rotational levels, from effective two-body interaction
rotational, non-axial nuclei, rel. to moments of inertia
second 2^+ level of even-even nuclei, E2 [17476 transitions 5722
shell structure and energy levels in bounded isotropic harmonic oscillator potential 17491
single-particle states in deformed nonlocal diffuse-boundary potentials 13108
spin $\frac{1}{2}$ nuclei, rotational levels, radiative transitions 9575
spin—orbit splitting 4026
spin-orbit splitting and tensor force 20340-1
splitting, prod. by $3s_{1/2}$ neutrons 20342
$3s_{1/2}$ single-particle neutron level 17493
2^+ rotational states, lifetimes, for $150 \leq A \leq 186$ 1369
unstable states in separable potential model 5643
vibrational level excit. in α-decay of even-even nuclei
vibrational levels, excit. by charged particles 9614 [7503
vibr. and rot. levels, excit. by heavy charged particles 11394
vibrational states, energies and lifetimes 4019
vibrational states in even--even nuclei 9528
Wigner supermultiplets 7482
$A^{36,38}$ 4098
A^{39}, low levels, calc. 11324
A^{41}, Fermi component in β-decay 2634
A^{41}, parity mixture, from decay data 4030
Ag^{104} 13171
Ag^{107}, existence of negative level 5790
Al^{28}, first excited state lifetime 17563
Al^{28} 13225
Al^{28}, in 2 MeV region 9530
Al^{28}, resonance capture 1175
Al^{28}, from Si^{28} decay 20417
Al^{27} 20347
Al^{27}, γ-ray widths 13139
Al^{27}, resonance capture 1175
As^{74} 15559
As^{75} 2653
As^{75}, g-factor of 280 keV state 7472
As^{76}, metastable state decay 4064
Au^{197}, hyperfine splitting of $^2S_{1/2}$ ground state 9517
B^{10}, 720 keV level half-life 17557
B^{10}, 7.42 MeV level 13133
B^{10}, from Be^9 (d,n) 20457
B^{10}, from Be^9 (p,γ) 1404
B^{10}, first excited state, lifetime 9547
B^{10}, lifetime of 2^+ rotational state, using pulsed proton beam 1369
B^{11} 17483
B^{11}, from B^{10}(d,p)B^{11} 13146 [11321-2
B^{11}, 4.46, 5.03, 6.76 and 7.30 MeV levels, B^{10}(d,p)B^{11} study
B^{11}, from Li^7 (α,γ) B^{11} reaction 20467
B^{11}, s-doublets 17492
B^{13}, from Li^7(Li^7,p)B^{13} 4023
Ba^{135} 4057
Ba^{137}, 662 keV transition study 7517
Be^8, ground state study 7551
$Be^{8,9}$, from $Li^{8,9}$(p,n) 4096
Be^8 5750, 9640, 20444
Be^8, from α-α scatt. 4005-6
Be^8, from α-α elastic scatt., 23-38 MeV 9447
Be^8, from Be^7(d,p) Be^8 20456
Be^8, from Li^7(d,n) Be^8 5684

Be^{8}, low levels 17497 [3976
Be^{8}, by study of Ra + Be and $Li^{7}(d,n)Be^{8}$ neutron spectra
Be^{9} 5769, 13112, 17601
Be^{9}, from Li^{7} + d 7574
Be^{9}, rel. to shell-model theory of inelastic scatt. 446
Be^{9} spin and parity 5651
Be^{11}, anomalous order of levels 13135
Bi^{209}, doublet splitting 4026
Bi^{210} 11339, 13137
Bi^{210}, from $Bi^{209}(d,p)$ 11323
Bi^{210}, ground-state model, rel. to Pb^{210} and Po^{210} 13144
Bi^{213} 9607
Br^{78}, 17 hr, inversion of $F = \frac{1}{2}$ and $\frac{3}{2}$ levels 13120
Br^{81} 2658
C, γ-ray resonances at 22-23.5 MeV 11431
C–C bound system 13251-3
C^{11}, from $B^{10}(d,n\gamma)C^{11}$ 20455
C^{12}, 7.656 MeV level 405, 9573
C^{12}, 7.66 MeV state, parameters, participation in element buildup in red giants 17609
C^{12}, 9.0 MeV γ-emitting level 17558
C^{12}, 9.63 MeV state 20348
C^{12}, γ- resonance scatt. on 17.22 MeV level 5770
C^{12}, from photoneutron energy spectra at 30 MeV 11435
C^{13} 2624, 20458
C^{13}, 3.85 MeV level, lifetime 15535
C^{13}, search for levels by C^{12} + n study 5791
C^{13}, transitions between mirror states 20353
C^{14}, in β^{-}-decay 2618
C^{14}, shell model assignments 9531
$Ca^{40,42}$ 4098
Ca^{41} 9532
Ca^{41}, doublet splitting 4026
Ca^{42}, zero-spin excited state 1361
$Ca^{42,44}$, first excited states, energy diff., calc. 13148
Cd^{110}, spin excited states 5665
Cd^{110}, spin and quantum no., parities 1391
Cd^{113} 15536
$Cd^{112,114}$, low-lying levels 13140
Cd^{114}, 556 keV level, lifetime 9597
Ce^{139m} 11336
Ce^{140}, lifetime of 1.6 MeV level 1367
$Cl^{35,37}$, low levels, calc. 11324
Co^{60}, from $Co^{59}(d,p)Co^{60}$ at 6 MeV 13238
Cs^{135} 5667-8, 17540
Cs^{133}, low levels, rel. to Ba^{133} decay 20381
Cs^{133}, spin and parity 13170
Cs^{134}, excited states 13149
Cs^{134}, low-lying excited levels 11325
Cu^{63}, level spacings, radiation widths 20445
Cu^{65} 17560
Dy^{160}, K-conversion coeffs. for γ transitions 2650
Dy^{161} 7473
Er^{166}, 0+ level 7477
Er^{168}, from Tm^{168} decay 13172
$Er^{166,168}$, from $Tm^{166,168}$ electron-capture decay 5714
Er^{167}, low levels 7559
Er^{169}, 80 keV level, half-life 11303
$Eu^{151,153}$, low levels 7559
Eu^{152}, coincidence nuclear spectroscopy 11334
Eu^{153} 7535
F^{17}, first excited state, lifetime 17551-2
F^{19} 2624, 5669, 17591, 20414
F^{19}, first T = 1 level 17495
F^{19} 4098, 7596
F^{19}, from O^{18} + p 2661
F^{20}, from O^{19} decay 9560
Fe^{56}, low-lying levels 433
Fe^{57}, 136 keV level decay 17561
Fe^{57}, hyperfine splitting, Mössbauer effect 11827
Fe^{57}, Mössbauer effect in Fe_2O_3, quadrupole interaction and chemical binding effects 11561
Fr^{223} 11338
Ga^{m} 17523
Gd^{152}, 0+ level 7477, 7526
$Gd^{152,154}$ 17554
Ge^{74} 15545, 15559
$H^{5,7}$, stability to neutron emission 15670
He^{4}, fine structure study of photoprotons 20249
He^{4}, level at 20 MeV, from p-T scatt. 13073

rotation, many-particle treatment 7310
semi-rigid model, core-to-particle interaction 5644
separable potential model, unstable states 5643
shell and compound models of nuclear reactions 3925
shell model, α-transition probabilities, calc., appl. to Po and At isotopes 13185 [17470
shell model, appl. of phase space quasi-probability distrib.
shell model, barycentric and rotational coord., elimination 7449
shell model, Be^{11} spin and order of levels 13135
shell model, calc. of compound nucleus decay 9545
shell model, calc. of triton and He^3 emission 15567
shell model, collective motion 20314 [5658
shell model, effect of hard-core correlations on moments
shell model, effective potential and Brueckner theory 5642
shell model, four-fold correlations of nucleons 13104
shell model, group theoretical study, translation-invariant Hamiltonian 7451
shell model, Hartree—Fock approx. with Gammel—Thaler potential 11291
shell model for heavy spherical nuclei, Barden—Bogolyubov-Belyaev pairing correlations 20317
shell model, levels from (p, 2p) reactions 17581
shell model, low levels of nuclei in $d_{5/2}$—$f_{7/2}$ shell 11324
shell model, low levels of nuclei in $2s_{1/2}$ and $1d_{3/2}$ shells
shell model, mathematical theory of [13138
Hamiltonian 5647
shell model, matrix elements, calc. 17469
shell model, Mo lower levels, explanation 9533
shell model, nuclear moments calc. 11300 [15516
shell model, optupole-type deformation of nuclear surface
shell model, particle—hole transitions, phase factors 9498
shell model, phenomenological nuclear interaction derived from binding energies 1346
shell model, rel. to inelastic scatt. by Be^9 446
shell model, spheroidal, of nuclear deformation 20318
shell model wave-functions, short-range correlations
shell structure and energy levels in bounded [17456
isotropic harmonic oscillator potential 17491
single-particle motion in deformed nonlocal potential well 7444
single-particle states in deformed nonlocal diffuse-boundary potentials 13108
spherical nuclei, collective states and quasi-particles 7453
spin—orbit force in bound state 4015
spin—orbit splitting and tensor force, with several nucleons outside closed shell 17465
statistical nuclei with repulsive-core interaction 17462
statistical theory 13100
structure calc., use of pairing correlation theory 13113
structure, from giant photoresonances 13129
structure, from high-energy nuclear interactions 9348
structure, review 2614
structure, surface and shell effects, rel. to multi—BeV reactions 13227
superconductor model, appl. to moments of inertia of even-even rare earth nuclei 9504
superfluid model 17467, 20330
superfluid state 2616
superfluid state, at non-zero temp., phase transition 15499
superfluidity of light nuclei 13110
superfluidity and moments of inertia 4011, 9505

meas., low-temp., cryostat 14829
meas., low-temp., cryostat for metals 20966
meas., of optical materials, using vacuum u.v. reflectometer 16829
metal crystals, undisturbed 4390
metal films and adsorbed gas layers, meas. 8802
metal films, det. method 5170
metal films in region of anomalous skin effect 19424
metals, calc. 4389
metals, effects of electron correlation 2930
metals, photographic method for u.v. and visible 16031
metals, rel. to elec. conduction 6165
molecular crystals in exciton absorption region 1716
multilayers for interferometer mirrors 14838
oceans and lakes 8766
refractivities of 36 hydrocarbons 8777
semiconductors, conference 570
semiconductors, in. i.r. region, free-electron theory 6163
solns. and melts, comparison with theory 3529
anthracene, meas. and calc., effect of temp. 4263
benzene, change by γ-irradiation 6416
noble metals, calc. 13669
polymethyl methacrylate, stress-optical coefficient 4398
stilbene, meas. and calc., effect of temp. 4263
styrene derivatives and copolymers, photoelastic constants 8257
Ag, calc. 4389
Ag films, effect of lattice defects 4391
Ag, i.r., in skin effect calc. 6078
Ag liquid, i.r. meas. 19154
Al, 2500 A–5μ 11754
Al, polished, 450-650 mμ 9075
Al, rel. to elec. conduction mechanism 6077
AlB_{12}, α and β phases 6356
Au, calc. 4389
Au, colloidal, peak at 500-600 mμ 666
Au films 18114
Au films, effect of exposure to air 1722
Au films, near-u.v. 2248
Au films, on quartz substrate, phase variations 18115
Au films, variation with rate of formation 18409
Au, i.r., in skin effect calc. 6078
$BaTiO_3$, anisotropy and opt. dielec. const., calc. 1720
$BaTiO_3$, low-temp. phase 4583
Bi films, effect of lattice defects 4391
$CaC_2O_4.H_2O$, refractive indices, structure 6169
CdSe films, 0.5-2.5 μ 18113
CdTe 10028
Cu, 0.36-2.5μ 11753
Cu, calc. 4389
Cu, colloidal, peak at 500-600 mμ 666
Cu, i.r., in skin effect calc. 6078
Cu, liquid 19154
Cu(I) halides, at low temps. 10029
Ga films, effect of lattice defects 4391
GaP, 1-40 μ 10042-3
Ge, 0-10 eV 7990
Ge, films 7993
Ge films, 0.35-2.5 μ 13668
Hg and Hg–In amalgam, measurement 16704
K, direct meas. in u.v. 16034
K halides in phase transition 16037
LiF, i.r. 6162
Na, direct meas. in u.v. 16034
Na, interference fringes on reflection, direct meas. of opt. constants 16034
Nb_2O_5 films, on Nb 14085
Ni, i.r., in skin effect calc. 6078
Ni nitrate hexahydrate 7991
$PbTiO_3$, anisotropy and opt. dielec. const., calc. 1720
Se films 7992
Se, polarizers for near i.r. region 14853
Si, 1-10 eV 18116
SiC, 2.5-16 μ 6164

Optical constants — contd
- Sn films, effect of lattice defects 4391
- SnO_2, Sb-doped thin layers, 1.7-2.5 μ 16036
- Sn oxide films, calc. from plasma model 1623
- Te films 4396
- Zn, polished, 450-650 mμ 9075
- ZnS, Ag and Cu activated 6161
- ZnS—CdS, Ag and Cu activated 6161

Optical films (See also Filters, optical).
- alloys, prep. 736
- dielec. mirror coatings for u.v. region 16882
- dielec., opt. dispersion 16885
- high reflecting, assessment, for interometry and monochromatic filters 1038
- low reflecting monolayers, retrograde property 8803
- metal, multi-beam interference, divergence of geom. series 2245
- metallic foil, structural model of reflection, transmission 6392
- metals, apparatus for vacuum study 19422
- metals, calc. of optical props. 8801
- metals, reflection reduction 3635
- multi-dielectric layers, reflecting, chromatic properties 16869
- multilayer, with periodic structure, Chebyshev polynomials 6940
- multilayer, recurrent formulae 19425
- reflectance and transmittance calc. using electronic calculator 14079
- reflecting multilayers, employing mica spacing layers 16883
- refractive index measurement, Brewster angle method 19380
- thickness monitor 3481
- two-layer anti-reflection coating for low n glass 5154
- Al, polarization effects, special cleaning 178
- Al, reflectance increasing coatings for vacuum u.v. 8797
- Au, optical constants and phase variations, effect of quartz substrate 18115
- Au, phase change, depend. on deposition speed 1036
- Bi, 2.5-10 μ thick, prep. and optical props. 10026
- CsI and MgF_2 dielec. multilayers, prep. and props. 16881
- K, interference fringes on reflections, opt. consts. det. 16034
- KBr, multilayers for interferometric spectrometer 16844
- NaCl, multilayers for interferometric spectrometer 16844
- $PbCl_2$ and MgF_2 dielec. multilayers, prep. and props. 16881
- Sb_2O_3, production of clear films for Fabry—Perot plates 16880
- Si, structure and reflecting power 19423
- ZnS, evap., ageing effects 3638

Optical images (See also Aberrations, optical; Resolving power, optics).
- amplifiers, use of elec. image convertors 6913
- aplanatic systems, image field structure 8787
- in astronomical spectrometers, band-limitedness 18585
- cross-wires, confused colinearity 19382
- defects, contrast transmission function 19373
- diffraction, in polarizing microscope 16827
- effect of aberrations and detector response 10750
- e.m. field in image space of optical system 8786-7
- entropy of light distribution, maximum information content 19368
- evaluation, contrast transmission theory 19367
- faint, detection using orthicons and image iconoscopes 8784
- Fourier space concept 19411
- image-splitting, precise meas. 14806
- improvement, by spatial frequency filtering 19372
- with incoherent illumination, transmission function, rel. to light peaks 19405
- intensity distrib., equi—densitometry 5126
- intensity distrib., geometrical and wave optics, applic. photographic images 19369
- intensity distrib., observations and contrast transmission function 19365
- inverted image space, general relationship with object, plane-mirror optics 14792
- i.r. lens and mirror systems, review 14797
- in i.r. spectrometers, formation 6928
- low-contrast, in partly coherent illumination 14794
- mirror-image kinematics 5137
- by multiple reflection 5136
- in nonuniform atmosphere, transfer function 19361

Optical images — contd
- photographic, Fourier spectral analysis 19370
- photographic, intensity distrib., geometrical and wave optics 19369
- plane-grating Ebert spectrograph 5164
- quality, evaluation, various criteria 19371
- of quasi-symmetrical systems 2226
- thick objects in phase-contrast microscope 16826
- of two plano-cylindrical lenses, crossed 2228
- unimodular analytic signal, most general form 19359

Optical instrument testing
- axial alignment det., 3 methods 5141
- centring errors, influence on image quality 5144
- contrast factor, measurement, visual method 19399
- contrast transfer function, det. from image of edge 1028
- cyclic shearing interferometers, uses 16891
- distortion, inverse nodal slide evaluation 3610
- distortion, visual goniometric evaluation 3611
- figure of optical surfaces, use of interference strioscope 19436
- flash intensity, digital pulse integrator 8789
- focal setting, longitudinal 6914
- lenses, frequency response meas., interferometric method 8788
- optical flatness of pre-polished glass surfaces 19398
- photographic objectives, dupligram method, accuracy 5143
- photographic systems, sine-wave analysis 19397
- resolving power criterion, limitations 14801
- Ronchi test charts, for parabolic mirrors 3604, 16816
- using slit-image light distrib., oscilloscope apparatus 19400
- spectrophotometer calibration using two filters 3624
- square-wave targets, photoelec. scanning of images 6908
- star test, limiting sensitivity 168
- test charts, sinusoidal, by filtering spatial frequencies 19396
- transmission function, complex, meas. with grating apparatus 19406
- transmission function, meas. with Foucault grating apparatus 19404
- transmission function, measuring apparatus, comparative tests on 19403

Optical instruments (Other instruments are listed separately, e.g. Refractometers).
- for absorption analysis, instrument errors, improved calibration 19395
- adjusting devices, precision mechanical 2233
- aluminizing technique for u.v. reflection efficiency 3402
- for atmospheric optics 4783
- binocular telescopes, parallelism tolerances 6921
- binoculars, military 6922
- for bubble chambers, stereoscopy, refraction correction 1232
- cascade intensifiers, image fluctuations 8785
- coarse grating for line intensity meas. 2251
- cross-wires, incorrect setting, due to optical illusions 19382
- daylight factor meter 14784
- design, automatic computation 14804
- diffractional light modulator 12494
- diffusing screens of high efficiency 8782
- dilatometer, high temp. rotor bore 3480
- exit pupils, optimum diameters 6914
- Fabry—Perot etalon, displacement of a flat 16851
- filter photometer for reflection measurements 2223
- for gas diffusion study, diffusion coeff. meas. 8697
- haploscope, for vision studies 816
- image amplifiers, use of elec. image convertors 6913
- image intensifier 3617
- image intensifier using secondary electron emission 10757
- image intensifier, transmission type 7142
- interference-modulation, resolution, relationship with res. of diffraction grating 10771
- i.r. absorptiometer, using interference filters 4754
- i.r. gas analysers, increasing sensitivity 12489
- i.r. image tube, electron scanned, small-target detection 167
- lens bench, with flat-field relation device, 8779
- light amplifier 3795
- longitudinal positioning, precision method 6915
- for luminescence spectra studies, in microscopy 14805
- luminescent fibre chambers and intensifier screens 18150
- microspectrofluorimeter 14826

Optical instruments — contd
mirror and prism angle-meas. instruments, adjustment 12397
mirror–prism optical elements, wide angle tracking 8781
moiré fringe reading head for use with fine grating 14844
"movialas", rotating prism system 166
nephelometer, visual, for high molec. wt. solutions 12495
for night vision, aberration tolerances, for low spatial frequencies 19401
optico-acoustic radiation receivers 8714
for particle-size anal., multichannel photoelec. scanning 4682
photo-contact tube for weak source study 6957
prism scanner 8780
quantum efficiency meas. for phosphors 19393
quarter-wave compensator, calibration 14855
radioactivity in, due to KBr components 19409
range finder, auto-focus 14859
recording optical lever 5150
reflectivity meas., auto-collimation adjustment 12475
reflectivity meas., method 10754
reflectometer for vacuum u.v. 1484 [16829
reflectometer for vacuum u.v. using $CaSO_4$:Mn phosphor
scanner, automatic, for electrophoresis and chromatography paper strips 4739
shadowgraph slits, manufacture 6916
shutter, high-frequency, using electro-optical effect in ADP 20973
spectrophone with a multiple passage of radiation 137
specular reflectance precision meas. 164
superposed crystal plates between crossed polars, applications 3653
tensiometer, photoelectric 10644
theodolites, survey 5147
thickness gauge 6722
tracking, wide-angle 8781, 19388

Optical materials (See also Filters, optical).
interference filters, layer prep. and props. 3639
for i.r., opt., thermal and mechanical props. 14808
for i.r. systems 19498
transmission coeffs.using vaccum u.v. reflectometer 16829
glass, prepolished, flatness testing 19398
polytrifluorochloroethylene,i.r. properties 12473-4
quartz, fused, refractive index 2229
Schott glasses, old and new melt numbers 5156
silicone oils, refractive index 2230
As_2S_3 glass, 15-25 μ transmittance 6904
CdS, far i.r. 2236
LiF, refractive index 2229
PoF_2, as high-μ u.v. material 2237
Si, n-type, for i.r., props. 14809
TlBr–TlI mixed crystal, i.r. use, antireflection coating 5155

Optical pumping
e.s.r. in crystals at low temp., optical detection 4508-9
ions, paramagnetic, in solids 18121
negative temp., possible prod. 1109
optical maser design 1202
solid state, high intensity monochromatic source 2975
solid-state i.r. quantum counters 12529
theory and teaching apparatus 17693
alkali metal vapours, spin relaxation and line-width 10701
alkaline atoms, spin distribution 17694
ruby 20988
ruby, coherence, narrowing, directionality and relaxation oscillations 21007
ruby, e.s.r. detection 1633
Al_2O_3, e.s.r. of Cr^{3+} excited state, optical detection 4508-9
Cs atoms, microwave emission 19918
Eu^{2+} in CaF_2 and $SrCl_2$ crystals 1829
He_2, population inversion investigation 7212
He^4 atoms in $^3S_1$ metastable state 13415
Hg^{203}, n.m.r., optical detection 17660
$K^{39,41}$, h.f.s. det. 17712
N, in Na vapour, N^{14}–N^{15} hyperfine anomaly 1482
Rb vapour, spin relaxation study of optically aligned atoms 482

Optical rotation (See also Magneto-optical effects; Optical constants; Polarimeters; Polarized light).
crystal symmetry changes producing specific rotation 19456
crystals, rel. to exciton bands 20762
dispersion curves, analysis 17842
Kerr cell, helical 2256

Optical rotation — contd
liquids and solns., rel. to intermolecular interaction 3542
macromolecules, oriented helices 6000
meas. by photoelectric method 19457
polymers, theory 20704
polymers, effect of vitrification 8258
theory, application of classical dispersion theory 19455
bimesityl derivatives, theory 17843
cobaltous salts, rotary dispersion 4399
quartz, rotatory dispersion 2257
Dy ethyl sulphate, theory 13734

Optical systems (See also Aberrations, optical; Lenses; Optical images; Optical instruments; Optical materials; Resolving power, optics).
aberration synthesizer 1029
amplitude-phase objectives for resolution of two non-monochromatic light sources 16866
annular apertures, use for increasing focal depth 14795
aplanatic systems, image field structure 8787
aplanatic, with two surfaces, approx. soln. 19363
astigmatic, response 16819
automatic computation 14804
axicons and their uses 2232
collection of light from scintillation counters 11971
colour correction, use of dispersion formula 19381
combined optical–microwave detecting system 14812
concentric, with spherical symmetry, variable n core 6907 [19366
contrast transmission functions, at low spatial frequencies
curvature variations, effect on basic parameters 3606
design, optimum, entropy of light distribution 19368
design, using opt. aberration coeffs. 5145
e.m. field in image space 8786-7
Gaussian properties, thickness variation 1027
grid method for studying diffraction of water waves 8633
heating system for high-vac. annealing studies 14900
in i.r. detectors 19498
i.r. focusing on to small receiver 3607
i.r. lens and mirror systems, review 14797
i.r. missile-seekers 16831
i.r., non-image forming, circuit details 14885
i.r. search system, design 14810
lens bench, flat-field relation device 8779
lens–photographic material, image formation 3601
longitudinal positioning, precision method 6915
parallax correction, at best focus for definition 8770
quasi-symmetrical, Gaussian image formation 2226
raster illuminators with cylindrical lenses 3615
ray tracing scheme 8768
for resolving two sources with different intensities 8776
response functions, influence of coma 10749
for retinal image stabilization 18565
rotationally symmetric, brightness and diaphragm coma 19374
scanning techniques, optical-mechanical 14811
Schmidt system 16818
system between two media, aberrations 14800
target detection, space filter for improved efficiency 14813
two plano-cylindrical lenses, crossed, paraxial props. 2228
with variable focal length, parameters calc., Gaussian optics 2227
waveguides, diffraction at exit 10756
waveguides, field distrib. 10755
waveguides, passage of light 14807

Optics (See also Aberrations, optical; Atmospheric optics; Lenses; Mirrors, etc.; Optical images).
coordinate transformation, Huggens' principle 19351
crystals, non-active, non-magnetic 2936
Gabor's expansion theorem, from information theory 14791
i.r. spectral region, history 154
solid state physics conference 6002
superlight-velocity optics 7326

geometrical
absorbing lens, equiv. plate thickness 5138
book review 151
concentration of light flux, at focus 8767
parallax correction, at best focus for definition 8770
plane-mirror optics, relation between object and image space 3603
ray-tracing, choice of rays 5146
ray-tracing scheme 8768

Optics – contd
geometrical – contd
rotating mirror, reflection theory 2224
Seidel eikonal, isoplanatic condition 3605
thick lenses, convergent, axial achromatism 3609
toric surfaces 16815
toroidal surfaces 14796
waveguides, passage of light 14807
Organic compounds (See also Plastics; Polymers; Waxes).
aliphatic liquids, relation btw. ht.cond., molec. wt., and freezing pt. 5015
aliphatic, steric effects on reactivity 1954
aromatic, condensed-ring, absorption spectra, effect of high pressure and low temp. 15733
aromatic, electron spin density on methyl protons, sign 2743
aromatic, fused-ring, ionization potential calc. 3738
aromatic hydrocarbons, complexes with iodine 11545
aromatic hydrocarbons, elec. conduction 6071
aromatic hydrocarbons, phosphorescence spectra and decay times 662
aromatic liquids, relation btw.heat conductivity, molecular weight and freezing pt. 5015
aromatic, polar, in organic solvents, dielec. props at 1000-10 000 Mc/s 5021
aromatic radicals, hyperfine interactions, theory 15680
aromatic, Raman spectra 9817
biradicals, spin exchange in 17722
biradicals of two triphenylmethyl groups, singlet–triplet splittings, calc. 15771
carcinogens, crystal fluorescence 8014
complex molecules, polarization of luminescence 10055
dielectric const., in intense elec. field 8663
dielectric liquids, elec. cond., effect of H_2O impurity 19136
dyes, effect of light on contact potential 1626
dyes, fluorescence quantum yield and absorption decay time 11772
dyes, frozen aq. solns., concentration profiles 6048
dyes, luminescence, metastable states 3537
dyes, photocond., effect of H_2 1685
dyes, props. of photographic sensitizers 10358
dyes, resonance Raman spectroscopy 7765
dyes, sensitization of photoconductivity in glass 20926
dyes, solid films, photoelec. emission, freq. depend. 17028
fluorescence maxima, effect of solvents 10677
gases, mixtures with air, ignition by sparks 7109
gases, proton mag. reson. spectra 16712
heterocyclic cpds., proton resonance, solvent effects 7806
ion-exchange resins, percolation of water under pressure 12067
i.r. absorption spectra and n.m.r. of H_2O in various subs. 16719
i.r. dispersion of several liquids 84
jet engine fuels, flame temp., visible emission spectra 8852-3
liq. hydrocarbons, γ-irradiated, energy transfer 18442
liquid mixtures, binary, dielec. const., meas. 19137
liquid mixtures, binary, sonic velocity, conc. depend. 6786, 16695
liquids, associated, u.s. viscoelastic props. 8651
liquids, correl. of energies of molec. orientation and of viscous flow 19100
liquids, degassed, proton spin–lattice relaxation, press. depend. 16720
liquids, 5- and 6-membered ring cpds., molar sound velocity 19134
liquids, luminescence and Cherenkov radiation, X- and γ-ray excited 19158
liquids, mag. rotatory power and rotativity 3543
liquids, polar, dielec. relaxation, temp. variation 19138
liquids, polar, with high dielec. permittivity and resistivity 2172
liquids, proton mag. reson. spectra 16712
liquids, Raman spectra, overtone lines 87
22 liquids, thermal cond., 20°C 8660
liquids, u.s. velocity, rel. to molar refraction and internal pressure 19130
long linear conjugated molecules, one-dimensional collective oscillation of π electron 17859

Organic compounds – contd
lubricating greases, capillary viscometer 8595
lubricating greases, flow in plunger viscometers 14577
molecular structure correlations for 25 cpds. 15776
molecules with two equivalent methyl groups, rotation–internal torsion levels 15696
on moon 8487
oil between electrodes as insulator, luminescence 3541
oil–water interface, oil drop coalescence 14610
oils, halogenated, trace water content 4766
oils, very viscous, effect of u.s. radiation 14131
phosphors, energy transport 1572
photochemical formation, in simple gas mixtures 3318
pigments, mixture data 14857
plastic scintillator with anthracene derivatives, photoluminescent characteristics 9235
polar molecules in non-polar solvents, relaxation times 5009
purification by zone refining 6329
purity determinations using adiabatic calorimeter 16924
radicals by h.f. discharge in aromatic vapours, absorption and fluorescence spectra 6199
Raman effect relationship with elect. band spectra 4209
Raman resonance effect, 73 substances 2175
scintillators, mode of action, theory 13702
semiconductor dyes, dark elec. cond. and long-wave absorption 13619
semiconductors, resistivities of 30 complexes 15969
short-lived transients in radiation chemistry 16383
solutions, aq., dielec. const., temp. and conc. depend., calc. 3528
solutions, luminescence and Cherenkov radiation, X- and γ-ray excited 19158
solutions, resonance fluorescence, diffusion theory 53
vapours, electron ionization coeff. 2316
in water, effect of chain length and structure on surface ageing of interface 2159
acenaphthene, fluorescence quantum yields 16098
acepleiadylene, crystal structure 8240
acetaldehyde–water mixtures, n.m.r. studies 6819
acetamide, Raman spectra and phase changes 5948
acetic acid, adsorption by Ge surfaces 12115
acetic acid, n.m.r. study of structure 18231
acetic acid, in Si etchants, contribution to etching 4600
acetic acid, u.s. absorption at 450 kc/s 5096
acetone and acetone-d_6, r.f. spectra, dipole moments and rotational consts. 4212
acetone, adsorption by Ge surfaces 12115
acetone, light scattering, Brillouin comps 14847
acetone, phosphorescence decay time, calc. 506
acetone, Rayleigh scattering depolarization factor meas. 19450
acetone, rotation–internal torsion levels, calc. 15696
acetone, self-diffusion coeff. 3513
acetone, tortional vibration of methyl groups 20602
acetonitrile, i.r. absorption bands, width and profile 20614
acetonitrile, microwave electrolysis, dinitrobenzene ion formation 17776
acetonitrile, phase transition between 77-195°K, study by N^{14} pure quadrupole resonance, 6283
acetyl chloride, hydrolysis kinetics 3307
acetyl cyanide, r.f. spectrum, structure and dipole moment 2763
acetyl fluoride, r.f. spectrum, structure and dipole moment 2762
acetylacetonates, sign of electron spin density on methyl protons 2743
acetylacetonates of Zr, Ce, Th, and U; dimorphism and isomorphism 3246
acetylanthracenes, in solvents, fluorescence spectra 10675
acetylene-air flames, elec. cond. at microwave frequency 1098
acetylene, charge distribution, hybridization and bonding 17802
acetylene, effect of deuteration on flame band spectra 5937
acetylene, loss of energy of an electron beam traversing gas 19764
acetylene, molecular vibration–rotation levels, perturbation by Kr and Xe 15726-7
acetylene–O_2, burning–detonation transition 12105
acetylene–O_2 detonation waves 12103
acetylene–O_2–argon, free radicals in shock waves, flash absorption spectroscopy 17760

Organic compounds — contd
acetylene, optico-acoustic effect 8715
acetylene, radiation-induced polymerization 6418
acetylene, reaction with methyl free radicals 4710
acetylene solns., i.r. spectra 9802
acids, u.s. velocity, relationship with latent heat of vaporization 16768
aconitine hydrochloride, hydrobromide, and hydroiodide, unit cell and space group 8244
acridine yellow, fluorescence decay period 3538
acridine yellow in gelatin, pre-excited, phosphorescence decay 13719
adamantane, solid, proton resonance, rotational transition at −130°C 16192
alanine, irradiation of single crystal 3128
alcohol–glycerol mixtures, ultrasonic studies, conc. depend. 10658
alcohols, aliphatic, dielectric polarization, relaxation regions 19140
alcohols, aliphatic, long-chain, dielectric const. 2171
alcohols and esters, relaxation times 19144
alcohols, higher, surface tension in H_2O 71
alcohol-H_2O_2 mixtures, u.v.-irrad., free radical formation, e.s.r. study 20662
alcohols, negative ion mass spectra, sensitivity for I ion formation 3740
alcohols, n-primary, anomalous dielec. dispersion 20960
alcohols, ani soins., dielec. relaxation 19139
alcohols, u.s. velocity, relationship with latent heat of vaporization 16768
aldehydes, Raman spectra, relative line intensities 85
alkane chain, hindered, mean square length 17858
n-alkane mixtures, principle of congruence 3518
alkyl enamels, light-scattering 6939
alkyl halides, and soins., dielec. relaxation 19139
alkyl hydroperoxides, photodissociation 8314
alkyl iodide vapours, interaction with C surface, desorption and activation energy 3304
alkyl iodide vapours, interaction with red phosphor surfaces, desorption 3305
alkyldiboranes, i.r. spectra 7760, 20634
allokainic acid, structure 3253
amido cpds., N^{14} quadrupole spectra, coupling and asymmetry const. 21087
amines, intra-molecular flexibility and rotation 7735
amines, refractive index at 6 mm, press. depend. 14697
aminoacids, effect of molec. wt. on luminescence 20995
2-amino azulene, crystal structure 21203
amino cpds., N^{14} quadrupole spectra, coupling and asymmetry const. 21087
p-amino-salicylic acid, tritium labelling by microwaves 15527
aminotroponeimine chelates of Ni, nuclear and spin resonance 15762
amyl acetate flames, temp. distrib. 1059
n-amyl alcohol, scattering of neutrons 12940
aniline–cyclohexane mixtures, u.s. propagation 19131
anilines, band intensity and structural factors 7750
anthracene, α-scintillation response, directional depend. 1754
anthracene, anomalous light waves in exciton-absorption region 6176
anthracene, charge carrier prod. and mobility 13620
anthracene crystals, anomalous dispersion 4403
anthracene + cyclohexane soins., irradiation 3322
anthracene derivatives, crystal structures 4658
anthracene, effect of thickness on absorption curves at 20°K 4409
anthracene, exciton production 9999
anthracene films, secondary electron emission, and inelastic scattering 15058
anthracene, hole and electron drift mobilities 15997
anthracene, ionization potential and mass spectra 3738
anthracene, light transmission, exciton absorption region 13678
anthracene, monocrystal growing technique 12008
anthracene, optical consts. meas. and calc. 4263
anthracene, photoconductivity, hole-injection energy-balance 10000
anthracene, photoconductivity, positive hole injection 4371
anthracene, photocond., voltage, illumination and electrode separation depend. 18065
anthracene, piezoelectric effect 11747
Organic compounds — contd
anthracene in polystyrene, concentration-depolarization of fluorescence 4423
anthracene-polystyrene solid solutions, fluorescence 20998
anthracene, positron lifetime in, near melting pt. 5549
anthracene, reaction with styrene during polymerization 8316-17
anthracene, scintillation response, to positrons and electrons 8023
anthracene, self-diffusion, 150-190°C, C^{14} tracer study 17977
anthracene, structure at low temperatures 18337
anthracene-sym-trinitrobenzene complex, luminescence 4434
9-anthraldehyde, crystal structure 4658
anthrone, crystal structure, 2-dimens. Fourier synthesis 18366
aryl derivatives of oxadiazole in polystyrene, luminescence and absorption spectra 10073
asphalt, soins., Overhauser effect 3545
azulene, spectral solvent shifts 16707
benzaldehyde, phosphorescence quenching by naphthalenes 944
benzaldehyde-α-t, oxidation 1953
1,2-benzanthracene crystals, anomalous dispersion 4403
benzene, adsorbed on Vycor glass, freezing 12118
benzene, adsorption on carbon, enhancement of nuclear polarization 16717
benzene-air mixtures, detonation wave pressure 10351
benzene, C—C mean vibration amplitudes 5909
benzene-CCl_4 soins., refractive index 10667
benzene, and C_6D_6, solutions in cyclohexane, luminescence at 77°K 11774
benzene and C_6D_6 u.v. absorption spectra 7800
benzene, cryometry 3676
benzene, crystal fields 2939
benzene, crystalline, i.r. spectrum 8003
benzene, and derivatives, dissociation, in glow discharges 485
benzene derivatives, halogenated disubstituted, dipole moments and relaxation times 15780
benzene derivatives, i.r. absorption 50-350 μ 6927
benzene, electrostriction 934
benzene, fast electron diffraction, energy analyser 9090
benzene, flame-front propag. and compression waves in air 14895
benzene, γ-irradiation change 6416
benzene, glow discharge 9017
benzene, glow discharge, chemical reactions 10891
benzene halides, melting, excess free energy 19502
benzene-iodine complex, charge-transfer forces 20685
benzene-iodine complex, geometrical structure 15779
benzene, ionization potential and mass spectra 3738
benzene, i.r. dispersion and absorption 5028
benzene, i.r. absorption bands, width and profile 20614
benzene-iso-octane mixtures, vapour-liquid equilibrium 6781
benzene, liquid, i.r. reflection spectrum 12426
benzene, mechanical analogue to determine absorption maximum 5901
benzene-methanol soins., refractive index 10668
benzene, molecular structure by electron diffraction 10791
benzene molecule, π-electron system 9302
benzene, molecule study by electron diffraction 15782
benzene, and mono- and divalent ions, electronic spectra, correlations 20648
benzene, monotritiated, dissociation 8322
benzene, phosphorescence decay times, calc. 506
benzene, phosphorescence lifetime 18141
benzene, polarizability, effect of π-electron electrostatic interaction 20652
benzene, prod. from reaction of acetylene with methyl free radicals 4710
benzene, radiation-induced polymerization 6418
benzene, Raman spectra, depolarization factors 86
benzene, Rayleigh scattering depolarization factor meas. 19450
benzene, rotational kinetic effect 8648
benzene, scattering of neutrons 12940
benzene scintillator soins., X-irrad., luminescence decay times and energy transfer 19159
benzene, second virial coeff. at low pressures 8699

Organic compounds – contd
benzene self-complexes, charge-transfer forces 13456
benzene, self-diffusion coeff. 3513
benzene, solid, i.r. absorption 13690-1
benzene, solid-liquid interface tension 3505
benzene, solid sphere, in liquid, convection during melting 12520
benzene soln. in CS_2 and CCl_4, proton spin–lattice relaxation 14664
benzene substituents, abnormal n.m.r. saturation behaviour 19170
benzene, surface tension, rotation effects, temp. depend. 73, 19087
benzene, surface tension, rotation effects 8640
benzene, thermodynamic props 1064
benzene, u.s. absorption 3525, 14743
benzene, vaporization, forced, at 25°C 14908
benzene, vapour isothermals 8698-9
benzene, vibronic calculations 15748
benzene, virial coeffs and intermolecular mechanics 11544
benzene–water, du Noüy ring, interface profiles and areas 2163
benzenes, p-disubstituted, forbidden character in allowed electronic transitions 15747
benzenes, hexa-halogen substituted, steric forces 20683
benzenes, substituted, dipole moments 5985-6 [7805
benzenes, substituted, proton resonance, solvent effects
benzenes, tri-substituted, dipole moments 5987
benzenocarboxylic acids, i.r. absorption spectra 9803
benzoic acid, heat of combustion 19524
benzoic acids, substituted, lattice parameters and space groups 3249
benzonitriles, band intensity and structural factors 7750
benzophenone–benzene, dielec. losses 10664
benzophenone, phosphorescence quenching by naphthalenes 944
benzophenone, photoreduction, quantum yield 14130
benzophenone in 3 non-polar solvents, dielectric absorption meas., mm wavelengths 5026
p-benzoquinone, crystal structure 8231
benzoquinone, visible absorption spectra 17757
1:12-benzperylene, crystal structure refinement 4656
benzyl-α-t alcohol, oxidation by chromic acid, isotope effect 4712
biacetyl, photolysis 14129
biacetyl, photo-oxidation 14127
bimesityl derivatives, optical activity, theory 17843
biphenyl, radiolysis 4731
bis-acetylacetone beryllium, crystal structure 8238
bis-(cyclopentadienylmolybdenum tricarbonyl), barrier to internal rotation 5911
bis-ethylenethiourea-Cd thiocyanate, crystal structure 6367
bis-salicyladehydato-nickel, anhydrous, cell size and space group 3247
bis-salicylaldiminato-nickel (II) and -copper (II), crystal structure 4653
boron–glycerine phosphors, concentration depolarization of phosphorescence 16100
o-bromoaniline, proton resonance, effect of added acetone 20669
bromodichlorofluoromethane ($CBrCl_2F$), vibrational spectrum, molecular and thermodynamic props. 4207
butadiene, polarizability calc. 17770
butanane sol., diffusion coeff. of polystyrene 10654
butane–He mixtures, in GM counters 12721
n-butane, electric discharge decomp. 975
n-butane, negative ion mass spectra 3740
n-butane, thermodynamic props. 1064
butanol, Rayleigh scattering depolarization factor meas. 19450
n-butanol, self-diffusion at 25°C 14632
1-butene, thermodynamic props. 1064
butyl alcohol, surface tension, rotation effects, temp. depend. 73
n-butyl alcohol, vaporization, forced, at 25°C 14908
butyl elastomers, rolling friction 4572
butyl stearate, dielectric relaxation 19145
caffeine, arrangement of water molecules 6369
caprylic acid, surface tension in HCl 71
carbon tetrabromide, absorption edge, press. depend. 4407
carbon tetrachloride-benzene solns., refractive index 10667
carbon tetrachloride, compressibility 12400

Organic compounds – contd
carbon tetrachloride, decomposition by γ-rays 18441
carbon tetrachloride, electrostriction 934
carbon tetrachloride, fast electron diffraction, energy analyser 9090
carbon tetrachloride, force constants 5897
carbon tetrachloride-HCl^* exchange reaction 8300
carbon tetrachloride, Raman spectra, depolarization factors 86
carbon tetrachloride, u.s. absorption 14743
carbon tetrachloride, vaporization, forced, at 25°C 14908
carbon tetrachloride, vaporization, forced, thermodynamics 3694
carbon tetrafluoride, isothermal PV curves, to 20 000 kg/cm² 14042
carbon tetrafluoride, refractivity, press. depend. 6839
carbon tetraiodide, absorption edge, press. depend. 4407
carbonyl sulphide, power saturation of $J = 1 \rightarrow 2$ rotational transition 1500
carbonyl sulphide, r.f. spectra 20642
carboxyl phosphate, electron distribution calc. 7736
carboxylic acids, fluorescence and absorption spectra 18140
β-carotene, resonance Raman effect 2175
p- and l-carvoxime mixtures, melting, excess free energy 19502
castor oil, permittivity and dielectric losses in electric field 20950
cellulose fibres, electron diffraction 18337
cellulose of Valonia, electron diffraction, structure 18337
cellulose acetate film, refractive index meas. 6941
cellulose, carboxymethyl-, frozen aq. soln., concentration profiles 6048
cellulosic materials, thermal diffusivity 10796
cetyl alcohol films, water evaporation reduction 14890
cetyl alcohol, on water, damping out ripples 12411
chelates of quinoxaline 2,3-dithiol with Ni, Co and Pd, spectra and structure 20631
chloranil and its hexamethylbenzene complex, nuclear quadrupole resonance 16193
chlorobenzene, absorption frequency shifts 1508
chlorobenzene, dielectric absorption meas., mm wavelengths 5026
chlorobenzene, glow discharge in vapour 9017
chlorobenzene soln. in CS_2 and CCl_4, proton spin–lattice relaxation 14664
1-chloro-2-butyne, r.f. spectrum, internal rotation consts. 1528
chlorodifluoromethane, vibrational collision lifetimes in A and He, intermolec. potential 15787
chlorofluoroethylenes, ionization potentials 3735
chloroform-carbon tetrachloride, dipole interactions 935
chloroform, diffusion of polybutyl methacrylate 14636
chloroform, i.r. dispersion 83
chloroform, microwave spectrum 15737
chloroform, optical anisotropy, calc. 14618
chloroform, Raman spectra, depolarization factors 86
chloroform, u.s. absorption 127
chloromethane, absorption frequency shifts 1508
α-chloronaphthalene–benzene, dielec. losses 10664
m-chloronitrobenzene, normal and supercooled, u.s. velocity, temp. depend. 6789
o-chloronitrobenzene, u.s. velocity 10659
o-chlorophenol, n.m.r. solvent effects 91
o-chlorophenol solns., microwave absorption 5027
p-chlorophenol, n.m.r. solvent effects 91
chlorophyll and analogues, on ZnO, CdS, Pt, photo-e.m.f. 1676
chlorophyll, in soln. and cellulose butyrate films, luminescence 2177
p-chlorotoluene, dielectric relaxation 19145
p-chlorotoluene, singlet → triplet transition 16099
choline halides, structure 8245
chrysene, polymerization of styrene 8317
coal-tar pitch, parallel plate viscometer meas. 6733
collodion films, 0.5-16 keV electron penetration 7163
collodion films, on polished Ag, colour in white light 12492
colophane resin, use in swelling of nuclear emulsions 12757
coronene, in boric acid glasses, photo-ionization by u.v. 21290
coronene, and mono-and divalent ions, electronic spectra, correlations 20648

Organic compounds — contd
- crude oil, in situ combustion criteria 14105-7
- 9-cyano-anthracene, crystal structure 4657
- cyanogen, transient species in radiolytic polymerization 21291
- cyclohexane, complex refractive index, below 5 mm 81
- cyclohexane derivatives, dielectric and molec. props. 15708
- cyclohexane, enthalpy change calc. for isomeric reaction 10662
- cyclohexane, i.r. absorption bands, width and profile 20614
- cyclohexane mixed crystals, with naphthalene and methyl derivatives 11777
- cyclohexane, monocrystalline, u.s. absorption 11572
- cyclohexane radicals, e.s.r. spectra 5969
- cyclohexane, radiolysis of pure liquid and benzene soln. 14134
- cyclohexane, radiothermoluminescence 21018
- cyclohexane, self-diffusion coeff. 3513
- cyclohexane, solid, molecular resonance acoustic absorption 17887
- cyclohexane soln. in CS_2 and CCl_4, proton spin–lattice relaxation 14664
- cyclohexanone, space group at −180°C 18367
- cyclooctatetraenyl radical, electron-spin resonance, h.f.s. 15734
- cyclopentadiene, n.m.r. spectra 1505
- cyclopentadienyl-metal cpds., n.m.r. spectra 1506
- cyclopentane radicals, e.s.r. spectra 5969
- cyclopropane, reactions initiated by β-decay of tritium 14132
- cyclopropane, unimolec. decomp. 8302
- L-cystine dihydrobromide, crystal structure 8234
- deoxyribonucleic acid, dielectric props. 6802
- deoxyribonucleic acids, molec. wt. det., methods compared 7822
- desoxyribonucleic acid, polycondensation 21276
- desoxyribonucleic acid, reduplication, solvent and nucleotide addn. 15794
- dextrose, charred, paramagnetic resonance standard 16159
- dextrose, charring study 3310
- diazomethane, photolysis in solid matrix, chemiluminescence of ethylene 13723
- p-dibromobenzene, Zeeman study, quadrupole resonance 8094
- dibromochlorofluoromethane (CBr_2ClF), vibrational spectrum, molecular and thermodynamic props. 4207
- dibromomethane, gaseous, multiple viorational relaxation, u.s. study 14695
- 2:4- and 2:5-dichloroaniline, n.m.r. of vinyl group, calc. 1507
- m-dichlorobenzene, nuclear resonance, effect of electron bomb. 21088
- p-dichlorobenzene, Cl^{35} quadrupole resonance, solvent shifts 4539
- p-dichlorobenzene, Cl spin-lattice relaxation 4532
- p-dichlorobenzene, irradiation effects 6282
- p-dichlorobenzene, planar normal vibrations, calc. 5910
- p-dichlorobenzene, Raman spectrum, wave numbers and intensities 14817
- dichlorodifluoromethane, refrigerant, specification tests 5041
- 4,4'-dichlorodiphenyl sulphone, crystal and molec. structure 4659-60
- 1,2-dichlorotetrafluoroethane, dielec. const. at 400 Mc/s, dipole moment det. 5988
- dicyandiamide, 25 MeV X-irradiation 2679
- diethyl amine, microwave absorption 19210
- 1,2-diethyldiborane, i.r. spectra 20634
- diethyl ether solutions of organic halides, photoconductivity 19151
- 1,1-difluoroethane, sound dispersion 17737
- dihydrophenanthrenes, as scintillators, u.v. props. 16710
- diketopiperazine (2,5-piperazinedione), crystal structure 3251
- dimethylamine, thermal cond., press. and temp. depend. 19202
- 1,2-dimethyldiborane, i.r. spectra 20634
- dimethyl-9:10-dihydroanthracene-9:10-dicarboxylate, unit cells and space groups of cis and trans isomers 8243
- dimethyl ether, pyrolysis 1949

Organic compounds — contd
- dimethyl ether, temp. dependence of vap. press., viscosity and heat of vapourization 5215
- 2,5-dimethylpyrazine, in hydrocarbon and EPA glasses, solvent effects on $n \rightarrow \pi^*$ transitions 15742
- dimethyl sulphide, microwave spectrum, structure and rotation barrier 20627
- dimethyl styrene scintillators 19969
- dinitrobenzene ions, isomeric, e.s.r., nuclear coupling consts. 17776
- γ-(2,4-dinitrobenzyl)-pyridine, photochromotropism 16381
- dinitrochlorobenzene, permittivity and dielectric losses in electric field 20950
- 1,5-dinitronaphthalene, crystal structure 8232
- dinitrotoluene, permittivity and dielectric losses in electric field 20950
- dioctylphthalate, monodisperse aerosols, generator 10364
- p-dioxane, adsorption by Ge surfaces 12115
- dioxane, complex refractive index, below 5 mm 81
- diphenyl, in boric acid glasses, photo-ionization by u.v., 21290
- diphenyl, chlorinated (Aroclor 1260), dielec. relaxation, press. depend. 16702
- diphenyl cpds., in benzene, CCl_4 and heptane, microwave absorption 19149
- diphenyl—diphenyl oxide, as reactor moderator and coolant 5825
- diphenyl, neutron age 12979
- 9,10-diphenylanthracene—polystyrene solid solution, fluorescence 20998
- diphenylether, normal and supercooled, u.s. velocity, temp. depend. 6789
- diphenylether and similar molecules, anomalous dielectric relaxation 16700
- diphenyl iodonium nitrate, use in photog. development 12756
- diphenyl metachloride, relaxation data from pressure generator meas. 3586
- diphenyloxazole in xylene soln., energy transfer 19161
- 2,5-diphenyl-1,3-oxazole, fluorescence quantum yields 16098
- 2,5-diphenyl-1,3,4-oxydiazole, fluorescence quantum yields 16098
- diphenylpicrylhydrazyl, BDPA and Wurster's blue, e.s.r. relaxation times 3123
- diphenylpicrylhydrazyl, dynamic proton polarization 4534
- diphenylpicrylhydrazyl, e.s.r. 16178
- diphenylpicrylhydrazyl, e.s.r. line at r.f. at liq. H temp. 10225
- diphenylpicrylhydrazyl, e.s.r. lines, moments 12671
- diphenylpicrylhydrazyl, e.s.r. and n.m.r. at 4°K 15773
- diphenylpicrylhydrazyl, e.s.r., r.f. susceptibility along polarizing field 16179
- diphenylpicrylhydrazyl, e.s.r. study of hyperfine interactions in single crystals of the hydrazine 13881
- diphenylpicrylhydrazyl, partial microwave saturation, susceptibility along polarizing field 16179
- diphenylpicrylhydrazyl, proton hyperfine spectra 10680
- diphenylpicrylhydrazyl, proton resonance, spin densities 17778
- di-p-xylylene, structure, thermal expansion and molec. vibrations 8248
- 8-eicosanol, proton resonance, rel. to dielec. relaxation 13894
- eosin—phenol system, flash photolysis 4725
- epoxy-resin joints for high-vacuum tubes 10705
- epoxy resins, replica mirror production 19389
- esters, Raman spectra, relative line intensities 85
- ethane and ethane-d_6, i.r. spectrum and c—c bond length 1513
- ethane, internal rotation barrier, valence bond calc. 4185
- ethane, molecular beam techniques 2758
- ethane, molecular yields in radiolysis 16385
- ethane, radiolysis, e.s.r. obs. of ethyl radical concn. 18439
- ethane, reaction with T_2, mechanism 745
- ethane, sound dispersion 17737
- ethane, thermodynamic props 1064
- ethane, unimolec. decomp. 8302
- ethane, substituted, proton—proton coupling const. in H—C—C'—H' bonds, temp. depend. 17784
- ethanes, substituted, u.s. relaxation, rotational isomerism, −70°C to + 100°C, 10-110 Mc/s 19125

Organic compounds – contd
ethanol–A mixtures, in proportional counters 12722
ethanolamine complexes, mono-, di- and tri-, of Fe, Ni and Cu, dichroism 13693
ether–acetic acid soln./water, interface mixing zone, non-stationary effects 19085
ether, cyclic, fluorinated, electron attachment 5273
ether, electron avalanches, carrier multiplication 2349
ethyl acetate, u.s. absorption 6788
ethyl acetate, u.s. velocity and absorption coeff. 8652
ethyl acetylene, proton resonance, proton–proton coupling consts. 17783
ethyl acrylate, γ-ray induced polymerization 1516
ethyl adipate, dielectric relaxation 19145
ethyl adipate, dielec. relaxation, effect of temp. 5022
ethyl alcohol, acoustic streaming, viscosity ratio 6880
ethyl alcohol for diffractional light modulator 12494
ethyl alcohol, frozen aq. soln., concentration profiles 6048
ethyl alcohol, scattering of neutrons 12940
ethyl alcohol, surface tension 14613
ethyl anisol p-aminocinnamate, polymesomorphic, dielec. loss at 1.2 cm 5018
ethyl benzene, relaxation time at 8.7 mm 18090
ethyl 9-bromo 10-anthracene, crystal structure 8233
ethyl chloride, dielectric dispersion 14696
ethyl chloride-hydrogen, thermal diffusion, 300-480°K 959
ethyl chloride, press. dependence of microwave absorption 5920
ethyl chloride, thermal cond., press. and temp. dependence 19202
ethyl chloride, unimolecular decomp. 8302
ethyl cyanide, r.f. spectrum and internal rotation 4211
ethyl formate, microwave absorption 19210
ethyl mercaptan, proton resonance, proton–proton coupling consts. 17783
ethyl phthalate, dielectric relaxation 19145
ethyl stearate, crystalline transitions and mechanical dispersion 6299
ethyl stearate, dielec. const. and crystal structure 13647
ethyl stearate–heneicosane mixtures, dielec. const and relaxation theory 13647-8
ethyl sulphates, electron spin resonance 3124
ethylene, α-radiolysis 8321
ethylene, chemiluminescence, from photolysis of diazomethane in solid matrix 13723
ethylene, force parameters, calc. using exp 6-8 model 1515
ethylene, ionization by Po α-particles 19613
ethylene, molecular yields in radiolysis 16385
ethylene, non-empirical MO calcs. 3971
ethylene, orbital calc. of $^3B_{1u}$ and $^1B_{1u}$ states 13452
ethylene, polarizability, effect of π-electron electrostatic interaction 20652
ethylene, reaction with methyl radicals 746
ethylene, reaction with T_2, initiation by T decay 3321
ethylene, thermal relaxation absorption 19209
ethylene, transfer of vibrational energy 7817
ethylene chloride, ratio of gauche to trans. form in soln. 2770
ethylenediaminetetra-acetic acid complex ions, thermodynamics of formation 21277
ethylene glycol, frozen aq. solution, concentration profiles 6048
ethylene glycol, sonoluminescence 2178
ethylene glycol, viscosity 19045 [19202
ethylene oxide, thermal cond., press. and temp. depend.
fluorescein in glycerin, concentration-depolarization of fluorescence 4423
fluorescein, in glycerol, polarization of fluorescence 14661
fluoroform, nonresonant absorption spectra 10700
α and β-fluoronaphthalenes, u.v. absorption spectra 5956
fluorotrichloromethane, microwave spectrum 15737
formaldehyde and CHDO, rotational fine structure 5921-2
formaldehyde, H-atom reaction, isotope effect 14114
formaldehyde, rotational spectra, computer programme 7747
formamide, microwave spectrum 4239
formamide, proton relaxation times in r.f. field 5035
formic acid, effect on crystallization of caprone 1885
formic acid, mag. hyperfine spectrum 20668
formic acid, structure 13439
formic acid-O^{18}, microwave spectrum 13439
formyl fluoride, microwave spectrum, structure and dipole moment 15738

Organic compounds – contd
furan, electronic structure 17852
furan, thermodynamic functions calc. from spectroscopic data 13433
gambodge sols, specific heat 18443-5
gelatin–glycerin, as a photoelastic material 907
gelatin as model and photoelastic material 16194
gelatin–resorcin interfacial surface tension meas. 14614
glycerine, dispersion of hypersound 5011
glycerine, surface tension by drop-weight, viscosity effect 19082
glycerine–water mixtures, viscosity meas. 14575
glycerol, dielec. relaxation, press. depend. 16702
glycerol, liquid, molec. motion 6779
glycerol, oscillating cylinder viscometer theory 12401
glycerol, relaxation data from pressure generator meas. 3586
glycerol solns., fluorescence, max. polarization 8018
glycerol–water mixture, u.s. studies, conc. depend. 10658
glycerol–water mixture, water drop falling into 8644
glycine, γ-irrad., formation of NH_3^+-$\dot{C}H$-CO_2^- radical, e.s.r. orientation study 20665
glycine, X-irradiated, e.s.r. spectra 499
α-glycine, crystalline, Raman spectrum 4421
β-glycine, crystal structure 4661
glycine anhydride, crystal structure 3251
glycine [glycocol] sulphate, 85% deuterated, ferroelec. props 4378
glycine sulphate, scattering of light by ultrasonics 9845
glycol soln, refractive index matching with heptane 3612
glycol, surface tension, rotation effects, temp. depend. 73, 19087
glycollic acid, free radicals formed by x-irradiation 20666
glyoxime metal complexes, structures 3252
gramicidin C, amorphism prod. by electron beam 1609
guanidine Al sulphate hexahydrate, elec. cond. 13578
guanidine Al sulphate hexahydrate, spontaneous polarization reversal 18097
guanidinium Al sulphate hexahydrate, etch pits, dislocations, gumdammar sols, specific heat 18443-5 [20818
halogen-containing, induction studies by Cl^{35}, $Br^{79,81}$ pure quadrupole resonance 15761
halomethane gas mixtures, sound velocity dispersion 19206
14-heptacosanol, proton resonance, rel. to dielec. relaxation 13894
n-heptane, molecular structure 15778
heptane, refractive index matching with aqueous glycol soln. 3612
heptane, ultrasonic vibration potentials 6787
hexachlorobenzene, quadrupole resonance study 16234
hexadecyl and octadecyl bromide, dipole orientation 18087
n-hexane, conduction currents under pulse conditions 6800
hexane, electron conduction under pulse conditions 3527
n-hexane, liquid, elec. cond., in pulsed fields 12418
n-hexane, molecular structure 15778
n-hexane, photo-injection of charge 16699
hexane–water, du Nouy ring, interface profiles and areas 2163
hexogene crystals, shock-wave velocities and effects 16776
hydrocarbon acids and alcohols, straight-chain, adsorption in water surface 14615
hydrocarbon liquids, elec. strength, molec. structure 12424
hydrocarbon liquids, elec. breakdown, statistical theory 12425
hydrocarbons, α-radiolysis 4734
hydrocarbons, alternant, and mono-and divalent ions, electronic spectra, correlations 20648
hydrocarbons, alternant, pairing of electronic states 20649
hydrocarbons, aromatic, phosphorescent, e.s.r. study 21080
hydrocarbons, aromatic polynuclear, out-of-plane CH vibrations 17738
hydrocarbons, aromatic polynuclear, spectral shifts in solution in paraffin hydrocarbons 16707
hydrocarbons, LCAO treatment of conjugated molecules 9825
hydrocarbons, mass spectra, temp. depend., effects of electron bombard. 20711
hydrocarbons, negative ion mass spectra, sensitivity for ± ion formation 3740
hydrocarbons, pyrolization by flash illumination 1962
36 hydrocarbons, refractivities 8777
hydrocarbons, saturated, bond energies and next-nearest-neighbour interactions 1512

Organic compounds — contd
hydrocarbons, unsaturated, gaseous, sparking potential rel. to molecular structure 14999
hydrocyanic acid, phase transition, study by N^{14} pure quadrupole resonance 6283
indene, molecular orbital theory 5973
insulin sulphate, crystal props. and structure 4663
iodobenzene, dielectric relaxation 19145
iodoform, absorption edge, press. depend. 4407
β-ionylidene crotonic acid, trans isomer, crystal structure 4654
isoamyl bromide, dielectric relaxation, −75 to 25°C 16701
isobutane, molecular beam techniques 2758
isobutyl bromide, proton resonance in crystals and supercooled liquid 3139
isobutyl bromide, proton resonance in liquid 5039
isobutyl bromide, u.s. meas. of vibrational, rotational isomeric, structural and shear relaxation 17736
isobutylamine, adsorption by Ge surfaces 12115
iso-octane—benzene mixtures, vapour—liquid equilibrium 6781
isopentane, self-diffusion coeff. 3513
keratin fibres, elec. cond., relative humidity depend. 11655
α-keratin, X-ray diffraction of six forms 10296
β-keratin, a morphism prod. by electron beam 1609
ketene, molecular potential energy and rotational distortion consts. 11524
ketene, photochemical dissociation 15683
ketones, dipole moments and relaxation times 20692
ketones, Raman spectra, relative line intensities 85
ketones, n—π* u.v. absorpt. and i.r. C = O band, correl. 7791
lac, sp. ht., meas. calorimeter for bad conductors 7006
lactose, irradiated, e.s.r. spectra 500
lemongrass oil, C^{14} activity, world data (1954-59) 7499
malonic acid, radiation damage 13571
mellitic acid, crystal structure 10319
menthol, normal and supercooled, u.s. velocity, temp. depend. 6789
mesonaphthodianthrene and mesonaphthodianthrone, semiconducting props. 18056
mesonaphthodianthrene, photo-oxidation 21289
metal chelate salts, crystal growth and symmetry 4589
methane, $2\nu_3$ band, fine structure 17751
methane, absorption spectrum, 2470-3200 cm^{-1} 15735
methane—air mixtures, detonation wave pressure 10351
methane, charge transfer reactions with A^+ and Kr^+ 16976
methane, density matrices for wave functions 9823
methane and deuteromethane, electric strength 19634
methane, diamagnetism, calc. 17795
methane, dielectric constant 19204
methane, elec. discharge, light emission, time depend. 2330
methane, equilibrium and mean C—H distance 17856
methane, ground-state wave-function 7811
methane—H_2 equilibrium of gaseous and solid phases 8710
methane, in H_2 and N_2, detection by thermal conductivity 16402
methane, K-LL spectrum, fine structure 17715
methane, loss of energy of an electron beam traversing gas 19764
methane, mag. susceptibility, calc. 9826
methane and methane—A mixture, in proportional counters 12722
methane, molecular wave-function 15769
methane, molecular yields in radiolysis 16385
methane, negative ion mass spectra 3740
methane—O_2, burning—detonation transition 12105
methane—propane mixtures, selective solubility in liquids 6782
methane, Raman spectra 17746, 17752
methane, second virial coeff. 19199
methane, solid, absorption spectrum, vac. u.v. 13696
methane, solid, phase transitions and compressibilities 12055
methane, thermal conductivity of condensed films 6390
methane, thermodynamic props. 1064
methane, Townsend discharge, and in N_2—CH_4 12595
methane, Townsend ionization coeff. α 2316
methanes, deuterated, vibrational intensities, bond moments 17740
methanes, isotopic, force constants, i.r. spectra and thermodynam. functions 5898
Organic compounds — contd
methanes, substituted, C^{13} splittings in proton resonance spectra, bond study 4224
methanes, substituted, vibrational spectra, molecular and thermodynamic props. 4207
methanol, adsorption by Ge surfaces 12115
methanol—benzene solns., refractive index 10668
methanol, crystal structure, −180°C 21204
methanol, radiolysis by recoils from $B^{10}(n,\alpha)Li^7$ 14133
methanol, temp. dependence of vap. press., viscosity and heat of vaporization 5215
methanol, vaporization, forced, at 25°C 14908
methanol—water solution, u.s. velocity, rel. to cavitation 19129
1-methoxyvinyl esters, proton resonance, effect of substitutional R.COO− groups 6276
N-methylacetamide, solvent effect on i.r. absorption 9805
methyl acetate, microwave absorption 19210
methylal, elec. discharge, light emission, time depend. 2330
methyl alcohol, effect on crystallization of caprone 1885
methylamine chrome alum, metamagnetism 21030
methyl-1,2-benzanthracenes, out-of-plane CH vibrations 17738
methyl 1:2-benzanthraquinones, structure 10318
methyl bromide, adsorbed on porous glass, i.r. band shapes, rotational freedom 15731
methyl bromide, dielectric dispersion 14696
methyl bromide, dissociation by nuclear isomeric transition of Br^{80m} 16388
methyl bromide, thermal cond., press. and temp. depend. 19202
methyl chloride, dielectric dispersion 14696
methyl chloride, refractivity, press. depend. 6839
methylcyclohexane, enthalpy change calc. for isomeric reaction 10662
methylene, triplet ground state, chemical evidence 15711
methylene bromide, u.s. absorption 127
methylene chloride, liquid, spec. heat relaxation 6791
methyl fluoride, absorption spectra, nonresonant 10760
methyl fluoride, refractivity, press. depend. 6839
methyl halides, Urey—Bradley force consts. 15685
methyl iodide, ionization by photon impact, efficiency 17720
methylmethacrylate, γ-irradiated, dielectric properties 6803
β-methylnaphthalene, from ethyl alcohol soln., growth spiral—soln. spiral transition 13957
methylphthalimide derivatives, fluorescence, effect of halogens 13718
methyl sulphide—BF_3 complex, B isotope separation 17676
milk gels, rheology 4746
milks, fat-free and renneted, viscosity meas. 14575
morellin, structure 8241
mustard oil, dielectric properties at 8.7 mm 18090
naphthalene and $C_{10}D_8$, fluoresc. spectrum at 20°K 6811-12
naphthalene derivatives, absorption and phosphorescence spectra 5949
naphthalene, electret formation, effect of alternating fields 635
naphthalene, electronic structure, calc., 11531
naphthalene, fluorescence spectrum of frozen solns., interpretation 4446
naphthalene, fluorinated, electric shifts 5957
naphthalene, intrinsic luminescence 10063
naphthalene, ionization potential and mass spectra 3738
naphthalene, i.r. absorption bands, width and profile 20614
naphthalene, luminescence, effect of D substitution 10231
naphthalene, with methylnaphthalenes and naphthols, luminescence and absorption spectra 21003
naphthalene and monoderivatives, phosphorescence and fluorescence 10070
naphthalene, phase charges, charge formation 16005
naphthalene phosphors, e.s.r. study 21080
naphthalene, phosphorescence lifetime, effect of deuteration 16101
naphthalene, photo- and thermoelectrets 13660
naphthalene, polarization of luminescence 11778
naphthalene, Raman spectrum, wave numbers and intensities 14817
naphthalene, spectral solvent shifts 16707
naphthalene, structure of 5 derivatives 8242

Organic compounds – contd
- naphthalene, u.s. velocity 10659
- naphthalenes, phosphorescence quenching of benzophenone and benzaldehyde 944
- naphthazarin, bond lengths and orders, π electron distrib., calc. 13453
- naphthazarin, Renninger effect 16297
- neopentane, self-diffusion coeff. 3513
- nitrobenzene, crystal structure at −30°C 4655
- nitrobenzene, dielectric const., in intense elec. field 8663
- nitrobenzene, dielec. const. in strong elec. fields 19141
- nitrobenzene solns. in n-hexane, diffusion coeff. 19109
- nitrobenzene, space charge phenomena 1106
- nitromethane, liquid, detonation, hypervelocity wave phenomena 16378
- nitromethane, self-diffusion coeff. 3513
- nitromethane, shock-wave velocities and effects 16776
- α-nitro-naphthalene, dielec. relaxation, effect of temp. 5022
- nucleic acids, effect of molec. wt. on luminescence 20995
- o- and m-nitrophenol, u.s. velocity 10659
- octadecanol monolayers, effect of benzene and hexane spreading solvents 10371
- i-octane–perfluoroheptane solns., cluster formation 3519
- n-octane, virial coeffs. and intermolecular mechanics 11544
- n-octanol, self-diffusion at 25°C 14632
- n-octyl bromide, proton resonance, motion of C–Br bond 14667
- olefines, O atom addition 21273
- 1, 3, 4-oxadiazole derivatives, scintillation efficiencies, chem. structure relationship 10676
- 5-oxiphenazine, crystal structure 4662
- oxy-amines, tertiary, as photog. hypersensitizers 12744
- oxydiazole-series cpds., opt. and scintillation props. 4447
- palmitic acid -stearic acid binary system, structure 18369
- palmitic acid, u.s. velocity 10659
- paraffin, recoilless Rayleigh scattering in, using Mössbauer effect 11560
- paraffin, rheological study, mechanism of interactions with detergents 3158
- paraffin, scattering of neutrons 12940
- paraffin wax, elec. cond. in strong shock waves 6073
- paraffin wax, formation of electrets, effect of alternating fields 635
- paraffins, C–H distance 14036
- n-paraffins, crystalline, vibrational spectra, methylene rocking and wagging modes 13697
- n-paraffins, quantitative relations in mass spectra 20710
- paraffins, Raman spectra, relative line intensities 85
- PBD, luminescence, scintillation 4447
- pectin, effect on crystallization of NH_4Cl 16262
- n-pentane, molecular structure 15778
- n-pentane, temp. dependence of vap. press., viscosity and heat of vaporization 5215
- Δ^{α}-pentenoic acid, isomerization, entropy prod. 14098
- perchloryfluoride, Raman spectra 17754
- perfluoroheptane–i-octane solns., cluster formation 3519
- perylene, in boric acid glasses, photo-ionization by u.v. 21290
- PETN, detonation, hypervelocity wave phenomena 16378
- petrol, flame-front propag. and compression waves in air 14895
- petroleum products, white, flowing, space density of elec. charge 14653
- phenanthrene, in boric acid glasses, photo-ionization by u.v. 21290
- phenanthrene, ionization potential and mass spectra 3738
- phenanthrene, spectral solvent shifts 16707
- phenanthrenes, aryl substituted, as scintillators, u.v. props. 16710
- phenol, free radicals from flash photolysis 6413
- phenol, n.m.r. solvent effects 91
- phenolphthalein, vitrification under high press. and temp. 12060-1
- phenols, band intensities and structural factors 7750
- phenols, hindered, solvent effects on i.r. spectra 8667
- phenothiazine perbromide (quinone), e.s.r., h.f.s., 17774
- phenothiazine perchlorate (semiquinone) e.s.r., h.f.s. 17774

Organic compounds – contd
- phenoxy benzenes, vacuum pump fluids 16740
- n-phenylenediamine, Raman spectra and phase changes 5948
- β-phenylenediamine–chloranil complex, semiconducting properties 13621
- 1-phenylhydantoin, crystal study 6368
- phenyl isothiocyanate–diethylamine mixtures, nuclear magnetic relaxation 16711
- phenyl salicylate, u.s. velocity 10659
- phthalimide derivatives, solid sol., polarization of fluorescence 10054
- phthalocyanine, mechanism of photoconductivity 6144-5
- phthalocyanins, evaporated films, photoconductivity kinetics 20936
- phyllochlorine ester, crystal struct. 4617
- pinacryptol, films on Ni, photoelec. emission 19718
- pinacyanol, films on Ni, photoelec. emission 19718
- pinacyanol, photoconductivity 1684
- piperidine hydrochloride, crystal structure 6366
- polyene compounds, resonance Raman effect 2175
- polyene, Raman spectra 9816-17
- polyphenyl acetylenes, effect of molec. wt. on luminescence 20995
- polyphenyl ethers, as vacuum pump fluids 16740
- polyphenyls, reactor coolants, nucleate boiling 13359
- porphin complexes, Kuhn electron gas model, ring form 9814
- porphyrins, luminescence 10064
- porphyrins, molec. symmetry and fluoresc. polarization 9829
- porphyrins, nuclear magnetic resonance 4222
- PPD, luminescence, scintillation 4447
- L-proline monohydrate, cell size and space group 3250
- propane–argon mixtures, electron cascades 7248
- propane, 24 litre bubble chamber 3898
- propane, γ-radiolysis 16387
- propane, in H_2 and N_2, detection by thermal cond. 16402
- propane, mass spectrum 3741
- propane, molecular yields in radiolysis 16385
- propane, proton magnetic resonance 4227
- propanol, diffusion of polybutylmethacrylate 14636
- propanol, Rayleigh scattering depolarization factor meas. 19450
- n-propanol, self-diffusion at 25°C 14632
- propargyl bromide, second-order quadrupole effect in r.f. spectrum 2744
- propene, thermodynamic props. 1064
- propionic acid, n.m.r. study of structure 18231
- n-propyl alcohol, acoustic streaming, viscosity ratio 6880
- pump oil, effect on ZnS film adhesion to glass and silica 14087
- pyrazine, in hydrocarbon and EPA glasses, solvent effects on $n \rightarrow \pi^*$ transitions 15742
- pyrene, in boric acid glasses, photo-ionization by u.v. 21290
- pyrene, polarization of first two electronic transitions 15755
- pyrene, polymerization of styrene 8317
- pyridine, adsorption by Ge surfaces 12115
- pyridine in diff. solvents, Raman spectra 942
- pyridine, frozen, X-ray anal. 6370
- pyridine, i.r. absorption bands, widths and profile 20614
- pyridine–Mn halogenated complexes, fluorescence 16088
- pyridine, pyrrole, and other N cpds., N electronegativity parameter, LCAO calc. 20682
- pyridine, u.v. absorption spectra 6804
- pyridines, dipole moments 5985-6
- pyrimidine, crystal and molec. structure 8230
- pyrrol, thermodynamic functions calc. from spectroscopic data 13433
- p-quaterphenyls, as scintillators, u.v. props. 16710
- quinidine salts, luminescence and ionization 6198
- quinine salts, luminescence and ionization 6198
- quinol clathrate, trapped Kr^{85} as β source 4051
- β-quinol clathrate, quadrupole resonance of trapped N_2^{14} 11961
- quinoline solns., absorption and phosphorescence spectra 5949
- quinoline phosphomolybdate, decomposition, thermogravimetric anal. 14574

Organic compounds — contd
quinoxaline solns., absorption and phosphorescence spectra 5949
resorcin—gelatin, interfacial tension 14614
resorcinol, elec. and elastic props. 633
L-rhamnose monohydrate, growing, dielec., piezoelec. and elastic props. 13650
rhodamin B in glycerin, concentration-depolarization of fluorescence 4423
rhodamine B and uranin, anti-Stokes excitation of fluorescence 88
rosin, dielec. props. 6153
rosin, dielectric properties at 8.7 mm 18090
rosin, vitrification under high press. and temp. 12060-1
salol, u.s. propagation constants 10723
salol, u.s. velocity, normal and super-cooled, temp. depend. 6789
sec-butyl-d_1 radicals, vibrationally excited, collisional deactivation 17739
seedlac, dielectric properties at 8.7 mm 18090
serum albumin, elec. props. 15970
silicone dielectrics, γ-irradiated 2173
silicone, liquid scintillant 5032
silicone, rolling friction 4572
silicones, proton magnetic resonance 5998
soaps, film formation and rupture 931
spindle oil soln., viscosity study 916
squalene, radiolysis 6417
stearic acid, B- and C-forms, thermal expansion, X-ray study 18368
stearic acid, monolayer orientation on Ag crystal 10372
stearic acid monolayers, effect of benzene and hexane spreading solvents 10371
stearic acid, oleophobic monolayers on mica 1947
stearic acid—palmitic acid binary system, structure 18369
stearic acid, u.s. velocity 10659
stearyl alcohol films coating water surfaces, evaporation 16922
steatites, dielectric properties at 3.15 cm and 8.7 mm 18090
stilbene, γ-scintillation luminescence yield 4451
stilbene, luminescence at 20°K 4450
stilbene, luminescence polarization 656
stilbene, optical consts., meas. and calc. 4263
stilbene, scintillation crystal as fast neutron spectrometer 20161
styrene, n.m.r. of vinyl group, calc. 1507
4-styrylstilbene, fluorescence quantum yields 16098
β-succinic acid, radiation damage 13572
succinonitrile, dielectric dispersion and relaxation in liquid and solid 4385
sugar solutions, light scattering, turbidity meas. 6951
sugar solutions, mixing with solvent 10639
terephthalic acid, convective diffusion, in turbulent flow 78
n-terphenyl, fluorescence quantum yields 16098
n-terphenyl, scintillation 4447
p-terphenyl, solution in xylene, luminescence 14662
p-terphenyls, as scintillators, u.v. props. 16710
terpine monohydrate crystals, growth, elastic and piezoelectric props. 13952
tetrabromobenzene, molec. structure, X-ray anal. 1922
tetra-n-butyl ammonium halides, electron irradiation 7797
tetra-n-butyl and tetra i-amyl quaternary ammonium salts, hydrates 3255
tetracene, in boric acid glasses, photo-ionization by u.v. 21290
tetrachloroketo-naphthalene, crystal struct. 4617
tetrachloromethane sol., diffusion coeff. of polystyrene 10654
tetramethylammonium tetrachlorocobaltate, crystal structure 3243
tetramethylammonium tetrachlorozincate, crystal structure 3243
1,1,4,4-tetraphenyl-1,3-butadiene, fluorescence quantum yields 16098
thiophene, thermodynamic functions calc. from spectroscopic data 13433
thiourea, ferroelec. props. 2921
tolane, luminescence polarization 656
Organic compounds — contd
toluene, adsorption on carbon, enhancement of nuclear polarization 16717
toluene, carried in N_2, as pyrolytic coating for zone-melting vessels 21167
toluene, complex refractive index, below 5 mm 81
toluene, electrostriction 934
toluene, glow discharge in vapour 9017
toluene, cross stresses in laminar flow 10637
p-toluidine crystals, growth and evaporation 13956
TPPAP radical, proton resonance, spin densities 17778
1,3,5-tribromobenzene, diamag. anisotropy 2978
1,3,5-tribromobenzene, structure at 20°C 8246
trichloroacetic acid, proton resonance 8093
1,2,3-trichlorobenzene, quadrupole resonance study 18234
1,3,5-trichlorobenzene, diamag. anisotropy 2978
1,3,5-trichlorobenzene, intra-molecular vibrations 4622
1,3,5-trichlorobenzene, polarity of substituents 3256
1,3,5-trichlorobenzene, space group 18370
1,3,5-trichlorobenzene, structure at −183 and 20°C 8246
triethanolamine, nuclear emulsion hypersensitization 12735, 12738, 12744
triethylamine, nuclear emulsion hypersensitization 12744
triethylborane-d_{15}, i.r. spectrum 1532
trifluoromethanethiol (CF_3SH), i.r. spectrum and fundamental freq. assignment 4205
trifluoromethanethiol, thermodynamic props. 5017
triglycine selenate, ferroelectric props., pressure effects 4379
triglycine sulphate, etch patterns 4601
triglycine sulphate, dielectric props. 16011
triglycine sulphate, domains, nucleation sites 640
triglycine sulphate, ferroelectric domains, structure and motion 20956
triglycine sulphate, ferroelec. hysteresis and pyroelec. 1703
triglycine sulphate, ferroelec. props., ageing process and rejuvenation 18100
triglycine sulphate, ferroelectric props., pressure effects 4379
triglycine sulphate, ferroelec. switching mechanism 1694
triglycine sulphate, pyroelectricity, internal domains, and interface charges 6160
triglycine sulphate, thermal expansion 7856
triglycine sulphate—selenate, ferroelec. props., composition depend., Devonshire coeff. 4380
trimethylaminoxyd hydrochloride, crystal structure 6365
trimethylborane-d_9, i.r. spectrum 1532
trimethyl silane, microwave spectrum, structure, dipole moment and int. rotation 17744
trinitrotoluene, liquid, detonation pressure 6399
trinitrotoluene (trotyl), cast, shock-wave velocities and effects 16776
1,3,5-triphenylbenzene, X-ray diffuse scattering 21206
triphenylene, in boric acid glasses, photo-ionization by u.v. 21290
triphenylene, and mono- and divalent ions, electronic spectra, correlations 20648
triphenyl methane dyes, photoconductivity 1684
triphenylmethyl, paramag. resonance absorption 17773
1,3,4-triphenyl-Δ^3-pyrazoline, fluorescence quantum yields 16098
1,3,5-triphenyl-Δ^2-pyrazoline, fluorescence quantum yields 16098
tris-acetylacetonates of Cr, Mn, Fe, and Al, i.r. spectra, Jahn—Teller effect in Mn cpd. 20636
tropaeolin phosphor, use in polymer adhesion study 3162
uracil, crystal study of three derivatives 6368
urea, N^{14} nuclear quadrupole reson. spectrum, temp. depend. 6271
vinyl stearate, crystalline transitions and mechanical dispersion 6299
vinyl stearate, dielec. const. and crystal structure 13647
vitrinite, absorption of u.v. and visible light 20992
wool fibres, surface replication by rolling 8263
xylene for diffractional light modulator 12494
xylene, ultrasonic absorption 3525
xylenes, luminescence in crystalline state 10067
$B_{10}H_{13}C_2H_5$, ionization potential 14963
C_3 hydrocarbons, γ-radiolysis, ion—molecule reactions 16386

Organic compounds – contd
C–C bond lengths and radii of C hybrid orbitals 1510
$CClF_3$, nonresonant absorption spectra 10700
CD_4, solid, phase transitions and compressibilities 12055
CD_4 and CH_4, second virial coeff. below 0°C, meas. of small differences 14682
CD_3H, spectrum, vibrational–rotational bands 7761
CH^+, transition probabilities 11518
$(C_8H_8)n$, transmission of electrons, energy loss 11146
n-C_9H_{20}, radiothermoluminescence 21018
$C_{10}H_{12}$, electronic energy levels, absorption line calc. 11533
$C_{17}H_{14}$, crystal structure 16332
n-$C_{18}H_{38}$, radiothermoluminescence 21018
$C_{30}H_{50}$, structure at low temperatures 18337
$(CH_3)_2.(C_6H_4)_2.(CH_2)_2$, intra-molecular vibrations 4622
$C_6H_5CH(CH_3)NH_2C_4H_6O_6$, unit cell and space group 14037
CH_2Cl_2, in ultrasonic field 1964
$CHCl_2F$, dielectric dispersion 14696
CH_3D, spectrum, vibrational–rotational bands 7761
$CH_3NH_3^+ + OH_2 + NH_2CH_3$ reactions in aq. acid, proton transfer study by n.m.r. 14118
$(C_4H_8O_2)n$, transmission of electrons, energy loss 11146
$C_{13}H_{16}O$, $C_9H_{16}O_2$, dielec. relaxation, effect of temp. 5022
CH_3SH, hindered rotation potential barrier, neutron scatt. study 5912
Ce ethylsulphate, n.m.r. below 1°K 10245
Ce tetrakis-dibenzoylmethane, crystal structure 3248
Co ammines, mag. susceptibility, interaction and crystalline field 21027
Cr acetylacetonate, magnetization and molec. field 10091
Cu II acetonylacetone, thermodynamic and mag. props. 1–20°K 10093
Cu dipyridine dichloride and dibromide, lattice consts., effect of size of halogen atom 3257
Cu salicylate tetrahydrate, crystal structure 8247
Dy ethylsulphate, dipolar ferromagnetism 8040
Dy ethylsulphate, susceptibility and sp. ht. below 1°K 10094
Fe acetylacetonate, magnetization and molec. field 10091
HCN, π and σ Stark components 13441
$KHC_4H_4O_6$, unit cell and space group 14037
Mn ammines, mag. susceptibility, interaction and crystalline field 21027
N-containing heteronuclear molecules, N electronegativity parameter, LCAO calc. 20682
$NH_4HC_4H_4O_6$, unit cell and space group 14037
Nd ethylsulphate, Faraday effect, influence of paramag. res. saturation 10216
Ni ammines, mag. susceptibility, interaction and crystalline field 21027
Pt(IV) and Th(IV) acetylacetonates, probable isomerism 8239
trans-$[Pt(C_2H_4)(NH(CH_3)_2Cl_3]$, crystal structure 8235
$[Pt((C_2H_5)_3P)_2HBr]$, crystal structure 8236
Pt-dimethyl-glyoxime, structure 3252
α-$[Pt_2(SCN)_2Cl_2(P(C_2H_7)_3)_2]$, crystal structure 8237
Pu oxalates, decomp. by own α-particles 4735
S cpds., bond energies and next-nearest-neighbour interactions 1512
$SP(C_2H_5)_3$, structure 3254
$SeP(C_2H_5)_3$, structure 3254
Sm ethylsulphate, Sm^{3+} spectrum anal., term diagrams, mag. sp. ht. 10047
Th(IV) and Pt(IV) acetylacetonates, probable isomerism 8239

Oscillations (See also Electromagnetic oscillations; Liquid oscillations; Piezoelectric oscillations; Vibrations).
apparent mass of object moving through liq. He II 8905
cylinder in viscous liquid 8598
disk in He II 10825
disk, in rotating He II 7024
elastic tube, incompressible, axially symmetric free oscillations 14712
fluid sphere, incompressible, of varying density 14601
forced frictional, overall stability 6846
freq-modulated by noise, energy spectrum 14522
harmonic, classical, Brownian motion 18994
harmonic oscillator, complex poles of S-matrix 14520
harmonic oscillator, quantum mechanics of dissipation 14519
non-linear theory 11037

- C, resonance lines, moments 12671
- CH_3 radical, C^{13} splittings 503
- $CH(COOH)_2$, C^{13} hyperfine splitting 5968
- $CH(OOH_2)_2$ in malonic acid, X-irradiated 13571
- $CaCO_3$ (calcite), Mn^{2+} resonance in 13871
- CaF_2 impurities 6267, 11937
- CaF_2, impurity spectra, theory of satellite lines 8088
- CaF_2, Yb^{3+} resonance at 20°K 11938
- $CaWO_4$, impurity resonance of Mn^{2+} and Gd^{3+} S-state ions 10221
- CdS, photosensitive Fe^{3+} centre, theory 13871
- CdS:Eu(II), crystal field splittings of ^8S state 21071
- CdS:Mn, at 4.2 and 300°K 13872
- CdTe:Mn, at 4.2 and 300°K 13872
- Co^{2+}, in CaF_2, CdF_2 and CdTe 16164
- Co^{2+}, in corundum, spin—lattice relaxation 21074
- Co^{60}, dynamic orientation in a crystal of $La_2Mg_3(NO_3)_{12}.24D_2O$ 5655
- Co salts, at liq. He temps. 6761, 10222, 10218
- $CoNH_4$—Tutton, single crystals, at liq. He temp. 10214
- $Co(NH_4)_2(SO_4)_2.6H_2O$ spin—spin relaxation time 1831
- Cr, in corundum and Cr alum, spin—lattice relaxation 16158
- Cr^{3+}, in alum, fine structure, ground-state splittings 21073
- Cr^{3+}, in corundum, resonance, line width and profile 11941
- Cr^{3+}, spin—lattice relax. in corundum 11940
- $CrCl_3$, g-factor anisotropy, room temp., 36 kMc/s 21072
- $Cr(H_2O)_6^{3+}$, in $Al(H_2O)_6Cl_3$ 13869
- $CrK(SO_4)_2.12H_2O$, saturation 10223
- CsO_3, exchange effects 4522
- Cu ions, dissolved, hyperfine structure 3544
- Cu salts, 5.4 and 6.6 mm wavelengths 3129
- Cu^{2+}, complexes, influence of Jahn—Teller effect 11943
- Cu^{2+}, in water and glycerine, 90° and 300°K 16714
- Cu^{64}, in divalent Cu cpds, use in masers 2436
- $Cu_{0.05}Co_{0.95}K_2(SO_4)_2.6H_2O$, at room temp and 77°K 4510
- $CuK_2(SO_4)_2.6H_2O$, saturation 10223
- Cu—Mn alloy, s—d interaction, theory 16166
- $Cu_{0.05}Zn_{0.95}K_2(SO_4)_2.6H_2O$, at room temp and 77°K 4510
- D, atomic, h.f.s. det. 20543
- DPPH, coupling consts. of hydrazyl nitrogens 4221
- DPPH, hyperfine interactions in single crystals of the hydrazine 13881
- DPPH, proton hyperfine spectra 10680
- DPPH, r.f. susceptibility along polarizing field 16179
- DPPH, resonance line at r.f., at liq. H temps 10225
- DPPH, T_1 and T_2 exchange effects 3123
- Eu, divalence proved 13874
- $EuIr_2$, no resonance detected 13874
- Fe group, salt solutions, resonance and relaxations 8085
- Fe^{2+}, in cubic fields, theory and expts. 10228-9
- Fe^{3+}, ground-level splitting and g-factor in nearly cubic crystal field, calc. 11601
- Fe^{3+}, ground-state cubic crystal field splitting parameter, sign 1824
- $Fe(NH_4)(SO_4)_2.12H_2O$, at 9.3×10^9 c/s 3130
- $Fe(NH_4)(SO_4)_2.12H_2O$, resonance in parallel fields 13875
- $Fe(NO_3)_3.9H_2O$, at 9.3×10^9 c/s 3130
- $(FeO_4)^{3-}$, in K_2CrO_4 20169-70
- Ga^{3+}, in fluorides 10226
- Gd^{3+}, in CaF_2 18216
- Gd^{3+}, resonance in LaF_3 6263
- Ge, donor spin—lattice relaxation and g-factor 11612-13
- Ge, p-type spin resonance predicted 11756
- H, atoms, h.f.s. det. 20543
- H, atoms, in rare gas matrices 7889-90
- H^3, solid, study of defects due to radioactive decay 20855
- H_2O_2—H_2O solns., u.v. irradiated 10678
- H_2S plasma, free radicals of dissociation 502

Paramagnetic resonance and relaxation — contd
Hg, excited states 20557-8
In^{113m}, atomic beams, h.f.s. 15511
InSb, spin resonance of conduction electrons 6266
Ir ions, in Ir salts, superexchange 13876
K-salt of m-dinitrobenzene negative ion 4219
KBr, V-centres in crystals containing Ca, Sr, Ba ions 6051
$K_3CO(CN)_6$, Cr^{+++}, spin–lattice effects 6256
KCl, F-centres, electron–nucleus double resonance 6273
KCl, F-centres, saturation and partial recovery of e.s.r. at 4°K 10236
KCl, U_3-centres, electronic structure 20832
KCl, V-centres in crystals containing Ca, Sr, Ba ions 6051
KCl:Ag, Ag spectrum, calc. for double and zero field reson. 18219
$KClO_3$, X-ray irrad., V-centre structure 2825
$K_3Co(CN)_6$, Cr^{3+} electron spin–lattice relaxation at liquid He temp. 13878
$K_3Co(CN)_6$:Cr, effects of polytypism 13877
$K_3(CoCr)(CN)_6$, relaxation effects 3134
$K_3(Co,Cr,Fe)(CN)_6$, cross-relaxation of Cr and Fe at 4.2°K 16165
$K_3Cr(CN)_6$, studied in $K_3Co(CN)_6$ crystal 681
KI, F-centres, 4-293°K, compared to other K halides 1826
K_2IrCl_6, Ir–Ir exchange interaction 8067
KN_3, irradiated with u.v. or X-rays 17919
KO_3, exchange effects 4522
KO_3, temp. and freq. depend. 21077
Kr^{85}, solid, study of defects due to radioactive decay 20855
$La(C_2H_5SO_4)_3.9H_2O$, Gd^{+++}, spin–lattice effects 6256
Li in LiF, electron density at nucleus, 1.5-4.2°K 16170
Li in neutron-irrad. LiF, line-width depend. on annealing 4511
LiF, cross-relaxation 4521 [18217
LiF, F-centres, h.f.s., M-centre resonance discounted
LiF, irradiated, dispersion signal, rapid passage 16171
LiF, X-irrad., e.s.r. of "antimorph" of F-centre 6053
LiH, colloid centres 1598
$MgAl_2O_4$, Cr^{3+} resonance 3131
MgO, antiferromag. exchange interactions between Mn^{2+} ions 6274
MgO, double-quantum transitions of Ni 6270
MgO, Fe-group impurities, electron transfers 21075
MgO, Fe^{2+} resonance in 10229
MgO, Mn^{2+} and Fe^{3+} resonance, cubic field splitting, pressure depend. 18218
MgO, Ni^{3+} and Co^{+} resonance, Ni^{61} nuclear moment 15513
MgO, valence of Fe and Cr impurities 11795
MgO, weak lines, Fe^{3+} and Cr^{3+} transitions 6262
Mn–activated phosphors, examination of physical props. 1752
Mn salt solutions 8670
Mn^{2+}, in KCl and LiCl 683
Mn^{2+}, ground-level splitting and g-factor in nearly cubic crystal field, calc. 11601
Mn^{2+}, proposed e.s.r. expt. under high pressure 11944
Mn^{2+}, salt solutions, spin–lattice relaxation times 10679
Mn^{2+}, spin–spin relaxation time in diamag. crystals 6266
Mn^{2+}, in water and glycerine, 90° and 300°K 16714
$MnAu_2$ 13864
$MnCl_2.4H_2O$, mag. susceptibility 10095
$MnCl_2.4H_2O$, rotation of plane of polariz. at 9150 Mc/s 11945
$MnCl_2.4H_2O$ single crystal 10230
$(MnO_4)^{2-}$ in K_2CrO_4 21069-70
$(MnO_4)^{3-}$ in K orthovanadate 20169-70
N, in oriented Na vapour, N^{14}–N^{15} hyperfine anomaly 1482
$(NH_4)_2IrCl_6$, Ir–Ir exchange interaction 8067
NO, h.f.s., N nucl. quadrupole moment 13443
$NO(SO_3)_2^{2-}$, nuclear resonance signals 16713
Na, colloidal, in Na azide 8083
Na azide, colour centres identified as colloidal Na 16063
NaCl, F-centre concn. and relaxation time, by microwave Faraday rotation 16161
NaCl, F-centre electrons, spin–lattice relaxation time, 300°K 16160
NaF, Fe-group impurities, bonding and valence props. 21076

Paramagnetic resonance and relaxation — contd
Nd^{3+}, in $LaCl_3$ double resonance 16173
Nd ethyl sulphate spin–lattice relaxation 10232
Ni, in sapphire 11948
Ni, spin–lattice relaxation time, calc. 13865
Ni chelate, Ni^{2+} splitting in crystal field 3135
Ni fluosilicate, 4.2-1.8°K 10234
Ni^{2+} hydrated salts 1778
Ni–Fe alloys strips, up to 1 Mc/s 13821
Np^{237}, h.f.s. in $(NpO_2)Rb(NO_3)_2$ 403
NpF_6 3126, 7768
O, in alkali halides 3127
O, atomic, recombination study 2728
O_2 ($O^{16}O^{16}$ and $O^{16}O^{18}$), g-values 9821
OH^-, in H_2O_2 at 77°K 13868
Pa^{231}, tetravalent 10235
RbAl sulphate, Fe^{3+} ground-state cubic crystal field splitting parameter, sign 1824
RbBr, F-centres 4300
RbCl, F-centres 4300
RbI, F-centres 4300
S, green and purple deposits, trapped radicals 16175
$(SO_3)_2NO^{2-}$ radical in aq. soln., Overhauser–Abragam effect in intermediate mag. fields 6815
Sb, g-factor 16163
Si, donor spin–lattice relaxation and g-factor 11612-13
Si, electronic structure of impurity transition-metal ions 17960
Si^{29}, h.f. interaction of donor electrons, double-resonance technique 16174
Si, P-doped, relaxation time as function of i.r. radiation power 10241
Si, P-doped, spin–lattice relaxation 4512
Si, p-type spin resonance predicted 11756
Si, spin resonance of transition metals in 4514
Si, vacancy trapping and annihilation by interstitial impurities 17959
Sn, 10^{10} c/s, 2.3°K, orientation depend. 21079
$SrCl_2$, resonance spectra of Mn^{2+}, Gd^{3+}, and Eu^{2+} 3132
SrS:Eu:Sm, e.s.r. of Eu^{2+}, detection of optical excitation 682
$SrTiO_3$, resonance of Fe^{3+}, test of spin Hamiltonian 3133
T, atomic, h.f.s. det. 20543
Ti^{3+}, resonance and relax. in corundum 13873
Ti^{3+} alum, rel. to nature of crystalline fields 8034
TiCs sulphate alum, 2.5°K 16127
TiO_2, Cr^{3+}-doped, as maser material 16180
TiO_2(rutile), Fe^{3+} resonance at low temp. 11951
TiO_2, V^{4+} resonance in 13879
V^{3+}, in corundum 8086
V^{3+}, in sapphire 1834
VO^{2+} solutions, relaxation 19167
Y_2 complexes, spin–lattice relaxation 16158
$Y(CH_3COO)_3.4H_2O$, g-values of Yb^{3+} 1835
YGa garnet, Fe^{3+} ground-state cubic crystal field splitting parameter, sign 1824
Yb^{3+}, in Al and Ga garnets 10239
Yb^{3+}, in yttrium garnets 4516
Zn, vapour, mag. resonance of excited atomic levels 13880
$ZnAl_2O_4$, Mn^{2+} resonance 3131
ZnF_2, resonance of Mn^{2+} impurity, F^{19} super-h.f.s. 6272
ZnF_2, spectra of Ni^{2+}, V^{2+} and Cr^{2+} 10233
$Zn_3La_2(NO_3)_{12}.24H_2O$, Cr^{3+} resonance 4507
ZnS, Fe^{2+} resonance in 10229
ZnS:(Cu,Ag or Al), crystalline transformations 11998
ZnS:Gd, photoconductive, trapping detection, e.s.r. enhancement by radiation 11729
$ZnSiF_6.6H_2O$, Mn^{2+} resonance in, $\Delta m = \pm 1$ transition 18220
Paramagnetism (See also Magnetic properties, paramagnetic).
adiabatic susceptibility, equivalence with isolated susceptibility 13733
cooling by adiabatic magnetization of certain paramag. salts 1087
cross relaxation in dilute paramag. systems 18223
electron gas, long-range spin interaction, Meissner–Ochsenfeld effect 11611
electron gas, relativistic quantum distrib. func. 13726
fermion system, interacting 14538
in ferromagnetic, explosively shocked 2307
ferromagnetic particles, at high temp. 4470
without Kramer's degeneracy 8032
magnetic double refraction of microwaves 2982

Paramagnetism — contd
metals, spin paramag. susceptibility of conduction electrons, effect of electron–phonon interaction 11592
n.m.r. shifts in paramag. crystal, theory 1837
paramagnetic effect in superconductors 8961
polarons, susceptibility 21023
resistance minimum in dilute paramag. alloys 2844
solid solutions of paramag. impurities in nonmagnetic substrate, exchange-coupling 674
superparamagnetic particles, anisotropy meas. 2999
superparamagnetism, at high temp. 4470
diphenyl picryl hydrazyl, transition to antiferromag. state 16178
dysprosium ethyl sulphate, susceptibility below 1°K 10094
garnets, rare earth, high temp. study 13739
ruby, susceptibility at low temp. 10098
Fe group, spin–phonon interactions, quadrupole selection rule 529
Ni^{2+} hydrated salts, anisotropy 1778
Sm^{152}, induced mag. field of 4f-electrons 402

Parity
baryons, relative parities of Λ and Σ 12845
conservation, asymmetry experiments, minimal error 17210
conservation, cascade reaction test 11128
conservation, in K–He interactions 17416
conservation, in meson group, invariance principle 12870
conservation, in nonlinear pion interaction with fermion isotopic doublet 17383
conservation, in π^0-meson production 15411
conservation, in π^+ production by p + p at 1 BeV 1279-80
conservation, of states in Rb^{85} 17502
conservation, in strong interactions 2684
conservation, in strong interactions, Fe^{59} β-decay 15550
conservation, in strong interactions, invariance of CP alone 12833
conservation, in strong interactions, test using β–γ and γ–γ correl. 2484
conservation, in strong interactions, test using Xe^{133} β–γ angular correl. 17547
conservation, in three-field theory of strong interactions 3924
conserving and nonconserving interactions, mass reversal 5483
elementary particles 20041
Fermi transitions, deviations from ΔT = 0 isotropic spin selection rule 9576
internucleon potentials, parity-nonconserving, invariance requirements 12862
$K^- - K^0$ relative parity, from $p + n \rightarrow K^- + K^0$ 5603
K-meson–baryon vertices 5523
K-meson–γ-particle relative parity, determ. 2596
K-mesons, charged and neutral, relative parity 20227
mixture, in A^{41}, Xe^{133} and Lu^{177} states 4030
neutrino emitted in β-, μ- and π-decays 2525
nonconservation 17275
nonconservation, in β-decay of Bi^{210} (RaE) 5702
nonconservation, in Bi^{210} (RaE) β-decay 11356
nonconservation, covariant interpretation, two new spin-like freedoms 12832
nonconservation, effect on crystal enantiomorph formation 11995
nonconservation, in K_{e3} and $K_{\mu 3}$ decays 11217
nonconservation, in Λ and Σ^- decays 4004
nonconservation, in neutrino capture by protons and deuterons 1269
nonconservation, in π-meson production 5593
nonconservation in $\pi^\pm \rightarrow \mu^\pm + \nu + \gamma$ decay 2566
nonconservation, probability in double β-decay 13188
nonconservation, rel. to strength of interactions 11084
nonconservation, in strong interactions 3978
nonconservation, strong interactions and particle decays 9311-17
nonconservation, in strong interactions of strange particles 11234
nonconservation, theory, renormalization 2483, 12837
nonconservation, and time reversal invariance, e.m. interactions, applic. to atomic energy levels 11485
nonconservation, in weak interactions 12827-30, 20032-3
nonconservation, in weak interactions, discussion 17209
nonconservation, in weak interactions, rel. to multiple model 20052

Parity — contd
nonconservation, in weak interactions, rel. to strange-particle spins 11235
nonconservation, in Ξ-cascade decay 9437
π^0-decay, T, P, C symmetries, possible breakdowns 9398
π–nucleon scatt., low-energy, possible parity nonconservation 1299
relative, suggested experimental determ. 2504
(Σ,K) relative parity, from $(\bar{\Sigma}^- + p)$ 3K annihilation mode 7418
Σ–Λ relative parity, proposed expt. 13066
selection rules for reactions of polarized particles 2507
space and time inversions, spinors and pseudo-spinors 4938
strange particles, from hyperon polarization in $K^- + p \rightarrow Y + \pi$ 2599
strange particles, methods for det. 2598
T.C.P. theorem, free-field transformations, applications 321
time parity cons. in β-decay of Bi^{210} (RaE) 4050

Particle accelerators (See also Ion beams).
accessories, magnetic particle analysers 15222
cascade generators 12655
CERN symposium 1956, review and proceedings 19811-14
design, waveguide theory 2450
electrostatic generators, use as injectors for synchrotrons 19818
high-current high-voltage generator 1176
ion and plasma propulsion, comparison 12615
magnetic fields, production 17063
monochromatic beam prod., by electrostatic analyser 1406
nonlinear oscillations, theory 11037
nucleonic instrumentation 19962
particle trajectories, analogue computer 19784
prod. of particle beams and use of nuclear emulsions 12654
relative energy calibration using foil transmission data 3816
setting-up devices 17153
stray radiation from, shielding problems 19817
tables of energy versus mag. field for He^3 7176
targets, carbon film preparation 18415
use of oxide-coated cathodes 2378
world list of installations 19815-16
Li ion sources 19779
LiH bremsstrahlung beam hardener 2517
linear
alternating-gradient focusing 5366
Alvarez type, e.m. field calc. 15090
CERN, 2.5 MW h.f. amplifier 19834
Cockcroft–Walton, mass analysis of ion beam 19829
design criteria 9114
deuteron, 150 kV rotating disk electrostatic transformer 5365
deuteron, very-low-voltage 17055
diverging electrostatic lenses for accelerators 19819
electron, beam splitting, by e.m. wave in guide 17053
electron, Ghent University 19823
electron, guide field accelerator 3817
electron, 1 MeV, for studying chemical and physical effects of radiation 19821
electron, 1 MeV, X-ray beam measurements 19822
electron, pulse-shortening 19824
electrostatic 2405
electrostatic, beam pulsations 10974
electrostatic, in compressed gas, 1.5 MeV operation 17054
electrostatic, relativistic electron optics 15091
elutron, linear-cyclic accelerator 10991
energy modulator, modification 19820
external beam current monitor 2406
gap-excited linear ducts, general formulae 19828
Harwell, 15 MeV, time-of-flight experiments 17350
helical waveguide type, construction 19833
low-background target room 318
moving fields, possible use of 1159
Orsay, 250 MeV beam, meas. of resolving power, aberrations and mixed focusing 10984
Orsay, 1 BeV, pumping 2407
particle bunching in travelling wave accelerator 9112
particle motion, analogue apparatus 5367
plasma acceleration, in coaxial waveguide 19653
plasma accelerators 10907

Particle accelerators —contd
linear — contd
proton machine, transit-time factor, elec. field distrib. 19827
pulsed beam deflection system 19825
relativistic electron motion, away from accelerator axis 19826
S-band isolator for use in linear accelerators 12656
strong-focusing, accel. of polarized protons 9363
stroboscopic radiography 6958
targets, liquid He 2477
three-stage tandem, injection of fast neutral beams 19830
triton, 340 kV, design and construction 9113
Van de Graaff, ion source, mass analysis 12642
Van de Graaff, beams for time-of-flight meas. 2476
Van de Graaff, construction and ancillary equip. 1175
Van de Graaff, electron accelerator, uses 19832
Van de Graaff, h.f. ion source, base design 15084
Van de Graaff, with low retrograde electron current 19831
Van de Graaff, precision method for high-voltage measurement 2295
Van de Graaff, for 2 MeV protons, Ecole Polytechnique, Paris 9630
variable-phase focusing 9115
orbital
analogue for particle oscillation studies 19835
beam shape, from hydrodynamic model 3819
betatron, air-cored, mag. field production 1178
betatron, calibration, photoneutron thresholds 13261
betatron, cylindrical, without Fe 17062
betatron, electron-capture processes 9130-1, 11000, 12660
betatron, electron-charge meas. 11004
betatron, electron distribution in vacuum chamber 19860
betatron, electron injection, with resonance 17061
betatron, electron motion 15092
betatron, electron motion, clock paradox 8543
betatron, electron trapping mechanism, for large and small injection currents 11091
betatron, energy calibration 1177, 3822, 7175
betatron, with fixed-gap field, electron capture 11003
betatron, injection pulse effectiveness 12658
betatron oscillations, equilib. trajectories, generalized magnetostatic field 12659
betatron oscillations, fringing effects, with sectional magnet 2410-11
betatron oscillations, vertical, amplitude change 15098
betatron, polarized bremsstrahlung production 3950
betatron, with short pulse injection periods, < period of revol. 11005
betatron and synchrotron γ-radiation, intensity stabilization 19859
betatron, 30 MeV, bremsstrahlung spectrum 12657
betatron, 31 MeV, energy control 19861
betatron, 31 MeV, energy meas. and automatic control 19862
betatron, transient current, during capture 9129
capabilities for high-energy neutrino studies 11140
cyclotron, Birmingham, use of electric-current shims 3820
cyclotron, Collège de France, focusing and beam analysis, α-particle prod. 3821
cyclotron, dee voltage, choice considerations 9119
cyclotron, electric deflectors, shaping 10993
cyclotron, with helical field, theory 3818
cyclotron, history 5368
cyclotron, ion beam modulation, use for control purposes 9121
cyclotron, at Louvain, beam extraction and analysis 15094
cyclotron, motion of particles in central region 9120
cyclotron, with oblique accel. gap 9118
cyclotron, phase relationships 7177
cyclotron, Pretoria 19842
cyclotron, ring f.m., high-current injection 10992
cyclotron, ring f.m., magnetic design 9117
cyclotron, ring type, vertically inc. mag. field, stability conditions 17057
cyclotron, Saclay, focusing and analysing magnets 19841
cyclotron, small, design and construction for students' use 19840
cyclotron, spiral-dee 19836
cyclotron, spiral ridge, particle dynamics 19852
cyclotron, with star-shaped mag. fields, stability and isochronism 15095

Particle accelerators — contd
orbital — contd
cyclotron, Stockholm N.I.P., 225 cm 9122-3, 17056
cyclotron, variable energy spiral ridge 15096
decoupling of oscillations, about central trajectory 9116
early development 284
effect of space charge on particle motion 2408
electron guide field accelerator, Boltzmann equation 9111
electron radiation, coherent 12662
electron, spiral sector, for fixed field alternating gradient 19837
electron synchrotron, Frascati, bremsstrahlung spectrum 15099
electron synchrotron, quantum effects 15100
electron trapping, in betatron accel. range 11002
orbit stability, calc. from field distrib. 15093
plasma accelerators 10907

radial fall-off of magnetic field in cyclotron 2409
radiation from relativistic particles, collision effects 15316
regenerative action in high-energy accelerators 19838
regenerative deflector 10994
similarity conditions, non-resonance eqn. of motion, oscillation damping 17058
Soviet, survey article 19839
strong-focusing, with fixed mag. field, equilib. orbit and betatron oscill. 10995
synchrocyclotron, beam extraction 5370, 19856
synchrocyclotron, Buenos Aires, 180 cm, beam magnetic deflector 15101
synchrocyclotron, burst cycle modification 10999
synchrocyclotron, Harvard, regenerative deflection 19853
synchrocyclotron, Harwell, conversion to spiral ridge operation 19852
synchrocyclotron, high-energy research, Joint Institute of Nuclear Studies, U.S.S.R. 15305
synchrocyclotron, particle vertical motion in regenerative extractor 19857
synchrocyclotron, pulse simulator 19858 [19854-5
synchrocyclotron, tuning-fork frequency modulation
synchrophasotron, shaping of phase motion of particles 17060
synchrotron, alternating gradient, mag. measurements 19850
synchrotron, coherent electron radiation 9124
synchrotron, Dubna, 10 GeV, design tolerances 9126
synchrotron, electron, oscillations, radial and phase 10996
synchrotron, electron phase motion, e.m. interaction effects 10997
synchrotron, focusing of scattered-out beam 19847
synchrotron, Frascati, shielding calc. 19817
synchrotron, frequency, upper limit 9125
synchrotron, high-current phase oscillations 15097
synchrotron, injector 3823
synchrotron, injector, variable-slope pulse line 17059
synchrotron, magnet field stabilization 19848
synchrotron, oscillation damping 9128
synchrotron, oscillations, resonant perturbations 9126
synchrotron, polarization of electron radiation 15317
synchrotron, proton, Argonne and Princeton, capabilities for high-energy neutrino studies 11140
synchrotron, proton, 10 GeV, at USSR Academy of Sciences, design 5369
synchrotron, radial phase amplitude distrib., for γ-rays 7180
synchrotron, ring type, betatron oscillations, characteristic functions 9127
synchrotron, Saclay, testing of electromagnet segments 19851
synchrotron, single-channel time analyser 7181
synchrotron, strong-focusing, gas scattering 19846
synchrotron, 10 GeV, theoretical aspects 7178 [12661
synchrotron, weak-focusing, damping phase oscillations

Particle accelerators — contd
orbital — contd
synchrotron, 340 MeV, associated equipment 17286
targets, rare-earth oxide, preparation and use 19843
Particle detectors (See also Bubble chambers; Cloud chambers; Counters; Ionization chambers; Nuclear track emulsions; Particle track visualization).
astigmatic focusing spectrometer, for energy distrib., light nuclei reactions 9251
β-particles, use of Ge and Si diodes 7493
Cherenkov high-energy neutron detector 17358
Cherenkov proton detector, Perspex cone 17155
chopper—ionization chamber method; 2×10^5 particle/cm sensitivity 5859
corona counters, electrical field shape 5452
corona counters, for heavily ionizing particles 5451
delayed-neutron monitor for reactor 13381
double focusing mag. spectrometer, 180°, aberrations and fringing effects 19788
emulsion—scintillator sandwiches, for dense shower detection 1233
fast-neutron dosimeters, proton-recoil, discrimination losses 7249
4π, for radiochromatograms 5450
G-factor, calc. for scattering through two apertures 17276
identification by track width 200
low-energy, use of pulsed ionization chamber for spectra 15186
multiwire counter for charged particles 3890
neutron dosimeter, BF_3 double moderator 17359
neutron, by fission in gas current 7384
neutron, flux meas., calib. of Mn and An foils 15367
neutron, γ-ray compensated B^{10} ioniz. chamber 3882
neutron, graphite sphere 17356
neutron, intermediate energy, by glass scintillators 17145
nuclear electronics symposium 12719
p—n junctions, as detectors 5630
p—n junctions, Au—Ge 1234
p—n junctions, Ge, as α proportional counters 5466
p—n junctions, Ge, charge collection coeff. 20886
p—n junctions, Si, for charged particles 7274
p—n junctions, Si, for heavy ion induced nuclear reactions 20508
p—n junctions, Si, for minimum ionizing particles 19975
Pioneer V instruments, results 17453
photon counters, self-quenched, characteristics 3598
scintillation gamma spectrometer, automated 4040
semiconductor devices 15195
semiconductor devices, as fast linear detectors 9237
semiconductor devices, Ge 17156
spectrometer, double-focusing zero-dispersion, magnetic 9252
thermoluminescent dosimetry device 9241
time-sorter for use in nanosecond range 15219
transistors, for α-particle detection 9238
travelling-wave devices, for mass analysis 319
Au foils, meas. of flux perturbation 9371
In disk, foil depression factors 12995
ZnS:Ag, fluorescence decay rates for different particles 6203
ZnS:Ag, proton and α discrimination from γ-background, by decay mode study 21009
Particle focusing (See Particle optics).
Particle optics (See also Electron optics; Ion optics).
axially symmetric mag. fields, with central particle source 10978
charged-particle motion, in near homog. mag. field 12646
charged-particle orbits in varying mag. fields 12647
charged-particle trajectories, differential geometry 10977
convergence of mag. sectors with shaped edges 9102
in corrugated mag. fields, particle traps 10980
electrostatic lenses, diverging, in accelerators 19819
in figure-of-eight systems 10981
focusing and beam analysis in cyclotron at Collège de France 3821
focusing, using ferromag. blocks as quadrupole lenses 1166
focusing, synchrotron scattered-out beam 19847
heavy particle spectrometer 2403
image location in particle spectrometers, effect of stray mag. fields 19799
Particle optics — contd
lens focusing system, high-energy particles 5350
mag. spectrometer, 180°, double-focusing, aberrations and fringing effects 19788
mag. spectrometer, 180°, line focus intensity distrib. 7173
magnetic mirrors, achromatic 10983
magnetic trap, with rotating mirrors 17002
motion in slowly varying e.m. fields 1184
orbit calc. for high-energy charged particle in e.m. field 12679-80
perfect imaging systems, theory 12680
quadrupole magnet focusing system 19783
relativistic motion of charged particle in inhomogeneous e.m. field 15114
relativistic particle beams through hole in screen 278-9
spherical electrostatic analyser, theory 2389
in toroidal mag. field, screw form, particle trap 10981
trajectories, analogue computer 19784
trajectories, in elec. and mag. fields, numerical calc. 12638
trajectories, in mag. monopole field 17075
He^3 energy versus mag. field 7176
Particle size (See also Surface measurement).
airborne matter, ballistic separator 10363
counting and sizing apparatus, photoelec. scanning 4682
colloidal Po 16389
det. by light scattering, polychloroprene latex globules 19446
disperse systems, photoelec. scanning, applic. coal dust 4682
distribution, in aerosols 3331
distribution, droplets in mists 1967
distribution, single tube sedimentation apparatus 14139
dust samples from coalmines, size distrib. 6422
meas., using light scattering, formulae and nomograms 12496
meas. with micrometer microscope 19384
measurement, shape factors, in sieve range, applic. to coal 16341
non-volatile droplets by electron microscopy 6771
silica sol mixtures, rel. to X-ray scattering 12053
small particles in suspension, photoelectric counter 18447
spectrum of condensing vapour 16736
submicroscopic, electron microscope exam. 8331
sub-sieve sizing, automatic decantation 8262
thermal precipitator slides, inter-observer checks 8327
from turbidity, nomogram 16390
Particle track visualization (See also Bubble chambers; Cloud chambers; Nuclear track emulsions).
dust-track model, with Pb and Alnico slugs, for teaching 5458
fission, products, damage effects in mica, electron microscope study 19979
in gas, new detector 7248
kinematic analysis, high energy 9307
luminescence camera 3893
luminescent chamber 15197
optical method of observation 1231
photographic tracking, review article 19988
tangents to trajectories, minimum deviation method 10979
trajectory photography, argon-propane electron cascades, study 7248
use of plastic scintillator filaments, utility of arrays 18150
Particle tracks (See also Range of particles).
analogy with pulse assemblies 12782
angle meas. in gridded ionization chamber 19966
angular distrib., effect of nuclear emulsion distortion 12775
angular-distribution chamber 17577
angular meas. in emulsions 201
angular spread in emulsion 3900
automatic track analysis, survey 12784-5
bubble nucleation in superheated aqueous solns. 7253
"constant sagitta" scheme for Agfa K2 emulsion 5461
correction formula for photographic overlap 1271
curvature, momentum estimate 2467
density, rel. to grain size in Ilford G5 emulsions 12762
discrimination at high γ-intensity by K ferro-oxalate developer 202
Dirac magnetic monopole, discussion 1258 [12761
electrons, in Ilford K5 and L4 emulsions, grain density

Particle tracks — contd
in emulsion, analysis of track density photometric curves by Fourier transform method 5462
in emulsion, charge identification 15210
in emulsion, finder attachment to microscope 15209
in emulsion, nuclear charge det. 12729
in emulsion, singly-charged relativistic particles 15206
energy and ang. distrib. fluctuations meas. 312
grain structure, in emulsions, effect of contact development 12781
grain structure, optical model 12783
heavy-ion tracks in Ilford G5 emulsions 11073
identification in fine-grain emulsions 197
identification of particles in high-energy stars 15203
identification by width meas. 200
ionization measurement in emulsions 2469
linearly biased track counting, cross-section determinations 2475
microscopic analysis, device for improvement of accuracy 12477
microscopic analysis, scanning device 12790
microscopic analysis, use of image rotator 12789
multiple scatt. parameters, automatic meas. 12786-7
photometric study, in diluted emulsions 12779
profiles, semi-automatic meas. 12788
protons, in emulsions, sagitta-method meas. 15204
protons and α-particles, discrim. in D1 and K0 emulsions 12770
protons and deuterons, discrimination in nuclear emulsions 12766-7
relativistic energy by meas. of mult. Coulomb scattering 1260
resolution in nuclear emulsions, effect of development 12778
stereoscopic reconstruction 15198
theory of formation in emulsions 196
thin-down in nuclear emulsions 12777
track analysis, thermally insulated microscope 12476
true length in nuclear emulsions, rel. to background fog 12773
Particles (See Fundamental particles; Range of particles; Scattering, particles; and under individual particles, e.g. Protons and antiprotons).
Pendulums
analogue for circular accelerator particle oscillations 19835
simple, equation for amplitude dependence of frequency 56
Periodic system (See also Elements).
atomic radii, electron shells 11477-9
electron groups in the statistical theory of atoms 7679
Permeability, magnetic (See Magnetic properties; Magnetization process).
Permeability, mechanical (See also Diffusion, solids).
filtration of aerated liquids 14060
flow of gasified liquid in porous medium 14587
ion-exchange resins, percolation of water under press. 12067
polymers, to gases, irradiation effects 12064
porous granular materials, to H_2 14693
porous media, dry granular materials 14693
porous media, non-steady state method 14692
sea ice 1975
transition metals, to H_2, theory 20848
Ni, evolution and diffusion of various gases 12120
Pd, to H_2 12069
Pd membranes, to H_2 14061
Permittivity (See Dielectric properties).
Phase equilibrium (See also Solubility; Solutions).
closed crucible technique for high-temp. studies 12095
condensing systems, cluster theory 12094
heterogeneous multicomponent systems 4706
meas. at temp. up to 1750° C and 50 kilobars 14041
multicomponent polyphase systems, chem. equilibrium 16369
temp. distrib. in moving interface 208
acetaldehyde—water mixtures 6819
alkali halides, evaporation, ion—molecule reactions 10876
benzene—iso-octane mixtures, vapour—liquid 6781
Al—AlF_3 and Al—LiF—AlF_3 systems 18427
AlRe, AlRu, AlOs 6357
CCl_4—methylene chloride solutions 10655
Phase equilibrium — contd
CdTe, rel. to semiconducting properties 2893
Fe—Ru alloys 6385
He^3—He^4, critical point for separation 8862
Mo—O system 12095
NH_3—Kr, gas—liquid equil. 14639
NH_3—N_2—H_2, gas—liquid equil. 14639
Ta—O system 12095
Ta—Zr system 6384
U—Mo, below 900° C 18378
W oxides, solid/gas phase 1955
$Zn_3(PO_4)_2$—$Mg_3(PO_4)_2$ 2953
Phase transformations
binary semiconductors, differential thermal analysis 12081
boson gas 3462
crystals of O_h^5 symmetry group 16252
crystals, perfect and with lattice defects, comparison 13761
crystals, of T_h^6 symmetry 18343
equation of phase-transition curve 6991
ferroelec. and antiferroelec. crystals, theory 10014
ferroelectrics, 2nd-kind transition, rel. to Raman light scattering 20974
ferroelectrics, space group change law 13986
gas, liquid and solid, cell theory of classical liquids 19098-9
ionic crystals, effect on u.v. absorption 10038
lattice gas, spherical 18997
martensitic, theory 16313
molecular crystals, phase transition theory 15803
order—disorder in alloys, lattice vibrations contrib. 21233
order-disorder transformations, in ternary alloys 16336
phase-boundary motion, converse Stefan's problem 14862
phase coexistence, strain terms, bulk free energies 220
polymorphic, in anomalous substances 19504
second-order, He^4 as model 14914
solid solutions, activation energy 1935
solid solutions, effect on thermal conductivity 15820
solid solutions, nucleation, ageing 1929
solid solutions, substitutional, anal. by internal friction 1933
solids, crystallographic orientation, charge formation depend. 16005
spherical precipitates, bounds on nonlinear-diffusion-controlled growth rate 15871
study using quadrupole resonance of impurity molecules 4539
surface phases, thermodynamics, theory 5213
"topotaxy", in solid-state reactions 6337
in two-component systems, calc. from atomic props. 8649
acetamide, rel. to Raman spectra 5948
acetonitrile, study by N^{14} pure quadrupole resonance 6283
anatase—rutile, effect of impurities 7895
Armco iron, α—γ, discontinuous change of thermal and elec. props 13498
austenitic steels, heat treatment, second-kind ordering 18397
cristobalite, optical obs. 1878
diamond, graphitization 21185
ice, high-pressure forms, structure 16319
magnetite, at low temp., thermoelec. data 6148
marble, shock adiabats 3585
p.t.f.e., 75-380°K, up to 21000 atm 1875
parachlorotoluene, singlet → triplet transition, luminescence spectra 16099
n-phenylenediamine, rel. to Raman spectra 5948
quartz, amorphous state prod. under shock conditions 6324
quartz, 2nd-kind transition, rel. to Raman light scattering 20974
silica, vitreous, Hugoniot curve, shock crystallization 3259
spinels, transition-metal, tetragonal to cubic phase, theory 1550
steel, effect of applied tensile stress 16337
transition metal hydrides 18289
transition metals and their alloys, rel. to band structure, theory 17911
water, triple point 1056
zirconia, neutron irrad. 2822
β'-AgCd, b.c.c. → h.c.p. transformation produced by mech. deformation, reversion 18373

Phase transformations — contd
- $AgFeTe_2$, 150° and 520° C 15961
- Al–Cu alloy, order–disorder transf. at 280° C 8270
- Al–Zn alloys 2851
- B_2H_6, solid, at low temp. 1914
- $BaTiO_3$, elec. field effects, optical transmission study 20958
- $BaTiO_3$, tetragonal–cubic 548
- $BaTiO_3$–$BaSnO_3$ solid solutions, at high temp. 12076
- Be, allotropic transf. due to plastic deformation 3170
- Bi, allotropic transf. due to plastic deformation 3170
- Bi, strain-induced at low temperatures 16379
- CF_4, solid, to 20000 kg/cm² 14042
- CH_4, CD_4, solid, 0–19000 kg/cm², 4–120° K 12055
- CO_2, electrical effects 8977
- Ca perovskite-type cpds., ferroelectric and puckering transitions 13654
- β–$Ca_3(PO_4)_2$, at low temps. 8011
- $CaSiO_3$:Mn:Pb 3267
- Co, f.c.c.–h.c.p. transformation 18374
- Co and Co–Ni, f.c.c.–h.c.p., natural and stress induced 16311
- Co and Co–25% Ni, martensitic 21207
- Cr–Ni alloy, ordering, effect of quenching temp. 8271
- Cr–Ti alloy, β–α, high-vacuum and high-temp. X-ray camera 13972
- Cs, allotropic transf. due to plastic deformation 3170
- $CsNO_3$ transition energy, direct meas. 18372
- CuAu(I)–CuAu(II) superlattice transition 21212
- Cu–Sn alloys, optical studies 1718
- Cu–Ti alloys, Cu_4Ti precipitation 21228
- Fe, α–γ, detection using differential thermal cond. anal. 14043
- Fe, γ–α change point, length change meas. apparatus 14572
- Fe alloy, with Al, C, Ni, S, Si, diffusion 8268
- Fe alloys, thin-film martensite transformation 21209
- Fe–Al alloys, liquidus–solidus relations 6383
- Fe–Ni alloys, martensitic 21208, 21210
- FeO–SiO_2–CaO melts, temp. and composition depend. 18163
- Fe_2O_3, $\gamma \rightarrow \alpha$ with pressure 18376
- FeS, α-transformation, susceptibility anomaly 18209
- Ga, elec. cond. anisotropy 9930
- H_2, conditions for existence of monatomic phase 15767
- HCN, between 77–195° K, study by N^{14} pure quadrupole resonance 6283
- H_2S, solid, to 20000 kg/cm² 14042
- He, liquid, boundaries between phases 8921
- He^3, liquid, transition predicted 12548
- He^3, solid, rel. to thermal cond. 19545
- He^4, liquid–vapour and liquid–solid mixtures, Ehrenfest eqns. 14914
- I_2, first order, by shock waves, diatomic bond destruction 15767
- In, fusion curves to 10^5 atm 9840
- InAs–In_2Se_3, homogenization, by annealing under pressure 1939
- K, residual resistance 20870
- K halides, polymorphic transition, optical observations 16037
- KCN, temp. cycling at thermal transformation, ~ –110° C, domain co-existence 21196
- Li, allotropic transf. due to plastic deformation 3170
- Li, martensitic transformation, spec. ht. study 7852
- LiI, effect on u.v. absorption 10038
- Li–Mg, sp. ht., martensitic transform. 2787
- $MnBr_2.4H_2O$ 16144
- $MnCl_2.4H_2O$ 16144
- Mo oxides, 500–870° C 18345
- Mo–Ti, β–α, habit planes and orientation 16312
- NH_4Br, I ⇌ II, differential calorimetric meas. 16334
- NH_4Br, I ⇌ II, dilatometric investigation 16335
- NH_4Cl, I ⇌ II, differential calorimetric meas. 16334
- NH_4Cl, I ⇌ II, dilatometric investigation 16335
- NH_4NO_3, at 125.8° C and 84.1° C 17899
- Na, allotropic transf. due to plastic deformation 3170
- Na, elec. resistivity of two low-temp. phases, 15–50° K 7914
- Na, martensitic transformation, spec. ht. study 7851
- Na, volume change 21188
- Ni films, neutron irrad., f.c.c. to h.c.p. change 10338

Phase transformations — contd
- Ni_3Mn, at ~ 110° K 17890
- Np, allotropic 12056
- Np, α–β, latent heat 2789
- O_2, solid, 0–19000 kg/cm², 4–120° K 12055
- Pu, equilibrium temps. 21226
- $RbHSO_4$, ferroelectric transition 7980
- SiF_4, solid, to 20000 kg/cm² 14042
- SiO_2 (cristobalite), α–β inversion, neutron irrad. 15878
- Sn, fusion curves to 10^5 atm 9840
- Sn, grey ⇌ white, in Sn–Hg alloys 727
- Sn-base alloys, cell to dendrite transition 16338
- Sn–Hg alloys, white to grey transformation 21231
- Sr perovskite-type cpds., ferroelectric and puckering transitions 13654
- α and β–Ti, ω-alloy phases, δ-Ti oxide and Ti monoxide, structural and geometrical relations 16310
- Ti–Zr alloys, β–α, high vacuum and temp. X-ray camera 13972
- U, transformation temps. 18377
- U and alloys, α–β thermal cycling, effects 4580
- U–fission-product alloys 14072
- U–9 wt% Mo alloy, radiation-induced 14071
- V_2O_3, neutron diffr. study, 168–533° K 6363
- WO_3, monoclinic–triclinic transformation near 17° C 18375
- Zn–Al alloy, rel. to plastic deformation 16230
- ZnS, hexagonal crystals 1880
- Zr, β–α, habit planes and orientation 16312
- ZrO_2 solid solutions, irradiation-induced 21211

Phonographs (See Sound reproduction).

Phosphorescence (See Luminescence).

Phosphors (See Luminescence; Luminescent devices).

Phosphorus
- analysis, spectrochemical, in Cu and in Al alloys 6428
- diffusion into Si, effect of oxide layers 6059
- diffusion in SiO_2 film 11642
- electron affinity, calc. 9745
- gettering effect on Si p–n junctions 18032
- mesonic X-ray lines, rel. to μ-meson mass 11559
- red, surface interaction with alkyl iodide vapours, desorption 3305
- thermodynamic props., for gaseous state (1 atm, 100–1000° K) 19200
- valence electrons, approx. wave-functions 469

Phosphorus compounds (See also Alloys).
- carboxyl phosphate, quantum mech. calc. of electron distribution 7736
- diphosphate ion, diffusion in var. liquids 3511
- phosphate phosphors, intensity–temp. dependence 2961
- CF_3PF_4, F^{19} spectrum 17781
- H_3PO_4, γ-ray irrad. at 77° K, atomic H and H_2 yields 14137
- H_3PO_4, molar sound velocity 19133
- PCl_3, PF_3, potential field and force constants 1501
- PH, analysis of (1,0) band of $^3\Pi_i$–$^3\Sigma^-$ system 11520
- PH_3, force constants and interaction constants 20600
- PH_3, theory of intensities of i.r. spectra 4203
- PH_3, PD_3, molecular props. 4187
- P_2O_5, molecular structure, electron diffraction study 17855
- PT_3, wave-numbers, rotational distortion const., thermodynam. props. 17741

Photochemistry (See also Photographic process).
- dissociation rate of vibronically excited molecules, calc. 15683
- electron transfer processes in solution, mechanism 10357
- flash photolysis system 3317
- gaseous polyatomic molecules, primary processes 14129
- ionosphere, F2 region, 1958 eclipse data 16447
- light source for photolysis 479
- matrix isolation, photolysis of hydrazoic acid 3320
- organic cpd. formation, in simple gas mixtures 3318
- ammonia, photolysis in solid matrix 14128
- alcohol–H_2O_2 mixtures, u.v.-irrad., free radical formation, e.s.r. study 20662
- alkali halides, transformation from F- to F_2-centres 15857
- alkyl hydroperoxides, dissociation, e.p.r. study 8314
- benzophenone, photoreduction 14130
- biacetyl 14129
- biacetyl, photo-oxidation 14127 [8317
- cumene, reaction with anthracene, chrysene and pyrene
- diazomethane, in solid matrix, chemiluminescence of ethylene 13723

Photochemistry — contd
9, 10-dihydroanthracene, reaction with anthracene, chrysene and pyrene 8317
γ-(2,4-dinitrobenzyl)-pyridine, photochromotropism 16381
eosin—phenol system, primary processes in 4725
halide solutions, flash photolysis, absorption spectrum of dihalide ion 10357
halogens in soln., transient species in flash photolysis 6414
hydrazoic acid, photolysis in solid N 21288
hydrocarbons, aromatic, photoionization by u.v. in boric acid glasses 21290
ketene, dissociation 15683
mesonaphthodianthrene oxidation 21289
methyl free radical prod. 4710
phenol, free radicals from flash photolysis 6413
styrene, polymerization, photo-sensitized by anthracene 8316-17
Ag, colloidal, bleaching inside AgCl crystals 9913
AgBr, paramagnetic resonance 6415
AgBr, sensitizens 10358
AgCl, sensitized crystals, at −253° C 10356
AgCl, with traces of CuCl, photographic process 19465
$BaTiO_3$, photosensitivity 4726
CO_2, dissociation by single flash 1961
CO_2, photolysis 21287
CdI_2, photolysis 18066
Cl_2, and optico-acoustic effect 19215
$Cl_2 + O_2$, photolysis, free radical prod. 1535
Ge electrodes, effect of illumination 21286
Ge electrodes, photochemical processes in cathodic polarization range 21281
H_2—D_2 exchange, in presence of rare gases 749
HCO, radical formation 5930
HN_3, solid, photolysis, N chain cpds as intermediates 4727
H_2O, formation of H_2 in photolysis 3319
K halides, with O complexes 8009
KI, aq. soln., flash photolysis, electron transfer mechanism 10357
N_2O, photosensitized decomposition by Hg (6^3P_1) atoms, isotope effect 15650
O_3, photodissociation in Schumann—Runge system 17721
O_3, flash photolysis, reactions of excited O and O_2 8319
O_3, with NO 8315
S_2Cl_2, flash photolysis 16382
SO_2 and SO_3, flash photolysis 8318

Photoconductivity
$A^{V}B^{VI}C^{VII}$ compounds, single crystals 11722
capacitance change in phosphor-containing condenser 3715
carrier thermalization, steady-state distrib. function 17905
cells, excess photon noise in single beam meas. 14954
crystals phosphors, relaxation processes 1743
dyes, sensitization in glass 20926
dyes, used for sensitizing photographic materials 10358
"Electrofax" materials 4387-8
electrophotographic device, using electret layers 10001
electrophotographic layers, dynamic props. 11728
excitons in semiconductors 6112
field ionization of traps 1740

trapping level effects, for insulating crystals and semiconductors 18060
X-ray image amplification 5541
X-ray image intensifier, with photoconductor electro-luminescent phosphor 3617
alkali antimonides, properties 20927-8
anthracene, carrier prod. and mobility 13620
anthracene, exciton production 9999
anthracene, hole and electron drift mobilities 15997
anthracene, hole-injection energy-balance 10000
anthracene, positive hole injection 4371
anthracene, voltage, illumination and electrode separation depend. 18065
cuprite, red and blue illuminated, reduced and enhanced conductivity 15988
phthalocyanine 6144-5
phthalocyanine, kinetics 20936
pinacyanol, quantum yield 1684
serum albumin 15970
sulphide phosphors 20887
triphenyl methane dyes, quantum yield 1684
Ag halides 20871
AgBr, electron mobility and scatt. processes at low temp. 15994
AgBr, grains, from emulsions, electronic carriers 1617
AgCl, and darkening 20940
As—Se alloy films 15991
As_2Se_3, amorphous films 6136, 15949
$4As_2Se_3.As_2Te_3$ glass 15903
$As_2Se_3.Se_2Te_3$ glasses 15902
Bi, shallow impurity traps and electron transfer dynamics at low temp. 18035
Ca halophosphates, with Sb and Mn 9993
CdI_2 18066
$CdIn_2S_4$, spectral response, temp. dependence 7961
CdO layers, visible and u.v. regions 11758
CdS 20914
CdS, annealed in vacuum and S vapour 18068
CdS, effect of deuteron bombardment 1662
CdS, excitation intensity depend., superlinearity 16079
CdS films, electron irrad., photoshift 7956
CdS, fine structure of spectra 7955
CdS, fluctuations due to shallow traps 4369
CdS, as γ-detector 313
CdS, γ-ray induced 15983
CdS, i.r. quenching 2910
CdS, improved performance, various methods 2908
CdS, insulated crystals, meas. by a.c. impedance 2906
CdS, "memory" effect 1677
CdS, mixed ambipolar and exciton diffusion 13525
CdS, photocells, preparation methods and efficiency 9989
CdS, photosensitivity 18037
CdS, quenching effect of photocond. decay 20932
CdS, relaxation, effect of trapping levels 18067
CdS, saturation 13630

Photoconductivity — contd
CdS, shallow traps, frequency factor and energy distrib. 9991
CdS, single crystals, mechanism 13632
CdS, sintered cells, fabrication 2913
CdS, sintered layers 2912
CdS, spectral dependence 18088
CdS, spectral distrib., ambient gas effects 9992
CdS, spectral response, surface treatment effects 15984
CdS, trapping and diffusion in surface region 13631
CdS, 2-4 μ, mechanism 15985
CdS:Ga:Cu, rel. to hole ionization energy of imperfections 1663
CdS—CdSe, monocrystals 7957
CdS—CdTe, effect of CdTe 621
CdSe, photosensitized, i.r. response 18061
CdSe, sintered, in light amplifier 2973
CdSe, 0.5-2.5 μ 18113
CdSe + Ag, single crystals, minority carrier lifetime 7958
CdTe, p—n junction photocells 11723
CdTe, p—n photocells, u.v. quantum yield 15987
CdTe, photosensitized, i.r. response 18061
CsSb and Cr_2Sb, spectral sensitivity and effect of O_2 11709
Cu_2O, depend. on O content, rel. to semicond. props. 6138.
Cu_2O, spectral response, effect of surface treatment 1679
Cu_2O, spectral response, fine structure 1678
GaAs, cells, spectral characteristics 9994
GaAs, photodiode, for visible region 16830
GaAs, photoelectronic analysis 6139
GaSe 1681
GaSe—GaS, solid solns., rel. to composition 15989
Ge, Au-doped, 60-300°K 6140
Ge, Au- or Zn-doped, as i.r. detector 7960
Ge, external elec. field effect 15924
Ge, junction photodiode, threshold sensitivity and noise 9995
Ge, in long-wave radiation, 2-4°K 20898 [20900
Ge, photodiodes, short time constants, high sensitivity
Ge, spectral response, surface treatment effects 15990
Ge, spectral response, 0.5-2 μ 13635
Ge, temp. depend., surface-state kinetics 18021
Ge-type semiconductors, relaxation characteristics 6133
Ge—Si alloys, i.r. response, use in detectors 2911
α-HgS 18071
InAs, 1-7 μ 19499
In_2S_3, spectral response, temp. dependence 7961
InSb, p-type 4370
InSb, photocell, nuclear radiation exposure 14881
InSb, relative quantum efficiency 2905
InSb, single-crystal i.r. detectors 8840
InSb, spectral distrib. 16039
K cyanides of Fe, Mn and Ni 4372
KBr, electrolytically induced 6054
KCl, colloid centres 11634
KCl, F-centre, decrease on bleaching 13553
KCl, F and M centres 20937
KCl:Tl phosphors 8016
NaBr, colloid centres 11634
NaCl, coloured 18072
NaCl, X-irrad. and heat treated 6142
PbS, cells, current fluctuations 7964
PbS, cells, effect of temp. on response 7965
PbS, cells, nuclear radiation exposure 14881
PbS, chemically precipitated 619
PbS, films, hole mobility and crystal size 20935
PbS, films, noise and signal response 7963
PbS, layers, 10 Gc/s 18050
PbS, layers, p—n junctions 20934
PbS, i.r. photocells, polycrystalline 7962
PbSe, i.r., polycrystalline 7962
PbSe, spectral response, crystal size effects 11727
PbTe, i.r. polycrystalline 7962
PbTe, photocell, nuclear radiation exposure 14881
PbTe, photoresistors, stoichiometric preparation 9996
PbTe, spectral response, crystal size effects 11727
S, films on glass, effect of Hg vapour 18073
S, monocrystals, 4400-9000 A 7918
Sb_2S_3, amorphous layers, mechanism 15949
Sb_2S_3, photoelectronic analysis 6139
Sb_2S_3—Bi_2S_3 films, spectral distrib. 601

Photoconductivity — contd
Sb_2Se_3, 400-1200 mμ 620
Sb_2Se_3, photosensitized, i.r. response 18061
Sb_2Se_3, spectral distrib. temp. depend. 599
Se, amorphous films 15991
Se, cells, thermodynam. props. meas., differential microcalorimeter 10813
Se, effect of Tl and TlCl 7966
Se, hole photosensitivity 6134
Si, charge-carrier diffusion length 9965
Si, n-type monocrystals 6141
Si, p—n junctions, photoresponse 18031
Si, photocells, reduction of reflection coeff. by SiO_2 layer 10031
Si, photo-ionization, quantum yield, wavelength and temp. depend. 15993
Si, quantum efficiency, spectral and temp. depend. 13638
Te, photocond. decay, carrier recombination and trapping 6143
Te, single-crystal i.r. detectors 8840
Tl_2S, i.r. photocells, polycrystalline 7962
$Tl_2Se.As_2Se_3$ glasses 15902
ZnO, O photodesorption study, temp. depend. 18074
ZnS, monocrystals, high-voltage photoemission 15995
ZnS:Gd, trapping, paramag. resonance detection 11729
ZnSe, photoelec. and opt. props. (400-800 mμ) 13671
ZnSe—CdSe, spectral response 15996
ZnTe, photoelec. and opt. props. (400-800 mμ) 13671
Photoelasticity (See also Double refraction, mechanical).
analysis from Newtonian theory of axial elasticity 694
bending waves, exponential near fields 14715
improved method 4971
mech. damping—illumination, correl. for CdS plate crystals 1715
polymers, study 5187
stroboscopic method for watching stress propagation 2143
technique for studying plane states of strain 19435
use in meas. of Poisson's ratio of birefringent materials 16196
Araldite, at l.f. 8109
Araldite, meas. of characteristics 12063
barite, dispersion 6170
gelatin 16194
gelatine—glycerin, as a photoelastic material 907
polymethyl methacrylate 4398
styrene derivatives and copolymers, optical constants 8257
AgCl crystals, study of reverse bending 21110
Ge, coeff. meas. 7996
Si, coeff. meas. 7996
Photoelectricity (See also Photoconductivity; Photovoltaic effects).
atomic photoeffect, applic. to γ-ray intensity determ. 7688
atomic photoeffect, at high energies, total cross-section calc. 5892
atomic photoeffect, K-shell, relativistic, ang. distrib. 17718
atomic photoeffect, from L-shell, calc. 15678
atomic photoeffect, Sauter theory, connection with bremsstrahlung as inverse process 2513-16
cascade intensifiers, image fluctuations 8785
counter-tube cathodes, change of spectral yield curve during operation 9229
detectors, relative spectral sensitivity 16824
at high energies, 1s-electron emission, total cross-section 4177
image intensifier using secondary electron emission 10757
interference band recording 16895
metal films, photoemission 9075
metals, photoelec. yield oscill. in mag. field 11719
metals, solar extreme u.v. exposure, analysis of photoelectrons 10451
organic dyes, solid films, freq. depend. 17028
photocathodes, commercial types, absolute spectral response 15054
photocathodes and dynodes, temp. depend. 2380
photocathodes, local sensitivity, effect on output pulse 2381
photocells, efficiency, solar energy utilization 9987
photocells, i.r., semiconducting single crystal 266
photoelectric camera, for astronomical work 18591

Photoelectricity – contd
photoelectric cross-sections, calculation 7687
photoelectric detector, count distribution, rel. to photon fluctuations 5124
photoelectric double-slit interferometer for solid film investigation 3641
photoelectric effect, relativistic, Hall's formula 20540
photoelectric measurement of galactic distances 18835
photoelectric observations with Michelson interferometer 16887-8
photoelectric photography 18592
photoelectric photometer at Turin observatory 18586
photoelectric photometry in astronomy 18595
photoelectric recording of time-resolved spectra 3631
photoelectric spectrophotometer 3632
photoelectron polarization by magnetic materials 2379
photoemission from compound photocathodes, effect of light polarization 19722
photoemissive cells, excess photon noise in single beam meas. 14954
photoionization in atomic L-shells 9775
photomultipliers, characteristics 7140, 17031
photomultipliers, counter symposium 15057
photomultipliers, detection of Raman spectra 3618
photomultipliers, effect of temp. 17151
photomultipliers, fast, and coincidence system for time meas. 19725
photomultipliers, fatigue in scintillation counters 17152
photomultiplier, FEU-13, optimum regime 7143
photomultipliers, local sensitivity 19726
photomultipliers, luminescent effect in tube faces 2462
photomultiplier, for nanosecond region 19723
photomultipliers, noise reduction 3731
photomultipliers, optimum optical density for "shot" noise limited spectrophotometers 1034
photomultipliers, pulse dispersion reduction 17143
photomultipliers, resistance strip magnetic for extreme u.v. 7144
photomultipliers, response speed 19724
photomultipliers, for scintillation counters, characteristics 17138
photomultipliers, for scintillation spectrometry 3789
plane of polarization, rotation, meas. method 19457
proton current meas., by photosensitive devices 20142
Raman line intensity meas. 16864
recording of interference bands 16896
scintillation multipliers, resolving power 3790-1
semiconducting emitters, various, comparison 19719
semiconductor cells as i.r. detectors 8838
semiconductors, analysis of spectral sensitivity 6130
semiconductors, photomagnetic e.m.f., edge effect removal 6132
solar batteries 5265, 14950
spectral distrib. meas. 7141
stabilizer for magnet currents 2308
technique for measuring eye movements 3379-80
X-ray photocell 5340
alkali antimonides, properties 20927-8
alkali halides, photoelectron energy distrib. 17029
alkali halides, selective photoemission 5339
alkali metal photocathodes, response to plane-polarized light 19721
pinacryptol, films on Ni 19718
pinacyanol, films on Ni 19718
Ag–Cs photocathodes, thermo- and photoemission maxima 5338
Ag–O–Cs photocathodes, i.r., preparation and props. 9073
AgI layers, quantum efficiency 15055
Al, during anodic oxidation, assoc. with electroluminescence 9065
Bi films 9074
Bi_2Te_3, and work function 13636
CdS films, electron irrad., photoshift 7956
CdS photocathode, for u.v. integrating meter 12472
CdTe films, photoelec. props. 15986
CsI, photoelectron energy distrib. at 11.3 eV incident energy 17029
CsSb and Cs_3Sb, photoelec. emission and effect of O_2 11709
Cs_3Sb, structure in energy distrib. of photoelectrons 1544
CuI layers, quantum efficiency 15055

Photoelectricity – contd
GaAs, and work function 13636
Ge, amorphous and crystalline, with Ba oxide films 11725
Ge, with Ba oxide layer, V–I characteristics 11724
Ge, Cs-treated, photoemission of electrons 7139
Ge, field induced photoemission and hot-electron emission 17030
Ge, photomagnetoelectric effect, spectral distrib. 13635
Ge, surface recombination rate measurement 18003
Ge, and work function 13636
InSb, and work function 13636
K_2Sb, structure in energy distrib. of photoelectrons 1544
NaCl, coloured, photoelectric electron emission 18072
Ni films, photoemission, effect of oxygen 19720
Ni oxide films, photoemission, effect of hydrogen 19720
Pb, atomic photoelec. effect at high energies, calc. 5891
Pb films 9074
Sb photocathodes, with alkali metals, spectral characteristics and sensitivity 15056
Se, photocell, int. resistance and capacitance at low temp. 7067
Se, photometer elements 1147
Si, amorphous and crystalline, with Ba oxide film 11725
Si, energy converter 20938
Si, photoelements, energy diagrams 9997
Si, photoemission induced by internal elec. field 12627
Sn films 9074
Ta, elec. field depend. 1148
TiO_2 (rutile), electron transfer in, onset of field emission 13579
ZnTe films, photoelec. props 15986

Photographic light sources
shadowgraph, 450 J spark discharge 14994
Al–O combustion reaction 8790

Photographic materials (See also Nuclear track emulsions).
chemical and γ-radiation fog 12731
colour, graininess and chromaticity discrimination 185
drying by vacuum desiccator 19238
"Electrofax", properties, review 4387-8

electrophotographic, using electret layers 10001
emulsions, contrast transfer function of light diffusion in emulsions 12502
emulsions, diffusion halo 8813
emulsions, effect of β-rays 12733
emulsions, fine-grained, prep. 12737, 12740
emulsions, fine-grained, for ultrasonograms 14746
emulsions, Fourier analysis of adjacency effect 3662
emulsions, grains, dark cond. and photoelectronic carriers 1616-17
emulsions, thickness meas. 1049
emulsions, thickness, resolving power depend. 12504
emulsions, ultra-fine, polyvinyl-alcohol based, effect of Cl^- 12739
films, resolution determination 14860
granular nature of emulsions, density meas. limitations 6931
granulation of plates after exposure to electrons 12730
grey photographic film, thickness meas. 6941
nuclear emulsions, reduction of spurious scattering 15207
plates, sensitization for u.v. 16904
protective paper, effect on X-ray diffraction photographs 12014
sine-wave response 19397
spectrophotometry, use of photometric sphere 8793
wavelength-independent dosimeter film 19978
X-ray microscopy, Ag-activated nitrocellulose as recording material 21254
Ag halides, irradiation in electric field, Ag nuclei growth 3663
AgBr emulsion, latent image of incident fast electrons 14861

sensitivity
density–exposure curves, for use with image intensifier 19467
density–intensity calibration in electron diffraction studies 10791
distribution, grain size depend. 19486
dye sensitizers 10358
to electron beams 12732
emulsion response to i.r. 8812
hypersensitization with triethanolamine 12738

Photographic materials — contd
sensitivity — contd
hypersensitization with various organic cpds. 12744
ionization relations determined for particle tracks 2469
nuclear emulsions, hypersensitization 19984
sensitization, with various chemical complexes and cpds 12745-6
wavelength dependence of Λ-transformation 5189
to X-rays, ultra-soft, of certain films 8815
Photographic process (See also Photochemistry).
diatomic reaction theory 19464
double exposure, effect of second on first 5190
electrophotographic image formation on photo-electrets 10021
electrophotographic processes, ZnS and ZnO films 13661
image formation, effect of lens—sensitive material system 3601
image quality, Fourier spectral analysis 19370
latent image, due to β-rays, effect of temp. 15214
latent image, due to light and β-rays, effect of temp. 12764
latent image, formation by charged particles 12780
latent image, formation by fast electrons in AgBr 14861
latent image, formation by light and elec. field pulses 12506
latent image, inhibition of fading with triethanolamine 12738
latent image, nuclear emulsions, due to light flashes 12763
latent image, repression, effect of H_2SO_4 and KBr 15213
latent image, thermally-induced fading, activation energy 10789
systems analysis, three-stage model 3660
AgBr, Hall mobility of holes 6955
AgCl, with CuCl traces, e.s.r. study 19465
AgCl, darkening and photoconductivity 20940
development
adjacency effect, contrast transfer of periodic structures 12503
contact development and grain structure of tracks 12781
corrosion during fixing, avoiding 194
developability of Ag halide crystals, effect of surface defects 4292
developing device 12748
diffusion of developer, effect of ultrasonics 8816
discrimination between particles at high γ-intensities 202
emulsion grains, print-out process 8814
ferro-oxalate-based developers, props. 15215
nuclear emulsion plates, apparatus 19986
nuclear emulsions, development in domestic refrigerator 15212
nuclear emulsions, effect of processing on spurious scattering 19982
nuclear emulsions, effect of temperature and pH of developer 12774
nuclear emulsions, effect on track resolution 12778
nuclear emulsions, effect on track structure and fog 5188
nuclear emulsions, gamma background eradication in nuclear emulsions 17165
nuclear emulsions, processing 17170
nuclear emulsions, processing of given volume 193
nuclear emulsions, reduction of spurious scattering 15207
nuclear emulsions, tanning development 192
nuclear emulsions, thick, compact processing plant 15211
theory, review 12505
use of diphenyl iodonium nitrate 12756
variation of emulsion background fog with pH 191
Photography (See also Cameras; Cinematography; Lenses, photographic; Radiography).
angular variation of exposure for a Lambertian source 3597
"average" outdoor conditions, illum., contrast, spectrum and colour 3661
densitometer wedge for low optical density measurements 6902
faint sources, contact tube 6957
moon, far side (book) 6569
photoelectric, astronomical use 18591-2
resolving power, as function of emulsion thickness and lens aperture 12504
wide angle tracking 8781
applications
aurora, colour films of 3 layer subtractive type 16462
contact photography, use in study of feeble light sources 6957

Photography — contd
applications — contd
eye movements during convergence and divergence 14347
metals, optical constants 16031
particle photography, 1957 and 1958 international conferences 2260-1, 17169
pulse amplitude analysis 5245
recording, electronic information from instruments 17162
recording, in mass spectrography 12806
sea surface 14788
smoke plumes, quantitative study, equi-densitometry 5191
solar, from manned balloon 16540
solar, λ3500-9000 A 18768
stationary sound pressure field meas. 16793
u.s. fields, stationary, acoustic image conversion 6884
xerography, reciprocity failure 6956
colour
aurora photography, using new film 4812
densitometry for colour print evaluation 2259
Land's experiments explained mathematically 3375-6
Land's two-colour system 3374
X-ray dosimetry 349
high-speed (See also Cinematography, high-speed).
applic. to pulsed gas discharge investigation 9041
optimum frame rate for given phenomenon 2262

recording time-resolved spectra 6936
review of methods 19463
shock-excited surface deformations in solids 19258
shock waves, in liquids, with compressed A flash source 19127
spark shadowgraph technique, improvement 189
spectrograph, mechanical shutter for extremely short exposure times 16862
splash of water drop, falling into water—glycerol mixture 8644
use in studies of ultrasonic wave scattering 12462
infrared
emulsion response 8812
Photometers (See also Spectrophotometers).
airglow, portable 8416
for auroral studies 791
bridge circuit for absorption meas. 6911
Chalonge microphotometer, improvements 19390
daylight factor meter 14784
filter photometer for reflection meas. 2223
light-intensity meter, wide-range log circuit 148
for luminescence studies 19392
microphotometers, photoelec., for single microcrystal studies 6161
microphotometers, direct intensity curve recordings, astronom. applic. 4844
modulation photoelectric type, high sensitivity 19357
photoelectric, double r.f. modulation 14781
photoelectric photometer, Turin observatory 18586
selenium, design, properties 1147
Wollaston, polarization, for astron. telescope 16515
Photometry (See also Brightness; Densitometry; Illumination; Spectrophotometry).
angular variation of exposure for Lambertian source 3597
auroral arc observation 6470
automation of measurements on nuclear emulsions 17164
cepheids in Small Magellanic Cloud 18831 [8764
direct-reading, intensity meas. by thermistor bolometer
effect of filter pass-bandwidths on relations between different systems 8763
flash intensity meas., digital pulse integrator 8789
of flash tube, by high-speed streak camera 169
homochromatic, neutral filter grating 5129 [6920
microphotometry, meas. with interference microscope
null modulation method, review 3596
photoelectric, in astronomy 18595
photoelectric, diffuse nebulae 6616
photographic, grain size importance 150
photon counters for u.v. 3598
photon detection, time-correlated, by coincidence counter 12468 [8776
resolution of two sources of strongly differing intensities
stellar, characteristic curve in focal method 18795
stellar, photoelectric, As Eridani 12311
stellar, photoelectric, wide pass-band, role of absorption lines 14440

Photometry — contd
stellar, R Canus Majoris 14441
stellar, three-colour, AO Cassiopeiae 12310
stellar, use of emulsion thickness for intensity meas. 1049
three-colour, of black body 8513
toroidal fluorescent lamps, light distrib. 14785
tungsten lamps, radiant intensity derivation 205
use of integrating sphere; distinction between absorption and scattering 5134
Venus, in u.v. and i.r. 8490
xerographic, reciprocity failure in ZnO and Se 6956
light sources
extended, light collection and calibration 10747
low-level, for photoelectric photometry 19358

Photons (See also Cosmic Rays, photons; Gamma-rays; Nuclear reactions, photons; X-rays).
absorption in liq. hydrogen, 155-255 MeV 11149
absorption by nuclei, oscillator model 15588
atomic photoelectric effect for arbitrary photon polarization 2513
beams, fluctuations, rel. to photoelec. detector count distrib. 5124
Compton scatt. on protons, π^0 decay as intermediate state in 5582
correlation, polarization and resolving time effects 10745
cyclotron radiation from relativistic particles, collision effects 15316
decay into two photons in mag. field 2510
detection, with Ge phototransistor, i.r. 8831
detection, visible to i.r., theory 8830
elastic scattering, by nuclear Coulomb field 20096
elastic scattering, polarization effects 17278
electron-pair creation, quantum field theory 7277
electron–photon cascades, diffusion 7315
electron–photon cascades, factorial moments, asymptotic behaviour 5545
electron–photon cascades, initiation 9462
electron–photon showers, in air and Al 20264
electron–photon showers, in Pb, lateral and ang. distrib. 9472
extension of functional theory 5488
extreme u.v., detection with photomultiplier 7144
fluctuations in photon streams 5123
forward scattering by bound electrons 9325
Furry theorem 12825
fusion with electrons, interaction energy 7314
Green's function, Redmond procedure 5529 [20095
high-energy, charged-particle beam production, theory
infrared divergences 11089, 18953 [343
interactions, current conservation and low energy limit
interactions, $\gamma + d \rightarrow p + p + \pi^-$, at 1 BeV, cross-sections 17399
interactions, $\gamma + p$, at 1.1 BeV, evidence against B^0 prod. 17363
interactions, $\gamma + p$, at 1.1 BeV, multiple meson prod. 13039
interactions, $\gamma + p \rightarrow \pi^0 + p$, 900-1200 MeV cross-sections 15415
interactions, $\gamma + p \rightarrow \pi^0 + p$, at high energy, recoil proton polarization 17397
interactions, π^+ production on H, 600-900 MeV forward diff. cross-sections 17398
lead converters, efficiency for 50-500 MeV 1236
magnon interactions 13725
as massless particle, rel. to space reflection 17274
meas. of small sources, effect of ionization chamber size 17136
momentum effect in magneto-optics of excitons 7997
monochromatic source, using positron annihilation 7320
as neutrino–antineutrino system, 4-component wave-function 3944
nonlinear electromagnetism, functional theory of particles 3914
optical transition radiation from protons entering metal surfaces 20099
packets, theory and Lennuier effect 14780
paradox of Einstein, Podolsky and Rosen 14517
photodetachment cross-section for H^- 14960
photodisintegration of deuterons 5622
photon gas, mixed with material gas, relativistic dynamics 953
photon propagator, independence of physical charge in high-energy limit 20027

Photons — contd
photon propagator, structure theorem 323 [12822
photon propagation function in quantum electrodynamics
production of π^+ on D at 500-1000 MeV 15413
production of π^0-mesons on C at 160-200 MeV 13044
production of π^0-mesons on protons at 245 MeV 13045
propulsion of space vehicles 12334
resonance in deformed nuclei 5766
scattering, on deuterons, 50-120 MeV, corrections to impulse approx. 12891
scattering, on deuterons, quasi-elastic 15315
scattering, on electrons 7295
scattering, on Hg atoms, polarization, calc. 17692
scattering, in homog. mag. field 322
scattering, by K-level electrons of Hg 15314
scattering, on nucleons, dispersion relations 7319, 7296
scattering, on nucleons, one-meson approxm. 11132
scattering, on protons, dispersion relations 11130
scattering, unification of equal-frequency photons in presence of matter 7316 [12820
self-mass, formal paradox in quantum electrodynamics
single beam meas., photoemissive or photoconductive cells, excess noise 14954
"size", quantum electrodynamics at small distances 11077
from slowly moving particle system, work done against radiation field 5530
spin density, in classical e.m. theory 3834
superlight-velocity optics 7326
time-correlated, detection, by coincidence counter 12468
u.v. radiation counters 3598
velocity meas. in vacuo, energy depend. investigation 12467
weight, apparent, det. using Fe^{57} γ-ray resonant absorption 10570

Photophoresis
No entries this year.

Photovoltaic effects
Becquerel effect in binary compounds 9985
Carnot cycle derivation 16968
cells, cosine correcting device 19598
chlorophyll and analogues, on ZnO, CdS, Pt 1676
classification 20931
contact potential effect 20930 [13629
exciton polarization, by low elec. fields, H-like model
fast-response photocapacitors 622
photoelectromagnetic effect 1683
photoelectromagnetic effect, in anisotropic cubic crystals 15982
photomagnetic effect, applic. to minority carrier lifetime meas. 15981
p–n junction, non-uniformly irrad. 11721
p–n–p phototriode, relaxation processes, at low illumination 4367
semiconductors, photoelectromag. effect, carrier lifetime det. in presence of trapping 2865
semiconductors, pressure dependence 2866
semiconductors, surface effects 18064
solar batteries 14950
solar energy conversion, effect of temperature 7967
solar energy converters, efficiency of various semicond.
solar energy converters, test lamp 10759 [2312
AgCl, Dember effect (crystalline photoeffect) 20941
Bi, photoelectromagnetic effect 6137
CdS crystals 7959
CdS, evap. layers, barrier effect 20929
CdS:Cu, hole conduction 4356
CdTe films, at high voltages 2312
Cu–CdS cells, photoemission 9990
Cu_2O, influence of heat treatment 13633
GaAs, exciton polarization 13629
GaAs, junctions, solar conversion 16969
GaP, p–n junctions 13708
Ge, external elec. field effect 15924
InSb, detectors, detectivity and preamplifier details 14683
InSb, In and Cd alloyed p–n junc., photovoltaic cell 11726
InSb, 1-7μ photoelectromagnetic effect 19499
InSb, p–n junctions, i.r. sensitivities 18069
Nb oxide films 9998
PbS, films, with electron bombard. 15897
PbS, layers, electron microscope study 18070
Se, barrier-layer cells, 16 types, slow response 2909
Se, photocell, e.m.f. in open circuit at low temps 13637
Si, n-type, ext. elec. field effects 594

Photovoltaic effects – contd
α-SiC, photoelec. props of alloyed p–n junctions 20939
Ti oxide films 9998
ZnS, effect of polarized light on photocurrents and photovoltages 2907
Physical effects of radiations
amorphism in crystalline cpds., by electrons 1609
apparatus, 1 MeV electron accelerator 19821
crystal defect production by local melting 20852
crystals, focusing effect of lattice structure, appl. to proton-bombard. of Au 13564
damage to Mylar plastic 2477
damage to plastic scintillators 663
damage in solids, dynamics 20856
displacement threshold, rel. to sputtering threshold, for 20 metals 12653
engineering materials 7674
f.c.c. lattices, focusing collisions, dislocations 1585
ferromagnetics, neutron irradiation, mag. props. modification 8058
fissile material, growth of gas bubbles 9903
fission recoil effects 20509
i.r detection elements, nuclear radiation exposure 14881
influence on spark breakdown 7106
lattice damage, directional distribution 1608
mechanical props. of irradiated solids 4545
metals, defect production 7904
nuclear resonance, prod. by acoustic waves 13125
polymers, permeability to gases, reversible changes
pulse irradiation of semiconductor devices 583 [12064
radioactive heating of moon's interior 14396
radioluminescence from β-radiation 2962
range of radiation-induced primary knock-ons 9922
reactor fuel alloys, irradiation effects 12084
review 20849
semiconductor defects 20850
solids, radiation damage, slowing-down processes, classical scatt. theory 17686
solids, survey. 6064
solids, theory of displacement cascades 2820
sonoluminescence 19163
Szilard–Chalmers reaction, radiation damage, isothermal annealing 2837
transition elements, pile-irradiated, at low temp. 2831
use of atomic reactors 20523
alkali halides, formation of interstitials, theory 1593
diamond, electron bombard., ionization effects 9925
glass, coloration prevention 8459
glass, irrad. in nuclear reactor 1759
glass, radiation shielding, discoloration 8254
glass, surface structure, effect of ultrasound 21215
glycine, free radical production 499
graphite, effect of interstitial compounds 13567
graphite, hardness changes 11988
graphite, neutron-bombarded, stored energy 11649
haemoglobin, ultrasonic irrad. 18528
lactose, free radical production 500
on malonic acid 13571
mica, by fission products, track visualization by electron microscope 19979
noble metals, damage threshold energies at 10°K 6066
nylon, strength props. of drawn and undrawn 11980
polyethylene, e.s.r. study of radical species 16176-7
polyethylene, effect on contact charging 10860
polyethylene, γ-irrad., X-ray study of action of heat 4681
polyethylene terephthalate, biaxially orientated, reactor irradiation, strength decrease 18274
polyethylene terephthalate, reactor irradiation, tensile strength 18273
polyvinyl chloride, elec. props. change 4310
quartz, thermoluminescence 16117
quartz and fused silica, optical absorption 16060
quartz and vitreous silica, surface refractive index changes 13569
sapphire, size change 1895
silica, gross structural changes 15877
silica, fused, radiation-induced coloration 16073
silica gel, colour centre prod. 4299
silicone dielectrics, γ-irradiation 2173
on β-succinic acid 13572
Teflon, neutron-irradiated, F^{19} n.m.r. line width 4529
Ag, colloidal, bleaching by 540–650 mμ light 9913
Physical effects of radiations – contd
AlFe, pile-irradiated, annealing study of magnetic anisotropy 3044
B_2H_6, at low temp., effects of r.f. discharge 1914
$BaTiO_3$-type ferroelectrics, temp. depend. dielec. props.
CdS, u.s. attenuation, effect of light 11574 [4384
Cl_2, optico-acoustic effect 19215
Cu, damage, point defect migration, thermally activated
Cu, calc. 20856 [17925
Fe, neutron irradiated, resistivity 20864
Fe–Ni alloy orientation superlattice formation in mag. field 13769
Fe–Ni alloys, neutron-irradiated in mag. field 10168
GaAs, conduction pulses on γ-ray bombard. 17287
In_2S_3, elec. conductivity 2898
Ir hexachlor-complex, Szilard–Chalmers reaction, Ir^{189} recoil species 12109
KCl, radiation-induced precipitation sites 17978
KCl, single crystal, u.v.-irrad., electron microscope study 18424
Mo, irradiation damage and recovery 7906
Mo, lattice expansion, recovery 20851
Na–CMC polymer soln., viscosity change 2170
NaCl, vacancies creation, detection by F-centre coloration
NaCl:Ca, X-irradiated, thermal props. 2833 [1594
Nb, irradiated, mech. props. 16232
Ni, neutron-irrad., K-absorption spectrum 13471
NO_2, optico-acoustic effect 19215
S^{35}, in $BaSO_4$, effect on solubility 14646
U, dimensional instability mechanism 11650
α-U, irradiation-induced growth 13938, 18308
U, swelling due to heating after irradiation 8265
U, tensile props. 10271
U alloys, irradiation effect on corrosion resistance 14068
U–Cr alloy, dimensional stability during burnup 14070
U–Zr–Nb reactor fuel, water corrosion after irradiation
W, irradiation damage and recovery 7906 [14069
ZrO_2 solid solutions, induced phase transformations
Physics (See also Nuclear physics). [21211
anniversaries (in 1960) 6640
in China, 1949–59 review 3432
education of 19th century scientist 856
engineering curricula, revision 857
experimental science projects in science fairs 6639
graduate examinations 22
nature of physics, and its relation to other disciplines 3431
Physical Society Exhibition (1959 and 1960) 3434, 8534
punched cards for personal ref. files 18896
teaching philosophy 6638
truth, meaning of 27
two aspects of science (British Association, presidential address) 16558, 18895
Physics fundamentals (See also Cosmology; Field theory, classical; Field theory, quantum; Fundamental particles; Indeterminacy; Mechanics; Parity; Probability; Quantum theory; Relativity; Thermodynamics; Units).
action as space coordinate 10553
antiparticles, sign of inertial mass 2503
axiomatic formulation of theories 863
boundary value problems, linear 2nd-order partial diff. eqn., soln. 6642
causality, requirement for systems with constrained inputs 4960
conservations laws of charge, baryon number and lepton number, exp. basis 5518
conservation laws in generally covariant theories 8556
continuum mechanics and irreversible thermodynamics
force, unified field with physical constants [6689
eqn., 4926
gravitational and inertial mass 6641 [14485
inertia, Sciama–Park theory, fundamental constants
interrelationship of physical quantities 4924
invariance principles, logical foundations 4927
irreversibility, theory 6688
Larmor's "aether and matter" reconsidered 16559
law of decay and first moment of energy distribution 14487
matter and point set theory 6643
momentum and conservation laws 4923
multipole fields 30
physical laws, mathematical forms 858, 14484
Poincare's epistemological sum 14486

Physics fundamentals – contd
potential surface discontinuities, sphere and circle theorems 12347
solution of basic problems by geometry (book) 10548
space and time reflections in relativistic theory
spinor space, differential eqns. of [5476-7, 5491
physics 12348 [16511
Sturm–Liouville eqn., canonical and Hamiltonian formalism
super-weak interactions, stability of matter 20035
symmetry in laws of nature, discussion 17209
time internal, definition using Newton's 1st law 4985
time-reversal, invariance in β-decay 2651, 2644
time-reversal, invariance, test of, search for μ-meson elec. dipole moment 9393
time-reversal, in strong interactions 2488
Wiener–Hopf eigenvalue eqn., solution in finite and infinite ranges 12233
Wiener–Hopf problems, "kernel" approx. 864
Physiology (See also Biological technique and instruments; Blood; Hearing; Vision).
muscle research, capacitance transducer 21403
neural inhibitory units for eye and skin 18566
neurophysiology, gating system for photographic printout of counts 12216
signal detectability as interpretive tool for phycho-physical data 16502
skin, vibration sense, dynamic properties, l.f. investigation 16499
vibrations, effects 8727
Piezoelectric oscillations
crystals, sources of sound 14733
pickup for rubber viscoelastic props. det. 10270
plate, idealized and loaded, response to elec. signals
quartz cylinder, in torsional mode, liquid helium [12460
viscosity meas. 16937
quartz oscillators, freq. rel.to Cs time standard 10547
quartz plates, analysis 19254 [19255
quartz plates, bending, longitudinal and thickness vibrations
Piezoelectricity (See also Electrostriction).
in acoustic transducers, review 5090
anisotropic media, transformation of consts. 6290
crystal film thickness monitor 3481
digest of literature (1958) 2300
electrets, theory, effect of electrode–specimen gap 18105
ferroelectrics, polarization meas. 7977
gravitational wave generation 6655
homogeneous medium, various props., space–time variations 10024
meas. of coupling coeff. and Q of ceramics 16029
photoelectrets 11747
reverse piezoelectric effect for recording interferometer scanning 16877
sinusoidal pressure generator 3586
synthetic materials, review 7988
various (49) substances, crystallization and props. 641
anthracene 11747
cancrinite 634
quartz-containing rocks, field measurement 2928
Rochelle salt, rel. to optico-acoustic effect 20972
Rochelle salt, piezoelec. polarization and domain structure 13664
resorcinol 633
L-rhamnose monohydrate 13650
terpine monohydrate crystals, properties 13952
thiourea 2921 [1714
titanate system, mixed, props., temp. and press. depend.
Ba, Sr and Pb metaniobates in Na niobate 630
$(Ba,Pb)(Ti,Sn)O_3$, props. 21236
$BaTiO_3$, rel. to depolarization charge 10019
$BaTiO_3$, effect of pressure 11748
CdS 16027
CdS, plate crystals, investigation of mech. props. 1715
$Ga_{2-x}Fe_xO_3$, simultaneous with ferromagnetism 11825
GaSb, piezoresistance, pressure depend., n-type 9977
Ge, piezoresistance, pressure depend. p-type 9977
Ge:Sb, piezoresistance, 4-7°K 20903
InSb, piezoresistance, pressure depend., intrinsic and p-type 9977
$MgSO_4.7H_2O$ crystals, temp. depend. 11749
$PbNb_2O_6$–$BaNb_2O_6$–$SrNb_2O_6$ 6154
Se, polycrystalline samples, temp. meas. 5095
$(Sr,Pb)(Ti,Zr)O_3$, props. 21236
ZnO 16027

Piles, nuclear fission (See Nuclear reactors, fission).
Planets (See also Astronomical spectra, planets; Solar system).
asteroids, connection with zodiacal light 18721
asteroids, rapidly rotating, formation 6571
atmospheres, i.r. reflectivity 18705

in arc discharge, decay theory 10893
arc discharge, h.v. electron extraction 15073
argon jet, heat transfer rates 2371
argon 'plasma stream' generation, 15000°K 1125
argon, r.f. discharge, refractive index meas. 3778
argon, thermal and electron properties 1126
in astrophysics 3403
axial stability and localization of constrictions in alt. e.m. field, calc. 15017 [10930
backward wave propag., in air-bounded non-mag. cylinder
ball lightning 16490, 21393 [16461
beams, density modulated, in mag. field, aurora theory
Boltzmann–Vlasov eqn., Lagrangian formulation 1138
Boltzmann–Vlasov eqn. for quantum plasma 15006
bremsstrahlung losses, e–e and e–ion collisions 15026
broadening and shift of spectral lines of He and A 13417
bumpy torus 7123
charged-particle drift, in const. grad. mag. field 5314
charged particles passing through, energy losses 10906
Cherenkov radiation in, at high temp. 1268
circuit dynamics 5303
circular conductor, in mag. field, equilibrium configurations 9168
in coil, impedance calc. 10900
cold, interaction with guided e.m. waves 17017 [16532
cold planetary body, condensed matter, physical state
colliding streams, mutual interactions, perturbation theory 12605
collision-free, hydromagnetic disturbances 19679
collision-free shocks, thickness and speed meas. 10904
collision of two plasma streams, stability 17013
collisionless Boltzmann eqn., soln. 16621
completely ionized, test particles 3774
completely ionized, in variable mag. field, kinetic eqn. soln. 9033
compression in axially-symmetric mag. fields 2367
conductivity and equation of state studies 14984
conductivity, microwave, in mag. field 12607
conference, Uppsala (Aug. 1959) 2314
confined hydrogen plasma, relativistic electron beam device for fusion 19670
confinement and energy balance in a rotating plasma 19667
confinement by electromagnetic waves 7121
confinement by external magnetic fields 3763
confinement, heating by magnetoacoustic waves 11035
confinement, helical conductor in torus or linear system 16997
confinement in mag. field rel.to thermonuclear fusion 3757
confinement, magnetic mirror, rate of particle loss from ends 15008
confinement, by r.f. e.m. fields 19666
confinement by standing e.m. wave 12610
confinement, for thermonuclear reactions 7677
containment, heating and energy-loss reduction, mirrors and external injection 259
containment, by mag. field 255
containment by r.f. and d.c. field combinations 5322
containment, by travelling-wave focusing 1135
convective instability 15013
and cosmical electrodynamics 16520
Couette flow, in mag. field 19652
Coulomb scattering of charges in strong mag. field 19683
Coulomb scattering in magnetic field 19618
current constriction mechanism 5302

Plasma – contd [19685
current transport eqns., effect of ionization of molecules
cyclotron radiation emission, spectral and ang. distr. 2500
cyclotron radiation from hot plasma 3773
cyclotron resonant, harmonic generation 258
cylindrical gaseous conductor in mag. field, stability 5313
cylindrical, with volume current, stability 10911
damping of satellite wake in ionosphere 15129
density profiles, microwave determination 5321
detonation-generated, propag. characteristics 1133
deuterium, directed flow into vacuum magnetic cusp field 15033
deuterium, fusion experiments 17645
deuterium, high-current, in longit. mag. field 5312
deuterium, ion cyclotron waves 15046
deuterium, moving magnetic field behind shock front 1196
D, in Scylla, emission of neutrons, protons, tritons, light, and X-rays 13385-7
diamag. moment, by spin resonance technique 19693
diffuse linear pinch, hydromagnetic stability 15014
diffusion across magnetic field 19668
diffusion break-up in mag. field 17015
diffusion processes, carrier distribution 7111
diffusion processes, column in longit. mag. field 15023
in discharge tubes, plasma potential and noise 19630
dynamics and electric field correlation 17011
effect of cont. elec. field, particle distrib. function 1130
effective cross-section definition, application 10604
electrical conductivity, h.f., negative values 15030
elec. cond. at high temp. 19691
electric micro-field, Fourier analysis 10901
electrodynamic acceleration 15037
electro-negative, Langmuir probe operation 9039
electron, Boltzmann–Vlasov eqn. 15006
electron,Bohm–Pines theory, subsidiary conditions 11595
electron density amplification in magnetic bottle 3761
electron density from group velocity 10913
1-electron density matrix kinetic eqn., graphical 20086
electron density meas. simultaneously with confining mag. field meas. 12616
electron diffusion, in mag. field 1128
electron energy distrib. 7117
electron energy distrib., meas. by triple probes 1134
electron excited, beam–plasma interaction, energy losses
electron gas, classical, in positive ion distrib., [10923
thermal equilibrium 15019
electron–hole within semiconductor, magneto-oscillatory effect 18057
electron and ion runaway 3775
electron–ion, charge-particle diffusion, across mag. field 17016 [13507
electron–ion gas at high density, electrostatic interaction
electron, in mag. field, complex Doppler effect 9052
electron, in magnetrons, instability 9081
electron and particle densities behind hypersonic shock waves 16775
electron temperature and plasma density, direct c.r.t. display 19688
electron temp., near anode, in l.p. discharge 9037
electron temp., press. depend., effect of ionization of molecules 19685 [10903
electron velocity distrib., effect of interelectron collision
electron velocity distrib., inelastic collisions effects 9044
electron velocity distrib. in strong elec. fields 9045
e.m. field penetration 10908
e.m. pulsations, slowly varying, propag. 9180
e.m. radiation, from rotating electrons, in mag. field 5316
e.m. wave absorption, cyclotron frequencies 12613
e.m. wave absorption, non-resonant 9058
e.m. wave damping in mag. field 2366
e.m. wave propagation and production 3766
e.m. wave propag., in homog. mag. field, slow waves 9055
e.m. wave propagation in, during motion in ionized gas, wave degeneration at l.f. 19910
e.m. wave propag. in plasma moving in mag. field 12708
e.m. wave propag. in plasma in waveguide 17005
e.m. wave reflection, moving in dielec. medium 9057
e.m. wave scattering, infinitely long magnetized cylindrical plasma 17018
e.m. waves, nonlinear interaction 2444
e.m.f., moving in mag. field 1129
energy conservation 10900

Plasma — contd
equation of state, density depend. 10895
eqn. of state at high temp. 19656
equilibrium in helical mag. field 9032
equilibrium props. at high temp., appl. of giant cluster expansion theory 18991
evolving, electron density meas. 7113
fast magnetic compression 19664
finite, diffusion in uniform mag. field 17014
flow in axial magnetic field 7119
flow, in high-current arcs, streaming velocity 19644
flow stability of longitud. plasma in mag. field 7126
flow into vacuum magnetic cusp field 15033
flute type instability 12618
Fokker–Planck equation 9024
Fokker–Planck eqn., soln. 19657 [10898
fully-ionized, ohmic heating, electron–ion collisions
fusion reactions in unconfined plasma 20532
gas-discharge, radiation energy loss 15025
general theory 2357
H, contra-streaming, instability 3777
H, electron velocity distrib. 5274
H, highly ionized, ionic conductivity 12586
H, incoherent microwave radiation at 3000 Mc/s 2370
H, ionization times of impurities 10902
H, partially ionized, equilibrium props. 17007
H, pinched, radiative losses from impurity ions 1131
H, pulse discharge, spectral study, high temp. parameters
H, shock-heated, temp. and density 19689 [10914
H, Stark broadening of spectral lines 1480
H and D discharges in B.3. stellarator, electrostatic instability 17001
He, incoherent microwave radiation at 3000 Mc/s 2370
He, shock-heated, temp. and density 19689
heating, collision-free 3758
heating by current saturation 9036
heating, by mag. shock compression 4155 [12602
heating, by microwave absorption, sheath configuration
heat transmission, through flowing gas, from solid 5053
heat wave propagation, with frontal radiation 10798
heavy-current toroidal discharge tubes 5305
h.f. heating, in axial mag. field 10899
Hg, ionization rates 7069 [15086
Hg, low pressure, forces on ion-bombarded electrodes
high-current pulsed discharges 5320
high-current pulse discharges in conical chambers 5306
high-energy density, high press., investigation 5319
high-energy pulsed discharges, neutron and X-ray production 5317
high-power pulse discharges, spectroscopic study 5318
high temp. 2359
high temp. gaseous, production 2310
high-temp. N, O, and air, absorption coeffs. 7120
high-temp. rotating, review 4156
Holtsmark microfield distrib., rel. to collision parameter cutoff 257
hot, cyclotron radiation 10918
h.p. discharges, probe meas. of local potentials 16992
hydromagnetic gun, 9034
hydromagnetic waveguides 11026
hydromagnetic waves in discharge plasma 5383
hydromagnetic waves excited by moving charge 5325
ideal, electrical behaviour 9028
ideal, motion of weak discontinuities 15128
impulse from exploding wire accelerator 7114 [15039
impulsive compression, magnetohydrodynamic effects
inhomogeneous, charge density fluctuations, plasma confinement 5309
inhomogeneous, micro-instabilities, with and without diffusion 5310
in inert gases, moving striations, successive prod. 2335
injection into mag. field of cusped geometry 17000
InSb, pinch effects at 77°K 1672
instability at electron gyromagnetic freq. 3764
instability, in uniform mag. field, weak temp. anisotropy 19677
interaction, and cm wave generation 19919
interaction with electron beams 12619
interstellar 3404
inverse skin effect 1092
and ion accelerators, comparison 12615 [15011
ion beam injection, energy losses, in homog. mag. field

Plasma — contd
ion cyclotron resonance 10924
ion energy distrib. from h.f. sources 12641
ion, slowly moving, electrostatic field 1186
ion wave instabilities 7118 [17886
ionic and electro-ionic, interaction of acoustic vibrations
ionization potential, effective, of atoms, contrib. of highest atomic states to continuous emission 19680
ionized, in mag. field, r.f. radiation 19682
ionized, transport eqns., statistical theory 2362
ionized vapour jet, production of continuous current 19671
irreversible processes 3776
irreversible processes, statistical mechanics 10614-16
jet, 7 kW, production 3779
jet piercing of magnetic fields 256
Joule heating of electron gas 7127
laboratory and cosmic scale 2358
large amplitude waves in collision-free plasma 12623
"Larmoron" concept 15004
linear pinch devices 19659
linear pinch, stability 19658
in longitudinal mag. field, contracted column and distrib. plasma effects 17010
loop in axially symmetric field 15031
loops, in h.f. induction discharges 14986
Lorentz, in mag. field, electron distrib. 2364-5
Lorentzian, inhomog. and anisotropic, statistical mechanics, electron distrib. 15005
l.p. discharges, various effects in air and H 16978
l.p. plane symmetric discharge 5308
in mag. field, h.f. response probes 17019
magnetic bremsstrahlung in high-temp. plasma 19681
magnetic confinement of thermonuclear reactions 13383
magnetic containment in axially symmetrical cusp fields
magnetic mirror devices for plasma containment 19662-3 [15009
magnetic mirror machines, motion of charged particles, stability 3837
in mag. mirror machine, multichannel ion analyser 19798
magnetic probes study, mag. field plot data 3760
magnetic trap, with rotating mirrors 17002
magnetoactive, moving-electron radiation 10919
magneto-acoustic resonance, heating by oscillating mag. field 19695
magnetohydrodynamic power generator 9182
moving-body problem, review 3448
Maxwellian, drift instabilities 17006
metal surface in contact, arc initiation 16991
in meteor trails, concentration near meteor 18712
microwave, elec. field as function of time 19669
microwave whistler mode propagation (in Zeta), diagnostic use 10916
microwaves in ionized gas 2360
in molec. ion injection mirror machine, O.G.R.A. 5840
motion of charged particle in rotating mag. field 11021
motion and heat transfer eqns., in mag. field 19651
motion in strong mag. field 15127 [12603
multi-component plasma, statistical-mech. treatment
Ne-A, diamag. moment, by spin resonance technique 19693
in Ne glow discharges, striation wave 2336
negative glow, as cathode for electron tubes 15068
negative glow of cold cathode discharge, electron energies 9043
in nonadiabatic transverse pinch, dynamics 1104
non-Maxwellian, uniform, electrostatic instabilities 9025
O_3, at 1-30 atm. 1000-30000°K 7129
ohmic heating in stellarator, charged particle loss 11475
optical absorption coeff. 10915
"over-thermal" elec. field fluctuations, spectroscopic study 5311 [15139
parametric amplifier, use as nonlinear propagating medium
partially ionized, equilibrium props. 17007
particle diffusion across magnetic field 17087
permittivity, screening ranges and skin-layer depth 19678
pinch, boundary-layer formation 10897
pinch, circuit dynamics 16998
pinched discharge, particle runaway corrections 3775
pinch, with distrib. current, stability 10896
pinch effect, collapsing current sheet 9030
pinch effect, linear stabilized, runaway electrons 16990
pinch effect, mechanism 5301
pinched, linear, surface instabilities 19655

Plasma — contd
plasma column in electromag. field, condition for non-central Maxwellian solutions 15020
plasma column in electromag. field, diffusion velocities
plasma jet, for high temp. research, [15021
review 12606
plasma ring experiments 7115
plasma thermionic element, theory 15067
plasmoid motion along mag. fields 15032
plasmoid production at plasma res. freq. 5324
positive ion space charge, potential distrib. 17046
positrons containment in a mirror machine 19654
potential troughs, in axial mag. field 14985
probe current step increase with mag. field 2331
probe measurements, for m.f.p. < probe dimens., at medium pressures 19690
probes, boundary layer, elec. field 15035
probes, Langmuir, theory 15036
prod. in detonations in air 12457
propagation, through dispersionless dielectric 9205
propulsion by rapidly varying field 15034
pulsed accelerator, partition of energy 12609
radial, in axial mag. field 7211
radiation, coherent and incoherent 9047
radiation, incoherent, microwave, theory 2370
and radiation, kinetic eqns. 9046
radiation and particle loss in hydrogen-plasma 15024
rapid compression with azimuthal currents 5307
in rect. waveguide, e.m. wave propag. 303
reflection of e.m. waves in slow-wave waveguides 5410
relativistic beam passing through, small amplitude motion 17003-4
relativistic charged particle, motion, in discharge mag. field 10982
relativistic electron beam, motion analysis 9083
relativistic kinetic eqn. 12614 [7876
resonance, correlation between extinction bands of solids
resonance, with two ion species present 10926 [19675
ring configuration, of finite conductivity, drift compensation
ring configurations, long-wave instabilities, dynamic stabilization 19673
ring-shaped conductor, in mag. field, stability 19674
ring-shaped, in mag. field, stability 15015
rotating, magnetic mirror containment 5315
rotating magnetic polarization 7112
rotating, in thermo-nuclear device 15126
rotation, between 2 coaxial cylindrical conductors 9171
scattering poti., calc. 2363
scattering of radiation 19684
scattering of radiowaves, incoherent 19931
Sceptre III A, electron temp. ($\sim 10^5$ deg K) 8857
Sceptre pinch, periodic mag. field fluctuations 19636
shock structure, diffusion effects 10905
shock waves, structure 11034
shock wave and solitary wave structure 17021
slowly decaying, microwave analysis 5295
solar, interaction with geomag. field 21316
solar prominence and corona formation theory 6592
solar spicules, solar outer atmosphere heating 18762
in solar system 10487
sources, survey 19769
space-charge waves, collision damping 3771
spatially homogeneous, Bogoliubov's eqn. 15018
spectral line profiles, functional description 3626
spectroscopic methods of determining temperatures 19687
spectroscopic study 19686
stable confinement 7122
stability and boundary conditions 15016
stability calculations, fundamental error 12611
stability in field of mag. dipole 19676
stability, at low pressures, in toroidal systems 7124
stability, in vacuum, many-valued scalar mag. poti. 17012
stagnation-point Langmuir probe 9038
Stark broadening of H spectral lines, calc. 1480
Stark-broadening of spectral lines 1479
statistical mechanics, Boltzmann and Jokker—Planck eqns., review 12604
steady-state processes, non-linear theory 7128
stellar plasma 2361
stellarator-type devices, magnetic confinement 19661
streaming cylindrical incompressible, hydromagnetic stability 9035

Plasma — contd
strongly ionized, production with pinch effect in cusped field 19672
super high frequency probe method for charge conc. 15028
survey of 1958 Geneva papers on high temp. plasmas
synchrotron radiation avoidance by confinement [19665
geometry 16997
temp. variations during self-heating by D and T thermonuclear reactions 3759
ternary (electrons, ions, neutral atoms), magnetohydrodynamics 15038
thermal conductivity tensor 1127
thermocouples, efficiency 9040
thermocouples, open-circuit voltages 2311
thermocouples, for 1600-2600°K hot-junction temp. 1139
thermodynamic props. of unipositive gaseous elemental ions 100-50000°C, calc. 14972
thermonuclear, cross-sections and rates of various reactions 17638 [15027
thermonuclear, heating of positive ions, by electron beam
thermonuclear, ion injection into magnetic mirror 3762
thermonuclear processes 5836
thin, ion and electron currents 15010
thin, of variable density, properties 15007 [3749
time for thermodynamic equilibrium in arc discharge
time variation in fusion systems, energy balance 17637
torch discharge, high frequency, heat losses 5299
toroid, with distrib. current, in mag. field, stability 10910
toroidal discharge in strong mag. field 9029
toroidal, heating, in oscill. mag. field 1136
toroidal stabilized pinch, review 19660 [9031
transport equations, relativistic, wave dispersion eqns.
transport processes, in mag. fields, 2nd order theory 2368
transverse compression waves in stabilized discharge
trapping, in cusp configurations, for high and low [3769
β-injection 9026
in tube, effect on e.m. waves in helical waveguide 17110
two-fluid model 16731
virial theorem 12612
viscous props. in mag. field 15022
v.h.f. and d.c. currents in a gas, correction 3765
wake of satellite in ionosphere 9023
warm plasma, conductivity, rel. to frequency and temp., theory 1137
water vapour, decaying, microwave study 5294
in waveguide, e.m. wave propag., perturbation theory
waves, absorption 3768 [12703
waves, with anisotropic press., Chew—Goldberger—Low approx. 9163
waves in electron clouds 19916
waves, propagation across a density discontinuity 3767
weak interactions 2372
zero-temp. plasma, nonlinear oscills. and nonstationary flow 12620-1

Plasma oscillations
A, linear pinched discharge, surface instabilities, growth 15012
A positive column, electroacoustic waves 2369
absorption and reflection spectrum 5409
accelerated, pinched electron streams 9027
in colliding plasma streams 12605
compression waves in static mag. field 15045
cylindrical fully-ionized plasma, radial oscill., stability 5323
disturbances prod. by compression and mag. field 10912
electron beams, large number of, longitudinal oscillations 9050
electron exchange effects on dispersion relation 12608
electron excited, energy losses 10923
electron gas, degenerate, surface oscillations 17906
in electron-ion beams, instability conditions 9053
electron—ion plasma, longitudinal oscillations 7125
electron oscillations, non-linear, exact soln. 9051
electron plasma, non-linear theory of oscillation modes
electron plasma without sheaths, two-beam [7128
excitation 15044
electrons in solids, effect of crystal size 15831
excitation by charge moving in moving medium 9155
excitation, by electron beam, anomalous scattering 10922
excitation of e.m. waves by external current 15042
excitation mechanism 7116
excitation, by modulated ion beam 15011

Plasma oscillations — contd
He positive column, electroacoustic waves 2369
h.f. oscillations in bounded plasma 15043
Hg discharge 19701
Hg, in hot-cathode discharge 19701
Hg, in r.f. probe 19698
hydrogen plasma, feebly ionized 12617
inert gases, electron oscillations near boundary, pressure depend. 10921 [9056
inhomogeneous hot plasma, small oscillations in mag. field
ion-acoustic oscillations, in anisotropic plasma, in mag. field 19696
ion beams, in mag. field, in rarified gases, space-charge oscill. 10976
ion oscillation, in h.f. e.m. field, kinetic theory 9049
ion oscillations, detection 19697
Kr positive column, electroacoustic waves 2369
linearized, in arbitrary electron velocity distributions
linearized theory 9048 [12622
longitudinal oscillations, instability 12625
longitudinal waves, scattering of e.m. waves 11053
in magnetized plasma 10920
magneto-acoustic resonance 19695
magneto-acoustic, in 3-component plasma 19694
molecules, long linear conjugated 20708
near cyclotron frequency, in long. mag. field 10925
near ion resonance, ion—electron scatt. effects 10899
non-degenerate electron plasma, in mag. field 17009
non-linear electrostatic in cold plasma 19700
non-linear, theory 3770, 11037, 19699
in nonuniform plasma 10927
perpendicular to constant magnetic field 12624
"plasma cable", e.m. wave propag. and Langmuir sheath 15041
plasma cylinder, inf. homog., in axial field 10928
positive ion heating, by electron beam 15027
r.f. forced oscillations, in collision-free plasma 19703
r.f. probe, plasma resonance 19698
radio emission in nonuniform plasmas 3772
radiation by, in bounded plasma in magnetic field 10917
relativistic plasma, by charged particles 12614
shocks, radio emission 10480
Sn oxide film 1623
space-charge waves 1132
spatially growing plasma waves, theory 19704
sphere, inf. cond., in quasi-stationary e.m. field 10909
stability of large amplitude waves 9054
standing-wave excitation, by electron beam injection
Stellarator B-1 1192 [19702
thin toroidal thread, in mag. field 15040
undamped and damped, in relativistic plasma 19678
uniform plasmas, stability to longitudinal oscillations
in various gases, detonation generation 1133 [10929
wave propagation, in longitudinal mag. field 19705
zero-temp. plasma, nonlinear oscillations 12620-1

Plastic deformation (See also Slip).
cause of allotropic transf. in metals 3170 [6713
compression, between smooth plates, under plane strain
compression, plane strain, between rough plates 6714
conference, solid state physics 6002
crystal, cyclic stressing, superposition of mech. vibration, electrical effect 7917
deformation band propagation in homogeneous isotropic material 6300
dynamic loading of plastic shells, end conditions 12393
effect on mosaic structure of crystals 16229 [8112
elasto-plastic phenomena interpreted by hereditary theory
elasto-plastic, thermodynamic invest. 1852 [8125
faults in materials that harden when they yield, theory
ferromag. materials, coercivity changes 6224
frames, plastic limit analysis, dual linear programming
indentation, by dies 16212 [8575
influence on permeability decrease in transformer steel 3150
inhomogeneity, in tension 8114
irreversible, thermodynamics 6301
linearized equations for beams 8115
metallic substances, Brinell ball test 11978
metals, annealed and cold-worked 6298
metals, by bending 6303
metals, cold-rolled 16213
metals, deformation in "flow areas" 6305

Plastic deformation — contd
metals, effect on mech. props. below 4.2°K 21122
metals, elastic behaviour in tensile test 11977
metals, energy dissipation mechanism 16226
metals, exo-electron emission 19712
metals, initial stage 1855
metals, microstresses produced 10263 [1853
metals, polycrystalline, slip bands and grain rotations
metals, role of microstresses 10264
metal, stored energy 21132
percussion figures in crystals 3157
plane circular membrane 13911
plates, extension and flexure, analogy with viscous fluid motion 8603 [8261
polymer films, softening temp., thermomechanical curves
porous viscoelastic cylinder, fluid filled, under steady press. 10622
prod. of thermo-e.m.f. in Cu, Al and mild steel 15099
rel. to hardening, isotropic, by plastic flow 1854
rolling, temperature rise, effect on roll-torque and roll-pressure 13910
single crystals, X-ray microbeam study 16258
square plates, simply supported, dynamic deformation
stress analysis 16225 [12391
stressed crystal lamellae, electron diffr. pattern, theory 10306-7
theory of metal abrasion 3164
twinned layers 1861
alkali metals, at low temps. 16215 [16219
α-brass single crystals, individual slip line histories
β-brass, anelasticity, 4.2-300°K 10258
butyl elastomer, and rolling friction 4572
calcite, deformation twins 1897
calcite, dislocation etch pits 16283
calcite, X-ray line broadening 21130
clay suspensions, yield stress 16391
glass, scratching with needle, avoidance 3151
muscovite, static and impact deformation 13544
Neoprene elastomer, and rolling friction 4572
noble metal alloys, influence on resistivity 7908
Nylon 66, drawing, effect of temp. and moisture 8116
organic glasses, submicroscopic cracks 6318
plasticine, indentation by dies 16212
polyethylene, mechanical loss 1846 [16008
polyvinylchloride, electrification, with heat treatment
rock salt, annealed, neutron irrad. 18242
rock salt crystals, initial stages 11979 [21086
rock salt, n.m.r., variation of Na^{23} resonance intensity
rocksalt, rel. to defects 13546
rubbers 10266-9
silicone elastomer, and rolling friction 4572
steel, expansion coeff. 19501
steel, internal friction 1849
steel, surface texture on rolling resistance 8132
Ag, compression, self-diffusion coefficient 2826
Ag—Al, free-energy change 21139
Ag—Al, single crystals, temp. depend. 21133
AgBr, study by surface dislocation loops 20807
AgCl, internal friction, temp. depend. 1848
Al, electron emission 1143
Al, electron microscope study 1859
Al, internal friction 1849
Al notched foils, tearing 11984
Al, polycrystalline, creep processes 16216
Al, polycrystalline, work-softening effect 4562
Al, recovery of internal friction 8111
Al single crystal plates 8107 [16253
Al single crystals, tensile deformation at low temps.
Al, X-ray microbeam study 6393
Al and Al alloy V-95, 1.6-300°K 1867
Al, Al-Cu, anelasticity, 4.2-300°K 10258
Al—Cu aged alloys, mechanism of hardening 18265
Al—Cu single crystals 18264
Al—Mg alloys, temp. and deformation-rate depend. 1931-2
Al—Mg—Zn alloys, aged, interior fatigue deformation
Au, effect on elec. resistance minimum at low temp. 2847 [21240
Au evap. thin films 10331
Au films, electron microscope study 8286
CsBr, single crystals, kinking, orientation depend. 13542
Cu, anelasticity, 4.2-300°K 10258
Cu, effect on shear wave attenuation in mag. field 523

Plastic deformation — contd
Cu, generation of thermo-e.m.f. and effect on microhardness 15098
Cu, n.m.r. line broadening 21083
Cu single crystals, by alternating stresses, hardening 8124
Cu solid solutions, effect on X-ray diffr. pattern 1910
Cu targets attacked by shaped charges 21104
Cu whiskers 18254
Cu-As alloy, effect on thermal and elec. cond. 21131
Cu-Zn alloy, effect on thermal and elec. cond. 21131
Cu–Zn alloy, identification of lattice imperfections 9900
Fe, anelasticity, 4.2-300°K 10258 [17943
α-Fe, dislocations, irregular sub-boundary networks
Fe, effect on mosaic structure 16229
Fe, at 4.2-77°K 8118
Fe single crystals, brittle fracture conditions 18281
Fe, tensile, of single crystals 4561
Fe whiskers, obs. of paired screw dislocations 3182
Fe, zone refined 16243
Fe–Ni–Cr–Co, cold deformation, creep 6312
Ga films, super-conductivity 16955
Ge, in bending, time depend. 13913
Ge, delayed yield 2876
Ge, hole–cond. type, linear dislocation effects 18020
Ge p–n junctions, reverse characteristics 13594
Ge p-type, elec. props. depend. 13596
InAs, new mode of deformation 21116
InSb, delayed yield 2876
InSb, uniaxial compression, effect on elec. props. 1858
KCl, effect on X-ray colour centre prod. at 5 and 78°K
MgO, crack propagation 17930 [6050
Mo, dislocations 1589
Mo, yield phenomena 21106
NaCl, effect on structure 16366 [10306
NaCl, progressive lattice distortion, electron diffr. study
Nb, anelasticity, 4.2-300°K 10258
Nb, superconducting, effect on thermal cond. 8938
Ni, effect on H_2 diffusion 15869
Ni, effect on sub-microstructure 16253
Ni, hard-worked, magnetostriction 1800
Ni, macroscopic strength inhomogeneity 6307
Ni polycrystals, X-ray diffr. data 6354
Ni alloys, bending and twinning 6302
Ni_3Mn, changes in magnetic saturation 21112
Pb, superconducting, effect on thermal cond. 8938
Pb–Bi, superconducting, effect on thermal cond. 8938
Pt_3Co, changes in magnetic saturation 21112
Si, i.r. birefringence study 1723
Si p-type, elec. props depend. 13596
Sn single crystals, deformation twinning under impact loading 21115
Sn, white, twin production 4585
Ta, effect on superconducting characteristics 2292
Ta, twinning 18294 [13542
TlBr–TlI, single crystals, kinking, orientation depend.
U polycrystals, by thermal cycling 16254
Zn, crystal fragmentation and twinning 13909
Zn single crystals, crack formation 688
Zn–Al alloy, rel. to phase transformations 16230

Plastic flow (See also Rheology).
age-hardened alloy, flow stress temp. dependence 18263
Bingham solid, between coaxial cylinders 16227
crystalline solids, and mechanical resonance dispersion
hardening, isotropic, due to plastic flow 1854 [18252
mechanism of paraffin–detergent interactions 3158
metals, b.c.c., flow stress 21100
metals, nature of shear formation 21128
metals, polycrystalline, under simple shear 8121
shock waves in plastic medium 993
visco-plastic liquids, unsteady flow 4993
steel, carbon, mechanism of flow 6304
steel, mild, effect on mag. props. 21048
Al, effects of unloading on yield point 21126
Al–Zn alloy, effects of unloading on yield point 21126
Fe, mechanism 6304
LiF, effect of surface cond. on yield stress 21096
MgO single crystals, rel. to fracture mechanism 21143
Pb, polycrystalline, under simple shear 8121
U polycrystals, grain-boundary flow due to thermal cycling 16254

Plasticity (See also Viscoelasticity).
increase at high hydrostatic pressure 1857

Plasticity — contd
pseudoplasticity, viscosity impulse theory 14581
stress and strain-rate tensors, principal axes 21134
viscoplastic liquid, motion of spheres 19051
viscoplastic oil, lubrication 14586
wave propag. in plastic material, convergence 12452
alkali halide crystals 21127
duralumin, under high press. 1856
steel, under high press. 1856
Fe, under high press. 1856
MgO single crystals 8119

Plastics (See also Polymers).
crack growth and structure 6315
crosslinking prevention 14138
dielectric properties, 1958 digest 2300
foamed, dynamic Young's and shear moduli, 0.1-100 c/s, meas. 18247
foamed, sound absorption, frequency depend. 16789
materials, use as insulators 19500
mech. props. at liquid helium temps. 6293
rolling friction of hard cylinders 3477
scintillator filaments, light attenuators 18150
scintillators, absorption and luminescence spectra 10073
thin films, sound velocity meas. 6859
vitrification study by luminescent method 4680
Araldite, mechanical props. 6287 [8109, 12063
Araldite, mechanical and photoelastic characteristics
Araldite, Poisson's ratio, photoelastic meas. 16196
caprone, swelling and partial crystallization 1885
Mylar, adhesive-bonded, liq. H targets 2477
Neoprene, rolling friction 4572
Nylon, combined spark and fire guard 6998
Nylon, contact electrification and polarization 7056 [6396
Nylon, scanning electron microscopy for spinneret holes
Nylon, strength props. of irrad. drawn and undrawn 11980
Nylon fibres, surface replication 8263, 10323
Nylon, texture examination by X-ray diffraction 8250
Nylon 66, drawing, effect of temp. and moisture 8116
PTFE, phase transform., 75-380°K, up to 21 000 atm 1875
PTFE, thermal expansion, anisotropic 10324
P.V.C. specific ht., thermal cond. 2276 [14865
P.V.C., thermal conductivity by non-stationary method
Perspex, elec. cond. in strong shock waves 6073 [635
Perspex, formation of electrets, effect of alternating fields
Plexiglas phosphors, anisotropy of emission 2948
Plexiglas, polarization of Cherenkov radiation in 5539
Plexiglas, stress waves generated by electric detonator
Plexiglas, use in radiation dosimetry 20367 [19260
polyethylene (Marlex-50), electron-irrad., e.s.r. study of radical species 16176-7 [8260
polymethylmethacrylate, surface colours following fracture
polystyrene scintillators, γ-luminescent energy yield 4430
polytetrafluoroethylene, friction on wood 8137
polythene, γ-irradiated, X-ray study, action of heat 4681
polyvinylchloride, plasticized, elec. breakdown, impurity effects 18108 [17515
Teflon counting-cell, for flowing radioactive solutions
Teflon, e.s.r. studies of γ-irradiation effects 6420
Teflon fibres, n.m.r. absorption 21225
Terylene fibres, surface replication by rolling 8263

Platinum
abrasion, theory 3164 [9741
atomic structure, relativistic self-consistent solution
corrosion in HBr, effect of α-rays 12100
counter-tube cathode, spectral yield curve 9229
diffusion in Au, tracer conc., 800°C to Au m.p. 20846
diffusion and desorption of Na, K, Ca impurities, thermionic emission study 6061
emissivity, 1.5-15 μ 16917 [14875
emissivity, temp.-independent, study and interpretation
equations of state at high pressure 11549
evaporation, for electron microscope shadow-casting technique 8293
filament, use in electron microscopes 15079
films, effect on slip of Ag substrate 21113
friction in reciprocating sliding, low values 3165
H_2 adsorption 4748
ion emission, secondary, by inert gas ion bombard. 17043
lifetime, under load 16223
photo-e.m.f., sensitized with chlorophyll and analogues
point defects 20798
preferential orientation on prod. from $(NH_4)_2PtCl_6$ 11992

Platinum — contd
recoilless Rayleigh scattering in, using Mössbauer effect
resistance—temp. relationship at low temp. 7002 [11560
resistance thermometer bridge 7003-4
resistance thermometers 630.5-1063°C 8856
secondary electron emission 5341
sputtered by Hg^+, ang. distrib. 1174
thermionic emission, in CCl_4 and Freon 10936 [17955
thermo-e.m.f. study of vacancy quenching and movement
thermoelec. power rel. to Armco iron 13498
thermoelectricity meas. below 1°K 18076 [18421
Pt—C shadowing deposits, study of background structure
Platinum compounds (See also Alloys).
Pt-dimethyl-glyoxime, structure 3252
trans-$[Pt(C_2H_5)(NH(CH_3)_2)Cl_2]$, crystal structure 8235
$[Pt((C_2H_5)_3P)_2HBr]$, crystal structure 8236
α-$[Pt_2(SCN)_2Cl_2(P(C_3H_7)_3)_2]$, crystal structure 8237
Pleochroism
dichroism, circular, qualitative theory 18111
dichroism, in light scattering of suspensions and solutions 939
dichroism, particle system with 3 energy levels, incident radiation intensity depend. 16075
dichroism, polymers, axially oriented, in i.r. 6166
alkali halide crystals, electron irrad., coloration depth
biotites, effect of heat 13666 [13550
mono-, di- and tri-ethanolamine complexes of Fe, Ni and Cu, dichroism 13693
$BaTiO_3$, dichroism 2932
KCl, dichroism of M band 17964
Pt hexahalide complexes, electron transfer spectra 20650
Plutonium
allotropic transformations 21226
evaporation by fission fragments 5812
h.f.s. and electron levels 7700
monitor, continuous, for airborne particles 5456
resistivity at 0.75°K 1084
thermoelectric power determination 18082
Pu^{239}, h.f.s. and nuclear mag. moment 20589
Pu^{239}, mass 15669
Plutonium compounds
absorption spectra 20656 [8239
Pt(IV) and Th(IV) acetylacetonates, probable isomerism
PuF_3, free energy of formation 12101
$PuGe_2$, ferromagnetic props. 11834
PuNi, crystal structure 3222
PuO_2, characteristic temp., from X-ray diffraction spectra 17898
PuO_2, neutron sources from Be reduction 7379
Pu oxalates, decomp. by own α-particles 4735
Polarimeters
i.r. polariscope 180
i.r., review 6952
microwave, for solar emission 16524
photoelectric meas. of optical rotation 19457
photoelectric, for Faraday effect 1047
photoelectric, simple, compensating 5184
polarizer for far i.r. 6953
stellar polarigraph, Öhman 6548
2-channel photoelec., for astrophysical and atmospheric optics 18590
Polarized light (See also Double refraction; Optical rotation; Photoelasticity; Polarimeters).
absorption, in ferromagnetics 6171-3
Al mirrors 178
anisotropic light scattering of streaming suspensions and solutions 939
atmospheric polarization, data 12202
Babinet compensator, phase difference meas. with increased accuracy 14854 [179
biaxial crystals, plane-wave polarization and optic axes
by water droplets, microscopic obs. 19453
coherence props. 146
comets, polarization measurements 18728
conical analyser, props. and uses 5185
crystalline plates, parallel or convergent light 2243
in crystals, magnetic, e.m. plane wave 3651-2
depolarization of light dispersed by macromolec. solns., theory 940
depolarization in medium with Rayleigh scattering 8809
edge emission of SiC 8012-13
effects on anomalous photocurrents and photovoltages in ZnS 2907
Polarized light — contd [19722
effects on photo-emission from compound photocathodes
from electron excited He atoms 4173
elliptically, analysis 14855
gravitational-field rotation of polarization plane 10568
intensity det. by photoelec. method 177
interference phenomena, absorbing biaxial crystals 2244
interstellar, relation behaviour extinction and polarization
i.r. polarizer using germanium 1045 [19458
light propagation in absorbing crystals 1046
light scattered by soot particles on prism 14856
luminescence from stilbene and tolane 656
luminescence of system with three energy levels 16075
matrix formulation of theory of partial polarization 12675
monochromators used in polarimetry 16901
from noctilucent clouds 6484, 14290
optical activity and intermolecular interactions in liquids and solutions 3542
optical vibrations in diatomic polar crystals 7989
photoelec. det. of extinction directions 5186
in photon correlation 10745
production by echelette grating, 1-600 μ 8810
production by protons entering metal surfaces 20099
$\frac{1}{4}$ wave compensator, calibration 14855
in reflection from crystals, orthogonal polarization directions 12497
scattering by colloidal spheres 2255
Se foil polarizer, interference effect 10787
Se polarizers for near i.r. region 14853
Se, thin films, study 20970
skylight during twilight 4804
skylight polarization meas. 6483
starlight from near stars 6611
from stars, measurement, instrument polarization effects 1
superposed crystal plates between crossed polars, special case, and applications 3653
from sunspots 4893
wire grid as near i.r. polarizer 14852
ZnS monocrystals, polarization of luminescence 16093
Polarography (See Chemical analysis, electrochemical).
Polishing (See Surface texture).
Polonium
No entries this year
Polymerization [6418
acetylene and benzene in gas phase, radiation-induced
acrylamide, radiation-induced in solid 14135
cyanogen, transient species in radiolytic polymerization
ethyl acrylate, γ-ray induced, n.m.r. study 1516 [21291
styrene, photo-sensitized by anthracene 8316-17
Polymers (See also Plastics).
adhesion, investigation diffusion processes 3162
amorphous, 6 specimens, creep, at high stress 16217
axially oriented, i.r. dichroism 6166
bond alternation and electron fixation 20699
chain dimensions, with interactions in adjacent monomers 9832
chain folding in crystalline high polymers 520
chain folding and free-energy density 18293
chain, unperturbed chain dimensions 5999
copolymer soln., light scattering 14851
copolymers, dipole moment 9833 [8160-1
crystal formation, with folded chains, in dilute solns.
crystal formation, platelets, of const. thickness 8159
crystalline ring structure, light scattering obs. 14053
crystalline synthetic high polymers with sterically regular structure 4668-77
deformed, submicroscopic porosity, exper. study 12065
degradation by flash illumination 1962
dielectric losses, pressure and temp. dependence 2927
diffusion of impurities 3264
diffusion and sedimentation theory, for 1, 2 and 3 branch points and rings 8657
dilute solutions, thermal diffusion, kinetic theory 19102
ebulliometry, design problems 6995
elec. conductivity, temp. dependence 563
films, fine structure, electron microscope study 21220
films, softening temp., thermomechanical curves 8261
gas-crystalline state 1916
helical, normal vibrations 20698
high, in dilute solutions, thermal diffusion 19103
high, dynamic mechanical properties 18250

Polymers — contd
internal rotation, extension, internal and intermolec. interactions 17857 [8599
intrinsic viscosity, measurement, velocity gradient effects
irradiated, intrinsic viscosity 20701
irradiated, molecular linking 21293
irradiated, solubility behaviour analysis 7820
light scattering by films under strain 6374
linear, excluded volume effect, calc. 15791
linear, heat capacity at low temps. 18384
macromolecular solutions, hydrodynamics 12405
mag. props., anomalies, and electron spin resonance
melt fracture, Hooke's law 13903 [20703
molecular weight determination 1058
molecular wt. det. from sedimentation 14141
molecular wt. distrib., det. by fractionation, theory 20702
molten, cooling of spinning thread line 6987
neighbour interactions and internal rotations, solvent effect 15790
optical and electronic properties, theory 20704
organic glasses, deformed, submicroscopic cracks 6318
secondary electron emission 17032 [7823
size and shape det. of flexible linear macromolecules
solid, mechanical and thermal properties 14049-51
in soln., inhomogeneous field study 3520
solutions of chain-polymers, radial distrib. function and osmotic press. calc. 14641
solutions, dilute, theory, second virial coeff. calc. 16694
solutions, normal stresses, in steady flow 3497
solutions, sedimentation of microscopic spheres 76
solutions, shear degradation 3522
solutions, theory 14629
statistics of isotactic deformable chains 20697
stretched, longit. wave propag. 18251
suspensions, in liquid dielectrics, nonuniform elec. field effects 10665
synthetic, solutions, effect of ionizing radiations 21294
thin film formation by electron bombardment 16360
transitions by n.m.r. and dynamic mechanical methods
X-ray diffraction patterns 16298 [6375
Bi, in Bi perchlorate aq. soln. 4247
CMC-Na in water, γ-irradiation effect 2170
p-chlorostyrene—styrene, dipole moments 9833
cotton cellulose, crystallinity, X-ray determination 1918
dimethyl siloxane polymers, n.m.r. 10252 [9834
isotactic vinyl polymers, dipole moments and dimensions
linear polyamides, dielectric props. 4246
methacrylic esters, homologous, in soln., molec. interactions, effective dipole moment 7821
methylmenthylacrylate—methylmethacrylate, optical activity 8258
methyl methacrylate copolymer, service life and failure under tensile load 16234 [14657
polyacenaphthene solutions, viscosity and light scattering
polyacrylic acid solution, sedimentation of microscopic spheres 76
polyamides, transition studies 6375
poly(butene-1), transition studies 6375
polybutylmethacrylate, diffusion in chloroform and isopropanol 14636
polybutylmethacrylate, diffusion and sedimentation in isopropyl alcohol 12111
polybutylmethacrylate, photoelastic effect 5187
polychloroprene latex globules, size det. 19446
poly copper phthalocyanine, semiconducting props. 4358
polydimethylsiloxane, radiothermoluminescence 21018
polyene chains, electronic 9831 [9835
polyene, cyclic, $C_{2n}H_{2n}$, bond length alternation, theory
polyethylene anti-reflection optical film 5155
polyethylene, b_{1u} methylene wagging and twisting 15792
polyethylene, contact charging due to irradiation 10860
polyethylene crystals, defects 17923
polyethylene, dynamic mechanical properties 8110
polyethylene, electron microscopy, crystallinity effects
polyethylene, fibrous, low angle X-ray [16340 diffraction 8251
polyethylene, flow in capillary 8605
polyethylene, γ-irradiated, induced conductivity in co-ax cable 9949
polyethylene, γ and n-irrad., energy deposition rate 20531
polyethylene, high density, dielec. loss, α-process 7985
polyethylene, mechanical loss 1846

Polymers — contd [12064
polyethylene, permeability changes, due to irradiation
polyethylene, radiothermoluminescence 21018
polyethylene, second crystallite modification 18371
polyethylene, sheets, polarizer for far i.r. 6953
polyethylene, single crystals, morphology 18292
polyethylene single crystals, structurally distinct sectors
polyethylene, solubility and diffusivity of N 12066 [4667
polyethylene spherulites, structure studies, light scatt. method 21221
polyethylene, structure at low temps. 18337
polyethylenes, transition studies 6375
polyethylene, with C-black, transmittance, 17-55 μ 6167
polyethylene glycols, and in benzene, dielec. props. 14656
polyethylene terephthalate, biaxially orientated, effect of temp. and reactor irradiation 18274 [14052
polyethylene terephthalate fibres, crystallinity meas.
polyethylene terephthalate, tensile strength, effect of reactor irradiation 18273
polyisobutylene, dynamic shear behaviour, effect of pressure 18249 [3492
polyisobutylene, melt viscosity, press. and temp. depend.
polyisobutylene, n.m.r. 7810
polyisobutylene, radiothermoluminescence 21018
polyisobutylene, transition studies 6375
polyisobutylene, viscous flow 10266-9 [4664-5
poly-L-proline II and poly-L-hydroxyproline A, structure
polymethacrylate, effect of molec. wt. on luminescence 20995
polymethacrylic acid, γ-irradiated, e.p.r. spectrum 501
polymethylmethacrylate, cold-drawing deformation mechanism 8117
polymethylmethacrylate, crack growth and structure 6315
polymethylmethacrylate, "electretized", elec. and opt. props. 1705
polymethylmethacrylate, γ-irradiated, e.s.r. 18221
polymethylmethacrylate, γ-irradiated, e.s.r. 18221
polymethylmethacrylate, γ-irradiated, e.p.r. spectrum 501
polymethylmethacrylate, γ-irradiated, dielectric properties
polymethylmethacrylate, internal gas bubble [6803 formation by heat 8259
polymethylmethacrylate, luminescence during reactor irradiation 1759
polymethylmethacrylate, mech. props., 1.6-4.2°K 18241
polymethylmethacrylate, optical activity 8258
polymethylmethacrylate, with phthalimide, fluorescence, max. polarization 8018
polymethylmethacrylate, photoelastic effect 5187
polymethylmethacrylate, service life and failure under tensile load 16234
polymethylmethacrylate, surface degradation 3309
polymethylmethacrylate, transition studies 6375
polymethylmethacrylate, vitrification under high press. and temp. 12060-1 [16333
poly-4-methyl-pentene-1, morphology and chain packing
polyoxymethylene, screw dislocations 18292
polypeptide chains, perturbation calc. of characteristic vibrations 15789
polypropylene, birefringence, principle bond polarizabilities 20971
polypropylene films, orientation meas. 18410
polypropylene, irradiation changes in structure 10359
polypropylenes, transition studies 6375
polystyrene, absorption spectra 50-2500 μ 10035
polystyrene, in benzene, light scattering indicatrix 12495
polystyrene, crack growth and structure 6315
polystyrene, e.s.r. studies of γ-irradiation effects 6420
polystyrene, effect of molec. wt. on luminescence 20995
polystyrene fractions in soln., diffusion coeff. 10654
polystyrene latexes, light scattering 10784 [1759
polystyrene, luminescence during reactor irradiation
polystyrene, solid solns., luminescence-solute conc. relation 6806
polystyrene solns., critical opalescence 6805
polystyrene, solutions in dioxane and butanone, flow birefringence 12498-500 [14658
polystyrene soln., refractive index, temp. increment
polystyrene, thermal cond. liq. N to room temp. 5204
polystyrene, transition studies 6375 [12060-1
polystyrene, vitrification under high press. and temp
polytetrafluoroethylene, electronic energy gap, wavefunctions and energy eigenvalues 20700

Polymers – contd
polytetrafluoroethylene, F^{19} n.m.r. 4529
polytetrafluoroethylene, γ-irradiated, e.s.r. 18221
polytetrafluoroethylene, irradiation effect 8320
polytetrafluoroethylene, permeability changes, due to irradiation 12064
polytetrafluoroethylene, thermal expansion 6376
polytetrafluoroethylenes, transition studies 6375
poly-tetra-tertiary butylphenylmethacrylate solutions, flow birefringence and viscosity 12501
polytrifluorochloroethylene, i.r. properties 12473-4
polyvinyl acetate, cold drawing deformation mechanism
polyvinyl acetate, photoelastic effect 5187 [8117
polyvinyl acetate solns., dielec. props. 6801
polyvinyl alcohol aqueous soln. effect of γ-rays 21292
polyvinyl alcohol, use as base of nuclear track emulsions
polyvinyl alcohol, use in photog. emulsions 12739 [3899
polyvinyl chloride, change of props. by ionizing radiation 4310
polyvinyl chloride "cokes", paramag. resonance 10213
polyvinyl chloride, electrification, after heat treatment
polyvinyl chloride, γ-irradiated, e.s.r. 18221 [16008
polyvinyl chloride, γ-irradiated, effect of gases 4732
polyvinyl chloride, transition studies 6375 [10273
polyvinyl chloride, under tension, appearance of cracks
silicone liquids, viscoelasticity under cyclic shearing stress 8597
silicone rubber, specific ht., thermal cond. 2276
styrene, polymerization 8316-17
styrene derivatives and copolymers, photoelastic properties 8257
vinylidene and vinyl chlorides, copolymer, X-irradiated, e.s.r. 18221

Polymorphism (See also Crystal structure).
alkali metals, condensed films 21252
As, study using As_2O_3 2815
Be films, supercond. 10846
ionic crystals, close packing, lattice geom. and chemical composition 16305

Polynomials
Chebyshev, expansion of Sin θ, in pendulum theory 56
Chebyshev, in optical multilayer films calc. 6940
Hermite and Laguerre, application of asymptotically solved differential eqns. 4838

Porosity (See also Permeability, mechanical; Surface measurement).
effect on acoustic materials 14725
fissured rocks, flow of homogeneous liquids 12407
gas diffusion in porous media 101, 14692-3
inhomogeneous media 14541
instabilities on displacement fronts in porous media 3495
marine sediments 8739
plasters, set sulphate, skeleton strength 13916
polymers, deformed, cloudiness, exper. study 12065
porous media, flow through, eqns. 4739
porous media, pressure transfer and non-stationary gas flow 10686
porous medium, conductive liquid saturation 21279
porous solids, liquid penetration, theory and exper. 8336-7
Ag membranes, use for isotope separation 18385
coal compacts, strength–porosity relationship 4568
Hg, measurement corrections 6377
Y garnet, effect on ferromagnetic resonance 8076
zeolite minerals, use as molecular sieves 14059

Positive rays (See Chemical analysis, mass spectrometry; Ion beams).

Positive ray sources (See Ion sources).

Positronium
annihilation, 3-photon, in P-state 11152
decay in molecular substances 20115
formation in an electron gas, unlikelihood 2533
formation in In, water and aq. solns 9343
formation in positron scattering 5550
in metals, props. 13520
magnetic moment 17317
orthopositronium, lifetime in liquid He 1274
orthopositronium, reaction with oxygen 3292

Positrons (See also Electrons, which includes both negative and positive electrons when the differences between them are of no special significance).
angular distrib. asymmetry in π–μ–e decay 15378
annihilation in flight, polarization 17311

Positrons – contd
annihilation in In, water and eq. solns., ang. correl. of 2-quantum emission 9343
annihilation in liquid He and gaseous He at low temp. 1274
annihilation in metals, theory 3960
annihilation, one-photon, theory 5892
annihilation in organic liquids 3959
annihilation radiation, linear polarization meas. 17312
annihilation in S and S cpds., γ-ray ang. correl. similarity of S^{2-} and Cl^- ions 15336
annihilation, use in photon source 7320
beams, collision with electron beams, μ pair production, QED validity 17372
beams, collision with electron beams, radiative corrections, calc. 17304
collisions with electrons, π^0 prod., proposed lifetime meas. 17375
containment in a mirror machine 19654
electron–positron scattering, non-local effects 3527
emitted from negative β-emitters 17529
in μ^+-meson decay 5578 [9391
from μ^+-meson decay, energy spectrum, Michel parameter
lifetime in anthracene near melting pt. 5549
lifetime in 18 metals, comparison with theory 17908
mean lives in Al and alkali metals 9342
$p-e^--e^+$ system, binding energy 9727
polarization in μ^+ decay, calc. 11190
scattering by H atoms at low energy, calc. 4167
scattering, elastic, on H and He atoms, calc. 9753
scattering on electrons, at 80-200 MeV 3958
scattering, on H atoms, effect of polarization 5550
scattering, inelastic, polarized positrons on atoms 9751
scattering, 1 MeV, by Xe and Hg 9652
scattering, 10 MeV, nuclear emulsion check of Molière's theory 7337
at 7-17 MeV, scattering on Xe 5764
space asymmetry in $\pi^+-\mu^+-e^+$ decay 15388
spatial asymmetry in $\pi^+-\mu^+-e^+$ decay 13016

Potassium
age of "carbo" meteorite from spallation-produced K 3413
age of Ramsdorf meteorites from K/A content 4885
atomic beam, scattering on N_2 11499
atomic beam, total collision cross-section with 77 molecules 4162
atoms, collision cross-section with Cl_2 5995
atoms, h.f.s., of $K^{39,41}$, pressure shifts 17712
atoms, ionization on collision with H_2, D_2, N_2 and O_2 19611
atoms, single scattering by Hg atoms 5866
Compton incoherent scatt. function for K^+ 8196
condensed films, polymorphism 21252
crystal growth by condensation on Ag wire, in super-saturated vapour 18309
crystals, growth and evaporation 13961
deformation, elec. cond., 4.2-195°K 1850
deformation at low temps., tensile and resistivity expts. 16215
diffusion and desorption in Pt, thermionic emission study 6061
elec. cond. 15826
electrokinetic effects in liquid metal, calc. 5268
electron scatt. at low energy by atomic beam 4166
excited bound states, eigenvalues 2725
films, elec. resistance, thickness depend. 1615
hyperfine and Zeeman resonances 17694
ions, K^+ in Hg gas, kinetics 3742
ions, mobility N and Ne 1103
ions, positive, resonance charge multiplication, by atom bombard. 8988
isotope separation, by vacuum evap. of molten K 7709
isotopic composition 13395
liquid, X-ray structure investigation 16692
melting point, at 0-30000 kg/cm². 15808
metal, electron wave-functions 13517
in meteorites age determination 7, 4882
opt. constants, direct meas. in u.v. 16034
optical props. in far u.v. 18117
positron mean life 9342
residual resistivity 20870
resonance spectrum, effect of A at press. up to 1500 atm 5882
specific heat, 0.15-1°K 9858
spectral lines, electron beam excitation 1478

Potassium – contd
surface ionization on W 10873
X-ray emission and energy levels of solid 20594
K–He gas mixture, propag. of ultrasonics 14721
Potassium compounds (See also Alloys).
azide, spectra, colour centre formation 8008
cyanides of Fe, Mn and Ni, photoconductivity and Hall effect 4372
dihydrogen arsenate and phosphate, u.v. transmission 13686
halides, crystals, with O complexes, absorption spectrum, photochem. 8009
halides, dielect. strength, –130 to 150°C 1706
halides, effect of Tl doping on colour-centre props. 16065
halides, F-centres, short-wave absorption, higher excited states 17965
halides, lattice vibrations and specific heats, calc. 13480
halide monocrystals, i.r. absorption, effect of anionic impurities, temp. depend. 6177
halides, polymorphic transition 16037
halides, recombination luminescence, mechanism, with Ga, Ge, In, Sn, Tl, Pb activators 20996
halides, temp. dependence of elec. strength 7987
halides, zone refined, ionic conductivity 7916
orthovanadate, e.s.r. of $(MnO_4)^{3-}$ in 20169-70
pentaborate, crystal structure 4644
pentaborate, vitreous α-phase, density, unit cell and i.r. absorption 6360
tartrate, elastic moduli, u.s. pulse meas. 13896
KAl alum, surface properties 9838
KBr, breakdown energy 16026
KBr, colour centres, H, V and F, low-temp. props. 9910
KBr, dielec. strength, temp. depend. 1707
KBr, dispersion, 0.3-3.0 mm wavelength 628
KBr, effect on latent image in Ilford C2 emulsion 15213
KBr, electrolytic coloration 6054
KBr, 5 elastic wave surface, 1.7 Mc/s 17877
KBr, ion activated luminescence centres 16104
KBr, polaron energy spectrum 15836
KBr, prebreakdown currents 20962
KBr, secondary electron emission 12628
KBr, solns., observation of crystal nucleation 10279
KBr, surface tension of solns., meas. 2160
KBr, thermal expansion 15815
KBr, V-centres in crystals containing Ca, Sr, Ba ions, e.s.r. and optical absorption 6051
KBr, zone refining 8167
KBr–KCl solid solutions, thermal expansion 15815
KBr:Tl, colour centres, X-ray induced, at low. temp. 1596
KCN, temp. cycling at thermal transformation, ~ –110°C, domain co-existence 21196
KCNS, melting, effect on u.v. absorption 10038
KCl, breakdown energy 16026
KCl, calc. inverse matrix of lattice eqns. 715
KCl, cation and anion migration barriers 4306
KCl, colloid centres, props. 11634
KCl, colour centres, F → M-centre conversion 20833
KCl, colour centres, H, V and F, low-temp. props. 9910
KCl, colour centres, M, N and R_2, pressure effects to ~10^4 atm 13556
KCl, colour centres, optical bleaching near 0°C, temp. depend. 11633
KCl, colour centres, thermal bleaching 11635
KCl, colour centres, thermal equilibrium between F- and M-centres 7893
KCl, crystal with K colloid particles 8296
KCl, crystals, cavity formation on dislocations 11622
KCl crystals, electrification, effect of β-irradiation 10859
KCl crystals, internal friction at low temp. 21098
KCl crystals, M centre thermal reorientation 17964
KCl crystals, quenching effect 20835
KCl, dielec. strength, temp. depend. 1707
KCl, discharge path in crystal 19632
KCl, dispersion, 0.3-3.0 mm wavelength 628
KCl doped crystals, anion diffusion 1604
KCl, elastic consts. and spec. heat at const. volume, 300°K to melting pt. 16207
KCl, elastic constants, temp. dependence 11968
KCl, elec. cond. and colour centres 15880
KCl, eqn. of state 2779
KCl, evaporation, complex-ion formation, ion–molecule reactions 10876
KCl, F-centre diffusion into crystals during additive colouring 20838

Potassium compounds – contd
KCl, F-centres, e.s.r., saturation and partial recovery at 4°K 10236
KCl, F-centres, electron–nucleus double resonances 6273
KCl, F-centre growth kinetics 4301
KCl, F-centre photoconductivity, decrease on bleaching 13553
KCl, F-centres, X-ray coloration and optical bleaching light intensity depend. 15861-2
KCl, F and M centres, photoconductivity and luminescence 20937
KCl films, secondary emission 3794
KCl foil, secondary electron emission, energy distrib. 5342
KCl, hardening, shear stress, F-centre depend. 3156
KCl, ion activated luminescence centres 16104
KCl, lattice dispersion freq., from i.r. absorption at 82°K 13665
KCl, lattice vibrations and specific heat, at low temp. 4261
KCl, light scatt. by dislocation networks 11618
KCl, liquids state structure 19114
KCl, M-centre preferential bleaching with polarized light 20634
KCl, nuclear quadrupole relaxation 3142
KCl, polaron energy spectrum 15836
KCl, phosphorescence, green, symmetry, of heat pretreated coloured crystals 13720
KCl, photo creation and destruction of F centres 15859
KCl, preferential orientation on prod. from K_2PtCl_6 and K_2PtCl_4 11992
KCl radiation-induced precipitation sites 17978
KCl, reflectance curve 14821
KCl, secondary electron emission 12628
KCl, secondary electron energy spectrum fine structure 10941
KCl, shape of F-band absorption 6180
KCl, single crystal filament and point production 18315
KCl single crystals, u.v.-irradiated, electron microscope study 18424
KCl soln., electrolysis, induced e.m.f. 12107
KCl, thermal expansion 15815
KCl, thermoluminescence, activation energy 4466
KCl, u.s. attenuation 2206
KCl, U_3-centres, electronic structure, point-ion lattice model 20832
KCl, V-centres in crystals containing Ca, Sr, Ba ions, e.s.r. and optical absorption 6051
KCl, with Ba chloride, defects and precipitation of Ba 11627
KCl, with F-centres, light exposure, electron microscope exam. 743
KCl, X-irradiated, 420 mμ absorption 558
KCl, X-ray irrad., α and β absorption bands 16064
KCl, X-ray irrad., elec. conductivity 11658
KCl, X-ray colour centre prod. at 5 and 78°K, effect of plastic deformation 6050
KCl, zone refining 8167
KCl:Ag, e.s.r. spectrum of Ag, calc. for double and zero field reson. 18219
KCl:Ba, thermoluminescence 8016
KCl:Ca, X- and γ-irrad., absorption spectrum 2938
KCl:Pb, absorption spectra and elec. cond., effect of 600°C annealing 20990
KCl:Sr, colour centres, F and Z_2, thermal equilibrium 9912
KCl:Sr, thermoluminescence 8016
KCl:Tl, configuration coordinate model 6033
KCl:Tl, luminescence 8016
KCl:Tl, luminescence excitation and high-temp. absorption 13709
KCl:Tl, luminescence, pressure effects, rel. to configuration coordinate model 657
KCl:Tl, N and O colour centres 15860
KCl:Tl phosphor, long period afterglow 21012
KCl:Tl phosphor, luminescence processes 21005
KCl:Tl, quantum-mech. calc. of a luminescent centre 4448
KCl:Tl, scintillation phenomena 18147
KCl:Tl, theory of luminescence 16086
KCl–KBr mixed crystals, effect of annealing on props. 12075
KCl–KBr solid solution, diffuse X-ray scattering 16323
KCl–KBr solid solutions, phonon scatt. by point defects at liquid He temp., from thermal cond. 13506
KCl–NaCl, mixed crystals, 420 mμ absorption 558

Potassium compounds – contd

KCl–NaCl, mixed crystals, X-irradiated, F-band position 557
KCl–RbCl mixed crystals, Rb ion diffusion 6063
$KClO_3$, Cl^{35} quadrupole resonance, selective spin excitation and relaxation 18233
$KClO_3$, Cl^{35} quadrupole reson., 15-77°K, thermometer applic. 18232
$KClO_3$, K nuclear quadrupole coupling interactions 9226
$KClO_3$, X-ray irrad., V-centre structure 2825
$K_3Co(CN)_6$, crystal growth, impurity effects 6325
$K_3Co(CN)_6$ study in $K_3Cr(CN)_6$ 681
$K_3Co(CN)_6$, Cr^{3+} spin–lattice effects 6256
$K_3Co(CN)_6$, Cr^{3+} electron spin–lattice relaxation at liquid He temp. 13878
$K_3Co(CN)_6$:Cr^{3+}, for 1420 Mc/s maser 17095
$K_3Co(CN)_6$, Cr-doped, growth and maser use 4520
$K_3Co(CN)_6$, Cr-doped, mag. energy level determ. 4518-19
$K_3Co(CN)_6$:Cr, e.s r. and maser measurements 11934
$K_3Co(CN)_6$:Cr, polytypism, Cr^{3+} e.s.r. data 13877
$K_3(CoCr)(CN)_6$, maser action, relaxation effects 3134
$K_3(Co, Cr, Fe)(CN)_6$, cross-relaxation of Cr and Fe at 4.2°K 16165
$KCoF_3$, antiferromag. props. 3104
K_2CrO_4, e.s.r. of $(FeO_4)^{2-}$ and $(MnO_4)^{2-}$ in 21069-70
$K_2Cr_2O_7$, elec. cond., solid and molten, and viscosity, melting study 13466
$K_2Cr_2O_7$, space group symmetry 722
$KCr(SO_4)_2.12H_2O$, mag. temperatures between 1 and 24°K 10103
KF crystals, n.m.r. of K^{39} spin 4528
KF, molten, structure, high temp. X-ray diffraction 6778
$KFeF_3$, antiferromag. props. 3104
KGe, crystal structure 8212
KH_2PO_4, electron diffraction examination 18337
KH_2PO_4, ferroelectric props., theory, comparison with isomorphs 7981
KI, anisotropy of elastic constants, 20-550°C 16206
KI, aq. solns., flash photolysis, absorption spectrum of dihalide ion 10357
KI crystals, growth, Tl halide activator distribution determination 13939
KI doped with paramag Cu, spin lattice relax. time of I nuclei 10243
KI, exciton band, long wave, temp. depend. 2811
KI, F-centres, e.s.r., 4-293°K, compared to other K halides 1826
KI, F-centres, optical aggregation 1597
KI, ion activated luminescence centres 16104
KI, luminescence, low temp., trapped charge 2957
KI, single crystals, elastic wave propagation 6855
KI, solutions, nucleon quadrupole relax. of I^{127} 12427
KI:Tl, colour centres, X-ray induced, at low temp. 1596
KI:Tl, emission and absorption spectra 20997
KI:Tl, luminescence under far-u.v. excitation 21004
$KLiSO_4$, thermal expansion, X-ray measurements 18361
$KMnF_3$, F^{19} n.m.r., antiferromag. transition at 88.5°K 11955
KN_3, irradiated, e.s.r. 17919
KNO_2, elec. cond., solid and molten, and viscosity, melting study 13466
KNO_3, aqueous soln, compressibility 14640
KNO_3, melting, effect on u.v. absorption 10038
KNO_3, phase III, ferroelectricity 639
KNO_3, specific heat, meas. and result 2275
KNO_3, surface tension and density 2161
KNO_3 and KNO_3–$NaNO_3$, molten, u.s. absorption and vel. 16696
$K_2Na(SO_4)_2$, thermal expansion, X-ray measurements 18361
$KNiF_3$, n.m.r., interaction of P_σ and P_π orbitals 18227
KO_3, paramag. reson., temp. and freq. depend., decomposition 21077
KO_2, resonance absorption, exchange effects 4522
KOH, acoustic velocity, u.s. 5012
KOH, crystal structure 21201
KOH, KOD, near i.r. absorption spectra 1736
K_2IrCl_6, crystalline, Szilard–Chalmers reaction, Ir^{193} recoil species 12109
K_2IrCl_6, exchange interactions 13876
$K_2Mg(SO_4)_2.4H_2O$ (leonite), structure 18363
K_2MnO_4, crystal structure 8220
K_2NaCrF_6, n.m.r., interaction of P_σ and P_π orbitals 18227
$K_2O.MgO.3SiO_2$; $K_2O.CuO.3SiO_2$ and $K_2O.PbO.3SiO_2$ fibres, structure 6372

Potassium compounds – contd

K_2SO_4–SO_3, isotopic exchange 14112
K_2SO_4, Madelung constant 13475
K_2SO_4–SO_3, isotopic exchange 14112
$K_2S_2O_3.\frac{1}{2}H_2O$, unit cell and space group 16331
$K_2S_2O_8$, i.r. absorption and Raman spectra study 11526
K_3Sb, energy distrib. of photoelectrons 1544

Powders (See also Granular structure; Particle size; Sintering; Surface measurement).
conducting, in a dielectric medium, dielec. props. 3722
dielec. props. embedded in homog. medium 3723
electroluminescence, of single particles, brightness distrib. 2966
electroluminescent, role of exhaustion barriers 8026
ferromagnetic, multidomain, props. 3047
ferromagnetic, relaxation behaviour 3045
ferromagnetic, in rotating mag. field 18193
ferromagnetic in wave guides, high temp. investigation 10156
Hall effect meas. 9946
inequigranular, fractional coverage of plane 10325
magnetic, perm. magnet use, stability 3038
magnetic, in plastic as perm. magnets 3037
magnetic, shape distribution 3048
on magnetic tapes, interaction, in ambient fields 1792
magnetized, electron beam diffraction 10968
mineral particles, friction 8135
optical reflection, diffuse, Mg oxides and ultramarine 12469
optical transmission, effect of adsorbed water, theory 3650
paramagnetic resonance line shapes 21219
phosphors, quantum efficiency, wavelength depend. 2954
pigments, mixture data 14857
radioactive, measurement of speed of pneumatic transport 19041
Raman intensities, absorption effects 13687
refractory compounds, emissivities 16919
semiconductors, powdered, photoconductivity using photodielectric effect 20924
ferrite, magnetic properties 3087
rutile, electrification 13643
B–Ti dispersions, metallurgical characteristics 14057
C, Hall effect measurement 17990
Ge, O_2 chemisorption 10368
ZnO, pure and doped, X-irradiated, electron emission 2375
ZnS phosphors, pulverization, effect on opt. and elec. props. 10084

Praseodymium
electronic transitions in CdF_2 13698
ionization potential 14964
magnetic props., calc. 11807
spectra of Pr^{3+}, calc. 5886
Pr^{3+}, self-consistent fields, without exchange 5848

Praseodymium compounds
PrB_6, formation, structure 14020
$PrCl_3$, electron states, comparison with $NdCl_3$ 8015
$Pr(NO_3)_3.6H_2O$, absorption line shift with film thickness 2942
$Pr_2O_3.Fe_2O_3$, mag. hysteresis, effect of temp. 13834

Precipitation
aerosol in electric field 10361
aerosols, charged particles, e.s. process 14976
alloys, effect of solute precipitation on resistivity 17984
at edge dislocations, impurity flow 7696
interaction of precipitates and dislocations 17936
precipitates growth, dislocation formation 20825
solid solutions, growth of precipitates 21230
spherical precipitates, bounds on nonlinear diffusion controlled growth rate 15871
surface-active additions on metal crystal lattice defects 8269
carbides, from solid solution in α-iron 16325
Elinvar-type alloy, hardening, props. 3012
Ag–Zn solid solution, vacancy precipitation kinetics 18387
Al–Cu alloys, effects of quenching 21239
Au–Co alloy, rel. to mag. props. 21242
Ba, in KCl/Ba chloride crystals 11627
C in α-iron 18405
CdS from solns, structure variations 8207

Precipitation — contd
Co, in Cu—Co alloys, particle size, rel. to magnetization 3016
Cu_4Ti in Cu—Ti alloys 21228
Fe, in β-brass-iron 2993
Fe, in grain boundaries, impurity separation 17970
GaAs, effects of Cu precipitation 18039
KCl radiation-induced precipitation sites 17978
Li, in Ge 12078
Mo_2C in Cr—Mo steel 18389
Si from Al 16350
Si crystals containing Al 20826
U_4O_9 in UO_2, habit planes 8150
Pressure (See also Atmospheric pressure; High-pressure phenomena and effects; Radiation pressure; Vapour pressure).
automatic recording film balance system 2162
high pressure thermodynamic scale 16930
internal, in solids, at 0°K, quantum-mech. calc. 11551
planetary nebulae, gas and radiation pressure 10518
sinusoidal, generator 3586
in TNT explosion products 14728
transfer through porous medium, distribution equations 10686
on water, effect on structure and sound velocity 10657
Pressure measurement (See also Manometers; Vacuum gauges; Vapour pressure measurement).
calibrator, hand-held, for measuring systems 8757
convection manometer 0.5 to 1000 mm Hg 3549
greaseless Hg cutoff for differential pressure operation 3551
intracardiac catheter tip piezoresistive pressure gauge 16501
piston manometer for 20000 atm 3548
pressure recording systems, hydraulic oscillator calibration 3587
shock-wave meas., $BaTiO_3$ spherical shell transducer 130
shock-waves, $BaTiO_3$ gauges, design and characteristics 16665
soil-pressure cell 8590
sound, photographic method 16793
spoon gauge, sensitive 16664
spoon gauges, coupled 3550
thermistor hypsometer with high accuracy 914
u.s., by light diffraction 10782
vibrating-wire cells, for earth pressure meas. 12399
viscous liquids, low-compliance diaphragm-capacitance gauge 19042
Prisms, optical
mirror—prism optical elements, wide angle scanning 8781
optical-mechanical scanning techniques 14811
resolving power, for unequal intensity lines 12490
rotating, use in "moviolas" 166
scanner for use with i.r. detector 8780
Probability (See also Errors; Random processes; Statistical analysis).
exchange reaction, quantum-mechanical calc. 3303
fragmentation of glass plates 2070
probability density meas., with cathode-ray tube 2386
self-avoiding walks, limiting props., rel. to Ising model of ferromagnetism 10468
stochastic processes, first-order 3401
Projectiles (See Ballistics).
Projectors, optical
illumination system, design 3603
use of heat insulating filters and cooled mirrors 5151
system correcting spherical, reducing coma aberrations 3607
Promethium
No entries this year
Promethium compounds
$Pm^{147}Cl_3$ in $LaCl_3$ crystals, luminescence spectrum 11787
Prominences, solar (See also Astronomical spectra, sun, corona and prominences; Flares, solar).
active and quiescent, comparison 12281
association with radio bursts 12255
condensation, from corona, in strong mag. field 6593
corpuscular emission, Arend-Roland tail, acceleration field 18730
eruptive 4901
formation, and coronal condensations, mag. field 6592
Prominences, solar — contd
heating, e.m. mechanism, mag. field strength, prominence lifetime 18758
magnetic field, polar zones 6601
1958, observations at Arcetrie observatory 18756
quiescent, temperature and turbulence from line-widths 6597
and recurrent geomag. storms, correl. 12282
sightline velocity distrib., temporal variation for active prominences 8502
solar physics review 14407
spectroscopy and Hα photography 18768-9
spurious, caused by jet planes 18757
20-21 Sept. 1955, photograms in Hα light 6596
Propagation (See Acoustic wave propagation; Electromagnetic wave propagation).
Proportional counters (See Counters, proportional).
Prospecting (See Geophysical prospecting).
Proteins
complexes of paramagnetic ions, proton relaxation 5970
irradiated, structure and orientation of free radicals formed 20705
irradiated, e.s.r. study of free radicals 20706
luminescence, effect of molecular weight 20995
position and shape of heavy-atom replacement groups, accurate X-ray det. 8249
rotational diffusion constant 14583-4
collagen, X-ray low-angle diffraction patterns 14038
haemoglobin, solution in aq. NaCl, X-ray small-angle scatter 19115
haemoglobin of horse, structure analysis 8249
serum albumin, isomerization in acidic media 21275
Protoactinium
crystal structure, X-ray study 1876-7
Protoactinium compounds
absorption spectra 20656
Proton spectra
(d,p) reactions on nuclei of $Z > 30$ 9635
D plasma in Scylla 13387
(γ,p) reactions in Nb, In, Ta and Au 11432
μ^- absorption in emulsion, calc. 17367
(n,p) reactions on 9 nuclei (A = 27-64) 11446
(n,p) reactions in 10 nuclides (F^{19} to Zn^{64}) 15600
(n,p) reactions, structures 1439
p—p scatt. at 1-2 GeV 15350
(p,p') scatt. on nuclei, at high energies, giant dipole resonance, analysis 20449
photoprotons, comp. with photoneutron spectra 7598
recoil protons in $\pi^- + p \rightarrow p + \pi^- + \pi^0$ at 1 GeV 17382
A(γ,p) 1431
Ag(N,αp) 13248

angular distribution – contd
$_\Lambda He^4$ decay 20361
He^3, elastic scattering on, 5-10 MeV 9359
He^4, scattering 12933
$Li(d,p)Li^{7,7*}$ 7575
$Li^6(n,p)$, calc., with n–p correl. in nucleus 20492
Li^7, scattering at 180 MeV 17587
$Li^7(d,p)Li^8$, at < 2.5 MeV 13237
$Mg^{24}(d,p)Mg^{25}$ 9637
$Mg^{24}(d,p\gamma)Mg^{25}$, p–γ ang. correl. 17604
$Mg^{24}(n,p)$ 20494
Mg^{24}, inelastic scatt. at 16.6 MeV, p'–γ ang. correl. 5745
$Ne^{20}(p,p'\gamma)$ 1.63 MeV, p–γ ang. correl. 11410
$Ne^{22}(d,p)Ne^{23}$ 11421
$Ni^{58}(n,p)$ and $Ni^{58}(n,np)$ reactions 9682
Ni^{58}, scattering 5746
$O^{16}(d,p)O^{17*}$ 17603
$O^{16}(He^3,p)F^{18}$ 5757
$O^{16}(t,p)O^{18}$ 17495
$S^{32}(n,p)$ 20494
$S^{32}(p,p'\gamma)$ 2.25 MeV, p–γ ang. correl. 11410
S^{32}, elastic and inelastic scatt. at 4.95-5.45 MeV 20452
Sb(n,p)Sn 1443
$Si^{28}(p,p'\gamma)$ 1.78 MeV, p–γ ang. correl. 11410
Si^{28}, elastic and inelastic scatt. at 4.95-5.45 MeV 20452
Si^{28}, scattering at 1.4-3.8 MeV 4032
$Sn(\gamma,p)$ 13256
$V^{51}(d,p)V^{52}$ 7577
Zr(n,p), Zr(n,np), at 14 MeV 15603
detection, measurement
Au–Ge junctions 1234
Cherenkov counters 15194
Cherenkov counter, internally reflecting, for high energy protons 17337
Cherenkov detector for proton synchrotron measurements 17155
energies from D toroidal discharge, nuclear plate cameras 20143
energy det., at 6.3 BeV, by multiple meson prod. in emulsion, methods compared 1283
in H bubble chamber, velocity depend. of bubble density 12728
high energy beams, operation of H bubble chambers 9243
mag. spectrometer for 1 MeV protons 15221
mass, momentum det. in propane bubble chamber 3942
photosensitive devices response to proton currents ~ 10^{-6} A 20142
proportional counter as spectrometer 19965
reponse of plastic scintillators 6204
sagitta meas. in G5, K5 and L4 emulsions 12776
spectrometer, high-energy magnetic, Uppsala 11075
spectrometer, Siegbahn–Svartholm type 15221
tracks in D1 and K0 emulsions, discrim. from α-particles 12770
tracks in nuclear emulsions 12777 [12767
tracks in nuclear emulsions, discrim. from deuterons
tracks in nuclear emulsions, discrim. from other particles 12766
tracks in nuclear emulsions, sagitta-method meas. 15204
effects
bremsstrahlung and pair creation, effect of form factor and meson "jacket" 2538
capture of μ-mesons 2564
Coulomb excit. of Sm^{152} 11415
excitation of H atoms (1s–2s) 20560
excitation of N_2, O_2 and O spectra, by 0.5-1 MeV protons 5942
solar protons, as cause of geomagnetic variations 1989
solar, relation between aurorae and magnetic bays 8403
solids, irradiation 6064
20 and 35 MeV beams, luminescent effects in Plexiglas Cherenkov detectors 2462
Au, preferential atom ejection at 300 keV in (110) directions 13564
H and H_2 excitation 11501
Ni^{58}, radiative capture and spins of Cu^{59} excited levels 4031
interactions (See also Nuclear reactions, protons).
with bound protons in C, at 930 MeV 7443
capture of neutrino, with parity non-conservation 1269
collision in liquid H_2 with (K^-,p) atom 470
Compton scatt., π^0 decay as intermediate state in 5582

Protons and antiprotons — contd
interactions — contd
deuteron disintegration, resultant neutron spectra 20244
electron capture from H gas atoms 7078 [15326
electron–proton collisions, bremsstrahlung production in emulsion, at 950 MeV, similarity to 900 MeV neutron effects 20484
in emulsion, at 5.7 BeV, π multiplicity, free nucleon interaction 17331
with emulsion nuclei, at 9 BeV, strange particle and meson prod. 13068 [9619
with emulsion nuclei, at 9 BeV, π- and K-meson prod. high-energy interactions with O and C, expt. and Monte Carlo calc. 11171
with H atoms, stability 20544
on H, high energy total cross-section 3984
with He, and 970 MeV, rel. to α-particle props. 20139
with He^4, at 630 MeV 12933
high-energy jet in emulsion 5598
multiple meson prod. at 6.3 BeV in emulsion, energy det., methods compared 1283
n–p capture, interaction effect 7377
with nuclei, Al and Pt, at 25 BeV, mass analysis of secondary particles, high deuteron production 17582
on nuclei C, Fe, Pb, at 2.8 BeV, strange particle production 17427
in Pb and Al, from cosmic-ray showers 5640
with photons, $\gamma + p \rightarrow \pi^0 + p$, at 900-1200 MeV, cross-sections 15415
photoprod. of π^0-mesons on protons at 245 MeV 13045
proton–electron, bremsstrahlung 15326
proton–nucleon collisions, 6.2 GeV in emulsion 12923
proton–π^--meson, at 1 BeV, Fermi's statistical theory 13070
proton–proton, at > 1000 BeV, data on cosmic-ray jet 1342
recoil, in π^+–p scatt., polarization 9411
recoil, in π^-–p, polarization 11210
scatt. of electrons at 900 MeV and 135° 17305
p–α, diff. elastic scatt. cross-sections at 20.1 MeV 2541
$p + \gamma$, at 1.1 BeV, multiple meson prod. 13039
$p + \gamma \rightarrow \pi^0 + p$, cross-section 373
p–e^-, K^+-meson prod. 15440
$p + d \rightarrow H^3 + \pi^+$, $\rightarrow He^3 + \pi^0$, at 591 MeV, diff. cross-section ratio, rel. to charge independence 15419
$p + d \rightarrow n + p + p$, neutron spectra for proton energy 6-13.5 MeV 1276
$p + d \rightarrow p + p' + n$, neutron spectra, 0-180°, 4 MeV 17332
$p + d \rightarrow \pi^0 + He^3$, $p + d \rightarrow \pi^+ + H^3$, branching ratio and cross-sections at 450 MeV 9355
$p + d \rightarrow \pi^0 + He^3$, $p + d \rightarrow \pi^+ + H^3$, branching ratio at 450 MeV, charge independence study 1277
p–d, rel. to μ-mesic molecules 13459-60
p–d, at 600 MeV, $(H^3 + \pi^+)$ and $(He^3 + \pi^0)$ production, cross-section ratio, e.m. corrections 11170
p + d, at 625-723 MeV, possible anomaly in meson prod. 20213
p–d, at 970 MeV, cross-sections 9356
$p + e \rightarrow n + \gamma$ cross-section 11143
p–n, d production, calc., modification of Fermi's statistical theory 20042
$p(\bar{\nu},\beta^+)n$, detection of the free antineutrino 3955
p–p, associated production, two models 20131
p–p collisions, high-energy, dueteron prod., calc., 20245
p–p collisions, π-meson production cross-section 2587
$p + p \rightarrow d + \pi^+$, amplitudes near threshold, calc. 5597
$p + p \rightarrow d + \pi^+$, d-polarization 9357
$p + p \rightarrow d + \pi^+$, deuteron polarization 11169
p–p, d production, calc., modification of Fermi's statistical theory 20042
p–p, in giant stars 10528
p–p, at 1 BeV, cross-sections, prod. of π^0 and π^+ 1279-80
p–p, π production, branching ratio 17403
p–p, π^0-meson production, ang. distrib. 11163
p–p, time-reversal invariance confirmed 12926
$p + \bar{p} \rightarrow \Omega + \bar{\Omega}$ 9442
$\bar{p} + n \rightarrow K^- + K^0$, K^-–K^0 relative parity determ. 5603
p–π collisions, K^+–K^- production ratio 13059
$p + \pi^- \rightarrow \pi^- + p + \pi^0$, at ~ 1 GeV, effect of π–π resonances 13021
$\pi + p \rightarrow Y + K$ and $Y + p \rightarrow Y + \pi$, rel. to Y-particle polarization 2596

Protons and antiprotons — contd
interactions — contd
π^-–p, Fermi statistical theory, applic. to exper. data 9403
π^- capture, high-orbital S-state 9417
π^+ meson photoproduction on H near threshold 15414
4.5 and 6 GeV in emulsion, ang. distrib. of secondary π-mesons 15390
6.2 GeV in emulsions 15346
at 9 GeV, in emulsion 3966
9 GeV, in emulsion, ang. correl. of secondaries 1401
9 GeV, multiple meson production in emulsion 2558
magnetic moment
anomalous, calc. using classical model 5555
precise measurement 20129
precise value, rel. to Bohr magneton 2537
polarization
acceleration by strong-focusing linear accelerator 9363
elec. and mag. polarizabilities, from γ-p elastic scatt 20137]
by nuclei, high-energy 1400
in scattering, inelastic, distorted wave theory 17574
by scattering at 10 MeV by A and Cu 7549
in scatt. by C and Cu, rel. to optical mode 11401
in scattering on C^{12} at 2.3-4.3 MeV 7554
in scattering on He^4 and C^{12} at 2-6 MeV, elastic 1408
in scattering, elastic, on O at 8.7 MeV 5743
$\gamma + p \rightarrow \pi^0 + p$, at high energy 17397
Λ decay, rel. to p helicity 17330
in n + d, at 90 MeV, calc. 17340
p–d elastic scatt. at 3.4 and 3.74 MeV 9361
p–p scattering at 3.3. MeV 7346
p–p, at 16.2 MeV 2545
in p–p scatt. at 98 and 142 MeV 11164
p–p scatt. at 98 and 142 MeV, depolarization 12926-7
p–p scatt. at 142 MeV, Wolfenstein R parameter 11166
p–p scatt. of 660 MeV beam, depolarization 20205
p–p scatt., elastic, at 1 BeV 1279-80
π^-–p scatt. at 225 MeV, recoil proton polarization 5589
C^{12}, scatt. at 1.5-5.5 MeV, phase-shift analysis 13232
C^{12}, elastic scatt. at 4.65-5 MeV 13228
C^{12}, inelastic scatt. at 185 MeV 11409
$C^{12}(d,p)$ C^{13} at 10 MeV 2665
$C^{12}(d,p)$ C^{13} reaction, proton polarization 20459
in $He^3(n,p)T$ reaction 9362
Mg, elastic scatt. at 9.1 MeV 11411
O^{16}, scattering at 180 MeV 7564 [20451
O^{16}, scattering, calc., choice of F^{17} level parameters
production
by antineutron annihilation in emulsion 17362 [15358
antiprotons, in π^-–N, propane bubble chamber study
antiprotons of 2.8 BeV/c momentum, in proton synchrotron
in $_{\Lambda}B^{11}$ non-mesonic decay 20359 [9364
$C^{12}(\gamma,n)$, yield curves 11434
fine time-structure of beams from synchrotron 19844
in (γ,p) reactions on Li^6 to Au 13264
monoenergetic, by Van de Graaff accelerator 1175
n + d, at 90 MeV, polarization, calc. 17340
scattering
collisions with μ-mesic H atoms 11492
on deuterons elastic, at 419 MeV, asymmetry using polarized protons 20136
diffraction scattering on complex nuclei, proton and antiproton 12924 [20132
diffraction scattering, in nuclear field, bremsstrahlung
elastic and polarization of 300 MeV protons 15347
elastic, at 6.8 MeV, on Cr, Ni and Cu nuclides 20450
electron-proton, with electric dipole moment 15345
of electrons, second Born approx. 15331
on emulsion nuclei, at 8.7 BeV, elastic 7546 [11410
even-even nuclei, inelastic, at 6.5 MeV, p–γ ang. correl.
on free and quasi-free nucleons in emulsions 9354
γ-p elastic, at 40-70 MeV 20137
of γ-rays, up to E_γ = 220 MeV 5533
high energy synchrocyclotron research, Joint Institute of Nuclear Studies, U.S.S.R. 15305
inelastic, direct interaction theory 11443
inelastic, optical model treatment 11288
inelastic, similarity to (d,d') and differences from (p,n), rel. to Blair model 1396
intermetallic diffusion study 1605
by light nuclei, inelastic, at high energy, ang. distrib., calc. 4089
light nuclei, inelastic scatt. of 340 MeV protons, energy spectra 15503

Protons and antiprotons — contd
scattering — contd
by non-spherical nuclei 7545 [20429
in nuclear emulsions, Coulomb and nuclear scattering
by nuclei, at high energies, giant dipole resonance, analysis 20449
by nuclei, high-energy, elastic 1400
on nuclei, at 96 MeV, calc. 15568 [20448
by nuclei, triple scattering and depolarization parameters
on nucleons in emulsion, at 9 BeV 13233
on nucleons, 6.2 GeV in emulsion 12923
p—α, at 40 to 95 MeV 20138 [7423
p—d, p—t, p—$He^{3,4}$, 5-14 MeV, elastic, diff. cross-sections
quasi-elastic, on nuclei 4085
on rare-earth nuclei, rel. to level props. 7559
resonance scattering integral 9358
surface analysis by charged particle spectroscopy 18457
68.3 MeV, diff. cross-sections 5-50° 12925
98 and 142 MeV, depolarization, time-reversal invariance confirmed 12926-7
210 MeV, phase-shift analysis 12931
25 GeV, pion production 13036
of π^+-mesons with 390 MeV energy 7409
$\pi^+ + p \rightarrow 2\pi^+ + p$, pion momenta 13034
$\pi^\pm$—p, with K-meson prod. 4001
of π^--mesons, with 6.8 BeV/c momentum 9415
π^--meson—proton, with 128 and 162 MeV mesons 13018
π^-—p, effect of bound states of π-mesonic atom 2583
π^-—p, elastic, at 240-330 MeV 13033
$\pi^- + p$ at 915 MeV 15402
$\pi^- + p$ at 1 GeV, phenomenological potential 15403
π^-—p, at 5 GeV, resonance interaction 11212
π^-—p, at 7 BeV, theoretical interpret. 13032
A, 10 MeV 7549
Ag, inelastic, model 11406
Al, differential cross-section and polarization 15569
Al^{27},(p,p'γ) 20347
C, elastic, 220 MeV 5738
C, at 970 MeV, optical-model analysis 4094
C, quasi-elastic, at 930 MeV 7443
C, at 10-68 MeV, total cross-section 4093
C, at 3 BeV, small-angle elastic scatt. 9628
C^{12}, 1.5-5.5 MeV, polarization, phase-shift analysis
C^{12}, elastic, at 2-6 MeV, phase-shift analysis, [13232
spin polarization calc. 1408
C^{12}, elastic, at 2.3-4.3 MeV, polarization 7554
C^{12}, elastic, at 4.65-5 MeV, polarization 13228
C^{12}, inelastic, at 185 MeV, 4.4 MeV level as collective state 11409
C^{12}, inelastic, 3.8-4.5 MeV, γ-ray ang. distrib. 17499
C and Al, neutral meson prod. at 930 MeV 5575
C and Cu, polarization, rel. to optical model 11401
Ca, elastic, 220 MeV 5738
Ca^{40}, elastic and inelastic, rel. to Sc^{41} nuclear band structure 1365
Co, at 5.45 MeV, elastic 7563
$Cr^{52, 53}$ 7556
on Cu, at 5.45 MeV, elastic 7563
Cu, 8-14 MeV 20453
Cu, 10 MeV 7549
Cu, at 3 BeV, small-angle elastic scatt. 9628
H, atomic, stopping power at low energies 9755
He, 9.2 and 14.5 MeV 20140
He^3, elastic, at 5-10 MeV, ang. distrib. 9359
He^3, 5-20 MeV, elastic scatt. calc. 9352
He^3, at 29 MeV 20250
He^4, elastic, at 2-6 MeV, phase-shift analysis, spin polarization calc. 1408
He^4, elastic, at 20.1 MeV, diff. cross-section 2541
He^4, at 630 MeV 12933
Li^7, at 180 MeV, ang. distrib. 17587
Mg, differential cross-section and polarization 15569
Mg, elastic, at 9.1 MeV, polarization 11411
Mg^{24}, inelastic, at 6.8 MeV 13235
Mg^{24}, inelastic, at 16.6 MeV, p'—γ ang. correl. 5745
Mg^{24}, inelastic, with Coulomb interaction 9629
Mg^{24}(p,p'γ) Mg^{24} 11383 [1411
N, elastic, 1-3 MeV, resonances and phase shift analysis
Ni, 8-14 MeV 20453
Ni, at 5.45 MeV, elastic 7563
Ni^{58}, elastic and inelastic 5746
O, 8-14 MeV 20453

Protons and antiprotons — contd
scattering — contd
O, at 8.7 MeV, effect on polarization 5743
O^{16}, inelastic, at 180 MeV 7564 [20451
O^{16}, polarization, calc., choice of F^{17} level parameters
Pb, at 3 BeV, small-angle elastic scatt. 9628
S^{32}, elastic and inelastic, at 4.95-5.45 MeV, ang. distrib. and total cross-sections 20452
Si, inelastic, at 7.5-8.5 MeV, energy levels of Si^{28-30} 13141
Si^{28}, elastic and inelastic, diff. cross-sections at 1.4-3.8 MeV 4032
Si^{28}, elastic and inelastic, at 4.95-5.45 MeV, ang. distrib. and total cross-sections 20452
Si^{28}, inelastic, with Coulomb interaction 9629
T, elastic, at 50-200 keV, phase-shift analysis 13073
T, 5-20 MeV, elastic scatt. calc. 9352
Ti, 8-14 MeV 20453
$U^{238, 235}$, elastic, at 22.8 MeV, cross-sections 1412
Zn, 8-14 MeV 20453
$Zn^{64, 66, 68}$, at 11 MeV 4092
$Zn^{64, 66, 68}$, elastic, at 20.35 MeV, absolute diff. cross-section 1409-10
scattering, proton—deuteron
differential cross-sections at 600 MeV 368
elastic, at 3.4 and 3.74 MeV, proton polarization 9361
elastic, 675 MeV protons 1320
π-meson prod. 9425
90 MeV, charge exchange in 19 atm deuterium 3967
970 MeV 9356
scattering, proton—neutron (See Neutrons and antineutrons, scattering, proton—neutron).
scattering, proton—proton
ang. dependence of polarization at 970 MeV 17334
associated meson production 15454
boundary condition model 20133
Coulomb, generalized Born approximation 15279
Coulomb and nuclear scatt. combined, phase-shift anal.
cross-section and polarization, at 98 and [17333
142 MeV 11164
in $^1D_2$ state, at 616 MeV 2544
effective-range, theory with vacuum polarization 17335
elastic, at 8.5 BeV 20134
electron excitation effects, compensations 1278
fixed angle dispersion relations 2539-40
high energies, phenomenological potential 5558
inelastic, at 9 BeV, interpretation 11168
phase shift analysis, test of charge independence 11157
phase-shift calc. 17251
phase-shifts, complex, from pion prod. data 3968
phase shifts, depolarization scattering parameter, 210 MeV 17336
phase shifts at 150 MeV 15351
$\pi^\pm$-meson prod., emulsion study 13047
polarization, at 16.2 MeV 2545
polarization in scattering near 3.3 MeV 7346
quasi-elastic, at 158 MeV 20135
quasi-free, in medium and heavy nuclei 20447
scattering amplitude, real part, mag. and sign 20429
scattering matrix at 90° and 140-635 MeV 15353
semiphenomenological potential 15348
spin correlation coeff. Cnn, meas. at 320 MeV 7347
spin correlation coeff. at 382 MeV 5559
study of α-particle props. 20139
triple, of 660 MeV beam, depolarization 20205
use of "damping" functions 9319
10 MeV, diff. cross-sections, phase-shift det. 2542
25 MeV, diff. cross-sections 11165
28-68 MeV 1282
90 MeV, analysis, rel. to π-meson field theory 12929
142 MeV, Wolfenstein R parameter 11166
< 150 MeV, single and double, two-nucleon potential with one-pion exchange tail 20072
158 MeV, quasi-elastic 20135
180 MeV, quasi-free on Li^7, ang. distrib. 17587
310 MeV, phase-shift analysis 2543
310 MeV, scatt. amplitude accounted for by neutral vector meson theory 15275
435 MeV, small-angle, cross-sections 12928
582 MeV, elastic, total cross-section 2580
930 MeV interactions 1281 [9356
970 MeV, partial cross-section, from p—d interaction
GeV region, Bubelev's model 15352

Protons and antiprotons — contd
scattering, proton–proton — contd
1 BeV, elastic, ang. distrib. 1279-80
1-2 GeV, momentum spectra, nucleon isobar prod. 15350
2.7 BeV, anelasticity, π-meson multiplicities 15349
3 BeV, small-angle elastic scatt., r.m.s. radius 9628
6.5 BeV, elastic 11167
10 GeV, 200 random stars 12932
25 GeV, rel. to statistical theory 12861
antiprotons
absorption by nuclei, effect of Coulomb forces 20430
annihilation, cross-section, rel. to π-nucleon interaction 11202
annihilation in complex nuclei 4090
annihilation, in deuterons 12936
annihilation in emulsion, π and K-meson production 7348
annihilation, influence of Bose-Einstein statistics 17339
annihilation, with meson prod., Fermi's statistical theory 13070
annihilation, multiple meson production, theory 11162
annihilation, π-meson prod. 11199
annihilation in protonium, capture rates for various eigenstates, π-meson multiplicity 15355-6
annihilation, statistical theory 2572
annihilation, three models compared 17327
diffraction scattering on complex nuclei 12924
events in emulsion, analysis 5561 [9364
generation of 2.8 BeV/c antiprotons in proton synchrotron
inelastic scattering, 30-250 MeV 15357
interaction cross-sections with protons at 1, 1.25 and 2 BeV 17338 [15343
interaction at 440 MeV on C and Pb, antineutron prod.
interactions in nuclear emulsion 362 [5562
interactions, in nuclear emulsions, meson production
interactions with protons, model 11156
isotopic spin 7312
production by protons at 25 BeV on Al and Pt 17582
prod. by 6 GeV protons on C, absorption effects 15343
scattering, in nuclear matter 5748 [11203
scattering by nucleons, calc. assuming charge independence
$\bar{p} + n \rightarrow K^- + K^0$, relative $K^- - K^0$ parity determ. 5603
$\bar{p}-p$ cross-sections, 534-1068 MeV 361
$\bar{p}-p$ and $\bar{p}-C$ interactions, 75-200 MeV 11172
$\bar{p}-p$, $\bar{p}-d$ and $\bar{p}-n$ annihilation, π-meson prod. 11199
$\bar{p} + p \rightarrow \Sigma^0 + \Lambda$, at 2 GeV/c, possible evidence 13067
Pumps (See also Vacuum pumps).
air-pump, centripetal, operated electromagnetically 8686
electromagnetic, d.c., theory 9149
e.m., thermal processes 10792
Pyroelectricity
in cubic ZnS structure 13663
thiourea 2921
triglycine sulphate 1703
triglycine sulphate, spontaneous polarization det. 6160
$UO_2(NO_3)_2$, hexahydrate and - deuterate 18138
Pyrometers
absorbing filters 10612
design, for surface and inside temp. of glass 6988
optical, using polarized light 12537
pyrometry of metals in near i.r. 8855
temp. depend. luminescence of Zn-Cd sulphide 1062
in temp. measurement of unenclosed bodies 2273

Quantum electrodynamics (See also Electrodynamics; Electromagnetism).
appl. of techniques to theory of superconductivity 5234
applicability at small distances, dispersion relations test
asymptotic conditions and perturbation theory 15300 [12818
Bopp–Podolsky field, electron scattering 12817
bound states 7275, 20030
Cherenkov radiation in ferromag. dielectric media 12903
Compton scattering, radiative corrections 7317
consequences of essential singularity 2486
convergent non-local theory 15234
correspondence principle in simplified theory 5472
Coulomb gauge, non-relativistic propag. function, spectral line shapes 20025 [11078
Coulomb law, for small distances, radiative corrections
covariant, formulation 14516 [17614

Quantum electrodynamics — contd
Delbrück scattering, imaginary part of scatt. amplitude
derivative coupling, source and photon field 1241
Dirac eqn., transformation props. 20047
dispersion relations 9257
electric and mag. susceptibilities, spatial dispersion 9150
electron–electron scattering, radiative corrections 15330
electron interactions, in coherent fields, expectation value, mean square velocity deviation 5544
electron polarization during motion in mag. field 12909
eliminating variation of mass with velocity 15265
e.m. wave propag., in ferromagnetics, spin system excitation 21034
Euclidean gauge transformation 6683
in expanding universe 18954
ferromag. dielectric in alternating mag. field, non-resonance absorption, theory 21032 [17216
Feynman amplitudes, singularities and discontinuities
field operators, asymptotic conditions 17221 [1242
gauge dependence of wave-function renormalization constant
gauge properties of Green's functions 15240, 20017
gauge properties of propagators 5474
gauge transformations 7274
general vector field interaction 15244
Green's function, 2-electron, renormalization 20018
with indefinite metric, Lorentz covariance 17220
indefinite metric, non-Lorentz invariance of Gupta formalism 12821
in infinite energy limit, 1-particle Green's function, spectral form 17215
infrared divergences 11089, 18953, 20022
integration of matrix element in perturbation method 15230
intermediate systems 20019
internal degrees of freedom 15304
intrinsic particle field, effect of multiple scatt., emission on passing through 2 media 20093
limits of validity, pair production 2485
Lorentz non-invariance with interaction present 18955
mathematical problems, conference 7267
matrix elements of connected diagrams 15242
mesic atoms, Auger effect, theory 11489
mesoelectrodynamics, geometrization 15231
μ-meson mag. moment, calc. 15382
μ pair-production, by electron and positron colliding beams, QED validity 17372
multipole singularities of classical vector and pseudovector fields 1243 [3914
non-linear electromagnetism, functional theory of particles
non-perturbation theory results on renormalization constants
nucleon interactions, at large distances, Heisenberg theory 9260 [7264
one-body propagator 20028 [20080
perturbation theory, properties of single loop diagrams
photon propagator, asymptotic behaviour 3915
photon propagator, general props. 12822
photon propagator, independence of physical charge in high-energy limit 20027
photon propagator, structure theorem 323
photon scattering, in homog. mag. field 322
photon self-mass, formal paradox 12820
polarized electrons, in mag. field, depolarization due to radiation 353 [9258
propagators, dispersion relations and perturbation theory
quantization, consistency 7272
quasi-real processes 1240
quasi-real processes, generalized Williams–Weizsäcker method 12816
radiation field of slowly moving particle system, work done against field 5530
relativistic processes, simplified calculation 20021
renormalizability, analyticity, and regularity at zero charge, inconsistencies 20027
renormalization, Dirac–Maxwell eqns. 324
renormalization constants 17219
scalar, 2-charge renormalization group 7273
scattering matrix, with Pauli interaction correction 20074
several interacting fields, S-matrix elements 15241
at small distances, dispersion relations, test 12819
at small distances, feasible tests 11077
at small distances, $K^+ - \mu^+$ radiative decay study 15422
at small distances, rel. to $e^- - e^-$ scatt. 9337, 17304
small Pauli term, possible existence 20029

Quantum electrodynamics — contd [20023
spin-zero particles, 4-vertex function, i.r. catastrophe
statistical, gauge invariance relations 5473
test in electron scatt. on α-particles 3916
vacuum 20024
vacuum polarization, due to charged bosons 7271
vacuum polarization, effects on p—p scatt. 17335
vacuum polarization, effects on energy levels of μ-mesic atoms 17672
vertex function, high-energy theorem 17218
wave-function renormalization constant, finite value 17217
wave propagation, in Lorentz systems 12465
Quantum statistics (See Statistical mechanics).
Quantum theory (See also Electron theory; Field theory, quantum; Fundamental particles).
accidental degeneracy 43
angular operators, applic. to s-matrix 883
antiunitary operators, normal form 16608
Brownian motion 8565
causal interpretation 17212 [18974
classical and quantum mechanical hyper-virial theorems
Clebsch—Jordan expansion of Lorentz group 2479
complex orbital momenta 4944
concept of physical quantities 18941 [18952
configurations in quantum mechanics, use of line geometry
co-ordinate rotations, real representations 16610
crystals, scheme of energy levels 2117
eigenvalue problems, asymptotic soln. 3455
eigenvalues, estimating, theorem 2066
ergodic theorem 16598
ergodicity conditions 12373
Fermi oscillator, classical analogue 8569
Fermi system, Feynman principle 8570 [18961
fundamental tenets, examination by information theory
generally covariant theories, local conservation laws 8556
generalization of quantum mechanics 12366
group-theoretical foundations 18942-3
Hilbert space, connection with deterministic parameter space 18960
Hilbert space, Lorentz non-invariance with interaction present 18955 [14516
Hilbert space, treatment with indefinite metric operator
"integral-over-all-paths", in diffusion-type eqns. 14368
irreversible processes 16650
length standard 862 [3449, 8554, 14511
measurement algebra, from N-dimens. geometry of states
measurement of quantum mechanical operations, limitations due to conservation law 18951
modified classical interpretation, and particle models 3939
non-linear theory of waves 10595 [3452
non-relativistic, in—out formalism, with 2-body interactions
optical theorem of scattering with incoherent mixtures of pure states 20078
paradox of Einstein, Podolsky and Rosen 44, 14517, 18950
photon packets 14780
positive-energy bound states, non-existence 10599
probability interpretation 18957-9
quantum kinematics and geometry 18940
quantum-mechanically possible physical states 8552
quantum phenomena in r.f. range 293
Racah algebra for evaluating commutators 2069
radiation diffusion, integral eqn. soln. 4963
relativistic rotator, Hamiltonian formalism 6684
relativistic velocity of spinless particle 7268
and relativity 14492
Schwinger's action principle, commutation relations 8555
small quantized system, in weakly dissipative medium
spin, gravitational effect 12351 [3459
spin, inertial effect, representation in Dirac theory 11091
spinors, use of Clifford algebra 18946
three-body mechanics 2114
transitions in adiabatic approximation 8557
transport coefficients, quantum corrections 18969
uncertainty principle 16599
uncertainty principle, proposed test 46
uncertainty principle, and relativity 10555
uniqueness of orbital angular momentum operators 14518
unitary operator bases 14512
unitary and antiunitary symmetry operators 16609
variation calcs., degenerate eigenvalues, separation theorem
von Neumann theorem of indeterminism 14510 [16603

Quantum theory — contd
application methods
antisymmetrized product, of N/2 2-electron orbitals, density matrices, electron energy 20536
atoms, statistical theory, electron groups in periodic system 7679
Brillouin zone energies, repulsive potential method 2777
cell model of liquids 3506
central-force problem, limits to soln. 10594
collective oscillations and giant density fluctuations 18956
commutation relations, nonrelativistic quantum mechanics
configuration-interaction wave-functions for [14513
2-electron ions 11481-2
coupling of spin system to cavity mode 1181
diffusion, steady soln. of Liouville's eqn. 14542
dissipative systems, harmonic oscillator 14519
electron gas in mag. field, transport of charge 4284
electron interferometer fringes, interpretation, significance of e.m. potentials 10953
electron levels in one-dimensional random lattice 20773
exchange reaction, probability 3303
fractional parentage coeffs., in photoelectric cross-section calc. 7687
gravitational field, quantized, invariant commutators 10566
gravitational field, quantum limitations on meas. 8539
"grilles" of a symmetric determinant 10465
H atom, ionization, by slow electrons 1101
hard-core integrals for central potentials, table 325
harmonic oscillator, excited, radiant energy emission 6680
Hartree—Fock energy expansion coeffs., for helium-like ion 9739
heterodynamic structures, heat capacity, rel. to glass 10322
integration in functional spaces 4939
inter- and intra-atomic correlation energies and core-polarization 20539
isotope shift and Fermi—Segrè formula 20339
Lamb shift, of tightly bound electron 9730-1
light atoms and molecules, variation method 5870
long-range forces, between atoms 9754
measurement, undisturbed measured object 8535
metals, thermal transport phenomena 1537
molecular beam differential elastic scattering, phase shift analysis 17860
molecules, perturbation calc. 4178 [8558
multicentre problems, Slater's mean exchange potential
Pais method for phase shift calc. 12852
perturbation theory, analytic properties 12878-9
perturbation theory, properties of single-loop diagrams
perturbation theory, summation method 18944 [20080
plane rotator in Stark field 3450
potential scattering, approximation methods 15283
potentials, significance, rel. to interference expts. 10600
quental systems, approach to equilibrium, theory 12378
radiation field of cavity 14519
renormalization constants in perturbation theory 20079
S-matrix, divergence iterative expansion 20066 [20061
scattering phase-shifts, distorted wave approximation
second-order perturbation energy of 2-electron atom
self-consistent molecular orbitals, determination 9824 [17650
Slater wave-functions, graphical polygon method 10597
spin Hamiltonian, open-shell ions 20684
spin systems, interacting, irreversibility 16639
spontaneous magnetization theory, for arbitrary spin [3100
superconductivity, strong coupling limit 14925
superlattices, quantum-mechanical representation 1536
surface states of diamond and graphite, MO—LCAO treatment 20719 [17266
thresholds, ordinary and anomalous, in perturbation theory
transport of particles in scattering medium, incoherent processes 9298
transport processes 16635 [9823
two-electron orbitals, density matrices for wave functions
variational principles, geometrical interpretation 18945
many-particle systems (See also Liquid helium; Superconductivity; Superfluidity).
analytical invariants 16612 [5513
arbitrary central forces, generalized Bohm—Pines model
Bethe—Goldstone approximation in superconductivity 14924
binding energy derivation 2115
Bose—Einstein gas with repulsive interaction, ground-state energy 3460

Quantum theory — contd
many-particle systems — contd
Bose–Einstein system with attractive interactions, eqn. of state, comparison with He^4 14531
Bose fluid, ground-state calc. 18985 [18984
Bose gas, nonideal, equilib. and quasi-equilib. props.
Bose hard-sphere gas, exact momentum-space formulation
Bose hard-sphere gas, low-lying excitations 10609 [16629
Bose hard-sphere gas, low-momentum excitations, temp. depend. 18987
Bose system, cluster expansion of ground state 14529
Bose system, ground-state energy, correction for triple collisions 14528
Bose system with Lennard-Jones potential, ground-state energy 14532
Bose system with repulsive interactions, ground state, equivalence of cluster integral method and pair approx.
Bose systems, dilute 3461 [14530
boson fluid, transport props., phonon concept 12379
boson gas, ground-state energy 2133-4
boson gas, hard-sphere, quantum statistics 8566
boson system, interacting, ground-state energy and excitation spectrum 2132
boson system, method of auxiliary variables, ground-state energy calc. 14534
boson system in 2-dimens. well, nuclear collective motion example 17471
bosons, Wigner distrib. function 14533
cluster development of density matrices, for Jastrow wave-functions 7308 [12884
cluster development method, saturation of nuclear forces
collisions, many-body, generalized angular momentum
cubic boson–boson interactions, inconsistency 5482 [20067
density matrix in many-electron quantum mechanics 9728
dielectric formulation for interacting particles 18988
Dirac and canonical density matrices, interrelation, appl. to imperfections in metals 18996 [14926
electron system, gauge invariance and the Meissner effect
electrons, in crystalline field, Kramer's theory, group theory 17872
Fermi fluid, bound pair states, hard-core effects 222
Fermi fluid, microscopic theory excitation energies 20085
Fermi gas, compressed and imperfect, energy 11122
Fermi gas, dilute, ground state, negative 2-body scatt. length 15301
Fermi gas, dilute, energy gap, negative 2-body scatt. length 17269
Fermi gas, ideal, energy spectrum 11564
Fermi gas, periodicity of self-consistent field, rel. to nuclear matter structure 11125
Fermi systems, superfluid, 2-particle excitation 12887
fermion and boson systems, collective behaviour 8890
fermion field, 2nd-order wave-equations 20056
fermion gas, degenerate, giant fluctuations 16636
fermion gas, statistical model, 1 and 3-dimensional cases
fermion hard-sphere gas with spin $\frac{1}{2}$, fero- [11120-1
magnetism 14537
fermion interactions, two-body correlation 16637
fermion system, with B.C.S. interaction, modified Bethe–Goldstone eqn. 17271 [15303
fermion system, collective motion and particle excitation
fermion system, ground-state energy 10607
fermion system, ground-state energy, critique of Brueckner–Goldstone perturbation series 8568
fermion system, interacting, Fermi surface and low-temp. props. 14538
fermion systems, moment of inertia 335
fermion systems, moment of inertia, effects of particle–particle interaction 2131 [7306
fermion systems, with separable potential interactions
fermion systems, superfluid, moment of inertia 12375
fermions, infinite system, energy gap, reaction matrix singularities 17270
fermions, Wigner distrib. function 14533
functional theory, mean waves and sum wave 17267
generalized theory, from Green's function 10606
Green's functions, many-particle structure 16607 [12885
ground states, with periodic Hartree–Fock wave-functions
hard-sphere interaction, surface charge pseudopotential
hard-sphere system, many-body pseudopo- [12381
tential 12380-2, 14528
hole–hole interactions in systems of fermions 18981

Quantum theory — contd

internal motions of relativistic fluid mass models of elementary particles 17238
transformation theory and functional differentiation 45
wave equations
asymptotic conditions and perturbation theory 15300
atomic orbitals, Slater's approximation, interpretation
atomic systems, perturbation theory 9729 [17791
atomic wave-functions, limiting behaviour for large Z 9732
atomic wave-functions containing interelectron coordinates, appl. to energy level calc. 15645
atomic wave-functions containing interelectron coords., appl. to Li ground-state 1468
basic equations, generalized time-dependent eqn. 5-dimens. space 16600
Be, atomic wave-functions, approx. 13392
Bhabha's eqn., non-relativistic approx. 3936 [3268
binary solid solns., random clusters, propag. phenomena
Bloch electrons in elec. field, wave-functions and effective Hamiltonian 4273
Bloch functions, dispersion relations 17871
charged particles, in e.m. field 5471
cluster and shell-model wave-functions for nuclei 4012
conference, molecular quantum mechanics 13426
configuration interaction wave-functions, 3-electron atomic system 15643
Coulomb wave-functions, irregular 6685
crystals, and molecules 1538 [17873
crystals, tight-binding approx., determinant factorization
Dirac continuum radial functions, for electrons in Coulomb field 5542
Dirac electron, Huygens' principle 9268
Dirac electron, source density and Huygens' principle 1248
Dirac eqn., for e.m. potentials, soln. 20046
Dirac eqn., relativistic Coulomb wave-functions 5515
Dirac equations, solutions 20048
Dirac-like wave eqns. for nonzero rest-mass particles, quantization 9270
Dirac particle, hypothetical velocity meas. 11096
Dirac radial eqns., quasi-classical solutions 7683
eigenstate system, autocorrel. field 893
electron eigenfunctions, in one-dimensional periodic potential field 9875-6
electron eigenvalues, det. by line integration 3454
electron scatt. on H, atomic distortion 1476
energy renormalization in wave mechanics 11079
Eriksson's spinor formalism for construction of wave equations 12841
excited states, approx. wave-function validity 888
extended particle, non-relativistic 12842
fermions, Heisenberg 3-point functions 2116 [8553
Groenewald's propagator, modified Hamilton principle
HF, LCAO wave-functions with Hartree-Fock AO's 1511
hard-sphere Fermi systems, density expansions 3921
harmonic oscillator wave-functions in nuclear spectroscopy 4025
Hartree—Fock eqns. with perturbing field 9734
Hartree—Fock method, unrestricted 20769-70
Hermitian polynomials, table for harmonic wave-function calc. 14369
interference expts., significance of potentials 10600
K metal, electron wave-functions 13517 [8895
liq. helium, multiplicity of ground-state wave-function
medium in motion 12443
mesic atoms 11490
molecular calculations, survey 9777
molecular electronic energies, use of complex wave-functions 20680
molecular wave-function, one centre expansion 7794-5
n-electron system, without spatial symmetry, lowest antisymmetric eigenfunction 4942
nonlinear, generalizing particles with spin 15261
nonlinear generalizations, review 12365
non-zero rest mass, invariance, rel. to 15-parameter group transform. 9301
overlap integrals, for 2 harmonic oscillator functions 522
relativistic Coulomb scatt. wave-function 15286
relativistic deuteron wave-function 7421
relativistic fluid masses 10591-2
relativistic wave-eqns., with max. spin 2 12880
relativistic wave-functions, associated with elementary particles 15259

Quantum theory — contd
wave equations — contd
Schrödinger, approx. solns. in momentum space 17655
Schrödinger, deriv. from Galilean invariance 10593
Schrödinger, energy levels, lower bounds 17654
Schrödinger, exactly renormalizable 5480
Schrödinger, scattering amplitudes 2499
Schrödinger, soln. for molecules 18426
Schrödinger, time-dependent 887
Schrödinger, two-electron atoms, solution 7682
Schrödinger eigenvalue problem 6681
second-order, four-component Dirac eqn. 5514
solutions, accurate method, for digital computer, eigenvalues without symmetry 4940-42
spin $\frac{1}{2}$ particles, anomalous equations 12848
spin > 1 particles 17247
spin 2 particles, gravitational zero mass limit 329
spinor equations, nonlinear generalization 2491
spinor fields, nonlinear theory 9280
spinors, normal, pseudo-and mixed types 11090
three-particle wave function, for particles of comparable mass 17806
transcendental eqn., for Schrödinger eqn. 14509
transformations of wave-functions in space and time reflections 5476-7
tritons, energy calc., D-state wave-functions 17434
velocity-dependent two-nucleon problem 5516
water molecule, eigenfunctions and eigenvalues 9783 [7712
wave-functions in electron—atom scattering problems
wave-functions of 2 particles, transformation brackets
wave-functions for zero-mass and arbitrary-spin [5517 particles, transformations 7288
wave mechanics, review 16597
wave-packet, reduction 8550
wave-packet formulation 45
wave propagation in nonlinear fields 12882

Quartz
absorption spectra, 50-2500 μ 10035
Al impurity, effect on structure and absorption 15865
α-form, colour centre prod. by electron and X-ray irrad. at at 77°K 2834
amorphization by milling, effect of medium 12058
amorphous form, produced under shock conditions 6324
in bent-crystal neutron spectrometer 11186
Brillouin splitting, scattering, in artificial quartz 11763
colour centre formation during electrolysis of quartz plates 13551
colour and luminescence centres 18135
crystals, mechanism of growth 18299
defect structure 13530
dislocations, X-ray diffrac., topography 1587
elastic constants, neutron irrad. effects 11967
electrostriction coeffs., Z-cut 11750
extinction bands, correl. with plasma resonance 7876
F-centres, acoustic saturation 13732
fibre, counter torque adaptation of Curie—Chéneveau magnetic balance 19872
fine grinding, kinetics 21151
fused, elastic const., γ-irrad. effects 16203 [14787
fused, ground surfaces, diffusion of u.v. and visible light
fused, photoemission 7141
fused, refractive index 2229
fused and crystalline, structural defects 7877
fused and crystalline, thermal cond. 7859
fused and irradiated, e.s.r. and thermoluminescence 10237
hypersonic wave attenuation, effect of crystal orientation and neutron irrad. 7867
i.r. absorption, of defects 16070
i.r. absorption, $\sim 3\mu$ 4416
i.r. absorption bands $\sim 3\mu$, α-phase study 16128
imperfections, study by light scattering 11619
indentation depth, of steel projectile 10629
interference phenomena, convergent light 2243
irradiated, optical absorption 16060
irradiation effects, by positive ions, surface refractive index changes 13569
irradiation effects, and short-range order 15876
light absorption and scattering, distinction 5134
in Lyot-type birefringent filters 5153
melting, structural changes 10321
in mine dust, i.r. spectroscopic determination 3337
morphology of crystal cavities 4576
optical rotatory dispersion 2257

Quartz — contd
- percussion figures 3157
- phonon viscosity, effect on acoustic wave attenuation and dislocation motion 6043
- powder, embedded, dielec. props. 3723 [20974
- Raman light scattering in, near 2nd-kind phase-transitions
- reflection coeff., meas. with vacuum u.v. reflectometer
- in rocks, piezoelectricity 2928 [16829
- specific heat, 2-4°K 9852
- surface properties, when highly dispersed 12114
- synthetic, effect of impurities on growth 16261
- synthetic, i.r. and low-temp. u.s. absorption, rel. to OH defects 11764
- synthetic, internal friction, growth depend. 10259
- synthetic, topography and etch patterns 16285
- synthetic, amethyst quartz, growth 18314 [4628
- texture of single crystals, by parallel X-ray beam method
- thermal conductivity, measured by five methods, as calibration standard 10795 [16117
- thermoluminescence measurements, structure defects
- u.s. surface waves, velocity and attenuation, meas. 8738
- ultrasonic absorption, up to 1000 Mc/s 10733
- unit cell parameters, specimens from 10 deposits 14021
- vapour, h.f. discharge emission, 2500-4500 A 1525
- vibration modes of double-convex lenses 14713
- vibrating plates 16751, 19253-5
- X-irradiated, luminescence and coloration 16089
- X-irradiated, thermoluminescence and decolorization effect of Na and Li ions 18154
- X-ray emission spectra, K ρ-bands 20639
- X-ray spectrochemical analysis 16296

Radiation (See also Acoustic radiators; Bremsstrahlung; Cherenkov radiation; Electromagnetic waves; Electrons, radiation; Emissivity; Stars, radiation; Sun, radiation; Sunlight).
- blackbody, electron mass renormalization 9335
- blackbody, 4000° K, and spectrophotometric apparatus 204
- blackbody, laws 8829
- blackbody, photon fluctuations, detection, theory 8830
- blackbody, practical realization, calibration standard 19488
- blackbody, spectral, direct reading nomographic slide rule 14879
- blackbody, 3-colour photometry, stellar applic. 8513
- band absorption of gases, at high press. and temp. 2184
- charged particles, in flight through hole in screen 278
- charged particles, slowly-moving, radiation field 12673
- charged particles, traversing plates 2505
- coherent and incoherent, from plasma 9047
- colliding particles, cyclotron radiation emission, spectral and ang. distrib. 2500
- cyclotron radiation, from relativistic particles, collision effects 15316
- damping in gravitational fields 8538
- diagrams, representation by translated functions 18569
- diffusion, integral eqn. soln. 4963
- diffusion, resonance fluorescence, stationary and non-stationary processes 53
- diffusion, in stellar atmospheres 18796
- earth's radiation belt, observation with 1958ϵ 8398
- emission processes, thermodynamics 12524
- extreme, u.v., detection with resist. strip magnetic photomultiplier 7144
- focusing, by random surface 8769
- gases, absorption and emission 8718
- gravitational 12352
- gravitational, in damping of nongravit. motion 12350
- harmonic oscillator, excited 6680
- high altitude balloon study during IGY 14266
- i.r., artificial, from stars 12330
- i.r., history 154
- impact-parameter and perturbation treatments 2142
- isothermal discontinuity disappearance, at great radiation density 906 [17094
- molecules, in coherent field, induced and spontaneous
- optical transparency and resistance to flash heating 19487

Radiation — contd
- particle traversing 2 media, energy loss, transition radiation 9321
- photon streams, fluctuations in 5123
- Planck's formula, in i.r. technology 6989
- Planck's law, statistical derivation 6702
- plasma, due to impurity ions 1131 [2370
- plasma, incoherent microwave radiation from, theory
- plasma, kinetic eqns. 9046 [9029
- plasma, toroidal discharge, u.v. and visible emission
- plasma oscillations, in bounded plasma 10917
- point charge, in hyperbolic motion 19886
- radiative transfer, error function absorption coeff. 14549
- radiative transfer, finite atmosphere, diffuse reflect. and transmission 14551
- radiative transfer, between grey surfaces 12525
- radiative transfer, within hydrosol 8766
- radiative transfer, integral equation transform 14550
- radiative transfer, in non-uniform media 4961
- radiative transfer, through opaque atmospheres 12248
- radiative transfer, scattering and transmission functions 14552
- radiative transfer, spherically symmetric stellar atmosphere 2088
- radiative transfer, stellar classification, growth curves 4905
- radiative transfer, stimulated transitions, negative absorption 4962
- radiative transfer, Wick—Chandrasekhar approx., convergence 10619
- radiative transitions, theory, resonance and multiple scattering 15515
- rectangular source, applic. shielding problems 16916
- scattering, isotropic, in semi-infinite atmosphere, H-functions 19002
- scattering in isotropic atmos, Chandrasekhar's method, convergence 19003
- shock waves, relativistic 16771
- spectrophone, with multiple passage of radiation 137
- spherically symmetric shell, discontinuities 8536
- Sputnik III (1958δ_2), data 14477
- standards, low temp. of total radiation 19489
- terrestrial, and assoc. energy exchange, Antarctic observations 14301
- transitional radiation, limit of applicability 8573

heat [16918
- absorbers, freely exposed, behaviour in radiation fields
- black ball observations, over US 12203
- blackbody standard, 1400-2400° K 19490
- calorimeter for very high flux meas. 19523
- dosage meter, for high intensity radiation 8833
- effect on hydrodynamics 19049
- electron-tube anodes, vacuum cooling 10944
- flux from heated cylinder, effect of specular reflection 14877
- glass, spectral emission 6988
- heat-wave propagation, frontal radiation 10798
- interchange factors, nomogram 19491
- Kirchhoff's law, for freely radiating body 1054
- quantities, symbols and units in i.r. technology 8832
- transfer between grey surfaces 12525 [10552
- uniformly accel. charge, classical relativistic theory
- Venus, radiometric observations 6573

Radiation chemistry (See Chemical effects of radiation, Ionizing radiations; Radiochemistry).

Radiation detectors (See also Bolometers; Photometry; Radioactivity measurement).
- absorbers, freely suspended 16918
- actinometers, review of methods 4780
- background description methods, and utility 14884
- Crooke's radiometer, as radiation modulator 1055
- detectivity, for detectors limited by radiation noise 19492
- differential radiometers, theory 19497
- double-radiometer and black ball, i.r. radiation divergence in atmosphere 14300
- energy detectivity, noise equivalent energy 14878
- G.M. counters, for u.v., stability, efficiency, characteristics 14833
- GaAs, sensitive photodiode for visible 16830
- Gd, magnetothermal effects, near Curie point 19494
- i.r., Ag—O—Cs, photocathodes 9073

Radiation detectors — contd
i.r., assessment of photographic method 8812
i.r., doped Ge photocells 7960
i.r., electrical and optical associated systems 19498
i.r., fundamentals 8838
i.r., non-image forming systems, electronic circuit details 14885
i.r., non-image forming systems, pre-amplifiers 14882
i.r., nuclear radiation exposure 14881
i.r., 1-7μ, using InAs and InSb 19499
i.r., optical filtering 14815
i.r., optics, review 14797
i.r., performance criteria 10801
i.r., polycrystalline photocells 7962
i.r., prism scanner 8780
i.r., quantities, symbols, units 8832
i.r., range eqn. for passive devices 8842
i.r., range finding using pulsed technique 8843
i.r., silicon solar cell power supply 14951
i.r., simulation 14886
i.r., single-crystal based on intrinsic absorption 8840
i.r., uncooled, for long wavelengths 10800
i.r., use of Ge—Si alloys 2911
i.r., use of semiconductors, applications up to 135μ 18015
i.r. and microwave, combined system 14812
i.r. missile-seekers, optical design 16831
i.r. quantum counter 12529
i.r. search system, design 14810
i.r. and unmodulated solar, response characteristics, atmos. pressure depend. 14880
InSb photovoltaic, pre-amplifier details and detectivity 14883
integrator, battery operated 14952
limiting sensitivity, rel. to fluctuations in photon streams 5123
logarithmic meter, using noise 2267
net radiometer, polythene shielded 4782
net radiometers, thermal transducer as 10799
noise, physical mechanisms 8841
optical, for absolute meas. 2264
optical focusing systems 3607
optico-acoustic transducers 8714
optico-acoustic transducers, with electrodynamic microphone, various characteristics 12527
optico-acoustic transducers, gas analysis, sensitivity increase 4752
optico-acoustic transducers, with optical microphone, max. sensitivity 12526
optico-acoustic transducers, sensitivity threshold 2265
orthicons and image iconoscopes, for weak sources 8784
PbS photocell, effect of temp. on response 7965
photoelectric, spectral sensitivity meas. 16824
photographic radiometry, accuracy limit 6931
photon fluctuation detector, Ge phototransistor, i.r. 8831
radiometers, for field use 8835
radiometers, thermal transducer type 14185
readings, effect of background emission 3674
review 8839
sensitivity threshold, rel. to background continuum and apparatus 19496
solarimeters, for field use 4781
spectrophone theory 1033
synchronous thermal detectors 19493
thermal, calibration 19489
thermal, using linear expansion 2266
thermal dosimeters, using temp. sensitive paint 8833
thermoelements, with direct visual adjustment 6990
u.v. integrating meter, with CdS photocathode 12472

Radiation effects (See Biological effects of radiations; Chemical effects of radiations; Physical effects of radiations).

Radiation monitoring (See also Dosimetry).
α, β, γ transistorized portable counting-rate meter 5457
ambient radiation monitor 19976
area monitor, transistorized, using G.M. ion chamber probe 5437
C^{14}, sample absorption correction 9541
fallout, large particles from nuclear weapon debris 20362
film-badge range extension 19977
health physics instrumentation 8438
monitors for α, γ, T and airborne Pu 5456
multifield isodose contour plotter 8437

Radiation monitoring — contd
radionuclides, efficacy of radiation detectors 7251
transistorized monitor 17157

Radiation pressure (See also Acoustic streaming).
acoustic, calibrator for measuring systems 8757
acoustic, measurement 6886-7, 8756
acoustic radiation force, meas. 141 [10715
acoustic radiation stress, measuring and interpretation
on particles, in solar gravitational and radiation fields, Poynting—Robertson effect 14404
planetary nebulae, comparison with gas pressure 10518
on rapidly moving surface 19353
shell, thick cylindrical, in acoustic medium, axially symmetric vibrations 14711

Radiation protection (See also Radiation monitoring).
chemical methods 14138
electro-filter, for radioactive aerosol removal 2631
from electron accelerators, up to 1 GeV, shielding 19817
γ-ray build-up factor in cylindrical source, effect of multiple scatt. 9591
Li—Pb shielding alloy, props. 8273 [318
low-background target room, for Van de Graaff generator
photon shields, permissible voids 12893 [16916
from rectangular source, various shielding problems
shielding glasses, effects of γ-irradiation 8254

Radioactive dating
C^{14} method, standardization of error calculations 9543
C^{14} scintillation counting 15193
low-level counter, with high efficiency 17134 [4041
meteorite Richardton, from Xe isotopic composition
meteorites, from A and K content, isotopic A composition 7
meteorites, "Carbo" and "Treysa", cosmic-ray ages 8495
meteorites, erosion in space calc. 10496
meteorites, inert-gas isotopic composition study 12272
meteors, by potassium-argon activity 5683
nuclear cosmochronology 14394
nucleosynthesis, duration 5684
Pb^{210}, new half-life det. by geological method 9553
review 3341
pegmatite, zircon age 13163
Rb^{87}, half-life, new value 1387
tektites, K—A ages 8361

Radioactive disintegration theory (see Nuclear decay theory).

Radioactive tracers
absorption study, applic. to CO adsorption on Ni 14152
atmospheric circulation, cosmic-ray produced tracers 6441
atmospheric tracers, use of natural radioactivity 13164
blood calculating system, ratemeter 21402
diffusion study of Cd and Zn in GaAs 9918 [9006
in electrode material transfer study, at prebreakdown
flow measurement, with Geiger and scintillation counters 14605
gas clean-up, penetration depth investigation 9003
impurity segregation in metals 11647
isotope labelling, by gaseous discharge 15527
labelling of membrane filters, for assay of airborne material 20364
leveller following in electroplating bath 14125
liquid diffusion coeff. meas. 3512
liquid and gas flow measurement 19080
oils, halogenated, water content 4766
pneumatic transport of radioactivated grains, speed measurement 19041
in vacuum distillation camera sources 5358
in beryl lattice study 21191
tritium, for very low vapour pr. meas. 19512
tritium labelling of organic compounds in discharge tubes 20369
As^{76}, in vapour-grown Ge, incorporation of As 17967
C^{14}, contamination in layer formation 2304
C solubility in α-iron, C^{14} technique 4684
Ca^{45} ion diffusion in NaCl—$CaCl_2$ mixed crystals 6062
Cd diffusion and solubility in Ge 553
Ce^{137}, for teletherapy 8436
D(d, n)He^3, counting rate meas., D diffusion in metals meas. 13559
H_2^3—C_3H_8 reaction mechanism det. 745
I^{131}, diffusion from radioactive monolayer 2165
I^{131}, in vapour-grown Ge, incorporation of I 17966
P^{32}, in autoradiography 14325

Radioactive tracers – contd
- P^{32}, in diphosphate ion diffusion in liquids 3511
- Rb^{86} ion diffusion in KCl–RbCl mixed crystals 6063
- Te^{129}, electrolytic purification 5680
- Tl^{204} halides, activator distribution determination in alkali halide crystals 13939
- U^{234}, self-diffusion study in β-phase U 11644

Radioactivity (See also α-, β-, γ-rays; Atmosphere, radioactivity; Chemical analysis, radioactive; Chemical effects of radiations, ionizing radiations; Fallout; Geophysical prospecting; Nuclear decay theory; Nuclear excitation; Nuclear reactions; Radiochemistry).
- aerosols, atmospheric 4042
- atomic beams, determ. of props. by mag. resonance 472
- β-decay, first forbidden transition, in universal Fermi interaction 5548
- β-decay from oriented nuclei 7442
- β-decay, 2nd forbidden transitions, ang. distrib. and polarization 9579
- β-decay, transverse polarization in allowed transitions 2643
- β-emitters, total disintegration energy 15507
- β–γ ang. correl.at resonance energy 15548
- decay chains, disintegration laws 13167
- double quantum emission 17550
- of earth, water, and air 1373
- electronic simulator 5673
- fission-product mixtures, γ-ray scintillation spectra interpretation 15610
- in food processing 13165
- isotopic exchange, heterogeneous processes, influence of radioactive solid phase 14112
- light sources 2238
- moon's interior, rel. to its thermal history 14396
- nuclei with oriented shells, ang. distrib. and correl. 9544
- nucleon pair production, pairing energies 9513
- nucleosynthesis, duration 5684
- in optical instruments, with KBr components 19409
- random disintegrations, assessment using glass plate fragmentation 2070
- resonance fluorescence expts. using thick scatterers and absorbers, analysis 1367
- rocks, high neutron flux 16404
- semiconductor current sources, double energy conversion 10867 [9498
- shell model, particle–hole transitions, phase factors
- single closed shell nuclei 17458-9
- spin $\frac{1}{2}$ nuclei, transitions between rotational states 9575
- thin film preparation, deposition 3281
- time meas., by counting radioactive disintegrations 18891
- time scales, absolute,random processes 8532
- vacuum deposition of radioactive materials 17514
- lemongrass oil, C^{14} activity since 1954, world study 7499
- A^{38}, β-decay interaction, det. from $e^- - \nu$ ang. correl. 1385
- $Am^{242(m)}$, branching ratio 7508
- Au^{196} 15533
- Au^{196} β–γ ang.correl., analysis 11365-6
- $Au^{\geq 194}$, new activity with 19 hr half-life 4071
- Au^{199}, conversion and K and L-Auger spectra 11369
- B^8, β–α ang. correl. 5692 [9581
- B^8, possible test of conserved vector current theory
- $Be^{7,10}$, in atmosphere 2041
- Be^7, in rain and snow 7500
- Bi^{210}(RaE), electron polarization, time reversal 2645
- Bi^{210}(RaE), 1st-forbidden decay, circ. polarization of internal bremsstrahlung 11362
- Cd^{114}, in In single crystals, γ-ray ang. correl. 2656
- Co^{60} 420
- Co^{60}, dose rate 20365
- Co^{60}, γ-source, equiv. to 280g Ra apparatus 5678
- $Eu^{152,154}$, β-spectra shape factors 15546
- Ga^{67}, Mössbauer effect in Zn^{67} 13126
- Ga^{72}, β-spectrum shape factor 15546
- H^3, solid, defect prod.,e.s.r. study 20855 [1385
- He^6, β-decay interaction, det. from $e^- - \nu$ ang. correl.
- Hg^{196}, conversion and K and L-Auger spectra, from Au^{199} 11369
- $Ir^{194(m)}$, possible existence 7510
- Kr^{74}, existence, and possible existence of Kr^{75} 20495
- Kr^{79}, charge spectrum of Br^{79} atoms produced 4052

Radioactivity – contd
- Kr^{85}, solid defect prod., e.s.r. study 20855
- La^{140}, β-spectrum shape factor 15546
- Li^8, β–α ang. correl. 5692
- $Mn^{52,56}$, oriented, γ-ray ang. distrib. and circ. polarization 4076
- $Na^{22,24}$ 420
- $Ne^{19,23}$, β-decay interaction, det. from $e^- - \nu$ ang. correl. 1385
- O^{14}, electromagnetic corrections 15379
- Os^{191}, decay to Ir^{191}, γ-ray resonance absorption 411-12
- P^{32}, allowed decay, circ. polarization of internal bremsstrahlung 11362
- $P^{32,33}$, in atmosphere 2041
- Pm^{147}, electrons and autoionization X-rays emitted simultaneously with β-rays 20386
- Po, abnormally long-range particle emission 9542
- Pt^{197}, Mössbauer effect in Au^{197} 11312
- Rn active deposits 5711
- S^{35}, in atmosphere 2041
- Sb^{124}, β–γ directional and circ. polarization correl., matrix elements 11360-1

Nd^{141} 5727
Pb^{203}, ang. correl. of 404 and 279 keV transitions of Tl^{203} 5713
$Pm^{143,142}$, ratio of K-capture to β^+ emission 5689
Pu^{237}, K-to-total electron capture branching ratios 1455
Rb^{84}, K/β^+ ratio 13198
$Re^{179,181}$ 15538
Se^{75}, circ. polarization of resonance-scattered γ-rays following decay 13214
$Sm^{147,145}$ ratio of K-capture to β^+ emission 5689
Sr^{87m}, 0.65% K-capture branch 20392
Ta^{173-4} 15538
Te^{119} 20389
Ti^{44} 1388
Tl^{200}, K/β^+ ratio 13198
Tl^{202} 1376
Tl^{202}, transition energy 7520
Tm^{168} 13172
$Tm^{168,169}$, levels in $Er^{168,169}$ 5714
Y^{88}, γ-ray ang. correl., calc. 9590
Yb^{167} 20393
protection (See Radiation protection).
Radioactivity measurement (See also Dosimetry; Radiation monitoring; and the specific radiation, e.g. Gamma rays).
absolute strength meas. of neutron sources 7389
α-active thin sources, prep. using vacuum sublimation apparatus 7489
atmosphere, due to nuclear explosions 11331
atmospheric precipitates 2630
atmospheric tracer 13164
β-activity in solids, flow counter meas. 7241
β-disintegration, absolute rate 7492
β-ray longit. polarization and γ-ray circular polarization 5677
condensation processes in meas. of air samples 5681
cylindrical source, dose rate 20365
decay constants, methods 20370
debris in stratosphere, time residence 6487
distributed radar recording 20363
effluent streams, monitoring cells 17515
electro-filter for removal of aerosols 2631
electron spectrum, continuous, accompanying K-capture 5710
exponential decay curves, multicomponent, analysis 821
γ-lifetimes ~ 10^{-11}-10^{-10} sec, using conversion electrons 407
gas flow-counter, sources of error due to field disturbances 11069
internal conversion coeffs., direct det. 9589
internal conversion coeffs., to ± 0.5% 13202
lifetimes of nuclear levels, recoil technique 5688
lifetimes of nuclear rotational levels ~10^{-9} sec, by microwave method 20397
natural dust, size distribution 4819
natural radioactive elements, calorimetric measurements 5685
neutron source standardization, using reactor graphite stack 7383
nuclides, absolute activity 5674

Radioactivity measurement —contd
photographic identification of radioactive aerosols 7486
preparations with electron capture decay 1374
radiation monitoring, in Sweden, γ-ray activity, after fall-out 8433
radon in air, continuous dosimetry 15528
short half-lives 20371
stratosphere, above Paris 21325 [12804
two-channel spectrometry, calc. of two-comp. system
weak samples 11328
water, α and β activity 5691 [5679
water containing fallout, activity det., overestimation
Ba^{140} 4043
C^{14}, aqueous solutions, scintillation counting 5687
C^{14}, with G.M. counters, CO_2—CS_2 filled 15530-1
C^{14}, sample absorption correction 9541
C^{14} standard, recalibration by Geiger and proportional gas counting 13159
Ce^{141} and Ce^{144}, determination in presence of each other 13166
Kr^{85}, determination of uranium ore deposit size 4777
Nd, natural 11346
Ra in liquids, method of assay 13160
Sm, natural 11346
Sr^{90} 4043
Sr^{90} + Y^{90} beta-ray applicator calibration 7491
T, aqueous solns, scintillation counting 5687
T, estimation in proportional counter 4756-7
U^{235}, enrichment, checked by γ-intensity 11388
Y^{90} 4043
apparatus (See also Particle detectors).
β—β coincidence apparatus, for short β half-lives 17518
for β—γ correlations from oriented nuclei 2652
electrostatic filter, for atmospheric activity estimation 6488
grinder, for sectioning solid diffusion specimens 3388
ionization chamber, pulsed, two-grid, for low-energy particle spectra 15186
pneumatic transfer of sample from reactor to detector 5810
types, methods, sensitivities 1373
vibrating reed electrometer for decay periods 7495
Radioastronomy (See also Cosmic radiations, r.f.; Sun, radiation, r.f.).
atmospheric scintillation, observed with centimetric waves 16474
aurora 8409
aurora, echoes, arrival angle determination 6481
aurora, echoes, height and geometry 18508
aurora, noise, l.f. 4815
aurora, radar reflections 798-9
ballistic theory of light, tests 834
Cassiopeia, spectrum below 30 Mc/s 18667
Cassiopeia A, 45 Mc/s, decreases and reception 18671
Cassiopeia A, 45 Mc/s scintillation rate 18672
celestial sources, bright at 10.2 cm 12260
Centaurus A, extended component 6563
comet Arend-Roland 18623
compound interferometer telescope, single lobed receiving patterm 4878
Crab nebula, coronal eclipse, 169 Mc/s study 18669
Cygnus loop emission 18664
Cygnus spectrum below 30 Mc/s 18667
discrete sources, 500 Mc/s observation 18662
discrete sources, observations at 3 cm using maser 18616
eclipse of Oct. 1959, radio observation 6554
emission spectra, apparent spectral index, in presence of red shift 18654
extragalactic sources, dimensions, spatial density and power 18656
Freiburg solar spectrograph, 48-165 Mc/s 2076
galactic coordinate system choice, relevant radio data 18657
galactic emission spectrum 18678
Galaxy, radio continuum 4860
Galaxy, 38 Mc/s survey 18677
Galaxy, 21 cm determination of principal plane 18675
H, ionized, continuous absorption coeff. 20592
H I, galactic disk, 21 cm observations 10482
H-line observations, interferometric analogue, correl. function 12252
H-line profiles, at high galactic latitudes 12261

Radioastronomy — contd
identification of sources 3409, 8477
interferometer, compound type, 10 cm wavelength 12262
interferometer, at Nançay 826-7
interferometers, phase-sensitive, for spatial brightness distrib. study 3
interferometric multiplex spectrometer, theory 16832
interstellar clouds, 21 cm studies 8478
interstellar communications, suitable frequencies 4846
interstellar gas, density and velocity distribution 8470
interstellar ionized gas clouds, size meas. 18614
ionosphere, elongated irregularities 12163
ionosphere, study above Pacific Ocean 8482
Jupiter, 18-23 Mc/s observations 18622
Jupiter, 31 cm emission 6553
magnetic bremsstrahlung radio-emission 831
meteor echoes 10486
meteor echoes, calc. of meteor mass distrib. 18706
meteor echoes, calc. of meteor mean hourly rate 18717
meteor echoes, distrib. by duration 18679
meteor echoes, duration, effect of electron attachment to O_2 8480-1
meteors echoes, factors affecting apparent height and distributions 18682
meteor echoes, Geminid stream study 4874
meteor echoes, height distrib., in non-isothermal atmos. 4876
meteor echoes, height variation with velocity and magnitude 18715
meteors echoes, oblique, from over-dense trails 4875
meteor echoes, Quadrantid shower, mass distrib. function, S-parameter 18684
meteor echoes, Quadrantid stream, structure study 18719
meteor echoes, in S hemisphere 18680
meteor echoes, trail height distrib. 4873
meteor echoes, trail irregularities 14388
meteor radiant distributions and echo rates, observed by forward scatter 14389
meteor showers, detection limitations 6566
meteor trail observation for upper-atmosphere wind determination 14390
meteor trails, c.w. equip. study 6565 [14391
meteor trails, oblique reflections, azimuth distribution
meteor velocity meas., pulse-diffraction method 18714
moon 12258
moon, atmosphere 18620
moon, echoes and emission 18627
moon, echoes at 10 cm 18617
moon, echoes at 100 Mc/s, fading 18616
moon, 10 cm study 18618
moon, reflection characteristics 18619
moon, roughness, as radar reflector 14384, 18652
moon, scattering props. 18651
Nançay grating interferometer, for 169 Mc/s solar studies 4849
negative absorption, from radiative transfer theory 4962
normal galaxies, emission 16527
observations at cm wavelengths, using masers 8473
observations from satellites 5, 10543
Paris symposium (1958) 10477
planets, echoes and emission 18627
planets, ionosphere 18624
polarimeter, for solar emission 16524
radio-meteors, incident flux determination 18683
radio source problems 18653
radio-star scintillations, effect of aurora 16465
radio-star scintillations, ionospheric origin 769, 770, 774, 2006, 2018-9
radio-star scintillations, simultaneous obs. on diff. freq. 14385
radio star spectra 18661
red-shift detection at λ = 21 cm 18912
San Diego Symposium (October 1959) 14382
Saturn, 18-23 Mc/s observations 18622
solar activity study 18732
solar corona, outer, emission, special array 4
solar corona, structure obs. 18749
solar corpuscular clouds, observation by direct continuous-wave reflection 4896
solar emission and earth's field 18469

Radioastronomy – contd
solar emission at 9500 Mc/s 18644
solar radio bursts, association with flares 12255
solar systems 18615
Soviet cosmic rocket, interference methods 16557
sporadic meteors, S hemisphere survey of radiants 18681
Sputnik 3, variation of signal strength 19
Stanford interferometer, preliminary observations 6552
sun, radar echoes 4871
telescope, at Medicina, 327 Mc/s 18687
telescope, N.R.L., 84 ft, observations 18625
telescope, 360 ft, at Ohio State University 4877
telescopes, design, diffraction theory 8786-7
telescopes, interstellar H radio-emission meas. 10485
telescopes, sensitivity 18686
telescopes, synthesis 18685
three antenna patterns from same aperture, resolving power 828
tracking of radio star by lobe comparison, angular accuracy 16529
two-aerial interferometer, for localized solar disturbances, 3.23 cm 4852 [8408
u.h.f. aurora-traversing signals, moon-bouncing studies
Venus, apparent radio radiation at 11 m 10479
Venus, at 8.6 mm 18621
Venus, radio echoes 4872

Radiochemistry (See also Chemical analysis, radioactive; Chemical effects of radiations, ionizing radiations; Radioactive tracers).
diffusion, from monolayer of reaction products 2165
identification of new transuranic elements 11332
(p, pn) reaction studies in complex nuclei 11403
separation of fission products, and corrosion elements on Al_2O_3 21301
C_6H_5T, dissociation following β-decay 8322
CO, α-radiolysis 12106
Cf^{252} spontaneous fission yield study 15609
Ga^{72} separation 9549
T–ethane reaction, mechanism 745
Te^{129}, purification 5680
U^{235} fission study 1448 [21302
U–Th separation, by Th-specific resin ion exchanger

Radiography (See also Luminescent devices; X-ray tubes).
autoradiography, β-active sources 15216
autoradiography determination of Fe distrib. on magnetic tape 12668
autoradiography, with fine-grain emulsions 12799
autoradiography, histological specimens 14325
cinefluorography, X-ray image television-type amplifiers 5541
diagnostic X-ray grids, comparative performance 10456
electron microscopy of autoradiographed radioactive particles 7487
electronic control of exposure-time 16500
flash X-radiography for hypersonic air flow density measurements 19188
image intensifying panels 19407
industrial, tomograph 14088
radioactive particles, electron microscopy 7487
stroboscopic, with linear accelerator 6958
X-ray dosimetry and colour film 349
X-ray intensifying screen, using photoconductive layers 19408

Radiometer gauges (See Vacuum gauges).

Radiowave propagation (See Electromagnetic wave propagation).

Radiowave spectra (See Nuclear magnetic resonance and relaxation; Paramagnetic resonance and relaxation; Spectra).

Radium
dosimetry in air, continuous 15528
Lennard-Jones parameters 17725
in liquids, radiometric assay 13160

Radon
atmospheric, and products, rel. to prospecting for U ores 16498
atmospheric, vert. and temporal distrib., effect of met. variables 14320
electron orbit angular momentum, distrib., pressure depend. 13388
natural, concentration near ground for atmospheric diffusion estimates 14319

Rain (See also Condensation; Snow).
charge and current, carried vertically 802
drop shape, field meas. 8434
radioactivity in rainwater, from nuclear weapon tests 5679
rainfall recording, unattended long period operation 3436

Raman spectra (See also Luminescence).
anti-Stokes components of compounds with H bonds 15718
bond polarizability calc. 17789
complex molecules, isotopic frequency rule 15715
crystals, near 2nd-kind phase-transition 20974
e.m. waves scattered on ferrites 9210
ferroelectrics, near 2nd-kind phase-transitions 20974
gases, at h.p., optical cell observations 6932
intensity meas., ratio of exciting and Raman lines 14816
intensities, temp. dependence 4206
line intensities, theory 19413
liquids, micro-technique using capillary 10765
liquids and diffuse scatterers, spectrometer for 3600-6400 A 3633
photoelectric detection system 3618
photoelectric recording 3619
photoelectric recording of line intensities, short-width effect 16864
powdered crystals, specimen mounting 14817
resonance region, intensity, rel. to electronic levels, theory 15716
scattering indicatrix 19412
solids, at low temp., apparatus 12484 [13687
solids, powdered, band intensities, effect of absorption
solutions, solute band intensity, solvent effects 15717
spectrometer applications in molecular analysis 3620

inorganic substances
calcite 16072
chlorates, use in lattice vibr. and rot. studies 1839
gypsum, polycrystalline 16072
ice crystals, H positions 10044
ice monocrystals, 226 cm^{-1} line 7843
oxyanions, intensities of A_1 lines 4208
parahydrogen, solid, theory 4197
pyroselenites, study of $X_4O_5^{2-}$ 11526
pyrosulphates, study of $X_4O_5^{2-}$ 11526
quartz, near 2nd-kind phase-transition 20974
silica, vitreous 11581
silicate glasses, interpretation 1499
CO_2, rotational and vibrational lines 17746
CS_2, overtone lines 87
Co tetracarbonylate anions 11528
Fe tetracarbonylate anions 11528
H_2 rotational and vibrational lines 17746
Hg, relative intensities of 60 lines, 3900-6250 A 14816
In sulphate, incomplete dissociation in aq. soln. 10671
IrF_6 soln. in n-C_7F_{16} 15723
$MSO_4.7H_2O$ (M = Mg or Zn) 4422
$MnSO_4.4H_2O$, monoclinic 2947
N_2, Q-branch rotational structure, temp. and press. depend., impact broadening 11527
N_2, rotational and vibrational lines 17746
NH_4CNS 4411
$N_2{}^{14}O_4$, liquid and solid 13436
$N_2{}^{15}O_4$, liquid and solid 13436
$NaClO_3$, polarization 13689
$Ni(CO)_4$, liquid and solutions 19156
$Ni(CO)_4$, vapour 19218
$NiSO_4.6H_2O$, (tetragonal and monoclinic) $NiSO_4.7H_2O$, (orthorhombic) 2947 [7763
O_2, gas at 1 atm, rotational and rotational–vibrational
O_2, rotational and vibrational lines 17746
O_2, at 7-125 atm 7764
$SbBr_3$, solid, liquid and in CS_2 and CCl_4 13688
$Sr(CO_3)$ 2946

organic substances
dyes, resonance effect 7765
electronic band spectra relationship, vibrational structure 4209
group Ib and IIb complex cyanide solns., CN stretching bands 16706
73 compounds 2175
acetamide, liquid and crystal phases 5948
aldehydes, relative line intensities 85
aromatic cmpds. 9817
bromodichlorofluoromethane ($CBrCl_2F$) 4207
dibromochlorofluoromethane (CBr_2ClF) 4207

Raman spectra — contd
organic substances — contd
p-dichlorobenzene, wave numbers and intensities 14817
esters, relative line intensities 85
fluorinated ethanes 5938
α-glycine, crystalline 4421
iodoxybenzene 3619
ketones, relative line intensities 85
methane 17752
naphthalene, wave numbers and intensities 14817
paraffins, relative line intensities 85
penta-deutero-fluoro-benzene 20626
perchloryfluoride, structure 17754
n-phenylenediamine, liquid and crystal phases 5948
polyene cmpds. 9816-17
pyridine, comparison with Debye–Scherrer patterns 6370
pyridine, in diff. solvents, analytical use 942
toluene 3619
tribromoethylene-d 17753
CCl_4, depolarization factors 86
CCl_4, overtone lines 87
CH_4, rotation and vibrational lines 17746
C_6H_6, depolarization factors 86
$CHBr_3$, rel. to vibrational interactions 20640
$CHCl_3$, overtone lines 87
C_6H_5Cl, overtone lines 87
$C_2H_2Cl_2$, overtone lines 87
$C_2H_3Cl_3$, overtone lines 87
$CHCl_3$, depolarization factors 86
CH_3OH, overtone lines 87
Random functions
radiation focusing, by random surface 8769
random linear systems, stability 8467
Random processes (See also Brownian movement; Fluctuations; Statistical analysis).
atomic diffusive motions in solids and liquids, study by γ-ray resonance absorption, theory 18992
conditional probabilities, estimating method 14186
conference 4957
dispersion by continuous movements 14539, 19000
examining distrib. laws of chance, apparatus 3399
fluctuations spectra, in complex systems 14526
grand canonical ensemble of statistical mechanics 894
irreversible thermodynamics of nonlinear processes and noise driven systems 902 [6690
irreversibility of systems perturbed by random forces
modulation of oscillations by random process 14522
molecular chaos and Kirkwood superposition hypothesis 18971
non-equilibrium, steady-state distribution 16617
non-stationary, relative running time 905
random delays, deduction of law 6544
random walk and multiple scattering 16616
stability of random systems 18580-1
Range of particles (See also Velocity analysis, particles; and under individual particles, e.g. Protons and antiprotons).
in Agfa K2 emulsion, range–energy relation 5460
charged particles, energy loss in thin absorbers, binding effect corrections 1261
charged particles, range straggling in Al, Be, C, Cu, Pb and air, calc. 5560
electrons, 8-20 keV, in Bi, Cu, Ge, Si 15082
electrons, 40-160 keV, in Cu, Ag and Au 2399
electrons, 0.5-16 keV, in Au and collodion film 7163
energy–range relation, for var. substances 9320
heavy ions, C, N, O, Ne and A, in emulsion, up to 10 MeV/nucleon 4105 [11073
heavy ions, range–energy rel. in Ilford G-5 emulsion
heavy ions, range-energy rel. in Ni foil, gaseous O_2 and nuclear emulsions 17051 [19624
heavy ions, in various media, effective charge, theory
ions, in emulsions, range-energy relationships 12771
protons, relative ionization near end of their range 20141
thin foils, surface density meas. using α-rays 19039
A ions, in emulsion 12772
Be ions, in air 2327
Li^{+3} ions, versus energy, in emulsions 9108
N ions, in air 2327
N ions, in emulsions 12772
Na^{24} recoil, from 660 MeV proton reactions 1402
Na^{24} recoil, from 260 MeV photon reactions 1403
Ne ions, in emulsions 12772
O ions, in emulsions 12772
Range of particles — contd
U^{235} fission products by thermal neutrons, range and rate of energy loss in Al and Au 20512
Rare earth metals (See also the individual metals).
abundance in chondritic meteorites 14402
activation of phosphors, luminescence 1767
in CaF_2, thermoluminescence 665
electron spin resonance, use in masers 2436
elec. resistivity, 1.3-300°K 18002
fission products, isotopic composition 5805
ions, in crystalline field, ground states in external mag. field 11946
ions, electron level splitting in crystal fields 6006
luminescent states, perturbing influences 18136
magnetic props. 11806
spectra, summary tables 9771
superconductivity and ferromagnetism 14932
superconductivity of rare-earth doped La 12557
X-ray spectra, Kα lines 481
Rare earth compounds (See also the compounds of the individual metals; Ferrites).
alloys, simultaneous ferromagnetism and superconductivity, theory 7030
antiferromagnetic, neutron diffraction studies 10188
ferromagnetic resonance materials, for high power-levels 11925
low-lying states, theory 11598
salts, fluorescence, monochromatically excited 1747
aluminates, crystal symmetry and ferroelectricity 14026
borides and carbides, anomalous thermionic emission, theory 2377
chlorides, anhydrous, prep. for electromagnetic isotope separator 17677
double nitrates, 2-particle spin–spin interaction internal elec. field effect 18213
ethyl sulphates, 2-particle spin–spin interaction internal elec. field effect 18213
ferrites, garnet structure, u.h.f. props. 6243
gallates, paramag. susceptibility 13735
garnets, Al, Ga and Cr substituted, mag. props. 13827
garnets, energy levels for ions subject to exchange and crystalline fields 1540
garnets, ferrimag. resonance measurements 11931
garnets, ferromag. resonance, theory 1820-1
garnets, mag. interactions and distribution of ions 10178
garnets, mag. props. 4517
garnets, paramagnetic study at high temp. 13739
garnets, quenching of mag. moment of rare earth ions, at low temp. 13831
garnets, specific heats at low temps. 9855
iron garnets, microwave resonance 10209
iron garnets, rare-earth radii and lattice consts. 3232
with Ir, Os, and Ru, Curie points and mag. moments 1776
monazite, X-ray study 3242
mono-seleno oxides (M_2O_2Se), crystal structure 8221
nitrides mag. ordering, neutron diff. study 11849
orthoferrites, single-crystal, mag. props., at low temp. 10176
orthoferrites, weak ferromagnetism 18202
oxides, cyclotron target prep. by electrophoresis 19843
oxides, meas. of atomic level energies 13391
oxides, reactor control rod 13377
oxides, Stark effect and neutron scattering 20776
selenides and tellurides, electrical properties 4351
Reaction kinetics (See also Catalysis; Chemical reactions; Exchanges, chemical; Explosions).
atomic reactions, energy distribution 3294
atomic recombination reactions 8298
bimolecular dissociation reactions 3299
bimolecular reactions, mean-first-passage time and collision theory 3300
bimolecular reactions, in solids and liquids 3301
burning rates of solid propellants 3314
chain reactions, diffusion theory 14104
charge transfer mechanism of reaction of conjugated molecules 14102
combustion in supersonic flow 2270
compensation effect, origin 10346
complex chemical equilibria, free energy minimization 747
chromatography, kinetics of zone structure 3334
diatomic molecules, dissociation, collision theory 1492
diffusion and heterogeneous reaction 16370
diffusion theory 21266

Reaction kinetics – contd [14111
dissociation of diatomic molecules behind shock front
dissociation of excited molecules, calc. 15683
equilibrium in multicomponent polyphase systems 16369
exchange reactions, vibrational excitation 3295
in flowing fluids, bibliographical review 10631
formulation 18426
in free molecule flow 3302
in gas flows around lamina, temp. distrib. 14674
halogenated pentaboranes, fragmentation patterns 21271
hot and thermal, comparison 3297
hydrodynamics of chemically reacting fluids 14109
in internal flow systems, non-isothermal homog. reaction 8297
isotope effects, meas. method 14113
isotope effects, secondary 14115-16
in laminar boundary layer 6397
laminar flames 6401
one-dimensional condensed system 3296
plane detonation waves 16772
rate constants at low concentrations 8315
reaction rate of expanding fluid, effect on velocity of sound 10722
reactive diffusion, in crystals 6055
reflected-shock technique 16377
size effects among isotopic molecules 21265
solids, chemical equilibrium, activity coeffs. of electrons and holes 15914
solids, with imperfections 4295
thermal decomposition of diatomic molecules 3298
thermodynamic relations for three-dimensional systems 19527
unimolecular gas reactions, theory 8302
unimolecular rate const., comparison of integrals 14101
unimolecular rate theory 6406
unimolecular reactions, high frequency factors 1948
variational theory, three-body recombinations 8299
acetyl chloride hydrolysis 3307
acridine orange, in solution, metastable states 18434
acrylamide, radiation-induced solid-state polymerization 14135
alkylamine ions, unimolecular decomposition 10350
benzyl-d-t alcohol, oxidation by chromic acid, isotope effect 4712
ethylene, α-radiolysis 8321
hydroxyl radicals in shock waves 6408
ketene, photochemical dissociation, rel. to unimolecular reaction rate theory 15683
pearlite nucleation rate, in Fe–C alloys 18393
polymethylmethacrylate, surface degradation 3309
sec-butyl radicals, decomposition, unimolecular reaction theory 21274
sec-deuterobutyl radicals, activated, unimolecular decomposition 8301
Zircaloy-2, in dry air, at high temps. 12102
Al films, oxide formation 8335
Cu, sulphurization mechanism 21268
H, ortho-para conversions and isotope exchanges 3293
H–D, electrolytic, separation 748
$H_2 + H$, H_3 activated complex formation, calc. 1514
$H_2SO_4^-$, dissociation 18433
I atoms, recombination in foreign gases 5868
$2NO + F_2 = 2ONF$, dilute diffusion flame study 16374
O_2, dissociation in microwave discharges, catalytic effects of foreign gases 7737
O_3, decomposition 18431-2
O atoms, addition to olefines 21273
O atoms, recombination 18430
O atoms, recombination, in absence of O_2 18429
O atoms, recombination rates 6405
O atoms, three-body recombination 20679
Pt and Zr, attack of HBr, effect of α-ray irrad. 12100
SrO, on W 3308
Zr, in dry air, at high temps. 12102

Recombination (See Ions, recombination; Semiconductors).

Recording (See also Sound recording).
d.c. response of mag. recording head 2424
magnetic, "ghost" signals, linear filter elimination 8352
magnetic tapes, particle interaction 11870 [14897
multipoint digital recorder, with punched-tape output
periodic waveforms 5399
perpendicular head, for digital purposes 12665

Recording – contd
strip chart recorder, single pen, long unattended period operation 3436
teleprinter tape, experimental results 4928

Rectifiers (See also Electron tubes; Semiconducting devices, diodes and junctions).
acoustic 19272
non-isothermal diffusion theory 20681
metal-to-semiconductor contacts, rectification without injection 9983
thermal, He^3–He^4 1085
Ge, point contact, thermal turnover 13623 [18051
Se, V–I charac., capacitances, resistances, 4 Russian types

Reflection (See also Neutrons and antineutrons, reflection; X-ray reflection).
focusing, by random surface 8769
shock waves, at 2-media interface, oblique incidence 8743

acoustic waves (See also Echo; Reverberation).
from coastal bottoms 2207
high-energy reflections, distributions in various halls 19343
in moving media, effect on audibility 14741-2
in moving media, total reflection 16792
multiterminal junctions 14724
non-specular, thin rods in water 1001
randomly rough surfaces 8751
rigid piston array, acoustic radiation impedance 10731
in rooms, automatic evaluation 19345
in rooms, correlation method 1024
by shock waves 6872
silent zone formation, round explosions 14303

acoustic waves, ultrasonic
from cavity flaws in media 1009
interferometers, Hubbard theory 10734
liquid–solid interface, at critical angle, velocity det. 16766

electromagnetic waves
aurora, daytime max. 10444
aurora, during intense activity 2039
aurora-like radar echoes 10443
auroral radar echoes, at 55 Mc/s 21326
auroral radar echoes, and magnetic activity 21327
auroral radar echoes, statistical props., anal. 6479
dielectric sheet, with conducting backing, incidence angle depend. 5408
ionosphere, antenna 2003
ionosphere, demodulation, near gyro frequency 3863
ionosphere, Σ layer, fading 1221
ionosphere, ground patterns, diffraction microscopy anal. 757-8
ionosphere, low-frequency, theory 1219-20
ionosphere, magneto-ionic theory 17122
ionosphere, short wave reflection coeff. 1222
ionosphere, solution of diff. equations 7233
ionosphere, spread-F echoes, at night, at Brisbane 3864
ionosphere, 2.28 Mc/s, effect of sudden disturbance 4800
above magnetic dip-poles, magneto-ionic theory 296
metal–dielectric boundary, principle of reversibility, failure 5132
metallic foil structural model 6392
microwaves from earth's surface 17100
moon 12258
moon, roughness, as radar reflector 14384
from moving parallel cond. planes 15141
plasma, moving in dielec. medium 9057
plasma, in slow-wave waveguides 5410
plasma spectrum 5409
radar echoes, assoc. with visible auroral forms 6478
radar echoes, at 55 Mc/s and visual aurora 21328
radio-aurora distribution 12199
stratified ionosphere modified by weak irregularities 9221
total, penetration of microwaves into rare medium 17101
water, excited by acoustic waves 7220

light (See also Mirrors; Optical films).
absolute coeff. meas., with 2-beam spectrophotometer 5152
antireflection coating, for low n glass 5154 [12492
collodion films, on polished Ag, colour in white light
corner-cube reflectors, effects of small errors in angles 3602
crystals, general theory, orthogonal polarization direction in incident and reflected waves 12497
crystals, mono- and triclinic, refraction and absorption surfaces 13672

Reflection – contd
light – contd
diffuse, characteristic factors, suitable standard measures, theory 19362
earth's albedo, meas. on 17 dates (1957-58) 21390
echelon 19441
in Fabry–Perot interferometry, phase shift effects 14839
films, dielectric multilayer, automatic computation 10779
filter photometer for reflection meas. 2223
Fresnel formulae, for crystal surface 16035
frustrated total internal reflection spectra, surface study 10030
by light scattering layers, with varying parameters 14846
metal–dielectric boundary, principle of reversibility, failure 5132
multiple, number of images 5136
multiple, ray passing through thin transparent plate 5171
organic films, on metals, i.r. study 6925
from photocathodes 5130 [19378
pile of plates, modified Lunelund and Stokes formulae
powders, under diffuse illumination 12469
random moving surface 14788-9 [16829
reflectometer, for vacuum u.v., using $CaSO_4$:Mn phosphor
reflectometer, for whiteness meas. 149
rotating mirror, relativistic theory 2224
semiconducting metals, 3000-1000 A 8004
standards 3658
total reflection wave 16814
twin crystal boundary, Fresnel formulae 3654
ultramarine powders, under diffuse illumination 12469
Ag, u.v., effect of angle of incidence 4395
Bi thin films, coeff. 10027
Cs–Sb films 1667
Ge, frustrated total internal reflection spectra, surface study 10030
Mg oxides, powders, under diffuse illum. 12469
Ni electroplated films, rel. to structure 4393
Si, surface, B-doped 11751
Si, thin layer 20975
Reflectivity (See also Diffusion, light; Optical constants; Optical films).
absorbing materials, simplified formulae 5133
aluminizing technique for u.v. efficiency 3402
meas., auto-collimation adjustment of plane surface 12475
measurement 10754
metal films, apparatus for vacuum study 19422
metallic reflection for molecular crystals 17847
metals with bright surfaces, specular meas. 19459
non-metallic films, meas. of change to determine thickness variation 12085
planetary atmosphere, i.r. 18705
radiating surfaces, method of meas. 6903
refractories, in i.r., modulation method 2935
shock front thickness meas. 16774
specular, precision absolute meas. 164
polythene antireflection coating for i.r. 5155
quartz, ion beam irrad. 13569
rare earth iron garnets, visible and near i.r. 10045
silica, vitreous, ion beam irrad. 13569
Ag, u.v., variation with incidence angle 4394
Al, anodized bright, specular meas. 19459
Au–Sn alloy films, rel. to composition 10334
$BaTiO_3$ single crystals, polarized light 2932
Bi, single crystals, det. of tilt of optic axis 13667
C_6H_6, liquid, i.r. 12426
Co, polished, variation with time 7998
Cu, polished, variation with time 7998
Cu–Sn alloys, rel. to phase composition and structure 1718
Fe, polished, variation with time 7998
GaAs, visible, 300° K, evidence for spin–orbit interaction 18120
GaP, 1-40 μ 10042-3
GaSb, visible, 300° K, evidence for spin–orbit interaction 18120
Ge, p- and n- type, 2-20 μ 18028
Ge, after surface treatment, spectral response of photocond. 15990 [18120
Ge, visible, 300° K, evidence for spin–orbit interaction
Ge–Si alloys, suggested band structure study 18116
HgSe, magnetoplasma reflection 4392
InAs, visible, 300° K, evidence for spin–orbit interaction 18120

Reflectivity – contd
InSb, magnetoplasma reflection 4392 [18120
InSb, visible, 300° K, evidence for spin–orbit interaction
K, far u.v. 18117
KCl, crystal reflectance curve, using vacuum u.v. reflectometer 14821
LiF, i.r. 6182
Li^6F films 6183
Li^7F films 6183
Na, far u.v. 18117
NaCl, i.r. 8007
Ni, polished, variation with time 7998
Si, 1-11.3 eV 18116
Si, p- and n-type, 2-20 μ 18028
Si films 19423
Si surfaces, reduction by SiO_2 formation 10031
SnO_2, Sb-doped thin layers, 1.5-6 μ 16036
VO_2, powdered, diffuse reflectance meas. 18112
ZnO, i.r. 11767
Refraction (See also Neutrons and antineutrons, refraction).
pulses, theory 8752
acoustic waves (See also Dispersion, acoustic).
in moving media, effect an audibility 14741-2
pulses, theory 8752
refracted rays, automatic plotting 19310
by shock waves 6872
acoustic waves, ultrasonic
No entries this year
electromagnetic waves (See also Electromagnetic wave propagation).
atmosphere, circularly stratified 17115
atmosphere, radio refractivity, model 21322
atmosphere, radiowaves, vertical distrib. 4821
atmosphere, refractive index 16476
coastal refraction, solution of integral eqn. 19939
crystals, exciton contribution 19451
metal–dielectric boundary, principle of reversibility, failure 5132
pulses, theory 8752
radiowaves, at low angles, within various air masses 15155
radiowaves, by spherical ionized layer 15158
from space vehicles, at ionospheric heights 1223
light (See also Double refraction).
bubble chamber optics, correction 1232
crystals, absorption and refraction surfaces 13673
dynamical aspects 1026
fluorescence anisotropy meas., with uncalibrated glass plates 19394
metal–dielectric boundary, principle of reversibility, failure 5132
molecular theory 8765
relation between refractivity and ionization potential of atoms 2321
twin crystal boundary, Fresnel formulae 3654
Refractive index
atmosphere, e.m. waves, fluctuations 16474
atmosphere, power spectrum, aircraft and balloon meas. 16477
atmosphere, radio waves, near ground 3357
atmosphere, radiowaves, vertical distrib. 4821
complex, gases, quantum theory 19216
complex, liquids, below 5 mm 81
complex, metals and films 10032
crystals, absorbing, magnetic 3652
dielec. liquids, in strong mag. and elec. fields 5024
e.m. waves, dispersion in high-density media, at high temp. 12709
e.m. waves, dispersion in non-uniform medium 19932
e.m. waves, interpenetrating moving media 9205
ionosphere, l.f. 15159
Kramers–Kronig relationships, simple derivation 19377
lower troposphere 16418
molecular crystals, temp. dependence 16043
plasma, e.m. waves, cyclotron absorption 12613
random moving surface 14788-9
tropospheric, time variation anal. 12205
light (See also Dispersion, optical; Double refraction; Optical constants).
complex, Mie coeffs., computer programmes 5183
condensed gases, at low temp. 740
crystals, isonormal waves, absorption coeff coincidence 13674

Refractive index — contd
light — contd
gases, i.r., using Michelson interferometer 16820
gases, polar, press. depend. 6839 [5174-5
gases and liquids, small changes,3-beam interferometer
liquids, and dipole moment meas. 20690
semiconductors, atomic, near absorption edge, calc. 11668
semiconductors, in strong mag. fields 7923 [3612
two immiscible fluids, elimination of optical discontinuity
air, 2302-6907 A 6910
atmosphere, starlight scintillation theory 2085
benzene—CCl_4 solutions 10667
benzene—methanol solutions 10668
cumulus clouds, and their vicinity 21321
heavy—light water, variation with composition 12471
mono-, di- and tri- ethanolamine complexes of Fe, Ni and Cu 13693
polystyrene soln., temp. increment 14658
quartz, fused 2229
quartz, ion beam irrad., surface changes 13569
silica, vitreous, ion beam irrad., surface changes 13569
silicone oils 2230
36 hydrocarbons 8777
A, liquid and solid, temp.variation 19153
CF_4, press. depend. 6839
CH_3Cl, press. depend. 6839
CH_3F, press. depend. 6839
$CaCO_3.H_2O$ 1907
CdS, visible spectrum 642
CdTe, i.r. 10028
$In(As_yP_{1-y})$, rel. to semicond. props. 1717
K, direct meas. in u.v. 16034
LiF 2229
$MgO.Al_2O_3$ (spinel) monocrystals 16033
Mg platinocyanide 6168
NH_3, press. depend. 6839
Na, direct meas. in u.v. 16034
SO_2, press. depend. 6839
Sb_2O_3, clear films 16880
Si, 109-750°K, 1.1-1.8μ 16032
Si surface, B-doped 11751
SnO_2, semiconducting 15965
Refractive index measurement
concentrated solns. and melts, comparison with theory 3529
gases, in i.r., using Michelson interferometer 16820
gases, recording optical lever 5150
i.r. critical angle method for absorbing liquids 83
i.r., 1-30μ 14802
ionosphere, group refract. index at l.f. 15159
liquids, interferometric apparatus, 1-15μ 14803
with modified Michelson interferometer 172
polarization method for transparent minerals 19379
soret effect, small variations of μ, interferometric method 8664
thin films 6941
transparent films, on reflecting substrate, Brewster angle method 19380
A, r.f. discharge 3778
air, at r.f.,using radiosonde 11045
amines, as function of pressure, at 6 mm 14697
Bi thin films 10027
He^4 8898
heavy—light water, phase contrast refractometry 12471
ice, in i.r. and r.f. regions 8665
water, i.r. and r.f. regions 8665
Refractometers
microwave,limit of spatial resolution of cavities 19924
Refrigerators (See Low temperature production).
Relativity
aberration of extragalactic nebulae 18903 [4929
absolute velocities and accelerations, causal significance
artificial satellite and relativistic red shift 14505
causality principle and second law of thermodynamics 18966
conservation laws and general covariance 16565
Einstein—Friedmann equations, age, density, universe 2074
Einstein's interior eqn., group movement 671
e.m. energy—momentum tensor, in charged matter 868
elementary particles, space-time 17236
energy, inertial properties 16563 [16604
extended tube, belonging of n-tuple of complex four-vectors
Friedmann—Lobachevsky space, geodesics 12349
gas flows, from acute-angled container 93
Relativity — contd
gas flows, in steady state 94
general Lorentz group, spinor representations 18905-7
general Lorentz transformations, matrix method of reductions 14367
global properties of periodic closed space—times 16566
gravitational red-shift, use of Doppler meas. from space vehicles 14479
gravitational red-shift, in nuclear resonance 36
Hamiltonian formalism in space—time 14488
interacting galaxies, low-velocity dispersion 2087
liquid sphere problem, analogue 6645 [12840
Lorentz transformation, analogy with Foldy—Wouthuysen
Lorentz transformation, extension by characteristic coords.
Mach's principle 33 [866
Maxwell—Einstein eqns., for conformally flat metric 37
metric associated with nonsingular e.m. field 18904
metric on rotating disk 10557
Minkowski space—time, conformal, complex non-analytic manifold 6536
model universes in state of pure radiation 875
motion of Mercury, Thiry and Lichnerowicz theory 32
Nakano rotator, bilocal representation, classical props. 3442
Nakano rotator, eqns. of motion, integration 6647
optical transformations, Huygens' principle 19351
particle motion, inside rotating spherical shell 16564
and quantum theory 14492
relativistic fluid masses, internal motions 12355
relativistic fluid masses, kinetics 10591-2
relativistic periastron motion of stellar binary 18802
Ricci tensor under conditions of rigidity 874
rotating disk, synchronization of infinitesimal clocks 872
rotator, classical motion 3443
space—time continuum, relation to relativity disputed 14499
"stationary" phenomena in closed circuit 873
stellar aberration due to motion of light propagating medium 18902
super-energy tensor, Petrov classification 867
super-energy tensor and Riemann tensor 6646
Thomas precession eqn., matrix calc. 10582
time retardation, in spherical and elliptic spaces 42
transformations in particle physics 15262
uncertainty principle 10555
unstable particles, relativistic theory 333
velocity of light, constancy principle 4932
general (See also Cosmology; Gravitation).
accelerated motion, rectilinear 16587 [7470
anisotropy of inertia, det. by Mössbauer effect, upper limit
antisymmetric propagators, e.m. field quantization 869
astronomical observations, interpretation 8468
canonical reduction, consistency 16586
canonical variables 6660
charged particle motion, Lagrangian 4936
conservation laws in Lagrange formalism 14503
coordinate systems and geometrical representation of physical quantities 10584
curvature, meas. in two-dimensional universe 18929
de Sitter space, Schrödinger's model 18930
dynamical structure and definition of energy 2106
e.m. linear constitutive relations, wave propag. 16583
e.m. radiation, in presence of electromagnetic induction
Einstein eqn., soln. 876 [18931
Einstein eqns., generalized, non-zero graviton mass 3437
Einstein exterior eqns., reduction for group movement 2109
Einstein—Maxwell field, Lorentz-invariant approx. 38
Einstein universe, Thirring effect, Mach's principle 18908
elasticity theory, with modified Hooke's law 3445
energy and criteria for radiation 10579
energy-momentum complex, props. 12360
equations of motion, derivation 10577
equivalence principle, "paradox" in gyroscope motion 16590
experimental verification 31, 878, 4933-5, 6663, 8545
field eqns., exact three-variable solutions 2107
flat space—times, with gravitational fields 8537 [2112
fluid spheres, Schwarzschild interior solution, generalization
Fokker action principle, generalized, applic. to fluid dynamics, droplet ensemble 6662
free-rotating particle, general Lagrangian and canonical formalism 18925 [6666
general covariant method of successive approximations
geodesic equation, applic. to motion of point masses 6659
hydrodynamics, perfect fluid motion, Cauchy problem 14504
invariants, canonical formalism 18927

Relativity - contd
general - contd
invariants, classification of spaces 18928
Kepler's laws, modified, satellite motion 10559
Lagrangian identities, 1st and 2nd derivative depend. 3447
light-ray paths 18924
light velocity, in flowing liquids 19356
local observables, formulation, Poisson brackets 10578
mass particle, in expanding universe 6669
matter representation 10581
Mössbauer effect, use in verification 9523
motion of N particles 2105
nonlinear model, plane-wave solution 12358
nuclear field, with rigid charge distribution 17466
null e.m. fields 10580
particle and gas behaviour in static spherical gravitational field 14496
plane wave solutions of field eqns., comparison with unified theory 12362
planetary motion observation, approximations 10469
point particles, classical, finite self-energy 10583
point particles, spinning, energy–momentum tensor 5485
Poynting vector 6661
quantization, functional integration 6651
quasi-static approximation 14501
radiation, gravitational and electromagnetic 18932
radiation field, weak, first-order approx., comparison with Einstein–Schrödinger theory 16584
reciprocal static metrics and scalar fields 877
Reissner–Nordstrom metric, oscillatory character for ideal charged wormhole 18938
Riemann space spinors 10554
rigid motion concept 6665
rockets, relativistically moving, separation 16580
rotating masses, general motion 12356
rotating stationary gaseous mass 3444
Schwarzschild metric, maximal extension 16588
Schwarzschild solution, completion and embedding 2108
space–time metric, fluctuations 18926
spinor calculus 14500
spinors, 2-component, Rainich problem 12359
static charged sphere, mass 16589
steady-state cosmology 16523
Stephenson's eqns., spherical symmetry 6667
super-energy and Riemann tensors 2110
test body motion, multipole moments model 14502
three-dimensional formalism, separation of time coordinates 12357
total energy, with gravitational correction 10560
total energy, standing waves metric 3440
two oscillating masses, on spring, eqns. of motion 8546
type II metrics, asymptotic behaviour 16585
uniform e.m. field in 2111
"uniform field", direct consequence 6664
vacuum field eqns., nonlinear Lagrangians, Palatini's device 16582
special
aether drift expt. proposed, using Mössbauer effect 18918
analytic particle dynamics 18921
arc lengths, in Minkowski space 10576
application to rotating mirror reflection 2224
clock paradox 39, 40, 42, 2113, 6670, 12353, 14498
clock paradox, appl. of class of transformations 14497
clock paradox, critique 8540
clock paradox, experimental test using Mössbauer effect, assessment 18917
clock paradox, and identical twins 41
clock paradox, Lorentz transformations 8542
clock paradox, motion of charged particle in mag. field 8543
clock paradox, possible astronomical tests 8541
clock paradox, relation to relativity disputed 14499
dynamics, and applications 10572-3
Euler's angles, generalized to space–time 10551
experimental verification, using two maser oscillators 6658
hydrodynamics, charged nonviscous fluid 9161
hyperbolic motion in curved space–time 16579
ideal fluid, one-dimension l motion in 879
identical twins problem 41, 4931
invariant groups, appl. to extended particle models 18919
kinematics 10571
Langevin's traveller paradox 18916
length observation, by single observer 16573

Relativity – contd
special – contd 18922
light velocity, moving source independence, exper. data
Lorentz contraction, invisibility 2102
Lorentz invariant eqns., motion of points 2103
mechanical foundation 16576-7
origins 12354, 16574
particle gravity field 2101
physical meaning 16575
pseudospinor, existence 6657
quantization of free e.m. field 18920
reaction systems, asymmetry of time scales 6658
revised theory 10574
rigid frames of reference 3441
rocket dynamics 18923
rotation and deformation velocity considerations 2104
rotators, Lie relations 16578
spinor, in Minkowski space 9275
time measurement 10575
transformations, class of 14497
visual appearance of rapidly moving objects 18915
unified field theories
asymmetric, generalization of equations 10587
asymmetric metric 2095

Einstein, field equations 6671
Einstein, mathematical aspects 10585
Einstein, modified version 18933
Einstein, total radiation 6673
Einstein, wave solution of field equations 14506
Einstein–Maxwell field, initial value problem 18934 2111
Einstein–Maxwell field eqns., soln. for uniform e.m. field
Einstein–Schrödinger, approx. field eqns., from action density 870
Einstein–Schrödinger, energy–momentum pseudo-tensor, current theory 16594
Einstein–Schrödinger, generalized, approx. 16593
Einstein–Schrödinger type, conservation identities 16592
electric dipole motion, by Einstein's theory 6675
electrodynamic eqns. of motion, with radiative reaction 11016
five-dimensional, stellar charge correl. 10512
gauge invariance and Lorentz pondermotive force 14508
gravitational–electromagnetic coupling and the classical self-energy problem 18935 10589
invariant variation, theory, and generalized canonical dynamics
Jordan–Thiry, eqns., derivation by energy–momentum tensor method 6677
Jordan–Thiry, 5-dimensional, singularities 3446
Jordan–Thiry, linear approx., quantization 12363
Jordan–Thiry, quantization 10586
matter representation 10581
Maxwell field, geometrical representation in Minkowski space 7196
non-symmetric field, Einstein's theory 8549
particle motion, eqns. 2096
particle motion, integrability conditions 6674
plane-wave solutions of field eqns., comparison with general relativity 12362
projective invariance, in non-symmetric theory 16595
projective theory, metric spin tensors, axiomatics 18939
six-dimensional world, with singular metric 18937
spherically symmetric solutions 6672
Tonnelat's generalization, conservation identities 16591
wave propagation, in nonlinear fields 10590
"weaker" equations, general static soln., spherically symmetric 14507
wormhole, charged, ideal, oscillatory character of Reissner–Nordstrom metric 18938 10588
wormhole initial conditions, from source-free Einstein eqns.

Relaxation (See also Acoustic wave propagation; Dielectric phenomena; Elastic relaxation; Ferroelectric phenomena; Ferromagnetic relaxation; Molecules, relaxation; Nuclear magnetic resonance and relaxation; Paramagnetic resonance and relaxation).
Casimir coeffs. and minimum entropy prod. 14643
isolated ensemble of harmonic oscillators 14525 16613
multistate system, open first-order stochastic processes
solids, time-dependent tensile strength 11983

Resistance, electrical (See also Conduction, electrical; Contact resistance; Magnetoresistance).
alloys, binary, effect of order 17986-7

Resistance, electrical - contd
alloys, binary, formation of intermetallic cpds. 16354
alloys, Nordheim' s theory, extension 1614
ferromag. films, at low temp., mag. field depend. 9937
ferromagnetic films, standing spin-wave excitation 21035
films, during deposition 8288
galvanic cells, a.c. meas., characteristic curves 10352
hot wire, in ultrasonic field, changes due to cooling 16797
meas., semiconductors 3707 [19586
measurement, semiconductors, 20 c/s - 20 kc/s, apparatus
metal film resistors, prep. 8287
minimum, in dilute paramagnetic alloys 2844
negative, in semiconductor devices 6098
nonlinear, solution of ladder networks 16963
plasma, moving in mag. field 1129
thermistors, l.f. wave filters 12572
ferrites, variation with field, temperature 6244
magnetite, temp. depend. 18000
rutile, piezoresistivity 7949
water, measured to det. cleanliness 110
Ag, effect of solutes on resistance minimum 20862
Ag—Pd, at low temp. 9942
Al, 14-655°C, rel. to vacancy conc. 4315
Al alloys, at low temp. 6083
Al_2O_3, effect of H-ion bombardment 20865
Au, effect of solutes on resistance minimum 20862
Au, low-temp. minimum, effect of plastic deformation 2847
Au, monocrystals, meas. by a.c. method 1611
Au—Cu and Au—Cu—Ni alloys 4373-4
Au—Mo, at low temp. 9942
Au—Pd, at low temp. 9942
Au—Rh, at low temp. 9942
B, rhombohedral, 77-1000°K 560
Bi thin films, temp. coeff., thickness depend. 10027
Bi_2Te_3, piezoresistance, deformation potl. and conduction band ellipsoids 17989
CdS, electron irradiated, intercrystal energy barriers 604
Cr, influence of alloying 1 at.% V, Mn, Fe, Co or Ni 13844
Cr—Fe alloys, temp. depend. 7910
Cs films, thickness depend. 1615
Cu, effect of solutes on resistance minimum 20862
Cu, residual resistance, theory 9929
Cu alloys, with Cd, In, Sn, Sb, annealed, rel. to internal adsorption 14064
Cu—Mn, temp. depend. 20868
Cu—Ni alloy 4373-4
Cu—Zn, residual resistance 6024
Fe, effect of domain structure at low temp. 2846
Fe, effect of pressure 11831
Fe—Al alloys 20867
Fe—Cr alloys, rel. to magnetic props. 4480
Fe in Cu alloy, minimum 20861
Fe—Ni alloys, effect of pressure 11831 [13775
Fe—Ni alloys, under isotropic compression at low temp.
Fe—Si, transverse effects 11666
Ge, piezoresistance 6092
Ge, thin films 588
InP, pressure depend., at 77 and 300°K 4362
K, residual resistance, strain dependence 20870
K films, thickness depend. 1615
Mg alloy, at low temp. 6083
Mg—Mn dilute alloys, temp. depend. up to 33°K 17999
MgO, effect of H-ion bombardment 20865
Mn—Zn alloys, temp. depend., liq. H_2 and He temp. 6084
Ni, effect of pressure 11831
Ni, during film formation, effect of elec. field 8283
Ni—Au, decomposition study 14075-6
Ni—Cu alloys, effect of pressure 11831
Ni—Cu alloys, rel. to magnetization 6074
PbTe, p-type, piezoresistive effect 7943
Pd and Pd-alloys containing H, in acidic solutions 236
Pt, low temp. precision thermometry 7002
Rb films, thickness depend. 1615
Se, dark-resistance variations, crystallization 10282
Se—Ag, temp. depend. 10282
Se—Pt, temp. depend. 10282
SiC resistors, dynamic V—I characteristics 15886
Sn, critical resistance, at supercond. transform. 12563
Sn, grey, 0.1 - 283°K 9931
Sn, hysteresis loops, superconductivity 2287
Sn, liq. He temp. 9932
Sn in Cu alloy, minimum 20861

Resistance electrical — contd
Te, zone refined, as purity test 13963
TiFe, temp. depend. 1788
Zn, heat treatment effects 4569
Resistance thermometers (See Thermometers, resistance).
Resistivity (See Conductivity, electrical).
Resolving power, optics (See also Optical instrument testing).
aplanatic systems, image field structure 8787
human retina, with oblique incidence 18552
Lummer—Gehrcke plate and transmission echelon, background depend. 8804
measurement, with square-wave targets, photoelec. scanning 6908
photogrammetric lenses, best average definition, test patterns 19402
photographic lens with Mollar auxiliary lens 152
sampling theorem of second kind 2225
spectral lines, of unequal intensity, in gratings, echelons and prisms 12490
spectrometers, improvement, by suppression of intermediate image 14825
as test criterion for objectives, limitations 14801
two sources with different intensitites 8776
Resonance spectra (See Spectra, resonance).
Resonators
in air stream, vortex formation 6828
acoustic
excitation and perturbation, integral theorem 16794
gas columns, periodic shock waves 14730
Helmholtz, absorption, for different arrangements in closed rooms 1023
Helmholtz, use in liquid bulk modulus meas. 8593
Helmholtz-type, disposed about room, sound absorption 5119
orifice in duct, with piston 16761
wall effect, on resonator tubes 5082
electromagnetic (See Electromagnetic oscillations).
Reverberation (See also Architectural acoustics; Echo).
absorption coeff. meas., by reverberation chamber method
chamber, meas. of total acoustic power 19311 [19312
difference limens, for decaying noise-band pulses 18540
equations, proposed names 2218
levels, backscattering of underwater sound 2209
optimum, for various factors of rooms and halls 6898
reverberation curves, properties and evaluation 19319
Severance Hall, characteristics 5116
sound diffusion, meas. in reverberation chambers 145
structural vibration of tall building, method of measuring
Rhenium [19337
critical mag. field, down to 0.3°K 12561
internal friction, high temp. damping 3145
in iron meteorites, meas. 12273
Re—W thermocouples, stability in H_2 atmospheres 14955
superconducting, effect of cold-working on domains 2293
superconductivity, neutron irrad. 3706
Rhenium compounds (See also Alloys).
Re hexahalide complexes, electron transfer spectra 20650
Re_2S_7, crystal structure 723
Rheology (See also Plasticity).
adhesives 3163
crystal melting 10321
eqns. of motion, non-Newtonian liquids 2149
flow lines, Bingham bodies 3161 [13918
H-bonded solids, tensile strength, theory, appl. to paper
milk gel 4746
polyisobutylene, viscous flow 10266-9
polymer solutions, steady flow, normal stresses 3497
pseudoplasticity, viscosity impulse theory 14581
renneted milk gels 8122-3
rubbers, viscous flow 10266-9
Rhodium
conductivity, thermal and electrical 2797
Rhodium compounds (See also Alloys).
Rh hexahalide complexes, electron transfer spectra 20650
Rochelle salt
dielectric nonlinearity 13653
ferroelec. domains, polarizing microscope obs. 16010
free oscillations of X-cut sections 16030 [9799
i.r. spectra, fundamental frequencies of water molecules
optico-acoustic and piezoelec. effects 20972
permittivity, 10 Gc/s meas., temp. and elec. bias field depend. 10017
piezoelec. polarization, domain structure 13664

Rochelle salt — contd [18099
polarization reversal in D-doped salt, Kerr effect study
proton magnetic resonance 4537
water molecule bonds, orientation 15781
X-cut, complex permittivity meas. 2302
X-rays effects, on anomalous props. 11741
Rockets
Aerobee, ionospheric electron density det. 14208
astronomical-instrument carrying 10531
cosmic-ray emulsions in, recovery 20251
in cosmic-ray studies 12796, 20300
electrically-controlled demand-thrust, for satellite guidance 12336
electrostatic propulsion 12333
falling, velocity and shock wave 57
focusing trajectories in inverse-square field 3479
free-molecule flow, interactions and energy exchange 19172
heat transfer, bibliographical review 12507, 16906
illumination, by Na artificial comet 18889
impact point, det. by acoustics 912
interplanetary travel, chemical and electric propulsion systems, comp. 12335
ion and plasma propulsion, comparison 12615
in ionospheric electron density meas. 6448, 12146
motion, round earth or sun 18874
motion equations, for variable mass gyroscope 6579
projectile aiming on moving earth 6719
noise, effect on missile motion 10741
photon propulsion 12334
propellants, thermodynamic props. of Al, B and Li halides, 0-6000°K 963
propulsion, relativistic theory 10573
radiowaves, from rotation of plane of polarization, ionospheric electron concentration 21350
relativistic dynamics 16923
relativistically moving, separation 16580
second Russian cosmic rocket, results obtained 10397
sky u.v. emission study 10533
Skylark rockets, sodium experiment 21331
solar corpuscular radiation observations 14381
solar observations 14434
solar u.v. spectrum observations 16545
solid propellant, acoustic resonance 8735
space flight problems 16872
stability, differential eqns. system 12395
stability, nonlinear differential systems 4977
stellar astronomy 14438
thrust, method of increase 19182
trajectories, optimal accuracy 911
upper atmosphere obs. of extreme u.v. 10451
Rotating bodies (See also Angular velocity measurement; Centrifuges; Earth, rotation; Gyroscopes).
centripetal force apparatus 6725 [6716
elliptical vessels containing liquids, rotational vibration
hulahoop, heteroparametric excitation 910
motion in elastic wave field 19033
lamina, inf. plane, in non-Newtonian fluid 8615-6
resisting couple, effect on rotation of rigid body 16658
slip between metal and rubber-covered rollers 8134
solid body subject to couples, spatial motions 14565
stability of rotating space vehicles 14476
Rotatory power, dispersion (See Optical rotation).
Rubber
acoustic wave propag. 2196
acoustic wave propag., plates and rods 14722
anti-vibration mountings, choice 6870
cork—rubber composition, thermal cond. 5204
crude, kerosene swollen, X-ray study 1913
dielectric properties, 1958 digest 2300
divinyl styrene synthetic rubber, meas. of dynamic viscoelastic parameters 10270 [635
ebonite, formation of electrets, effect of alternating fields
ebonite, permanent polarization 10022
elastic properties, static and dynamic determination 18235
films, fine structure, electron microscope study 21220
filled and unfilled, dynamic elastic props., strain amp. depend. 8108
gutta-percha, crystallization and crystal structure 6342
natural, longitudinal wave propagation 18251
natural latex, coagulated, weak hydrogel properties 14142
pure, and foam, complex dynamic elastic modulus 1842
radiothermoluminescence 21018
Rubber — contd
rubber-like materials, dynamic shear properties, machine testing 6289
rupture, internal, bonded cylinder in tension 3159
rupture and tearing energies 1865
SBR, stress relaxation, at large strains 18244
SBR, ultimate props., time and temp. depend. 21123
strain dependence of visco-elasticity 697
stress relaxation by viscoelastic mechanism 3160
tearing, analysis of stresses and deformation 1864
viscous flow 10266-9
vulcanization by irradiation 6419
and ZnO_2 mixtures, permittivity 6151
Rubidium
atomic structure of Rb^+ 17647
atoms, ionization on collision with H_2, D_2, N_2 and O_2 19611
elec. cond. 15826
films, elec. resistance, thickness depend. 1615
ions, range in Al 19804
liquid, density measurements 12398
n.m.r., electronic structure 4530
Rb^{87}, 70c/s line width, optical orientation and microwave detection 17695 [5882
resonance spectrum, effect of A at press. up to 1500 atm
thermoelectricity, meas. below 1°K 18076
vapour, optically aligned, spin relaxation and disorientation collisions with buffer gases 482
Zeeman resonance 17694
Rubidium compounds (See also Alloys).
RbBr, nuclear magnetic resonance 4531
RbCl—KCl mixed crystals, Rb ion diffusion 6063
$RbClO_3$, Rb nuclear quadrupole coupling interactions 9226
$RbHSO_4$, ferroelectric props. 7980
Rb halides, e.s.r. of F-centres 4300
Rb halides, F-centres, short-wave absorption, higher excited states 17965 [13480
Rb halides, lattice vibrations and specific heats, calc.
Rb iodide, mirror coatings for u.v. region 16882
Rb pentaborate, crystal structure 4644
Rb pentaborate glass, radial distrib. curve 6360
Rb—Sb layers, secondary electron emission 12630
Ruthenium
atomic and electron heat, 10-273°K 1560
RuI spectrum 7729-31
Rn^{222}, diffusion in ThO_2 15874
Ruthenium compounds (See also Alloys).
with rare earths, Curie points and mag. moments 1776
Ru_2B_3, crystal structure 18349
Ru hexahalide complexes, electron transfer spectra 20650

Samarium
heat capacity, 13-350°K 2788
mag. susceptibility, 300-1400°K 18169
new isotope, proposed formation 5805
Sm^{149}, pile neutron absorption cross-section 4125
Samarium compounds
Sm ethylsulphate, Sm^{3+} spectrum anal., mag. sp. ht. 10047
SmB_6 powder emissivity 16919
SmB_6, prep. and properties 13468
SmFe garnet, ferromag. resonance, theory 1820 [10136
xSm_2O_3 . (3-x) Y_2O_3.5 Fe_2O_3, lattice constants, mag. props.
Sampling (See Statistical analysis).
Sand
analysis for Pb and Cu, using γ-ray absorption 12121
bearing plasters, skeleton strength and critical porosity
e.m. wave propagation over sand-covered conducting plane 1209 [13916
γ-ray scattering and energy degradation 5532
marine sediment, u.s. velocity and absorption 8739
marine, velocity of compressional waves 2200
pressure transfer and nonstationary gas flow 10686
St. Peter sandstone, pressure solution and force of crystallization 10280
water-saturated, motion 6752
Satellites, artificial
acceleration due to air drag, fluctuations 14474
aerodynamic lift and moment 18886
angular decel., correl. with solar noise intensity 8371
astronomical information obtainable 18875

1960 α 2 (Pioneer V), magnetometer experiment 21317
1960 α 2 (Pioneer V), particle detector information 17453
1960 β 2 (Tiros I), meteorological data 16416 [18871
1960 γ (Transit 1B), orbit, and earth's gravitational field
1960 ε (Sputnik IV), sudden discontinuity in orbital period [18887
Scandium
electronic polarizability 7698
nuclear mag. resonance, Knight shift, 1.8 and 300°K 18228
oscillator strengths of neutral atom 20590
solubility, solid, of impurity elements 18396
stacking faults 552
Scandium compounds
ScH_2, preparation and properties 21270
Sc_2O_3, work function 19707
Scattering
analytic completion in fourfold scattering 20016
with classical central-field repulsive forces, analytic approach 17686
on cones, finite, backscattering 17106
dissipation functions and invariant imbedding 19004
elastic waves by cylinder 14718
fourth-order amplitude with two complex invariants 16606
grey, Rayleigh phase function 16634
isotropic grey, stellar radiation 19001
isotropic, in semi-infinite atmosphere, H-functions 19002
length, and effective range in two-body problem 11106
multichannel, in Hilbert space, integral equations 337
multichannel, nonrelativistic quantum mechanical theory 11109
phase of scattered waves 2498
phase-shift calc., Pais method 12852
plane wave by special potential well, phase-shifts 20063
Scattering – contd
potential scattering, Mandelstam representation 12849
scalar field, on spherically symmetric scatterer, dispersion relations 17261
S-matrix invariance 17259 [17253
Yukawa potential scattering, partial wave amplitudes
acoustic waves
cylindrical waves, convergent, by a sphere, calc. 6875
by a disk, solution for an arbitrary wave 19303
flat plates, totally reflecting, bistatic scattering 6879
non-uniform sinusoidal surface with normal acoustic admittance 6877
plane, by row of small cylinders 2210 [8754
plane transverse, by spherical object, in elastic medium
resonance on sinusoidal surface of small-amplitude waves
sea 5099 [19305
in sea, at temperature discontinuity 132
by solids with uneven surfaces 19304
by spherical fluid obstacle in elastic medium 2211
strips system, forces and torque calc. 5097
by turbulence in surface layer of atmos. 12176
in turbulent atmosphere 6878
in waveguides with irregular surfaces 133
acoustic waves, ultrasonic
backscattering of underwater sound from sea surface 2209
by cylinders, photographic observation 12462
Rayleigh surface waves 8731
by u.s. waves 5098
α-brass, polycrystalline 13503
Cu, polycrystalline 13503
electromagnetic waves
due to auroral disturbances 6480
circular disk, cross-section for plane wave, with amp. distrib. 901
conducting sphere response to dipole field 12694
cone, Rayleigh and resonance scattering 5404
by corrugated sheet 5405
from cylindrical plasma, infinitely long, magnetized 17018
dielectric rod lattice, 2-dimensional 11054
by electron beam 3859
on electrons, above ionosphere 18501
by ellipsoidal particles 19447
on free electrons in strong mag. field 11020
by gravitational fields 10568
in high-density media at high temp. 12709
on imperfectly conducting cylinder 12698
by ionized gas in thermal equilibrium 17108 [16432
ionosphere, 440 Mc/s backscatter, s.n. ratio versus height
ionosphere, v.h.f. forward scatter, turbulence theory 12711
by longitudinal plasma waves 11053
lower ionosphere 14318
in lower ionosphere, metre waves 6453
microwaves by plasma 19684
moon, as diffuse reflector and scatterer 16528
by moon, "quasi-smooth" model 16525
by moon, radar determination of scattering props. 18651
multiple scattering, spectral density 12674
in non-uniform medium, scattering-angle dispersion 19932
by obstacles, field analysis 5402 [5406
parallel slits, in conducting screen, transmission coeff.
plane waves, on conducting disk 15145
by plasma, rel. to ionospheric propagation 19931
power spectra, of temp., humidity and refractive index, aircraft and balloon meas. 16477
pressure on charge in mag. field 11022
radar cross-section of a semi-infinite body 2443
radio waves by weak auroral ionization 16466
Raman scatt., on ferrites 9210
reciprocity theorem, for far-zone field 7223
rough surfaces, reciprocity theorems 17107 [16455
spread angle due to moving irregularities in F-region
troposphere mechanisms, inadequacy 4792
troposphere, mult. scatt. 12710
waveguides, equivalent network 9213-14
X-band, back-scattering from sea 12700
light (See also Diffusion, light; Raman spectra).
by adsorbed water on isotropic powders, theory 3650
in atmosphere, meas. instrument 4783
in atmosphere, searchlight for meas. of 171
in atmosphere, u.v., effect of ozone absorption 18518
atmospheric particles, solar aureole 18519

Scattering — contd
light — contd
atmospheric, visual range meas. 8420
binary fluid mixtures, critical opalescence 10786
Chandrasekhar's method for diffuse scattering problem, convergence 19003
classical theory, molecular interaction 6950
by colloidal spheres 3255, 5182
colloidal spheres, Mie theory, comparison of approx. methods 19445
coloured spheres, Mie equations 10785
copolymer soln., angular distribution 14851
by crystalline polymers 14053
disperse systems, particle size determination, formulae and nomograms 12496
distinction from absorption, use of integrating sphere 5134
by ellipsoidal particles 19447
by films, effects of pigment size 6939
in fogs 10453
forward scattering by spheres 5135
i.r. in fogs 10452
large particles, spectral depend. meas. 14848
Lennuier effect, theory 14780
line broadening on transition liquid to solution 3530
measurement, review, definitions 163
in media with varying optical parameters 14846
by molecules, semi-stiff chain type 11546 [19448
in moving boundary media, quantum escape probability
multiple coherent scattering of light from optical resonance in gas 20548
non-absorbing spheres, i.r. transmission of clouds 14302
optical conds. in weakly absorbing scattering medium 1044
optical resonance multiple coherent scattering in Hg 20549
particle size det., polychloroprene latex globules 19446
photographic emulsions, diffusion halo 8813
polymer films under strain 6374
point source in diffusing medium, light distribution 10783
Rayleigh, optical conditions inside medium 8809
Rayleigh scattering depolarization factor, meas. for various vapours 19450
Rayleigh, in sodium twilight flash 786
resonance, by atmospheric sodium 2029-30
resonance, atmospheric sodium, twilight intensity theory theory 2031
resonance radiation, transport, incoherent scatt. theory, verification 13394
in spherical homog. medium, with central energy source, applic. to nebulae 18842
by solution of anisotropic rods, function for luminous intensity 19449
solutions, visual nephelometer 12495
in spectrophotometers, prism-type, stray light determination 12485
by spherical metal particles 5183
by spherical particles, descriptive functions 3649
by spherical particles, various functions 14849
streaming suspensions and solutions 939
by systems of particles, theory 14850
by ultrasonic waves in glycine sulphate 9845
acetone, intensity of Brillouin cmpts. 14847
polyacenaphthene solutions 14657
polyethylene spherulitic films, structure studies 21221
polystyrene latexes, monodispersed 10784
quartz, imperfections, study 11619
soot particles on prism, polarization 14856
sugar solutions, turbidity meas. 6951
water, intensity of Brillouin cmpts. 14847
by wood smoke 5131
DNA, comp. of molec. weights 7822
KCl, scatt. by dislocation networks 11618
Na-borosilicate glasses, rel. to X-ray scatt. 16040
X-rays (See X-ray scattering).
Scattering, particles (See also Collision processes; Field theory, quantum, interactions; Fundamental particles, interactions; Nuclear forces; Nuclear reactions; Particle tracks; Range of particles; and under individual particles, e.g. Alpha-rays).
α_{33} phase-shift, energy depend. 17391
amplitudes, single particle singularities 15282
analyticity, unitarity and resonances 7292
ang. distrib., Coulomb excitation 12853 [11103
angular momentum expansions in relativistic field theory

Scattering, particles — contd
approximation calc. for inelastic scattering 15284
approximation methods, comparison 15283 [13401
by atoms, dispersion relations, appl. to electron scatt. by H
Born approximation, for scatt. on spherically symm. potential 3932
Born expansion, convergence 16631
Born formula, 1st approx., distribution theoretic anal., mathematical meaning 20058 [1255
bound particles, analysis of model related to stripping reaction 20090
bound states, non-perturbation approach 9284
bubble chamber, propane, meas., mass and momentum
cascade, as test of parity conservation 11128
causal scattering matrix, in indefinite metric theory 9283
causality requirement formulation 12860
charged particles, energy loss in thin absorbers, binding effect corrections 1261
collision amplitudes, analytic structure in perturbation theory 15295
collision lifetime matrix 9282
by complex atoms, differential elastic cross-section 9733
by compound systems, low-energy 4167
by compound systems, upper bounds on scatt. lengths, appl. to N—D 5863
conference papers 17277
Coulomb energy differences, for nuclei A = 1 - 54 17486
Coulomb field, transition matrix elements between states
Coulomb, generalized Born approximation 15279 [4947
Coulomb, interference with nuclear scatt., high energy 20429
Coulomb, multiple, effect on ionization losses 20073
from Coulomb potentials with exponential screening, total cross-section calc. 5865
Coulomb scatt., charged particles on atoms, effect on certain interactions 12875
Coulomb scatt., in magnetic field 19618
Coulomb wave-functions, irregular, tables 6685
Coulomb wave-functions, in terms of confluent Appell functions 4946
coupled scatt. and production amplitudes satisfying analyticity and unitarity, construction 12873
covariant treatment 338
cross-section dependence, dispersion relations 20077
use of "damping" functions 9319
by deformed nuclei, inelastic scattering 17578
depolarization due to target motion 20094
diffraction theory for v. high energies 12850
Dirac particles, azimuthal asymmetry 20059
Dirac particles, Coulomb scattering 15279
Dirac particles, by spherically symmetrical force centre. 2nd Born approx. 9269 [1396
direct-interaction inelastic scatt., reaction mechanism
direct-interaction with strong coupling 4087
dispersion relations, limitation of validity 17262
dispersion relations and perturbation theory 1251
double scattering, asymmetry and polarization 12855
effective range, stationary expression 5499
elastic, behaviour of fermion spin 5503
elastic and inelastic, on black nonspherical nuclei, collective states excitation 11310
elastic and inelastic, calc. of bounds 11108
elastic and inelastic, nonrelativistic particles 12877
elastic scattering amplitude at high energies, real part 20193
elastic, of spinless particles, amplitude calc. 15298
electrons, large angles, infinite medium 2398
e.m. scattering of different spin $\frac{1}{2}$ particles 12854
equivalent Hamiltonians 7299
Feynman diagrams, singularities 12876
by fixed centres, dispersion relations 3931
fluctuation theory 4957
formal theory, and Chew—Low formalism 11114
formal theory, criticism 9294
forward scatt. amplitude, structure 3934
G factor calc. for gas scattering 17276
gas scattering in strong focusing synchrotron 19846
giant resonances, model, appl. to S-wave neutron scatt.
heavy charged particles, by nuclei with vibr. and rot. [1445 states 11394
by heavy electron-screened nuclei, Schwinger effect 13224

Scattering, particles — contd
heavy nuclei, diff. cross-section calc. 7586
high-energy-limit cross-sections for particles and their antiparticles 5502
high energy potential scattering 7300
high energy synchrocyclotron research, Joint Institute of Nuclear Studies, U.S.S.R. 15305
Hilbert space operator, phase shift formula 16605
Hulthén-type variational methods 5498
impulse approx., time-dependent 12868
indefinite metric in Lee model 17256
inelastic diffraction scatt., mechanism 432
inelastic diffraction scatt. on nuclei, equivalence of distorted-wave Born approx. and adiabatic method 20426
inelastic, direct interaction 20420
inelastic, optical model treatment 11288 [1239
isotopic spin conservation, electromagnetic corrections
kinematics, Mandelstam representation, for two incoming and two outgoing particles 7298
Klein–Gordon particles, Coulomb scattering 15279
ladder approximation, Mandelstam representation 17255
low energy, field theory 15276
Mandelstam representation in potential scattering 884
Mott scattering analysis of Co^{60} β longitudinal polarization
Mott scattering, longitudinal electron polarization 17306 [20381
multichannel, Levinson's theorem 20071
multiple Coulomb, relativistic energy meas. 1260
multiple, of polarized particles 3930
multiple scatt., effect on intrinsic particle field, emission on passing through 2 media 20093
multiple scatt. of monoergic particles by amorphous foil, theory 9292
multiple scatt. of particles of opposite charge 20165
near reaction threshold, cross-section energy depend., resonances 11393
nonspherical, at small angles, Schiff approx. 885
nuclear excitation, adiabatic approx. 9522
nuclear potential, field theoretic definition 1252
on nuclei, black nonspherical, nuclear interaction 11392
on nuclei, cross-section and polarization, optical model 5734
by nuclei, forward scatt. amplitude from optical-model potential, high energy limit 20428
on nuclei, optical-model analysis 20427
nuclei, spin–orbit force 4015 [7344-5
nucleon–deuteron, inelastic, impulse approximation
nucleon–nucleon, two-pion contribution 15293
nucleons, by nonlocal potential, at high energy 9295
nucleus, optical model, scattering amplitude 13109
off-forward scatt., dispersion relations 3935
optical conditions within a weakly absorbing scattering medium 1044
optical model potential, target exchange corrections 15566
optical theorem, with incoherent mixtures of pure states
p–p, p–n, electron exitation effects, calc. 1278 [20078
partial wave amplitudes 2499
partial wave amplitudes, analytic props. 12859
partial wave amplitudes, complex singularities in perturbation theory 20068
phase shifts, bounds, for static central potentials 17252
phase shifts, calc. for centrally symmetrical case 20060
phase shifts, calc., improved Born approx. 17251
phase shifts, coupled errors 3943
phase shifts, distorted wave approximation 20061
phase shifts rel. to no. of bound states 17264
in plasma, scatt. potl., calc. 2363 [5524
polarized particles, multiple elastic scatt., diffusion theory
potential scattering, dispersion relation 2495
potential scattering, Mandelstam representation 5500
proton–proton, spin correlation coeff. C_{nn} 7347
quasi-elastic scatt. of fast particles by nuclei 4085
quasi-stationary states, with complex energies 11110
radial wave funcns., analytic properties 17254
radiative transitions, theory, resonance and multiple scattering 15515
relativistic Coulomb scatt. wave-function 15286
resonance reactions, Blatt–Biedenharn formalism, extension 7543
resonance, and virtual binding 17568
by rigid rotator 20609
S-matrix, angular operators 883

Scattering, particles — contd
S-matrix, divergence-free iterative expansion 20066
S-matrix, generalized quantization method 9256
S-matrix, multiplicity of interpolating field 15281
S-matrix, non-relativistic, structure 20070
S-matrix, physical interpretation of complex poles 14520
S-matrix, reduction formulae 7294
S-matrix, scatt. amplitudes, general eqn. 5525
S-matrix, spin structure 20069
S-matrix, transformation leaving cross-section invariant
s-wave, pseudoscalar coupling 20199
scattered-wave phase 15297
scatt. involving a bound state, theory 3933
scatt. lengths when composite bound states exist, upper bounds 9288
scattering amplitude, for separable potentials, Fredholm soln. 7301
scattering amplitudes, rel. to production amplitudes 17260
scattering lengths for static potentials, upper bounds 2496
scattering matrix, with Pauli interaction correction 20074
scattering potential reconstruction, use of scatt. amplitude
by singular potential in perturb. theory and in momentum repres. 12856 [11107
small-angle, systematic errors 15311
spin polarization meas., study of techniques 1408
spin-$^3/_2$ particles, by Coulomb field 2508
spin-2, scattering by Coulomb field 2509
by target possessing discrete excited states, complex eigenvalues 9293
theory, using eigen-phase shifts and eigen channels 11111
theory, without channel radii 17567
threshold effects in three-body channels 15287 [17266
thresholds, ordinary and anomalous, in perturbation theory
transport in scatt. medium, quantum theory, incoherent processes 9298
two-body problem, covariant 3923 [15288
two-body problem, integral formalism, using Liouville eqn.
unitarity property of scattering operator 4945
unstable particles, scatt. amplitude determination 9296
wave-packet formalism for finite time interval 15272
wave-packet interpretation 12874
wave-packet theory formulation 45
Wigner's inequalities for spin 0 and $^1/_2$ particles 5501
He^3, on medium-weight nuclei 9641
He^3 by C^{12}, Ne^{20} and A^{40}, at 28.5 MeV 20463
He^3, 29 MeV, by H, D, He^3 and He^4 20250
Schlieren systems
sequential-spark with cylindrical-lens camera, laminar to turbulent flow transition 16727
Scintillation counters (See Counters, scintillation).
Seals (See Glass-metal seals).
Seawater
acoustic wave "divergence" attenuation, calc. 5094
acoustic wave propag., to great distances 12450
acoustic wave scattering 5099
acoustic wave scattering, at temperature discontinuity 132
back-scattering of underwater sound 2209
Forel's Colour Scale 19462
gravity waves, propag. over seabed, damping 8348 [8149
hopper halite crystal growth by evaporation of seawater
optical props. of large bodies of water 8766
propagation of sound 19267 [8360
radio echoes at Casablanca, period and length of waves
sea ice, physical properties 1975
sound propagation at l.f. in shallow sea 19268
sound velocity 989, 10721, 19276
sound velocity and temp. meas., pulse apparatus and thermistor bridge 16765
sonic velocity variations, meas. by phase difference recorder 14756
turbulence, spectrum at high Reynolds number 5000
X-band radiation back-scattering 12700
Secondary electron emission (See Electron emission, secondary).
Sedimentation
electriator for ferrimag. mineral sands 10326
equations 4739
equilibrium second virial coefficient det. for polymeric solns. 77
generalized theory 8323
hydrodynamical model 2152
microscopic spheres in polymer solutions 76 [14139
particle size distribution meas., single tube apparatus

Sedimentation — contd
of polydisperse macromolecules 16393
polymer solns., molecular wt. det. 14141 [8657
polymers, theory, for 1, 2 and 3 branch points and rings
pseudoplastic systems, viscosity impulse theory 14581
sizing analysis, automatic decantation 8262
spheres, moving through viscous liquid, interaction 8592
velocity, relation to effective viscosity 4740, 10366
polybutylmethacrylate in isopropyl alcohol, rel. to molec. wt. 12111
DNA, comp. of molec. weights 7822
ThO_2 slurries at high temps. 12112
Seignette salt (See Rochelle salt).
Seismic waves (See also Seismology). [10385
body, amplitudes from underground nuclear explosions
boundary conditions, theory 986
dispersed wave trains, anal. and synthesis 10714
earth's core, equations of state 8353
generalized reflection and transmission coeffs. 12451
hydrogen bomb explosion (1954) 4769
long earthquake waves 12129 [4776
longitudinal, in upper mantle, velocity, European study
long-period, from nuclear explosions 14158
Love waves, in medium with single layer, propag. 12126
low-velocity layers in earth, ocean and atmosphere 10386
modes, rays and travel times 8349 [12127
multiplet, in solid with plane homogeneous isotropic layers
off-shore areas, wave propag. in water 6764
plane n-layer general problem of reflection 14159
propagation in inhomogeneous media 987
quarry explosions, S.E. Australia 4768 [10382
Rayleigh-type, development in vicinity of small explosions
thermoelastic solid, attenuation of plane stress waves 8734
underground explosions, surface motion 10384-5
velocity in marine sand sediments 2200
Voigt waves, plane compressional 8730
Seismographs
continuous signal 8351
underground nuclear explosions 10384-5
Seismology (See also Geophysical prospecting; Seismic waves).
earth oscillation study from seismograms 8518 [8352
ghost reflections, on mag. record., linear filter elimination
hydrogen bomb explosion (1954) 4769
IGY Kelvin lecture 754
piezoelectricity meas. in quartz-containing rocks 2928
propagation of plane long. waves in inhomog. elastic media 987
pulse frequency analysis, photomechanical method 8350
refraction, seismic, in uniaxial homogeneous medium
seismogram synthesis, with multiples and transmission coeff. 6430 [12128
theory applicable to earthquake stress and rupture determinations 699
underground nuclear explosions 10383-5
Selenium
absorption spectra 10037
barrier-layer cells, 16 types, slow response 2909
conductivity and photoconductivity, effect of addition of Tl and TlCl 7966
dielectric props., 500 c/s - 1 Mc/s, −40° to + 160°C, Br-doped 10012
diffusion in GaSb 4359
elec. cond., press. depend., up to 30 000 atm. 613
elec. cond., time rate of decrease, temp. depend. 18052
elec. and opt. props., theory 6127 [1675
elec. props., effect of Br, Cl, I impurities, temp. depend
electronic structure, composite valence and cond. bands
films, annealing and oxidation, X-ray reflection [6126
studies 14089
films, polarization study 20970
films, structure, effect of In and Tl 18412
foil polarizers, interference effect 10787
hole conductivity, photosensitivity 6134
ionization potential — refractivity relation 2321
optical props. of thin layers 7992
oxygen free, prep. and effect of press. on elec. cond. 614
photocell, open cct. e.m.f. 13637
photocell, thermodynam. study, microcalorimeter for 10813
photoelectric elements, design, investigation 1147
rectifiers, effect of strong fields and Br impurity 6125
rectifiers, non-isothermal diffusion theory 20881
study phase boundary Se/H_2SO_4 system 2901
Selenium — contd
thermal cond., effect of added Br 6057
thermal cond., effect of halogen content 546
thermal cond., effect of Sn and Bi impurities 11589
u.s. absorption, polycryst. samples, temp. meas. 5095
u.v. absorption and reflectivity 8004
u.v. emission spectrum, use for analysis 16397
wedge-shaped layers, thickness determination 3483
xerographic, reciprocity failure 6956
X-ray K-absorption edge 20734
zone refined, Sn distrib. 13942
Ag—Se layers, resistivity and thermoelec. power 7968
Selenium compounds (See also Alloys).
selenates, metallic, i.r. absorption spectra and structure
SeP $(C_2H_5)_3$, structure 3254 [20625
Semiconducting devices
amplifiers, instability 15918
amplifiers, using negative-mass carriers 15919
cylindrical, spreading resistance 13627
detectors, 1960 Washington Scintillation Counter Symposium, development review 15195
effects of pulse irradiation 583
electrophotographic device, using electret layers 10001
encapsulation 9984
fission probe for neutron detection 11462 [11046
generators and amplifiers using electronic transitions
grain-boundary amplifier 5397
hygrometer, automatic, using Peltier effect 14668
i.r. detectors, use of InSb and Ge:Sb 18015
i.r. detectors, 1 - 7 μ, using InAs and InSb 19499
i.r. photocells, single crystal 266
negative resistance 6098
neutron dosimeter 2551 [12573
ohmic contacts, stable low-resistance, applic. to ceramics
optico-electronic devices, review, amplifiers, modulators, computer elements 2929
oscillistor, semiconducting oscillator 18057
p—n junction, non-uniformly irrad., photoeffects 11721
photocells, efficiency, solar energy utilization 9987
photodetectors, grain-boundary photoresponse 18063
photoresistor bridge, for meas. of small d.c. voltages
radiation monitor, transistorized 17157 [19596
radioactive current sources, double energy conversion
refrigerating thermoelements, efficiency, temp. depend. 3733 [10867
review, especially of InSb devices 2871
semiconductor-to-Cu soldered contact 6129
solar batteries 5265, 14950
solar energy converters 2312
solar energy convertors, maximum efficiency 19601
thermistor hypometer 914
thermistor Pirani gauge 19231
thermistors, use as a.c. - d.c. convertor 5264
thermistors for l.f. wave filters 12572 [3731
thermoelectric cooling to reduce photomultiplier noise
thermoelec. generators and cooling devices, efficiency calc. 3734 [13639
thermoelec. generators and refrigerators, effect of temp.
thermoelec. generators and refrigerators, figure of merit, theory 4375
thermoelec. refrigeration 19574
thermoelements, meas. of thermal parameters 12574
transistorized distributed amplifier 2299
washing system 4724
Bi—Sb—Te alloy thermocouples, as refrigerating elements 2915
Bi_2Te_3 — Sb_2Te_3 solns., as thermoelements, elec. cond. depend. 2917
CdS cells, solar energy conversion 7967
Co—Mn oxide thermistor bolometer 8836
GaAs barrier layer cell as X-ray detector 3198
GaAs cells, solar energy conversion 7967
GaAs photocells, spectral characteristics 9994
Ge n—p—n structures, double diffusion production 13622
Ge, effect of O_2 and water vapour adsorption 16395
Ge photocells, γ - radiation, noise level increase 14681
Ge surface barrier counters 12725
InSb Hall-effect oscillator 610
InSb i.r. photoelectromagnetic detector 10800
InSb photovoltaic detector, detectivity 14883
Se barrier-layer cells, 16 types, slow response 2909
Si cells, solar energy conversion 7967

Semiconducting devices – contd
Si photocells, carrier mobility and density 13587
Si photoelectric energy converter 20938
Si photo-elements, charge carrier diffusion length 9965
Si photo-elements, energy diagrams 9997
Si solar cell for photoconductive detector 14951
p-Si–P device as particle detector 9237
diodes and junctions
alloys, p–n in α-SiC, photoelectric props. 20939
avalanche breakdown in diode with limited space-charge layer 18058
capacitors for parametric amplification 13625-6
contacts with metals, rectification without injection 9983
diode, conductivity and voltage transfer coeff. in non-stationary regime, calc. 4329
use of diode-ring as four-quadrant multiplier 2306 [15911
electrical breakdown, at high inverse voltages, theory
Esaki diodes, current–voltage characteristics 6104
Esaki, Ge, As-doped, single crystal growth 21164
fast-response photocapacitors 622
formation, during oxidation 15936
group III–V junctions, observation of polarons and phonons during tunnelling 13628
impurity distribution, from capacity–voltage meas. 15972
"long", I–V charac., temp. depend. 7921
mesa type parametric, thermal spreading resistance 13627
metal point–semiconductor, photocurrent, pressure depend.
n–p junctions, I–V characteristics, carrier generation and recomb. 11675 [15992
noise non-rectification paradox 7064
p–i–n junction in anodic oxide Ta film 15962
p–n avalanche breakdown det. 581 [2862
p–n junctions, breakdown, effect of carrier space-charge
p–n junctions, capacitance at low temps. 6099-100
p–n junctions, charged particle detectors 5630
p–n junctions, Li–B ion pairing, effect on Li^+ ion drift in Si 15940
p–n junctions, PbS photosensitive layers 20934
p–n junctions, Peltier effect, injection heat transfer 11731
p–n photoelements, recomb. const. and depth, from spectral data 18062
p–n junctions, surface phenomena 15915
p–n junctions, temp. depend. and lifetime 1631 [11720
p–n photoelements, characteristic and quantum yield
p–n reversed biased, visible light emission 2875
photocells, p–n junc., recombination parameters 15908-9
point contact effective area 2883
point-contact rectification, dipole mode of minority diffusion 1633
as radiation detectors 17156
thermojunctions, review 10002 [18025
tunnel diodes, by epitaxial growth of Ge on Ge or GaS
tunnel diodes, ratio peak-to-valley currents 15971
tunnel, scaler circuit 12803
tunnel, test set for V–I characteristics 7046 [7952
variable capacitance diode, using space charge layers
white noise, temp. depend., calc. and meas. 1636
AlSb, grown-junction, Al_2Ta dendritic inclusions 16276
Au–Ge junctions as particle spectrometers 1234
Cd telluride, p–n junction photocells 11723, 15948
CdS analogue diode and triode 2892
CdS p–n junction, photovoltaic barrier effect 20929
CdTe p–n photocells, u.v. quantum yield 15987
Cu_2O rectifiers, surface conductivity 13624
FeS_2 point-contact, rectifying props. 612
GaAs, diffused diodes 2895 [13628
GaAs, observation of polarons and phonons during tunnelling
GaAs, p–n fabrication, by Zn diffusion, reverse characteristics 4360 [16969
GaAs, p–n junction, high solar conversion efficiency
GaAs, photodiode for visible 16830
n-GaAs point-contact, prep. and props. 15974
GaAs tunnel diodes 2896
GaAs, Zn-doped tunnel diodes 7951
GaP, breakdown and recomb. emission 18042 [13628
GaP, observation of polarons and phonons during tunnelling
GaP, p–n junction, electroluminescence and photovoltaic effect 13708
GaP point-contact diodes, radiative recombination 20016
GaP point-contacts, characteristics 9974 [13628
GaSb, observation of polarons and phonons during tunnelling

Semiconducting devices – contd
diodes and junctions – contd
Ge diffused n–p junction α-particle detector 5466
Ge diodes, direct tunnelling 2880
Ge diodes, inverse I–V characteristics, thermal breakdown 15976
Ge diodes, static and pulse I–V characteristics, thermal breakdown 15975
Ge, electron–hole junctions, conductivity in reverse direction 20880
Ge junction diodes, use in β-ray detection 7493 [9995
Ge junction photodiodes, threshold sensitivity and noise
Ge junctions, internal field emission 9961
Ge, p–n formation, due to As and Al doping 1640
Ge p–n junction delineation by electrodeposited Cu 13593
Ge p–n junction particle detectors, charge collection coeff.
Ge p–n junction, vapour grown, variable capacitance diode 18024 [20886
Ge, p–n junctions, barrier temp. at turnover 4341
Ge, p–n junctions, breakdown, effect of carrier space-charge 2862
Ge p–n junctions, at high current densities 6102
Ge p–n junctions, plastically deformed, reverse characteristics 13594
Ge p–n junctions, preparation by diffused shot-melting 11695
Ge p–n junctions, recomb. and generation phenomena 7924
Ge photodiodes, short time constants, high sensitivity
Ge, noise temperature ratio 7950 [20900
Ge point-contact, rectifying props. 612
Ge rectifiers, surface phenomena 9981
Ge surface-barrier diodes, as α-spectrometer 1644
Ge, vapour-grown, elec. props. 18023 [1635
Ge variable reactance diodes, surface-dependent losses
Ge–GaAs, rectifying characteristics 18026
Ge–Si alloy junction 4347
Ge and Si Esaki diodes, fast neutron bombard. 18029
InAs, observation of polarons and phonons during tunnelling
InP, observation of polarons and phonons during tunnelling 13628 [13628
InSb, Esaki effect 11714 [11726
InSb, In and Cd alloyed p–n junction, photovoltaic cell
InSb, magneto-tunnelling for fields up to 88 000 G 18047
InSb narrow p–n junctions, internal field emission, field and temp. depend. 11715 [13628
InSb, observation of polarons and phonons during tunnelling
InSb p–n, anomalous barrier capacitance 18045
InSb, p–n, electric props. 18043
InSb, for parametric amplifiers 6122
InSb photovoltaic cells, i.r. sensitivities 18069
InSb, tunnelling, Stark splitting of energy bands 18048
Sb–Cd, welded contact, thermoelec. inversion 16000
Sb–Mg, welded contact, thermoelec. inversion 16000
Se, electron–hole junctions, conductivity in reverse direction 20880
Se rectifiers, effect of strong fields and Br impurity 6125
Si alloy diodes, breakdown effects 9966
Si, breakdown voltage, effect of state of surface 6114
Si, with breakdown > 4000V 6103
Si, electron–hole junctions, conductivity in reverse direction 20880
Si, inversion behaviour, in moist gases 9982
Si junction-diode amplifiers 12692
Si junction diodes, use in β-ray detection 7493
Si junctions, internal field emission 9961
Si junctions, ion drift, diffusion meas. of Li, 25-125°C 13561
Si junctions, photoemission induced by internal elec. field 12627
Si n–p junction charged particle detector 7247 [20508
Si p–n junctions, anomalous surface channels 18031
Si p–n junctions, breakdown charac., internal heating 1650
Si p–n junctions, capacitance at low temps. 6100
Si p–n junctions, for detecting minimum ionizing particles
Si p–n junctions, electron emission 2376 [19975
Si p–n junctions, heat treatment centres and bulk currents
Si p–n junctions, impact ionization 15937 [1651
Si p–n junctions, impact ionization, exp. and theory 596
Si p–n junctions, light emission and noise generation 1648
Si p–n junctions, metal precipitates 18032
Si p–n junctions, prep. by diffused shot-melting 11695

Semiconducting devices – contd
diodes and junctions – contd
Si p–n junctions, prep. by diffusion of B and P 597
Si, p–n–p–n switch 1649
Si, ohmic contacts, production 595 [15973
Si, point contact, heat treatment and ion bombard. effects
Si rectifiers, inverse characteristics, at surface breakdown 11702
Si, review 20912
Si surface-barrier diodes, as α-spectrometer 1644
Si, surface improvement by low melting glasses 6105
Si, uniform junctions, breakdown and ionization rate
Si–Ag contact, visible light emission and [11703-4
rectifying props. 20909
SiC, Al-alloyed, various characteristics 11705
SiC p–n grown junctions 15960
Te–Mg, welded contact, thermoelec. inversion 16000
transistors
as α-particle detectors 9238
use in avalanche made for nuclear intrumentation 20008
base, minority carrier lifetime determination 15980
with dispersed colloidal phase base 9979
double diffusion Ge transistors, props. 15978
drift, diffusion attenuation 543
drift transistors, increase of cut-off frequency 9980
junction, electric field in base at low injection levels 15979
mesa, extrinsic collector resistance 13627
mesa type drift, minority carrier recombination in base region 11679
p–n junction on n-type Ge, technique 15933 [4367
p–n–p phototriode, with base floating, relaxation effects
p–n–p–n switches, turn-on transients, analysis 15977
as radiation detectors 17156
ratemeter, transistorized 21402
time-to-pulse-height convertor, transistorized 19993
white noise, temp. depend., calc. and meas. 1636 [11678
Ge alloy, current gain reduction by neutron bombardment
Ge phototransistor, for photon fluctuation detector, i.r. 8831
Ge, production, by impurity and donor diffusion 11686
Ge, surface recombination velocity by γ-irradiation 4342

Semiconducting materials (See also Magnetoelectric effects; Photoconductivity; Photovoltaic effects).
$A^{II}B^{VI}$ tellurides, solid solutions 12083
$A^{III}B^{V}$ cpds., mag. susceptibility 11803
$A^{III}B^{V}$ cpds., thermal stability, growth, structure, melt study 13465
$A^{III}B^{V}$ cpds., valency zone parameters, equiv. orbits method 11553
absorption constants, i.r. 1734
capture cross-section ratio meas., at recomb. centres 6091
carrier distribution and potential charge, for arbitrary surface distrib. of minority carriers 6087
carrier mobility measurement, magneto-electric field effects 20883
carrier recombination after high excitation 4337
contact electrification 13643
crystallographic orientation meas. 705
diffusion length, photomag. meas., effect of specimen geometry 15906
electrolyte–n-type semiconductor contact 6101
electrophotographic layers, photocond. props. 11728
etching damage by ion bombardment 21172 [13589
excess carrier decay times meas., X-ray pulse study
extrinsic, surface elec. props., effect on reaction of xanthate with galena 15953
filament, photoconductive decay, influence of transverse modes 7954
four-point measurements, specimens shape and cond. variations depend. 7045
free-carrier lifetimes meas., from i.r. absorption relaxation times 4326
Group III–V cpds., free carrier absorption due to polar modes 18010
Group III–V cpds., properties 20923
Group III–V cpds., {111} surfaces, props. 11996
Group V sulphides, sp. ht. and entropy 13491
Hall effect and conductivity meas., a.c. apparatus 2854
Hall effect, measurement, in pulsed mag. field 7044
with high impurity conc., elec. cond. 7920
high resistance, cryostat for elec. props. 5241
homogeneous growth of single crystals 12005
infrared properties 18015

Semiconducting materials – contd [13585
injected holes and electrons, number of, determination
inorganic and organic, effect of light on contact potential
lifetime decay waveshapes 7922 [1626
measurements on, resistance and thermo e.m.f., 20 c/s - 20 kc/s, apparatus 19586
minority carrier diffusion, in mag. field 15905
minority carrier lifetime, photomag. meas., theory 15981
n–type, parameters, dependence of dope concentration
organic complexes, resistivities of 30 cpds. 15969 [4327
organic, dark elec. cond. and long-wave absorption, singlet excitation state 13619
oxidation, impurity redistrib. and junction formation 15936
p–n transitions, Hall effect 4336
photo-emitters, various, comparison 19719 [2866
photo-piezoelectric effect, due to inhomog. pressure distrib.
photovoltaic effect at high voltages, in solar energy converters 2212
purification and analysis of Ga, Ge, In, Si 2065
resistivity meas., 4-electrode probe method, with Hg contacts 3707
slices, dice and island production with u.s. drill 14362
solid solutions, thermal conductivity 15819
study, using vacuum microbalance 11681
surface layer carrier mobility and density 13587
synthesis, using vibrational mixing 7953
ternary compounds, predicting props. 11680
ternary systems, mag. susceptibility formulae 16128
thermal diffusivity, meas. by Angstrom's method 19468
thermoelectric power meas., rapid method 18075
thin films, electrical props. 9953
22 elements and compounds, specific heat 1557
alkali, antimonides, properties 20927-8
alloys 20891
anthracene, carrier prod. and mobility 13620
ceramics, single-phase, excitation processes 11590
chalcogenides, complex, of As, vitrification 13610
chalcogenide glasses of Te, As and Sb, optical props. 13609
chalcopyrite, elec. props. 7938
diamond, crystal potl. and energy bands, self-consistent calc. 1629
diamond, heat treatment, elec. resistivity changes 4357
diamonds, i.r. absorption between 450-600°K 16068
diamonds, natural and X-irrad., temp. depend. 15951
diamonds, p-type, warped valence band and magnetoelec. effects 6116
"Electrofax" 4387-8
gallium arsenoselenides, elec. cond. at high temps. 15955
glasses, elec. cond., interatomic elec. field 578
glassy, conduction 15902
glassy semiconductors, photoconductivity 15902-3
n–indium phosphide low-field breakdown 1673
iron oxide ceramics, granular structure 4363
mesonaphthodianthrene and mesonaphthodianthrone 18056
metal oxide films, semiconducting and electrochemical behaviour 21282
oxide glasses, elec. props 15942
β-phenylenediamine-chloranil complex 13621
poly copper phthalocyanine 4358 [4351
rare earth selenides and tellurides, electrical properties
rutile (TiO_2) piezoresistivity 7949
sulphate phosphors 20887
transition metal cpds., criterion of semiconductivity 1625
transition metal semiconducting cpds., crystal chemistry
tungsten carbide, "hot" electron emission 9066 [13932
Ag halides, electronic conductivity 20871
AgBr, Hall mobility of holes in photographic process 6955
$AgFeTe_2$ 15961 [9951
AgI thin films, absolute absorption coeff., thickness depend.
$(Ag_{x/2}Pb_{1-x})Bi_{x/2})Te$, thermal and elec. cond. 4646
Ag_2S, Brillouin zone, chemical bonds and conduction mechanism 13605 [7946
Ag_2S relation btwn. crystal structure and electronic props.
$AgSbTe_2$ 11680
$AgSbTe_2$–PbTe 2902
Ag_2Se, Brillouin zone, chemical bonds and conduction mechanism 13605 [7946
Ag_2Se relation btwn. crystal structure and electronic props.
α-Ag_2Te, galvano- and thermomagnetic effects 20922
AlAs, properties 20923
AlP, properties 20923
AlSb 4598

Semiconducting materials — contd
AlSb, n-type, props. from i.r. absorption 6184
AlSb, n-type, Te and Se doped, 80-1200°K 598
AlSb, properties 20923
AlSb—GaSb alloys 12079 [6381
AlSb—GaSb system, hardness, energy gaps, X-ray data
Al—Se, elec. cond., temp. depend. 1657
As_2O_3 sp. ht., structural prop. correl. 13490 [12062
As_2Se_3—As_2Te_3 system, props. of vitreous semiconductors
As_2SeTe_2, effect of impurities on conduction 15944
$B_4C.2SiC$, non-linear properties 9972
BN, cubic, crystal potential and energy bands, calc. 4354
BP, properties 9971
B—P alloys, elec. resistivity 4355
B_2SiC, non-linear properties 9972
Bi binary alloys, carrier mobility and conc. 1659
Bi telluride, single crystal, thermal diffusivity 19468
Bi_2S_3, carrier mobility and scattering 6089
Bi_2S_3 sp. ht., structural prop. correl. 13490
Bi—Sb—Te alloys 2915
Bi_2Se_3 and Bi_2Se_3—Se, high temp. props. 13606
Bi_2Se_3, carrier mobility and scattering 6089
Bi_2Se_3 system, differential thermal analysis 12081
Bi—Te solid solns., props. 4352
Bi_2Te_3 2915
Bi_2Te_3, anisotropic Cu diffusion 11643
Bi_2Te_3, carrier mobility and scattering 6089
Bi_2Te_3, donor and acceptor states 13607
Bi_2Te_3, elec. props. and spec. heat 8858
Bi_2Te_3, energy spectrum of holes 7936
Bi_2Te_3, opt. and elec. props 4353
Bi_2Te_3, prediction rules of semiconductivity 11682
Bi_2Te_3 system, differential thermal analysis 12081
Bi_2Te_3—Bi_2S_3 6387
Bi_2Te_3—Bi_2S_3, carrier scattering 2890
Bi_2Te_3—Bi_2Se_3, carrier scattering 2890
Bi_2Te_3—Bi_2Se_3, elec. cond. and thermo-e.m.f., ageing effects 2889
Bi_2Te_3—Sb_2Te_3, carrier scattering 2890
CSi, surface energy 13467
Cd telluride, surface layer investigation 7937
$CdAs_2$, cyclotron resonance 1571
Cd_3As_2, Hall mobility 36 000 cm^2/volt-sec 603
$CdIn_2Se_4$ 18026
$CdIn_2Se_4$, electron band symmetry 2891
$CdIn_2Se_4$ -type, energy-band structure 15947
CdO, elec. and optical props. 11752
CdS, barrier-free contacts of Al 6117
CdS crystals, deuteron bombardment effects 1662
CdS, current noise due to ohmic contacts 13608
CdS, electronic processes 20914
CdS, field effect in illum. monocrystals 6118
CdS films, electron irrad., electrical cond. 605
CdS, γ-ray induced elec. cond. 15983
CdS, i.r. quenching effects 1768
CdS, I—V curves, for static and pulsed voltages 18088
CdS, impurity photocond., 2-4 μ, mechanism 15985
CdS, effect of light on contact potential 1626
CdS, mixed ambipolar and exciton diffusion 13525
CdS plate crystals, optico-mechanical effects 1715
CdS, polycrystalline, photodielectric props. 20953
CdS, reflection spectrum 6185
CdS single crystals, elec. cond. process 1664-6 [2910
CdS single crystals, i.r. quenching of photoconductivity
CdS, space-charge limited currents, effect of glow discharge and γ-irrad. 18038
CdS, space charge oscillations 6086
CdS, thermally-stimulated conduction 11674
CdS—CdTe 621
CdS:Cu, hole conduction 4356
CdS:Ga:Cu, hole ionization energy of imperfections, rel. to impurity conc. 1663
CdS, O impurity position in lattice, rel. to semi-insulation props. 18041
CdSb monocrystals, Hall const. 15946
CdSb, temp. depend. 1660
CdSb:In, temp. depend. 1660
CdSe, elec. field effects, temp. depend. 1661
CdSe films, electron irrad., electrical cond. 605
CdSe, growth at Cd—Se contact 602
CdSe + Ag single crystals, minority carrier lifetime 7958
CdSe—In_2Se_3 ordered solid solutions 18036

Semiconducting materials — contd [13589
CdTe, excess carrier decay times, X-ray pulse study
CdTe films, conductivity and photoelec. props. 15986
CdTe, phase equilibria and semiconducting properties
CoAsSe, magnetism and electrical conductivity 7934 [2893
CoO—NiO—O_2 elec. props. 15950
CoPS, magnetism and electrical conductivity 7934
$CoSb_3$, doping effects 607
$CoSb_3$, elec. and thermoelec. props. 10006
CoSbS, magnetism and electrical conductivity 7934
CoV_2O_4—Co_2VO_4, elec. cond., temp. depend. 4366
CrSb, criterion of semiconductivity 1625
CsSb and Cs_3Sb, elec., optical and photoelec. props. 11709
CuO, work function, effect of oxide additions 11710
Cu_2O, conductivity depend. on O_2 press. 1668
Cu_2O, exo-electron emission 1142
Cu_2O, films, absorption spectrum 20982
Cu_2O, large area single crystals, growth 10284
Cu_2O layers, field effect and variation with oxygen press. and temp. 7939
Cu_2O, photocond. rel. to semicond. props. 6138
Cu_2O, polaron mass 7940
Cu_2O, polaron-produced absorption spectrum 644
Cu_2O, visible light absorption, temp. depend. 643
Cu_2O, Cu^+ mobility, from electroluminescence 1766
$FeAs_2$, magnetism and electrical conductivity 7934
FeAsS, magnetism and electrical conductivity 7934
FeAsSe, magnetism and electrical conductivity 7934
Fe_3O_4, structure, electron diffraction study 18344
FeP_2, magnetism and electrical conductivity 7934
FePS, magnetism and electrical conductivity 7934
$FeSb_2$, magnetism and electrical conductivity 7934
$FeSe_2$, magnetism and electrical conductivity 7934
Ga, purification and analysis 2065
GaAs, conduction pulses by γ-ray bombard. 17287
GaAs, effect of As pressure on Ge doping 20915
GaAs, effects of Cu precipitation 18039 [7872
GaAs, Faraday effect, determ. of effective electron mass
GaAs, heat treatment 13611
GaAs, high temp. Hall coeff. 9973
GaAs, magnetoresistance and Hall effect, anomalous behaviour 18046
GaAs, n-type, magnetoresistance 6121
GaAs, n-type, Nernst—Ettingshausen effect 608
GaAs, n-type, thermal conversion to p-type 18040
GaAs, O impurity position in lattice, rel. to semi-insulator props. 18041
GaAs, p-type, props., prep. by Cu diffusion 11711
GaAs, photoelectron analysis 6139
GaAs, properties 20923
GaAs, strongly degenerate, elec. cond. and Hall effect, carrier scatt. 13612
GaAs, surface energy 13467 [11712
GaAs—Ga_2Se_3 system, elec. cond. and carrier parameters
GaAs:Se, thermoelec. power, 25-150°C 18075
GaN, recombination and fluorescence 1751
GaP, carrier density and hole mobility 11713
GaP, free carrier absorption due to polar modes 18010
GaP, n-type, 1-4 μ absorption band 16055
GaP, properties 20923
GaSb, conduction band study 2894
GaSb, current carriers, effective mass, and var. elec. props., 200-400°K 6119
GaSb, at m.p. and liquid state, thermoelec. props. 624
GaSb, piezoresistance, pressure depend., n-type 9977
GaSb, properties 20923
GaSb, surface energy 13467
GaSb, thermomag. properties, 150-950°K 15954
GaSb, −190 to +600°C 623
GaSb—InSb alloys, energy gap from i.r. transmission 6120
GaSb, with In, Sb, Se, Te diffusion impurities, effects −120° to + 680°C 4359
GaSe, props., rel. to photocond. 1681
Ga_2Se_3, thermal cond. temp. depend. 545
Ge, see below
Ge—Si alloys, electron and hole mobilities, intrinsic carrier conc. 18022
Ge—Si, thermodynamic props. 4685
$HgIn_2Te_4$ energy gap, properties 565
In, purification and analysis 2065
InAs, electron irradiation effects on carrier conc. 1671
InAs, Hall-effect probes for mag. field meas. 6123

Semiconducting materials — contd
- InAs, heat treatment effects 13613
- InAs, i.r. Faraday rotation, rel. to carrier mass 20919
- InAs, mag. susceptibility of electrons 4469
- InAs, p-type, Hall effect 4336
- InAs, properties 20923
- InAs, surface energy 13467
- InAs, thermal cond. at high temps. 20757
- InAs, thermomag. Nernst-Ettingshausen effects 6124
- $InAs_yP_{1-y}$, electron mobility 11716
- $In(As_yP_{1-y})$, optical and semicond. props. 1717
- (In,Ga)As 2897
- InP, electron effective mass, in n-type, by i.r. Faraday effect 18049
- InP, free carrier absorption due to polar modes 18010
- InP, i.r. Faraday rotation, rel. to carrier mass 20919
- InP, n-type, piezoresistance at 77 and 300°K 4362
- InP, p-type, elec. props. 7942
- InP, properties 20923
- In_2S_3, photoconductivity 7961
- In_2S_3, prep. and elec. conductivity 2898

electron mobility, field depend., in n-type theory 20901
electron-voltaic effect, atomic battery 7065 [6113
energy barrier betw. surface states and bulk of crystal Ettingshausen effect, calc. 18012
excess carrier decay times, X-ray pulse study 13589
exciton contribution to photoconductivity 6112 [18119
exciton and magneto-optical effect, rel. to strain, at 77°K
excitons, [111] direct transition exciton, predicted observation by magneto-reflection 13527
fast surface states, effect of chem. etches 13601
fast surface states, topography, by pulsed-field method 1639
field dependence, interelectron collision, hot electron temp. 6092
field effect and photocond., temp. depend., other surface states 18021
field emission 7928
filaments, conductivity, in high d.c. fields 13598
filaments, research 20905
films, elec. props. 588
films, polycrystalline, elec. cond. and noise 15921
films, vapour-grown on GaAs 18026
free carrier polarizability, temp. depend., 2 - 20 μ reflectivity data 18026
gas adsorption by monocrystals, mass-spectrometrical investigation 4750
growth of 5 kg single crystals 4593
growth, striations in contact with metals 16260
Hall effect, longitudinal, for n-type, theory and exp. 4333
Hall effect and magnetoresistance 9960
heat capacity, vibrational frequency spectra 15812
heavy and light holes, relative conc. 1628
high electron field effects 20893
high pressure effects on hot electron phenomena, at 297°K in n-type 11689
hole energy spectrum, effect of deformation 11694
"hot" electron anisotropy, under high elec. fields, temp. depend. 20904
"hot" electron emission 9066 [15935
impurity conduction, n-type, at 1.9°K, effect of sheer strain impurities 20830
impurity band theory 6095
impurity concentration, meas. using scatt. data 9963
impurity conduction and magnetoresistance, n-type, at 2.5°K
impurity conduction in neutron-irrad. [15934
transmutation-doped p-type, 1.2 - 300°K 13595 [6090
impurity mobilities, electron scattering cross-sections
influence of degeneracy on recombination radiation 2879
interaction of holes with phonons 2873
intervalley noise 11676
i.r. absorption, due to minority carriers 1733
lattice scattering mobility, transition of temp. depend. 9957
long-wave irrad., 2-4°K, anomalous props. 20898
mag. susceptibility of electrons 4469
mag. susceptibility, p-type, rel. to extrinsic carrier density, 1.3-300°K 18168
magnetism of interacting donors, calc. 6215
magnetoresistance, oscills. at 20°K 2881
magnetoresistance rel. to mag. induction, highly doped samples 13599
magnetoresistivity 20907
minority carrier lifetime 18018
minority carrier lifetime, external elec. field effects 15924
minority carrier lifetime, from noise meas. 9962
mixed oxides, Seebeck coeff. 2914
monocrystals, surface elec. cond. 15929
monoenergetic neutron irradiation, effect of 6109
Mott exciton, binding and decay 20778
n-type alloyed with Cu or Ni, carrier lifetime 20896
n-type, anisotropy of galvanomagnetic effect 13816
n-type, controlled diffusion process for In 15933
n-type, hole capture cross-section by γ-ray produced defects 15875
n-type, neutron irrad., drift mobility 18017
n-type, non-ohmic current, temp. dependence 11688
n-type, Sb doped, press. depend. of Hall effect 584
n-type, transitory elec. props. after neutron pulse 13597
n and p-type, thermal cond., 80-440°K 15930
n—p—n structures, double diffusion production 13622
Nernst effect, methods of measuring 4328

Semiconducting materials — contd
germanium — contd
Nernst effect, phonon part, mag. field depend. 15823
neutron bombarded, in-pile Hall coeff. meas. 18016 [15925
neutron-irradiated, defect creation, effect on recombination
noise measurement, near collision ionization, 5-10°K 11684
1/f noise, rel. to crystal imperfections 1595
oscillations with applied pulsed electric field 18027
oxidation of heat treated (111) surfaces 3189 [587
p-type, deformed, energy spectrum and elect. props., theory
p—type, elec. props., influence of deformation 13596
p-type, energy spectrum of holes 15952
p-type, Hall effect and elec. cond., press. depend. 585
p-type, hole-mobility variation in strong electric field 15932
p-type, surface electron states, energy distrib. 15926
p—n junctions, photoemission, field induced and hot-electron emission 17030
p—n junctions, recomb., and generation phenomena 7924
p—n junction, V—A characteristics 20899
p—n and l—h junction location 7919 [11724
photo-emission, with Ba oxide layer, V—I characteristics
photo-emission, crystalline and amorphous states, with Ba oxide film 11725
photomagnetic effect, anisotropic 7926
photomagnetism anomaly, origin 7929
photomagnetoelectric effect 20889
piezoresistance, pressure depend., p-type 9977
plastic deformation, linear dislocation effects 18020
plastic yielding delay time 2876
point contact junction effective area 2883
purification and analysis 2065 [20984
radiative recombination, electron irrad., i.r. emission
radiative surface effect 1642
recombination centres, prod. by neutron irrad. 6110
recombination constants from photoconducting spectrum
recombination of excess carriers 591 [13634
recombination, at Ni, absolute capture cross-section 11691
recombination relaxation effects in surfaces 4345
relation between etch time and orientation accuracy 3186
relaxation characteristics of photo-elements 6133
relaxation processes in a transverse field 6094
Seebeck coeff., effects of strain 1643, 11735
single crystals, examination with i.r. polariscope 180
single crystal, vapour deposited 11693
slow traps distrib., in relaxation time, electron irrad. effects 7931
solar battery use 5265
solid solns., excess entropy 1641
solubility of Al and Ga 12080
surface-barrier counters 12725
surface breakdown anisotropy, in high elec. fields 15931
surface cond., effect of etchant impurities 9959
surface cond., p-type, and field-induced surface cond., of cleaned surface 2878
surface-dependent 1/f noise 11683
surface elec. properties, external elec. field effects 15923-4
surface energy 13467
surface investigation by magnetoconcentration effect 2861
surface props., cleaned surfaces 4344
surface recomb. centres 2874
surface recomb. centres, capture cross-sections and energy levels 1638
surface recomb. rate meas. 18003 [1627
surface recomb. rate meas., using photomagnetoelec. effect
surface recombination vel., by γ - irrad. 4342 [11685
surface traps, excess noise, field-effect freq. depend.
temp. dependence of l.f. conductivity fluctuations 7925
thermal cond., 40-425°C, electron and phonon contrib.
thermal stability, growth, structure, melt [20756
study 13465
thermoelectricity, volume gradient Thomson effect 11732
transistor with base of dispersed colloidal phase Sn 9979
transistors and photodiodes as radiation detectors 17156
transmutation-doped p-type, by neutron-irrad., impurity conduction 13595
valence band structure in external mag. field, theory 9883
vapour-grown, incorporation of As 17967 [17966
vapour-grown, incorporation of I, radioactive tracer study
volume-gradient e.m.f., in presence of current 11690
warm electrons, variational treatment 18009
water molecule absorption on etching 7927
wetting and alloying with In and In alloys 14066

Semiconducting materials — contd
germanium — contd
zone-levelled in oxygen atmosphere, props. 11692
Ag and Au impurity levels 6107
As and Sb diffusion, p—n junction study 2829
Au-doped, carrier lifetime 6140
Be-doped, doubly ionized acceptor, recomb. props. 15927
Cu-doped, electron trapping coeff. temp. dependence 6106
Cu-doped, recombination cross-sections 4330
Cu mobility in, 500-680°C 2872
Cu production of recombination centres, determination of physical parameters 13592
with Fe, Ni, Co, annealing effects on equilib. and non-equilib. carriers 15863
Ga-doped, alloying to As-doped Si 4347
In doped, impurity conduction 20902
Ni removal 12231
Sb-doped, as i.r. detector 18015
Sb-doped valley orbit splitting, elec. cond. change under tension and compression 20903
silicon
absorption of light by impurities, variational calc. 13685
Auger effect in the deep traps 13591
Auger electron ejection by inert-gas ions 13600
Brillouin zone energies, repulsive potential method 2777
carrier lifetime meas. 1645
carrier lifetime temp. dependence 593
carrier mobility, field depend. 4346
carrier mobility temp. variation 4335
carrier recombination after high excitation 4337
carriers, low-level lifetime and conductivity mobility 2885
charge-carrier diffusion length 9965
collision ionization, field-dependence of conductivity 18033
crystal potential and energy bands, self-consistent calc. defect electrons, mag. susceptibility 2979 [9970
dielec. props., freq. and temp. depend. 627
diffused junction depletion layer calculations 11696
donor spin—lattice relaxation and g-factor 11612-13
doped, low-temp. Hall coeff., conductivity 11697 [11701
effect of γ - irradiation of n-type oxygen-doped material
electrical conductivity at microwave frequencies 2852
electrical properties, effect of heat treatment 20910
electrochemical props. of Si solutions in HF 10353
electron bombardment, conductivity depend. 18030
electron capture by a lattice vacancy 4350 [1653-4
electron mobility, ionized-impurity scattering, 30-100°K
electron-voltaic effect, atomic battery 7065 [6113
energy barrier betw. surface states and bulk of crystal
epitaxial growth 18326-7
Ettingshausen effect, calc. 18012
exciton contribution to photoconductivity 6112
field effect, long-term variations due to H_2O vapour 15939
field electron emission, rel. to V—I characteristics 1145
free carrier polarizability, temp. depend., 2-20 μ reflectivity data 18028
galvanomagnetic effects in n-type 9969
gas adsorption by monocrystals, mass-spectrometrical investigation 4750
Hall effect and conductivity meas., in pure state 11698
Hall effect, mag. field depend. 1647
heat capacity, vibrational frequency spectra 15812
high electron field effects 20893
high purity, electrical properties 4349
hole energy spectrum, effect of deformation 11694 [592
"hot" electrons and carrier multiplication at low temps.
impact ionization of impurities at low temps. 4348 [9968
impurity conduction, n-type doped with P and B, at low temp.
impurity mobilities, electron scattering cross-sections
i.r. absorption, by free charge carriers 16071 [6090
i.r. birefringence studies, plastic deformation and work damage 1723
junction diodes 20912
lifetime meas., photocurrent modulation method 2888
mag. susceptibility of electrons 4469
magnetic field, local, at impurity Fe^{57} nuclei, using Mössbauer effect 11826
magnetism of interacting donors, calc. 6215
magnetoresistivity 20907 [11700
minority carrier lifetime, after diffusion in BCl_3 and N_2
mobility, impurity effects, temp. depend. 1652
n-type, i.r. absorption, by electron scattering 18129
n—type, surface energy levels 15938

Semiconducting materials — contd
silicon — contd
n-type, surface recomb. and capacitor photo e.m.f. 594

carrier lifetime and mobility, u.h.f. meas. 4331
carrier recombination, at large trap concentration 574
carrier steady-state distribution function 17905 [13586
carrier transport and photoconductivity with trapping, theory
carriers, nonequilibrium retardation times 20885
cascade capture of electrons 15917
cavity packing with hard Ga alloys, elec. props. 14360
charge carrier behaviour, in high elec. fields 13588
chemisorption, "real" surface, electronic theory 1634
conduction centres, four-point resistivity probe 2856
conduction electrons, 2-phonon scatt., Weisskopf–Wigner theory 528
conduction mechanism, thermally stimulated 11674
Conference (Garmisch, 1956) 4324
contacts with metals, nature of current flow 582
correlation energy of electrons, theory 2867 [15864
covalent, impurity centres, ionization energy, temp. depend.
crystal potential and energy bands, calc. 4354
crystal potl. and energy bands, self-consistent calc. 1629
current carrier scattering on impurity centres 6088
cyclotron resonance 537, 6093 [11596
cyclotron resonance, in crossed elec. and mag. fields
cyclotron resonance, use for microwave generation amplifcn. 2437
depletion-layer photoeffects 1682
diamagnetic susceptibility, theory, temp. depend. 18157
diamond-type crystals, hole band, many electron theory
diamond-type, energy spectrum of holes 11597 [2858

Semiconductors – contd
diffusion attenuation of space charges 542-3 [2857
diffusion const. and length of excess charge carriers, meas.
diffusion limited field instabilities 4325
dislocation acceptors, occupation statistics 18005
with dispersed colloidal phase, optical absorption by free carriers 7995
donor–acceptor pair energy levels 11602 [541
drift mobility meas. theory, diffusion and recomb. controls
dye–semiconductor interface, photo-effect sensitization
effective mass determination, Fermi liquid [6131
theory 575
elec. breakdown, theory 15910
elec. conductivity at microwave frequencies 2852
elec. conductivity, statistical theory 571
elec. conductivity and thermionic emission 15901
elec. and galvanomagnetic meas., effect of random inhomogeneities 17982
elec. resistivity and thermoelec. power, below and above melting pt. 7909
electron effective mass, relation to energy gap and spin–orbit splitting 18049
electron gas, nondegenerate, deviations from Ohm's law, variational approach 1624 [13584
electron Hall mobility, effect of electron–electron scatt.
electron-phonon interactions and transport phenomena 6013
electron plasma, in mag. field, oscillations 17009
electron plasmas, theory 2860
electron S-states, in hole field, Schrödinger eqn. 2804
electron velocity distrib., effect of interelectron collisions
energy bands calc., tight-binding method 6027-9 [10903
energy bands symmetry, without spin-orbit interaction
energy levels of conduction electrons in a mag. [1543
field 1548
etched surfaces, electron diffraction exam. 590
Ettingshausen effect, theory 18012
excess carriers, decay, effect of electric field 9956
excess carriers, lifetime 20894
exciton dissociation, by phonons 532 [13629
exciton polarization, by low elec. fields, H-like model
exciton waves, Green's function, soln. 9836
Faraday effect 7923
Faraday effect at i.r. freqs. 13677
ferromagnetic, carrier recomb., spin-wave absorption 577
ferromagnetic, magnetocaloric effect, meas. 2853
field effect 20890
field effect meas. in transverse mag. field 15920
field emission, review 3782
flaw solubility in heavily doped, theory 15916
fluctuations spectra 14526
fluctuations, symposium 20876
free-carrier absorption due to ionized impurities 18011
free-carrier lifetimes, from i.r. absorption relaxation times 4326
glass-like 3263
Hall field relaxation at high frequency 18007
heterogeneous, magnetoresistance asymmetry 9950
h.f. magneto-acoustic resonance 1566
high electron field effects 20893
"hot" electron emission 9066
"hot" electron mobility tensor, integral eqn. 11671
impact ionization, kinetic theory 9958
impact recombination, at deep traps, theory 11672
impurities, ionized, free carrier absorption 18011
impurities, multiply-charged, effects anal. by mass action law 18008
impurity band theory 6095
impurity conduction at low concn. 18013
impurity conduction, theory 11670
impurity type, conduction–impurity transition, statistical theory 11673
inhomogeneous, bulk photo effects 18059
International Conference (1958) 570
ion movement in, theory 11677
ionic, ferro- and antiferromag., many-electron model, kinetic coeff. anomalies 20761
ionization, use of electron Van de Graaff accellerator 19832
i.r. absorption, effective mass of current carriers 18014
lifetimes of free electrons and holes 20892
liquid, electrokinetic effects 6096
luminescence and conductivity induced by field ionization of traps 1740

Semiconductors – contd
mag. susceptibility of interacting donors, calc. 6215
mag. susceptibility, of unionized impurities, disordered Ising lattice 6217
magneto-concentration effect, longitudinal, and hole concentration 1628
magnetoresistance of Ni ferrites 11664 [1632
minority carrier current in linearly graded drift field
minority carrier diffusion, dipole mode, about spherical emitter 1633
minority carrier diffusion, in mag. field 15905
minority carriers lifetime, photocond. and P.E.M. effect, adhesion levels 1680
modes of conduction with low mobility 4334
Mott exciton, binding and decay 20778
movement of free charges, two mechanisms 9952
n-type, nondegenerate impure, drift and Hall mobilities of electrons 20884
n–p junction, ion drift 6103
nearly intrinsic, minority carrier injection and extraction phenomena 2870
noise, transitions between valleys 11676
non-degenerate non-polar, carrier heating, with ion and lattice scatt. 579
non-polar, electron–lattice interaction 9957
non-polar, internal breakdown 15912 [18009
Ohm's law deviations for weak fields, variational treatment
one-electron problem, many-particle approach 1546
optical constants, complete set, theoretical determination
optical properties, in i.r. region, free-electron [10025 theory 6163
oxidation of CO on oxide semiconductors 10345
p–n junction in thermal gradient 15899
parallel photoelectromagnetic effect 1683
paramagnetic resonance, forbidden transitions, energy levels and probabilities 18214 [1682
photoconduction through reverse-biased p–n junction, theory
photoconductivity, effect of surface recomb. 617
photoconductivity, minority carrier lifetime, effect of 18060 trapping levels 18060
photoelec. effect, analysis of spectral sensitivity 6130
photomagnetic effect 15981
photomagnetic e.m.f., edge effect removal 6132
photovoltage at surface 18064
piezoresistive effect and applications 6097
plasma model, recombination processes 2859
polar, elec. cond and Hall effect, with carrier scatt. 580
polar, lattice screening in 2868 [20324
powdered, photoconductivity using photodielectric effect
progress, book of review articles 20877-9
quantized system, in weakly dissipative medium 3459
quantum mechanical model, recombination probability 1741
radiation effects 20850
radiationless transitions, 2 harmonic oscillator wave-func., overlap integral 522 [2864
rate of diffusion-limited annihilation of excess vacancies
recombination, capture cross-sections 4330
recombination coefficients, in Coulomb repulsion field, temp. depend. 15907 [13590-1
recombination processes, by Auger effect, negligible influence
relationship between, energetic, electrophysical and mechanical properties 573
resistivity and Hall const., meas. cit. analysis 19587
Seeback effect 20943 [11682
semiconductivity prediction rules for crystal lattices
semiconductor catalysts, theory 21267 [15898
sheet resistivity meas. using square four-point probe
specific resistance by h.f. method 2855
stability of non-stoichiometric compounds 13516 [576
steady-state electronic processes, characteristic times
surface energy, calc. for diamond and zinc blende structures
surface space-charge calc. 18006 [13467
surface states, theory 2878
surface transport, in space-charge layers, theory 9955
thermal conductivity considered from kinetic theory 8561
thermal diffusivity meas. 11669
thermally stimulated current theory 15896
thermoelectric power, integrals evaluation 1690 [1692
thermoelectric power, in mag. field, phonon relaxation
thermoelectric props., meas. 1688
thermoelectricity, figure of merit, impurity scatt. effect 1689

Semiconductors – contd
thermoelectricity, two-band model, inner elec. field 20942
thermoelement efficiency, effective masses and mobilities 3732
thin films, absolute absorption coeff., thickness depend.
transport phenomena in slightly ionized gases, theory [9951 and applications 8989
transverse magnetoelec. effect, in weak scatt. limit, quantum theory 2842
two-carrier, concn. and mobility of charge carriers 15900
two-carrier space-charge-limited current flow 2863
uniaxial, birefringence, theory 2931
u.s. attenuation in mag. field, calc. 13504
u.s. attenuation in mag. field, Fermi velocity det. by high-field tilt effect, theory 20767
u.s. excited, in mag. field, effect on charge carriers 9851
vacuum boundary, image forces 17077
valence type, conduction at low temp., in high fields 15913
warm electrons, variational treatment 18009
work function and sec. electron emission 2374
Zener tunnelling, in const. field 4332
zone refining, automatic apparatus 16271
Series (See also Fourier series).
Chandrasekhar's method for diffuse scattering problem, convergence 19003
in multi-beam interference, anomalous divergence 2245
Sferics (See Atmospherics).
Shock waves (See also Detonation; Explosions; Supersonic flow).
accelerated flames and detonations 8746
aeroplanes, supersonic level flight prod. 992
applications, in gas mixture explosion studies 14110
attenuation, in solids 8742
bibliographical review 10631
blast waves, in conical tubes 10725
in cavitation, origin, Rayleigh's theory, air content depend. 6860
in cavitation, oscillatory 14598
compression wave intensification, on interaction with flame front 14895
constant strength, propagation, homentropic motion 6861
as continuous wave-function, existence theorems 991
deflagration-to-detonation transition 6999
detection, pressure sensing probes 3583
detonation pressure, by crusher rod compression 10351
detonation front, in exploding O_2–CO_2 mixtures 994
detonation process 103 [14111
dissociation of diatomic molecules behind shock front through ducts of variable cross-section 10726
electrically excited, velocity 7210
electrostatic, in zero-temp. plasma 12620-1
emission of Na_2 bands behind shock fronts 5946
entropy and velocity 2203
examination, by streak interferometry 3642
explosion, elec. cond. in wave-front 7061
Fermi-Dirac gas 8693
flame propagation, in rough tubes prior to detonation 10809
flow, in magnetic annular shock tube 1195
fluids, perfect, shock equations, correction terms 10730
free radicals, flash absorption spectroscopy 17760
gas ionization, in e.m. field, piston problem 3842
gases, real, ideal analogy 12454
gases, with variable sp. ht., parameters behind shock front 8740
in gravitational fields 10590
high-intensity stress pulses, meas. 5086
high-speed, in magnetic annular shock tube 1194
hypersonic, electron and particle densities behind 16775
in hypersonic gun tunnel 4976 [16378
hypervelocity wave phenomena, in condensed explosives
impact point of falling body det. 912
interaction with e.m. field 19911
interaction with flame fronts 12105
ionized fluid, compressible, hydromagnetic wave propagation 11030 [16773
ionosphere, vertically travelliag, due to nuclear explosions
jets, supersonic, gas mixture separation 16726 [19127
liquids, photography of, with compressed A flash source
magnetoacoustic, generated by moving piston, in cond. fluid 1190
magnetohydrodynamic, gas ionization, e.m. frontal waves 1197

Shock waves — contd
magnetohydrodynamic, inclined wave-front wave, velocity nomograph 11033
magnetohydrodynamic, isothermal 15132
magnetohydrodynamic, 1-dimensional relativistic 11028
magnetohydrodynamic, in partially ionized plasma, structure 11034
magnetohydrodynamic, point explosion, in inf. cond. gas 2432
magnetohydrodynamic, proofs of four basic props. 15133
magnetohydrodynamic, unstable, multi-wave disintegration
metals, wave and material velocities 6010 [9177
one-dimensional detonations, anal. 14109
origin at "weak" interfaces between media 5084
periodic, in resonating gas columns 14730
physical equivalents of spectral notions 5102
plasma, Chew–Goldberger–Low approx. 9163
plasma, diffusion effects 10905
plasma, radio emission 10480
plasma collisions 12605
plastic media 993, 12452
pressure meas., $BaTiO_3$ gauges, design and characteristics 16665
propagation, calc. method 19278
propagation, into earth 19280
propagation, to earth from falling body 57
propagation, due to point detonation 6863
propagation, in solids, theory 12453
radiative processes 10728
reflected-shock technique for fast chem. reactions 16377
reflection, at 2-media interface, oblique incidence 8743
reflection and refraction 986, 6872
refraction, at gas interface 12456
relativistic, strong, density compression ratio 16771
relativistic theory 19277
review 2202
semi-infinite elastic solid, stress field produced by bomb blast at surface 19279
shock front thickness meas. 16774
shock tube, ionization causing resistance-gauge shorting 2274
solids, initiated by high explosives or impacts 14729
from spark-channel expansion 5285
from spark channels, in liquids 15002
spectroscopic investigation of gas behind wave 19212-3
spectroscopic temp. meas., in shock tube 12455
sphere in hypersonic flow, shock layer about stagnation region, viscous flow 14671
spherical $BaTiO_3$ pressure transducer, for meas. in air 130
spherical blast, in free space, similarity soln. 2204
stable and transient, in solid cast explosives 3584
stationary detonation zones, in toroidal tubes 6398
in stationary magnetogas flows, 1-dimens. and quasi-1 dimens. 19913
stellar chromosphere heating 18858
in stellar envelopes 18856
structure, Boltzmann equation 16770
structure, bimodal model 10729
structure, low-intensity waves, in relativistic hydrodynamics 10732
structure, plane, steady in H plasma 17021
subsonic flow, with normal shock wave at near-critical Mach number 19185
in supernovae, cosmic-ray production 17437
temp. meas., by spectrum-line reversal 8744, 14732
temp. behind wave 973
temp. meas., behind wave, using Na D-lines 10727
tube narrowing and grid effects, 1-dimens. theory 5085
wave-fronts in mag. field, effect of elec. cond. anisotropy 9178
at wedge, shock-front attachment conditions 9179
air, detonations 12457
air, pressure distrib. in sand-packed tube 10686
air, u.v. absorption behind wave 19211
atmosphere, due to nuclear explosions 4770
hexogene crystals, velocities and effects 16776
hydroxyl radicals, kinetics 6408
marble, transmitted from aluminium 3585
nitromethane, velocities and effects 16776
trotyl, cast, velocities and effects 16776
A, electron diffusion 14731
Shock waves — contd
A, Hβ line profile behind wave 15659
A, liquid, shock Hugoniots 8653
A, shock front thickness 16774
D, moving magnetic field behind shock front 1196
N_2, temp. 14732
N_2 and air, temperature behind front 102
NaCl 20730
O_2, temp. 14732
effects
diatomic gases, translat.–vibr. energy transfer 6832
elec. cond. dielectrics 6073
gases, physical study, review 3564
heating and melting, of solid walls 6864
heating, use in possible controlled fusion devices 9724
plasma dynamics, in l.p. discharges in H and air 16978
stellar atmospheres, cooling behind wave-front 18978
surface deformation propagation, in shock-excited body 19258
air, dissociation, calc. of reaction profiles 1957
air, electrical conductivity 5055
steel plates, cratering at high impact speeds 8741
silica, vitreous, crystallization 3259
CO_2, vibrational relaxation and dissociation 5893
Cr I, excitation in $Ne–Cr(CO)_6$ 484
H plasma, temp. and density 19689
He, 5876 A emission, anomalous precursor 483
He plasma, temp. and density 19689
I_2, diatomic bond destruction 15767
S, transition to metallic state by fusion 15806
Xe_2, u.v. and visible emission 15728-9
Shot noise (See Fluctuations, electrical).
Showers (See Cosmic rays, showers and bursts).
Silicon (See also Semiconducting devices; Semiconducting materials).
absorption spectra, 50-2500 μ 10035
adsorption on, O_2 12116
α-particle range, 4.5 MeV 9446
bremsstrahlung enhancement by single crystal on passing 575 MeV electrons 11137
bremsstrahlung prod. at 1 GeV, orientation effect 12899
capacitance and barrier layer, in contact with electrolyte
crystal growth 12006 [13649
crystal growth, high purity, floating-zone method 16268
crystal potential and energy bands, self-consistent calc. 9970
crystals, containing Al, precipitation 20826
crystals, liquid–solid interface shape 6326
cyclotron resonance 6037, 7875
defects, produced by neutron irrad., size of damaged regions 2835
diffusion of B, 950-1375°C 6058
diffusion of Li 4302
diffusion of Li, at high temp., Li isotope effect 13560
diffusion of Li, 25-125°C, by ion drift in n–p junction 13561
diffusion of O_2, donor production 1601
dislocations, curved and festoon formation 13537
dislocations, formed by vacancy disk collapse 20814
dislocations, study by etching 1580
dislocations, X-ray diffrac. topography 1587
electrochem. props. Si solutions in HF 10353
electron absorption and range, 8-20 keV 15082
electron beam penetration 19765-7
electron density, anisotropy, X-ray study 16309
electron emission, effect of treatment in Cs vapour 19716
electron irrad., lattice damage, directional distrib. 1608
electron-nuclear double resonance of Fe^{57} and Au^{197} in, mag. moments det. 7458-9
electron pair prod. in, by 1 GeV γ-rays, orientation depend. 7340
electron spin–lattice relaxation, in P-doped Si 4512
electronic complex 9890
energy barrier, betw. surface states and bulk of crystal 6113
etching, by A ion bombard. 1898
etching, chemically, mechanism 18330
etching, damage by ion bombardment 21172
etching, with $HF–HNO_3–HC_2H_3O_2$ 4600
etching, jet method 6340
exciton energy levels 11607 [8284
films, evaporation deposited, by electron beam heating

Silicon – contd
impurity spin relaxation, via conduction electrons 10241
i.r. absorption, effect of O on fine structure 20986
i.r. birefringence, plastic deformation and work damage 1723 [17679
isotopic analysis, by solid-source mass-spectrometry
lattice parameters, X-ray study, absorption correction 1919 [9957
lattice scattering mobility, transition of temp. depend.
lattice vibrations, group theory study 20737
Li^+ drift in, effect of Li–B ion pairing 15940
light absorption, by impurities, theory 6175, 13685
liquidus curves 19119
mag. susceptibility of electrons and donors in n-types 3-300°K 10099
melting, acquisition of metallic props. 11552
in Ne elec. discharge, cathode fall 19633
optical consts., 1.10 eV 18116
as optical material, for i.r. 14809
optical films, structure and reflecting power 19423, 20975
phonon broadening of impurity lines 11756
photocell surfaces, reduction of reflectivity by SiO_2 layer 10031
photoelasticity coeff. 7996
photoelements, energy diagrams 9997
photoemission, from p–n junction, induced by internal elec. field 12627
polishing and surface props. 8139
precipitation, from Si–Al solid solution 16350
prep., impurity segregation and distrib. 13944
prep. of pure Si from silane 819
refractive index, near absorption edge, calc. 11668
refractive index, 109-750°K, 1.1-1.8 μ 16032
resistivity, microwave, of doped spheres 5243
Si^{29}, in silicon, dynamic polarization at low temp. 21081
Si I, II, absolute transition probabilities 5887
Si–Al flames, spectrum, energy distrib., colour and brightness temp. 8854
single crystals, mosaic structure 21183 [4628
single crystals, texture, by parallel X-ray beam method
spectrum and term system of Si IV 15564
spin resonance of transition metals in 4514
thermal expansion 2799, 13494
thermal expansion, single crystals, –195° to +100°C 11587
thin layers, electron diffraction study 12039
transition metal impurity ions in, electronic structure 17960
twin structures, etching and fracturing techniques 13965
two-phonon indirect transitions and lattice scattering 9871
u.v. absorption and reflectivity 8004
valence electrons, approx. wave-functions 469
wafers, thickness meas. 6722
whiskers, cleavage type, formation 13964
whiskers, growth from Zn-reduced $SiCl_4$ 3184
whiskers, polished sections, etch figures 18322
X-ray emission spectra, Kβ-bands 20639

Silicon compounds (See also Alloys; Quartz).
crystals and glasses, spectra interpretation 1499
amphiboles, crystal chemistry 8147
celsian (barium felspar), crystal structure 8225
orthosilicates, subst. of Si by Ge, Cr, S, P, As 1905
silane, purification 20908
silica, absorption spectra, 50-2500 μ 10035
silica, clear fused, thermal cond., 300-2100°K 1577
silica, defect structure, nature of bonding 13530
silica, fused, colour centre prod. by X-ray and electron irrad. at 77°K 2834
silica, fused, cone cracks 11986
silica, fused, irradiated, optical absorption 16060
silica, fused, irradiation effects and short-range order 15876
silica, fused, luminescence 1759
silica, fused, radiation-induced coloration 16073
silica, fused and crystalline, structural defects 7877
silica, molten, viscosity and density, temp. depend. 18383
silica, sol mixtures, X-ray scattering 12053 [11580-1
silica, vitreous, Brillouin spectra and lattice props.
silica, vitreous, Hugoniot curve, shock crystallization 3259
silica, vitreous, irradiation effects, by positive ions, surface refractive index changes 13569
silica, vitreous, in suspension, electrokinetic mobilities 4744

Silicon compounds – contd [12532
silica, vitreous, thermal expansion and Grüneisen factor
silica, vitreous and crystalline, radiation changes, gross defects 15877
silica, Young's modulus, –195° to +540°C 13900
silica, ZnS film adhesion, effect of oil vapour contamination 14087
silica gel, colour centres prod. by γ or X-rays 4299
silica gel, crystal growth in 13946
silica gel, effect of γ-rays on adsorption props. 4745
silica gel, paramagnetic studies of radiation damage 21078
silica gel, particle size determination 8330
silica and silicates, structural effects in chemical reactivity 16376
silicates, dielectric props. 13645
silicates, layered, reported departures from ideal structures, criticism 6362
silicates, luminescence efficiency, thin layers 2963
silicone liquid scintillant 5032
silicone oils, refractive index 2230
SiC, coding matrix 6644 [4365
SiC, crystal growth and semicond. props. (conference)

SiC, dislocations 13538
SiC, electroluminescence, current–voltage characteristics 18053
SiC, grown p–n junctions 15960
SiC, insulated crystals, electroluminescence 8024
SiC, international conference 20714
SiC, 174 layers, structure analysis 10314
β-SiC, optical absorption and semicond. energy gap 16062
SiC, optical consts., 2.5-1.6μ 6164
α-SiC, photoelectric props. of alloy p–n junctions 20939
SiC, polarized edge emission 8012-13
SiC, resistors, dynamic V-I characteristics 15886
SiC, whiskers, growth, twist and polytype 1886
SiC, X-ray emission spectra, Kβ-bands 20639
SiF_4, isothermal PV curves, to 20 000 kg/cm² 14042
Si nitride, dielectric films on Mo 4376
Si_2O, SiO, Si_2O_3, X-ray emission 1970
SiO films on Al mirrors, annealing 8783
$SiOC_2H_5{-}Si_2O.(C_2H_5)_2O$, X-ray emission 1970
SiO_2, films, diffusion of P 11642
SiO_2, i.r. absorption, 50-350μ 6927
SiO_2, melting 10321
SiO_2, neutron spectrometer crystal 5572
SiO_2, protective film for resistance temp. gauge 2274
SiO_2, use in interference light-filters 3639-40
SiO_2–Cr_2O_3 catalysts, mag. props. 11805
SiO_2, cristobalite, neutron irrad., α–β inversion temp., structure 15878
SiO_2 windows, construction technique 10335

Silver
abrasion, theory 3164
Ag–Se layers, resistivity and thermoelec. power 7968
Ag–Si contact, with light emission and rectifying props. 20909
atoms, optical transition probabilities 7732
bremsstrahlung circular polariz., in magnetized Ag 7325
chemisorption of H_2 and CO, work function, bond 18452
cohesive energy 20722
cold-worked, dislocation distribution flow stress, and stored energy 20813
cold-worked and annealed, thermoelec. power at low temp. 18081
colloidal, bleaching inside AgCl crystals 9913
condensation energy on glass, NaCl and KBr 4696
counter-tube cathode, spectral yield curve 9229
crystal growth, in H_2S, reaction rate and product growth 16257
crystal growth, simple method 3174
crystal growth, from vapour, condensation coeff. 12003
de Haas–van Alphen effect 16121
deformation, 1.7-473°K 1851
deposition, on C replica of rocksalt, preferential orientation 21171
deposition and dissolution kinetics 4713
diffusion at Ag–AgCd interface, tracer study 1606
diffusion in Cu, effect of Be impurities 4303
diffusion in Cu_2O 11639
diffusion in Ge, in elec. field 15870

Silver – contd
dissolution in emulsion by fixing solutions 194
dislocation structure, cold-worked polycrystalline specimens, annealing processes 20822
electron irrad. effects at 10° K, elec. cond. study 6066
electron pair formation in, cross-section by photon absorption 5534
electron range in, 40-160 keV 2399
equations of state, at high pressure 11549
Fermi surfaces, from u.s. attenuation in mag. field 13502
films, evap., defects, electron microscope study 17927
films, optical props., calc. 8801
films, optical properties, effect of lattice defects 4391
films, with SiO, LiF, Cu_2O, Fe admixtures, disorder, structure and resistance 3283
films, thickness meas. 4979
foil, secondary electron emission, energy distrib. 5342
friction in reciprocating sliding, low values 3165
in Ge, impurity levels 6107
glide, thermally activated, and strain hardening 21114
growth defects, in f.c.c. evap. films 20796
L-shell fluorescent yield 15652
lattice constant, energy, sublim. energy and compressibility, theory 17874
lattice expansions, and Debye temps. 1909
lattice vacancies, energy of formation in pure metal, resistivity effect 13549
lattice vacancies, equilib. conc. near m.pt., from thermal expansion 13548
lifetime, under load 16223
liquid, atomic distribution, structure 19123
liquid, optical const., i.r. meas. 19154
liquid, solubility of Kr in 19120
liquid and solid, thermal expan. 9893
magnetoresistance, anisotropy, Fermi surface 9939
magnetoresistance, rel. to Fermi surface 15893
mass stopping power, to α-rays 19039
membranes, fine-pored, use for isotope separation 18385
nuclei growth, in silver halide micro-crystals 3663
optical consts., calc. 4389
precipitates, in AgCl single crystals 6343
secondary electron emission 5341
self-diffusion 11638
self-diffusion, effect of plastic compressive deform. 2828
self-diffusion, solute effects 20840
self-diffusion coeff., finite sum method 1600
single crystals, surface prep. by evap. 16271 [4311
single crystals, surface structure, after A-ion bombard.
skin effect, i.r. data 6078
slip, effect of surface films of C, Pt, Fe, Cr 21113
solubility, in Ge:Sb, P 16351
specific heat 2791-4, 7850
spectra, vibrational structure 5925
sputtering, cathodic, single and polycrystalline 3815
sputtering, by light ions 10989
stearic acid monolayers on, orientation 10372
stress–strain meas., at various temps. 3144
striation formation, on crystals heated in air 18328
surface free energy, orientation dependence 17865
thermal lattice defects, and energy content 6038
u.v. reflection, effect of angle of incidence 4394-5
vacancies, quenching, elec. cond. increases 17954
vacancies, quenching and movement, thermo-e.m.f. study 17955
vapour, ionization by electron impact 14967
whiskers, growth from AgCl liquid 18320
Xe diffusion, 500-800° C 15868

Silver compounds (See also Alloys).
AgBr, diffusion of Cd 9916
AgBr, dislocations, with ⟨100⟩ Burgers vectors 20816
AgBr, effect of light on paramagnetic resonance 6415
AgBr, electron mobility and scatt. processes at low-temp. 15994 [14861
AgBr, exciton dissociation and latent-image formation
AgBr, generation of surface dislocation loop 20807
AgBr, grain size in photogr. emulsions 12737
AgBr, grains, dark conductivity 1616 [1617
AgBr, grains, from emulsions, photoelectronic carriers
AgBr, Hall mobility of holes 6955
AgBr, replicas for electron microscopy 14092
AgBr, solid, ion and electron conduction 4322
AgBr, surface potential, temp. depend. 20961
AgBr, vacancy motion, heat of transport calc. 13497

Silver compounds – contd
AgBr:Ag_2S, luminescence, pressure depend. 4449
AgCl, A^+ bombard., catalytic activity 4709
AgCl, bleaching of contained colloidal Ag 9913
AgCl, containing Cu chlorides, props. 15847
AgCl, with CuCl traces, photographic processes 19465
AgCl, cyclotron resonance, irradiation effects 1547
AgCl, Dember effect (crystalline photoeffect) 20941
AgCl, dislocations, X-ray diffrac. topography 1587
AgCl, ductile–brittle transitions 21145
AgCl, internal friction 13908 [1848
AgCl, internal friction, plastic deform., temp. depend.
AgCl, normal and deformed monocrystals, luminescence, –180° C 13703
AgCl, reverse bending 21110
AgCl, sensitized crystals at –253° C, photochemical phenomena 10356 [20842
AgCl, single crystals, diffusion of Ag^+, Cl^- and Cd^{++}
AgCl, single crystals, with internal print-out, annealing 6343
AgCl, strength, effect of impurities 21097
AgCl, strength, temp.–time dependence 21135
AgCl, thermoelectric power 20949
Ag complex cyanides, Raman spectra in solns., CN stretching bands 1670
AgF, n.m.r. of Ag^{109} 4528
Ag fulminate, crystal structure 3238
Ag halide films, rapid prep. 14081 [11949
Ag halides, with Ag sulphide, selenide, telluride, e.s.r.
Ag halides, correl. btwn extinction bands and plasma resonance 7876
Ag halides, doped, dipole relaxation 1704
Ag halides, electron conductivity 20871
Ag halides, heat of fusion determination 14901 [16049
Ag halides, impurity anions, absorption band positions
Ag halides, increase of content in nuclear emulsions 12734
Ag halides, irradiation, Ag nuclei growth 3663 [12506
Ag halides, latent image formation by light and electrons
Ag halides, photographic developability 4292
AgI, ice growth on 6335
AgI, photoelectric emission 15055
$AgNO_3$, effect on u.v. absorption 10038
$AgNO_3$, molten, u.s. absorption and vel. 16696
$AgNO_3$–$Ba(NO_3)_2$–$Ca(NO_3)_2$–$Mg(NO_3)_2$, density and electrical conductivity 64 [21091
$AgNO_3$–$NaNO_3$, quadrupole n.m.r., satellites intensity
Ag_2Pd_2S, elec. cond. 18001
Ag_2S, Brillouin zone, chemical bonds and conduction mechanism 13605
Ag_2S, crystal structure and electronic props. 7946
Ag_2S, whiskers, growth 16275
$Ag_2SO_4.4NH_3$, growth and crystal props. 13921
$AgSbTe_2$, anomalous Hall effect 20921
$AgSbTe_2$, semicond. props. 11680
$AgSbTe_2$, structural study 21202
$AgSbTe_2$, thermal conductivity 7860
Ag_2Se, Brillouin zone, chemical bonds and conduction mechanism 13605
Ag_2Se, crystal structure and electronic props. 7946
β-Ag_2Se, ionic conduction, composition depen. 20872
α-Ag_2Te, galvano- and thermomagnetic effects 20922

Sintering
diffusion theory 3167-8
metallic powder compacts, elastic moduli 1841
ice 19508
Bi_2Te_3, variation of thermoelec. power with sintering temp. 7972
Cr–Mo powder mixtures, diffusion and growth 12070
Cu alloys, segregation during sintering 18395
Cu–Ni powder mixtures, diffusion and growth 12070
Mn ferrites, defect formation 11889
NaCl, in presence of inert gas 8463
Ni–W powder mixtures, diffusion and growth 12070
Th, effect of O_2, C and N_2 on properties 10462
UO_2, in H_2 at 1350° C, prep. of fine-grained product 8464
UO_2, review 14056
YFe garnets, with Ne 21057
Zn oxide spheres, in air, O_2, H_2, He 1958

Skin effect
anomalous, rel. to surface impedance of superconductors, calc. 10841
ferromagnetic films, standing spin-wave excitation 21035
metals, polyvalent, anomalous effect, rel. to electronic structure 9888

Skin effect – contd
plasma, in l.p. discharges, in H and air 16978
plasma, relativistic 19678
plasma, 3-component, magneto-acoustic waves 19694
semi-infinite metallic medium, transition region 13576
superconductors, surface impedance in a mag. field 8926
Ag, from i.r. data 6078
Al, anomalous, rel. to band structure 9887-8
Au, from i.r. data 6078
Bi, anomalous, at 2°K and 23.5 kMc/s 1658
Cu, from i.r. data 6078
Ni, from i.r. data 6078
Sn, films, superconducting penetration depth 8931
Sky brightness (See also Airglow; Twilight).
energy distrib. of daylight, from overcast sky 14297
i.r. radiance, distrib. over clear sky 2024
night, interferometric study 16470
polarization during twilight 4804
Sliderules
for interferometric length meas. 6943
nomographic type, direct-reading, for spectral blackbody radiation 14879
for Xe, absorbed radioactivity calc., after power reactor shutdown 9723
Slip
cross slip, dislocation barriers, long jogs 17933
frictional, Bauschinger's effect 21111
interaction between fixed and mobile dislocations, in slip plane 17937
metals, within grains in "flow areas" 6305
α-brass, individual slip lines 16219
α-brass, polygonization 17950
graphite, slip planes, electron diffr. study 10343
rocksalt, plasticity 21127
Ag, single crystals, effect of surface films of C, Pt, Fe, Cr 21113
Ag, thermally activated glide 21114
Al, quenched single-crystal plates, patterns 3152
Al, single crystals, slip patterns 3149
Al, thermally activated glide 21114
Cu, evidence for dislocation reactions 7883
Cu, thermally activated glide 21114
Fe, at 4.2-77°K 8118
Ni alloys, deformed by bending, rel. to twinning 6302
Ni_3Mn 21112
Pt_3Co 21112
U, polycrystals, due to thermal cycling 16254 [13547
Zn, multiple slip, active basal and pyramidal systems
Smokes (See Aerosols).
Snow
charge, current, carried vertically 802
electrical props., 20 c/s-200 kc/s 12131
plane crystals, coalescence 14324
radioactivity, from nuclear weapon tests 5679
Sodium
absorption by glasses 4683
allotropic phase transf., due to plastic deformation 3170
in atmosphere, resonance scattering 16472
in atmosphere, vertical distrib. and height 4802-3
atoms, h.f.s. of $3^2P_{3/2}$ state 7701
atoms, ionized on collision with H_2, D_2, N_2 and O_2 19611
colloidal, in Na azide, due to u.v. irrad. 16063
colloidal, in Na azide, e.s.r. 8083
compressibility calc. 15824
Compton incoherent scatt. functions for Na and Na^+ 8196
deformation, elec. cond., 4.2-195°K 1850 [16215
deformation, at low temp., tensile and resistivity expts.
diffusion and desorption in Pt, thermionic emission study 6061
elastic consts. press. depend. 13904
elec. cond. 15826
elec. resistivity, of two low-temp. phases, 15-50°K 7914
electrokinetic effects, in liquid state 5268
electron energy density, from Fermi gas model 11564
as etchant of sheet glass, surface cracking study 21217
films, condensed on glass 21252
films, effect on Mo work function 9062
films, on Ta, secondary electron emission, A ion bombard. 19728
hyperfine and Zeeman resonances 17694 [10878
ionization, on incandescent W, mass spectrometer study
ions, Na^+, scattering of Mott excitons 6035
Sodium – contd
ions, range in Al 19804
liquid, heat transport properties 3526
liquid, X-ray structure investigation 16692 [18889
luminescent cloud, ejected from space rockets, props.
martensitic transformation, volume change 21188, 21243
in maser, submillimetre range 5395
molecules, Na_2, electronic excited states 17765
n.m.r., electronic structure 4530
nuclear spin–lattice relaxation time, 1.1-4.2°K 3140
optical constants, direct meas. in u.v. 16034
optical props., in far u.v. 18117
partition function, calc. for neutral Na 20551
positron mean life in 9342
re-emitted resonance radiation, influence of interatomic resonance 17713
specific heat, 0.15-2°K 9857-8
specific heat, 20-300°K, martensitic transformation 7851
spectra, D line separation 16871
spin exchange cross-section, and electron spin g-factor ratio 16162
Thomas–Fermi–Dirac eqn., generalized for exchange interaction 13462
twilight abundance, from scattering data 2029
twilight glow excitation 21382
vapour, etching study of glass surface cracks 10274-5
Sodium compounds (See also Alloys).
effect of cpd. on Na line intensities of flame spectra 4174
rock salt, annealed, neutron irrad., mech. props. 18242
rock salt, dislocation damping effects 11973
rock salt, effect of colour centres on dielec. strength 1710
rock salt, effects of mech. and thermal working 8213
rock salt, electron irrad., blue ring formation 9923
rock salt, etch figures and dislocations 13534
rock salt, Faraday effect at 1-9 μ 13677
rock salt, low temperature creep 18255
rock salt, macroscopic surface defects, high temp. healing 17924
rock salt, n.m.r., plastic deformation effects 21086
rock salt, Na and Cl displacement, effect of temp. 14018
rock salt, plastic deformation, initial stages 11979
rock salt, plastically deformed, defects 13546
rock salt, plasticity 21127
rock salt, silver-doped, decoration and etching, by surface gas reactions 16280
rock salt, thermal breakdown 1711
NaAl silicate glasses, elec. cond., Al/Si depend. 11659
Na azide, electron spin resonance of colloidal Na 8083
Na azide, spectra, colour centre formation 8006
Na azide, u.v. irrad., colour centres identified as colloidal Na 16063
NaBr, colloid centres, props. 11634
NaBr, elec. cond. and colour centre 15880
Na borosilicate glass, X-ray scattering 10320
Na carboxymethyl cellulose, in water, γ-irradiation effect 2170
NaCl, Ag-activated, exoelectron emission 3780
NaCl, alkalinity of natural and melt-grown crystals 13943
NaCl, anisotropic surface, under rolling cylinder, resistance 13920
NaCl, breakdown energy 16026
NaCl, brittleness, effect of ambient air 1872
NaCl, cation and anion migration barriers 4306
NaCl, cavity formation on dislocations 11622
NaCl, cleavage surface behaviour, etch pits 3187-8
NaCl, colloids in additively coloured crystals 9911
NaCl, colour centre formation by γ-irradiation 17962
NaCl, coloured, optical and elec. props. 18072
NaCl, compressibility, elec. cond., eqn. of state, 50-800 katm 20730
NaCl, crystal plates, evaporation figures 7891
NaCl, cyclic stressing, electrical effects 7917
NaCl, dielect. strength, −130° to 150°C 1708
NaCl, discharge path in crystal 19632
NaCl, dislocations, Au decorated replica 9899
NaCl, dislocations, X-ray diffrac. topography 1587
NaCl, dispersion, 0.3-3.0 mm wavelength 628
NaCl, ductile–brittle transition 21145
NaCl, ductility 10262
NaCl, ductility and strength 6306
NaCl, effect of sudden pressure on elec. cond. 17993
NaCl, effective Debye temp., vibration frequency spectra 20743

Sodium compounds — contd
NaCl, elastic fatigue, damping decrement dependence on no. of cycles 21119
NaCl, elec. cond. and colour centres 15880
NaCl, electrification by X-irradiation 3714
NaCl, electron density in atoms, Fourier integral method 18351
NaCl, electron spin resonance of F-centres 8087
NaCl, electrostriction coeffs. 11750
NaCl, evaporation, complex-ion formation, ion-molecule reactions 10876
NaCl, exciton structure, LCAO calc. 13524
NaCl, F-band breadth, calc. 13554
NaCl, F-centre conc. and relaxation time 16161
NaCl, F-centre electrons, spin–lattice relaxation time, 300°K 16160
NaCl, F-centre stability 9907
NaCl, films, electron reflection 3793
NaCl, films, secondary electron emission 3792-3, 10940
NaCl, frozen aq. soln., concentration profiles 6048
NaCl, growth mechanism 16256
NaCl, growth in silica gel 13946
NaCl, growth from sublimed vapour 711, 4596
NaCl, hole bands 2807
NaCl, i.r. reflection spectrum 8007
NaCl, internal friction, effects of vibrations 21100
NaCl, ion activated luminescence centres 16104
NaCl, ionic conductivity, γ-irradiation effects 6067
NaCl, lattice dispersion freq., from i.r. absorption at 82°K 13665
NaCl, lattice energy calc. 11562-3
NaCl, lattice vibrational spectrum, calc. 20742
NaCl, liquid state structure 19114
NaCl, Madelung constant 13475
NaCl, melting 10321
NaCl, molecular trajectories in electric fields 7827
NaCl, mutual polishing procedure 21176
NaCl, natural and synthetic, microstructure 16366
NaCl, nuclear quadrupole relaxation 3142
NaCl, photocond., X-irrad. and heat treated 6142
NaCl, polaron energy spectrum 15836
NaCl, polished surfaces, water vapour resistance 1901
NaCl, polygonization, geometry and kinetics 15854
NaCl, pressure required for metallic transition, calc. 15802
NaCl, quench hardening 15852
NaCl, relation of microhardness to load 13919
NaCl, soln.-precipitation deformation under applied stress 10261
NaCl, secondary electron emission 9077, 17033
NaCl, secondary electron energy spectrum, fine structure 10941
NaCl, self-diffusion, conductivity, and crystal fine structure 20845
NaCl, self-diffusion of Cl^{36}, in pure and Ca-doped crystals, 520-740°C 17974
NaCl, sintering, in presence of inert gas 8463
NaCl, soln., electrolysis, induced e.m.f. 12107
NaCl, soln., observation of crystal nucleation 10279
NaCl, stressed lamellae, electron diffr. study of progressive lattice distortion 10306
NaCl, structure amplitude, powder method 18350
NaCl, sublimation into A, 726-770°C, rate of vaporization 16921
NaCl, surface tension of solns., meas. 2160
NaCl, thermal expansion theory, eqn. of state 4270
NaCl, thermionic emission 5335
NaCl, thermoluminescence, effect of illumination at liq. N. temp. 18155
NaCl, thermoluminescence, activation energy 4466
NaCl, thin monocrystals, delayed discharge 18107
NaCl, TlCl-activated, luminescence afterglow, rel. to method of preparation 8019
NaCl, u.s. attenuation 2206
NaCl, use in fusion cut-out for manipulation of Cl in vacuo 14703
NaCl, vacancies created by high-energy irrad., optical detection 1594 [1586
NaCl, whiskers, formation, strength and dislocations
NaCl, X-irradiated, ionic conductivity 1622
NaCl, X-ray coloured, thermoluminescence 2971
NaCl, X-ray expansion and coloration of undoped and doped crystals 2824

Sodium compounds — contd
NaCl, X-ray irrad., α and β absorption bands 16064
NaCl:Ag, luminescence decay time, ion excitation 1756
NaCl:Ag, luminescence theory 16086
NaCl:Ca, X-irradiated, thermal props. 2833
NaCl—$CaCl_2$, mixed crystals, Ca ion diffusion 6062
NaCl—KCl, mixed crystals, X-irradiated, F-band position 557 [12075
NaCl—NaBr, mixed crystals, effect of annealing on props.
NaCl:Ni, de-exciting action of X-rays 1750
NaCl:Pb, absorption spectra and elec. cond., effect of 600°C annealing 20990
$NaClO_3$, Cl spin—lattice relaxation 4532
$NaClO_3$, irradiation effects 6282
$NaClO_3$, Raman spectrum, polarization 13689
NaF, cryometry of dissolved alkali salts of oxygenated anions 19507 [8778
NaF, molten, structure, high temp. X-ray diffraction
NaF, thermal cond. at low temp. 9867
NaF, X-ray irrad., α and β absorption bands 16064
Na ferrocyanide, Mössbauer effect 9524
Na halides, lattice vibrations, calc. 2782
$NaHgCl_3.2H_2O$ crystal structure 21197
NaI, efficiency and total absorption fractions 2511
NaI, fluorescence and reflection spectra of 22 samples, 20° to −190°C 21006
NaI, lattice dynamics, theory and neutron spectrometer study 13479
NaI, solid solubility of TlI 16356
NaI, solutions, nuclear quadrupole relax. of I^{127} 12427
NaI, specific heat and elastic consts., at low temp. 17895
NaI, well crystals, γ-ray absorption 11133
NaI:Tl, emission and absorption spectra 20997
NaI:Tl, γ-ray absorption mechanism 9326
NaI:Tl, γ-ray response spectra 16102
NaI:Tl, luminescence 0-270°C 13712
NaI:Tl, luminescent response to energetic heavy ions 11788
NaI:Tl, scintillation phenomena 18147
NaI:Tl, scintillation response to monoergic neutrons 17355
NaI:Tl, technique of making holes in crystals 16255
$Na_2IrCl_6.6H_2O$, crystalline, Szilard–Chalmers reaction, Ir^{192} recoil species 12109
$NaNO_2$, elec. cond., solid and molten, and viscosity, melting study 13466
$NaNO_2$, i.r. absorption spectra 6926
$NaNO_2$, Na^{23} n.m.r., quadrupole splitting 13895
$NaNO_3$, aqueous soln. compressibility 14640
$NaNO_3$, atomic scattering amplitudes 12025
$NaNO_3$, melting, effect on u.v. absorption 10038
$NaNO_3$, molten, migration of ions 4718
$NaNO_3$, n.m.r., 2nd order quadrupole effects 21092
$NaNO_3$, and $NaNO_3$—KNO_3, molten, u.s. absorption and vel. 16696
$NaNO_3$, oscillations of NO_3^- ions 524
$NaNO_3$, thermal expansion, X-ray meas. 15814
$NaNO_3$—$AgNO_3$, quadrupole n.m.r., satellites intensity, $AgNO_3$ depend. 21091
Na_2O—GeO_2, viscosity, 1000-1550°C 8255
$Na_2O.MgO.3SiO_2$, $Na_2O.CuO.3SiO_2$ and $Na_2O.PbO.3SiO_2$, fibres, structure 6372
Na_2O—SiO_2 glasses, elec. cond., effect of BeO, MgO, CaO, SrO, BaO, ZnO, PbO 15882
NaOH, NaOD, near i.r. absorption spectra 1736
NaOH, u.s. velocity 5012
$Na_4P_2O_{10}$, phases I and II, crystal structure 8222-3
$Na_2SO_4.10H_2O$, dehydration and co-electron emission 15050
Na_2SO_4—SO_3, isotopic exchange 14112
$Na_2S_2O_3.5H_2O$, dehydration and co-electron emission 15050
$Na_2S_2O_8$, i.r. absorption and Raman spectra study 11526
NaSb, semicond. props. 7947
$Na_2Se_2O_8$, i.r. absorption and Raman spectra study 11526
Na thiosulphate, pentahydrate crystals, colour centres 6049
Na uranyl-8-quinolinate, crystal structure 4647
Na_xWO_3, bronzes, neutron diffr. study 6361
Na_xWO_3, conduction electrons, zero Na^{23} Knight shift explained 13518

Soil
frozen, r.f. elec. props. 16009
gaseous diffusion 14692

space exploration symposium (1959) 8521
space research 8523-4
space research discussion (1958) 8520, 18873
Solid solutions (See also Alloys; Phase equilibrium).
binary, directional solidification 14062
binary, disordered, propagation phenomena 18404
binary, disordered, random clusters propag. phenom. 3268
binary, metallic, excess energy 21237
breakup, Hall effect changes 6069
coalescence theory 4687
complex oxides, dielectric props. 7974
configurational partition function 4689
creep, in f.c.c. 21105
hardening, by interactions between dislocations and impurity atoms 15851
multicomponent, short–range order, independent parameters 14073
nucleation, transform. centres, ageing 1929
phase transformations, activation energy 1935
precipitate growth kinetics 16357, 21230
regular, with molecules occupying several sites, partition functions 12082
semiconductors, flaw solubility 15916
semiconductors, thermal conductivity 15819
ternary semiconducting systems, mag. susceptibility formulae 16128
thermal conductivity, rel. to prep. and comp. 15820
thermal vibrations, charac. temp., concentration and treatment dependence 6008
thermodynamics, various results 731
alkali halides, contact fusion 3265
alkali halides, mixed crystals, effect of annealing on props. 12075
anthracene–polystyrene and 9, 10-diphenylanthracene–polystyrene, fluorescence 20998
aryl derivatives of oxadiazole in polystyrene, absorption and luminescence spectra 10073
α-brass, creep 21105
cyclohexane with naphthalene and methyl derivatives, fluorescence 11777
diphenylene in naphthalene, absorption spectrum 18131
β-graphite, formed by diffusion 20841
metaniobates, of di- and trivalent metals, ferroelec. props. 16020
naphthalene, with methylnaphthalenes and naphthols, luminescence and absorption spectra 21003
rare earths, in super-conductor, disordered Ising lattice, ferromag. props. 6217
urania-thoria, thermodynamic props. 6382
Ag–Al, supersaturated, decomposition, primary X-ray extinction 3266
Ag–As, mag. susceptibility 13731
Ag–Cd, mag. susceptibility 13731

Solid solutions – contd
Ag–Cu, continuous series of metastable solid solutions 14077
Ag–Cu, mag. susceptibility 13731
Ag–Ga, mag. susceptibility 13731
Ag–Ge, mag. susceptibility 13731
Ag–Ge, metastable electron compound 14078
Ag–Ge, with Sb and P 16351
Ag–In, mag. susceptibility 13731
Ag–Sb, mag. susceptibility 13731
$AgSbTe_2$–PbTe, structure and elec. props. 2902
Ag–Sn, mag. susceptibility 13731
Ag–Sn, resistance minimum 20862
Ag–Zn, kinetics of vacancy precipitation 16387
Ag–Zn, mag. susceptibility 13731
Al–Mg, fine structure investigation 6380
AlSb–GaSb, hardness, X-ray lattice data 6381
AlSb–GaSb, prep., elec. cond. and Hall effect 11706
AlSb–InSb, elec. props 15943
AlSb–InSb, prep. 10328
Au with Ni, Cu and Sn, resistance minimum 20862
$(Ba,Pb)(Ti,Sn)O_3$, phase diagram, dielec. and piezoelec. props. 21236
BaO in $Ba(OH)_2$, solubility, 600-1000° C 710
$(Ba,Sr)(Ta,Nb)_2O_6$, dielec. polarisation 631
Ba, Sr and Pb metaniobates, in Na niobate, dielec. and piezoelec. props. 630
$BaTiO_3$, ferroelectrics, ageing process 13656
$BaTiO_3$, various solutions, ferroelec. props. 1698
$BaTiO_3$–$BaSnO_3$, elec. props. and structure, phase diagram 16017
$BaTiO_3$–$BaSnO_3$, ferroelec. props., temp. depend. 16018
$BaTiO_3$–$BaSnO_3$, high-temp. phase transition 12076
$BaTiO_3$–$BaZrO_3$, ferroelec. props., temp. depend. 16018
$BaTiO_3$–SnO_2, ferroelec. props., temp. depend 16018
$BaTiO_3$–$SrTiO_3$, ferroelectrics, with low temp. coeff. of permittivity 13655
$BaTiO_3$–ZrO_2, ferroelec. props., temp. depend. 16018
$BaTiO_3$– ZrO_2, structure, rel. to ZrO_2 content 1928
Ba(Ti, Zr, Sn)O_3, prep., ferroelec. props. 16019
Bi–Te, semicond. props. and thermoelec. power 4352
Bi_2Te_3–Bi_2Se_3, elec. cond. and thermo-e.m.f., ageing effect 2889
Bi_2Te_3–Sb_2Te_3, thermoelec. props. 16002
Bi_2Te_3–Sb_2Te_3, as thermoelements, elec. cond. depend. 2917
C in Fe, solubility from mag. aftereffect 3270
C in α-Fe, solubility limit at various temp. 13819
$Ca_3Fe_2Sn_2O_{12}$–$Y_3Fe_5Fe_2O_{12}$ 6359
Cd–Cu, mag. susceptibility 13731
CdS–CdSe, prep. and photoconductivity studies 7957
CdSb–ZnSb 18401
CdSe–In_2Se_3, ordered, limits of formation 16036
CdTe–HgTe 12083
CdTe–ZnTe 12083
Cu, deformation and X-ray diffr. pattern broadening 1910
Cu, dilute, n.m.r. at low temps. 18225
Cu–Al, segregation of Al to stacking faults 21241
Cu in Ge, decomp., X-ray study 21192
Cu–In, mag. susceptibility 13731
Cu–Mg, resistance minimum 20862
Cu–Sb, mag. susceptibility 13731
Cu–Sn, mag. susceptibility 13731
Fe, effect of deformation on internal friction 1845
Fe–Ge, with Sb and P 16351
Fe–P, lattice parameters, solubility 18348
$FeAl_2O_4$, mag. props. 11829
FeO_3–$FeVO_3$, antiferromagnetism 11914
Fe_3O_4, mag. props. 11829
$FeTiO_3$–Fe_2O_3, heat treated, mag. props., order–disorder transform. 670
0.6 $FeTiO_3$–0.4 Fe_2O_3, reverse thermoremanent magnetization 8041
Ga in superconductor, mag. susceptibility and Curie point calc., 18160
GaSb–Ge, pseudo-binary system 18402
GaSb–InSb, prep., equilibrium and elec. props. 730
GaSe–GaS, photoconductivity 15989
$GdRu_2$–$CeRu_2$, superconduction, mag. props. 11844
Ge, solubilities of Al and Ga 12080
Ge–Fe, Ni, Co, annealing effects 15863
Ge–Si, positive excess entropy 1641

Solid solutions – contd
Ge–Si, thermodynamic props. 4685
H–D, mutual solubility at 4.2°K 12099
HgTe–ZnTe 12083
InAs-based quaternary systems 10327
InAs–In_2Se_3, optical absorption edge 16057
InAs–In_2Te_3, optical absorption edge 16057
InSb-based quaternary systems 10327
InSb–GaSb, thermodynamic props. 4685
KCl–KBr, configurational free energy 12071
KCl–KBr, diffuse X-ray scattering 16323
KCl–KBr, phonon scatt. by point defects at liquid He temp., from thermal cond. 13506
$M_x^{2+}Fe_2Sn_3O_{12}$–$Y_3Fe_2Fe_3O_{12}$, M = Cd, Zn, Mn, Ni, Mg 6359
Mg, lattice spacings 21195
NaI, with up to 2.6 mol.% TlI 16356
$NaNbO_3$–$PbZrO_3$, prep., antiferro- and ferroelec. props. 11746
Ni–Cu, fine structure investigation 6380
NiZn ferrites, with ferric oxide 21232
Pb and Bi tellurides, carrier scattering 2890
Pb–Mg, lattice parameters and zone overlap 16315
with Pb_2MgWO_6, antiferroelec. and ferroelec. props. 7978
$PbNb_2O_6$–$BaNb_2O_6$–$SrNb_2O_6$, ferroelectric props. 6154
$Pb_2NiNb_2O_9$–$Pb_2MgNb_2O_9$, polarization mechanism 629
Pt–Ag, solution formation due to spark discharges 16352
Sb_2Te_3–Bi_2Te_3, thermoelec. props., effect of impurities
SbZn–SbCd, thermoelec. props. 16002 [18079
Se–Te, X-ray study 12077
in Si, excess entropy 1641
$(Sr,Pb)(Ti,Zr)O_3$, phase diagram, dielec. and piezoelec. props. 21236
Ti with ferromag. solutes, superconducting transition temp. 1079
Ti–Cu, decomposition 16353
VO_2–TiO_2, mag. susceptibility, 25-90°C, composition depend. 18166
Xe and Kr 8846
$Zn_xCd_{1-x}Sb$, elec. props., single-phase prod. 2903-4
$Zn_3(PO_4)_2$–$Mg_3(PO_4)_2$, phase equilibria and Mn-activiated fluorescence 2953
ZnSe–GaAs, existence of continuous series 729
ZrO_2, irradiation-induced phase transformations 21211

Solids (See also Cyclotron resonance).
acoustic loss, macroscopic model 16758
charged-particles stopping power, from effective cross-section theory 10604
cold neutron research, review 7840
composite, flow of heat 8820
conductors, optical constants, complete set, theoretical determination 10025
conferences 6002-3, 17864, 20713, 20715
crack propagation, brittle–ductile transition, temp. depend. 11985
dielectric props. of disperse systems 3722
electron nuclear double resonance applications 10242
electron penetration, universal law 10971
electronic behaviour 4272
impact, on solids, at > 10 km/sec velocities 11991
with imperfections, thermodynamics and reaction formulation 4295
impurity absorption spectra, effect of acoustic waves 2944
ionization, by heating and exp. in vacuum 14958
irradiation effects 6064, 9922
mech. relaxation, effects of elongation and contraction of samples 16221
molecular and atomic motions, by r.f. methods 7829
n.m.r., review and applications 4523
with paramag. impurities, nuclear polarization 16717
plastic flow of Bingham solids 16227
porous, liquid penetration, theory and exper. 8336-7
pressure effects 13495
Raman intensities, absorption effects 13687
size of defects, ultrasonic impulse echo method 5109
spin systems, correl. times, line widths and cross relax. 8082
steady-state temp. distrib., during change of property 6961
strain, ultrasonically produced, calorimetric meas. 18243
stress waves, initiated by high explosives or impacts 14729
stresses, under hydrostatic pressure and tensile load 16228

Solids – contd
stressed, thermodynamics 731
thermal and acoustic oscillations, due to periodic evolution of heat 19477
thermal and mechanical props., relation 9854
transition-element ions, charge transfer and exchange interaction 21067
transition-element ions, props. and electronic structures 20727-8 [14874
translucent low temp., directional, spectral emissivity
ultrasonic machining, effect of cavitation 3390
ultrasonics, very high energy 6890
work function and sec. electron emission, in semiconductors and dielectrics 2374
X-ray scattering, small-angle theory 718

structure (See also Crystal structure; Examination of materials; Granular structure; Vitreous state; X-ray crystallography).
atomic displacements, thermodyn. averaging 11571
cation–cation interactions, in ionic solids 11554
dielectrics, binding energy rel. to breakdown energy 16026
dislocations in arrays 15844
distortions in metallic structures 7879
examination with ultrasonic "matterscope" 3590
gas-crystalline state in polymers 1916
impurity flow to edge dislocations 7896
ionic charge, rel. to volume, for isoelectronic ions 514
model, effect of orientation on strength 16235
packing of hard spheres 21223
phase change meas., at high press. 1926
stability of non-stoichiometric compounds 13516
superlattices, quantum-mechanical representation 1536
symmetry, geometrical anal. 6004
texture antisymmetry, with infinity-fold axes 12057
vacancy coalescence and macro-defect form. on cooling 6046
coals, deduced from He densities 14058
mumetal, heated in air, surface layer heterogeneities
Permalloy films 3052 [18394
rare gas matrices, trapping sites for H atoms 7889-90
silica, fused and crystalline 7877
transition metal semiconducting cpds, crystal chemistry 13932
BN, donor–acceptor bond 4255
Bi_2Te_3 and CdI_2 types, bonding and semiconducting relationships 15945
CdI_2, 3 layer, bonding scheme 15945
Co nuclear alignment, at 0.04°K 4285
Co and Co–25%Ni, structure indicative of martensitic shearing 21207
Cu, dislocations and oxide nuclei, correlation 17934
NaSb, intermetallic semiconductor 7947
Pb and Pb–Ag alloys, macromosaic substructures, formation 13545
S and S cpds., positron annihilation in, similarity of S^{2-} and Cl^- ions 15336
U, texture, neutron diffraction exam. 18416

theory (See also Crystals; Dielectric phenomena; Metals, theory; Plasma; Semiconductors).
amorphous, electron energy spectrum, band structure 15879
amorphous, ferromagnetism, quasi-classical theory 16130
atomic aggregate, extension of Huygens' theory 13463
atomic oscillations, localized, Mössbauer-effect studies 20789
band energy spectrum in mag. field 9889
band structure 20774
band structure of $A^{III}B^{V}$ compounds, equiv. orbital method 6030
Bi-type crystals, electronic structure 17910
Bloch electrons in elec. field, wave-functions and effective Hamiltonian 4273
Bloch functions, dispersion relations 17871
Bloch waves and Wannier functions, analytic props. 521
bosons in solid state, quantum theory 7304
Brillouin zone energies, repulsive potential method 2777
cascade capture of electrons 15917
cation–cation direct interactions in oxides 7832
charge carriers of negative effective mass, electrodynamics 544
chemical binding effects on nuclear recoil 13131
chemical equilibrium, activity coeff. of electrons and holes at high conc. 15914

Solids — contd
theory — contd
cohesive energy, calc. by SLCO method 13476-7
conduction electrons, energy levels in a mag. field 1548
continuum mechanics and irreversible thermodynamics cooperative phenomena, review 18178 [6689
crystal-field effects, electron densities and mag. form factors 20770
crystal-field stabilization, and site deformation in crystals and complexes containing transition ions 20729
cubic closed-shell metals, Born—Mayer consts. 11556-7
diatomic chain, vib. spectra, functional equations 9843
diffusion in binary system 13557
Dirac electrons, energy band structure 15832
donor—acceptor pair energy levels 11602
elasticity, moving dilation in semi-infinite isotropic solid 16657
electron collective oscillations 11594
electron excitation energy migration, by virtual-exciton mechanism 21011
electron in one-dimensional deep trap, energy levels 11755
electron gas, conductivity in strong mag. fields 12570
electron gas, dielec. props., effect of the lattice 10009
electron gas, long-range spin interaction, Meissner—Ochsenfeld effect 11611
electron gas, nondegenerate, deviations from Ohm's law, variational approach 1624
electron gas, transport in mag. field, quantum theory 4284
electron-hole interaction, potl. energy 4280
electron—phonon resonance 527
electron scatt., in high mag. fields by delta—function impurities 13575
electron scattering, inelastic, in solids 7871
electron transport, effective scattering mechanism parameter, det. using thermoelectric power 11730
electron config. f^n, matrix elements of tensor operators 6006
electronic states, forbidden bandwidths for 1-dimens. periodic fields 17914
elementary excitations, effect of Coulomb interaction 530
energy band calc., orthogonalized plane-wave method 2778
energy bands, in Ni, Co and their alloys 4267
energy levels, in distorted Coulomb field 6031
excitation intensity, depend. on luminophor storing level depth 2958
excitons, Mott-type, scattering on Na 6035
γ-ray resonance absorption 18992
Grüneisen theory 15798
H-bonded, tensile strength 13918
Holstein—Primakoff formalism, mag. ordered crystal 1539
impurity conduction, "dielectric" approach 6072
impurity diffusion, correlation effects 4307
impurity escape rate 555
incompletely polar crystals 20738
interaction of normal modes with electron traps 2806
internal pressure at 0°K, quantum-mech. calc. 11551
irradiation effects, theory of displacement cascades in cpds. 2820
irreversible processes 16649
Ising antiferromag. model, use in other problems 8066
Ising ferromag. model 11814
lattice of oscillations, normal modes, with many resonances and dipolar-coupling 9841
lattice sums evaluation, Madelung method 7836
lattice thermal cond., effect of point imperfections 20795
linked cluster expansion applicable to nonspherical situations 14527
long-wave absorption 6174
macroscopic props. and atomic structure, review 4260
many-electron model, s.c.f. approach 516
many-particle theory, periodic ground states 12885
mechanical strength 10272
Mössbauer effect, temp. depend. of γ-ray energy 11314
multi-component systems, non-uniform, free energy and distrib. function 16630
multi-phonon thermal ionization 11605
nuclear orientation, dynamic, by forbidden transitions in paramag. resonance 5654-5
one-electron problem in insulators and semiconductors, many-particle approach 1546
periodic-lattice electron-density, effect of boundary conditions 15830

Solids — contd
theory — contd
π-band calc., using self-consistent theory 4277
piezoelectricity, space—time variations 10024
plasma frequency, formula, from electron collective oscillations 11594
plasma oscillation of electrons, effect of crystal size 15831
positronium decay in molecular substances 20115
semimetals, u.s. attenuation in mag. field, calc. 13504
sound waves in ionic crystals, non-linear effects 17886
spin energy, spatial diffusion, calc. 1823
spin—phonon resonance lines, broadening by exchange and mag. dipole interactions 13509
spin polarization effects on electron densities and mag. form factors 20770
statics of crystalline media 9837
superexchange interaction 21058
superexchange interaction, four-electron model 21059
thermal lattice defects and energy content 6038
thermally stimulated current 15896
transitions between metallic and insulating states 20775
vacancy relaxation 11628
van der Waals solids at 0°K, law of corresponding states 17868
ice, effects in covalency of H bond 8662
ice, proton conductance in 4721-2
rare earth compounds, low-lying states 11598
Bi, hole part of Fermi surface 13519
HgO, atomic velocity distrib, at 77°K 6794
NaCl, hole bonds 2807
Sols (See also Colloids; Sedimentation).
specific heat measurements 18443-5
silica, mixtures, X-ray scattering 12053
V_2O_5, streaming birefringence and optical relaxation 3333
Solubility (See also Phase equilibrium).
binary alloys, immiscibility 21244
crystal faces 13935
flaws in heavily-doped semiconductors 15916
gaseous mixtures in liquids 6782
irradiated polymers, analysis 7820
ferric oxide, in NiZn ferrites 21232
A, O_2, N_2, in liq. H_2, 20-33°K, 35 atm 75
Ag, in Ge : Sb, P 16351
Al, Ga, in Ge, solid state 12080
$BaSO_4$, effect of radioactive S^{35} 14646
C in α-iron, C^{14} technique 4684
Cd, in Ge 553
Fe, in Ge : Sb, P 16351
Ge, in liquid metals 19119
in Ge, solid, of impurity elements 18396
H_2, in steel cavities, equilib. pressure 18391
H_2, in Vycor glass 5051
H and D, in liquid argon 19118
H—D, mutual, at 4.2°K 12099
He, in Vycor glass 5051
Kr, in liquid Pb, Sn, Ag 19120
LiF, in aqueous solution, poisoning 21159
LiF, dissolution kinetics at dislocation etch-pits 13968
N, in polyethylene 12066
N_2, in Vycor glass 5051
NaCl, effect on deformation under applied stress 10261
Ne, in Vycor glass 5051
P, in Fe 18348
in Sc, solid, of impurity elements 18396
Se, in liquid metals 19119
Ta, in Ge, temp. and elec. cond. depend. 1599
TlI, in NaI crystals 16356
Solution energy (See Heat of solution).
Solutions (See also Heat of solution; Liquids; Solid solutions).
of anistropic rods, luminous intensity 19449 [19124
aqueous, acoustic relaxation, meas. principles and methods
aqueous, decomposition by ionizing radiation, activity concept 1963
aqueous, dielectric constants 945
aqueous, nitrates, compressibility 14640
aqueous, positron annihilation in 9343
broadening of scattering line 3530
chain-polymer, radial distrib. function and osmotic press. calc. 14641
charge transfer and fluorescence quenching 19162
convective diffusion, of solute, in turbulent flow 78
copolymer, light scattering 14851

Solutions - contd
critical opalescence, free energy, and density correlations [19093
crystal growth, concentration distribution 4586
diamagnetic salts, spin–lattice quadrupole relaxation 8669
dielectric constant, in strong elec. fields 19141
dielectric loss meas., with e.m. interferometer 10664
dielectric relaxation 5020-1
diffusion, Einstein's law, effect of solvent viscosity 14633
dipole moments det., validity of Higasi's method 5019
dissociation of strong acids, n.m.r. meas. 3547 [19046
electrolytes, adiabatic compressibilities, conc. depend.
electrolytes, compressibility, variation with temp. 6793
electrolytes, Debye–Hückel theory, fluctuations and limit of validity 938
electrolytes, heat transport theory 5014
electrolytes, strong, statistical-mechanical theory 14121-2
electrolytes, thermal diffusion in, Soret coeff. for 18 solns.
electrolytes, u.s. absorption 10660, 19293 [6784
electrolytes, u.s. propag., dispersion 941
electrolytes, velocity of sound, calc. 5013
electron-transfer processes and chem. reactions 19171
fluorescence, emission anistropy, meas. with uncalibrated glass plates 19394
fluorescence, meas. of polarization 14661
fluorescence, mixed solns. 6807
fluorescence spectra, effect of secondary fluorescence 10672
fluorescence time const., theory, for liquid and rigid solns. [3536
free energy and radial distrib. function, hyper-netted chain approx. 14617
γ-irradiated, diffusion kinetics 6421
H-bonding between solvent and solute 3535
hydration of cations, n.m.r. study 3546
inorganic acids, molar sound velocities 19133
ionic structure 19117
large polarizable particles, inhomogeneous field study 3520
linear macromolecules, local steric hindrances 2756
liquid, diffusion coeffs. statistical mechanics 10653
liquid drops, on miscible liquid surfaces, mixing zone circulation 19086
luminescence, γ and u.v. induced, comparison 2176
luminescence decay, theory 6810
luminescence quenching, theory 16708
macromolecular, under flow, apparatus for dielec. prop. meas. 12421
macromolecular polymers, hydrodynamics 12405 [940
macromolecules, depolarization of dispersed light, theory
macromolecules, double refraction due to flow, shape effect [12498-500
macromolecules, rigid, streaming birefringence, theory
macromolecules, size and shape 7823 [16703
Mayer's ionic theory appl. to electrolytes 6783
metals in dilute soln., theory 16690
molecular interactions in n.m.r. reference cpds. 15763
nuclear mag. resonance of p and d in H_2O and D_2O solns., mag. interactions compared 14666
nuclear quadrupole relaxation 12427
optical activity and intermolecular interaction 3542
organic, effect of solvent on electronic spectra 15739
organic, effect of solvent on fluorescent maxima 10677
organic, luminescence and Cherenkov radiation, γ- and X-ray excited 19158
organic, resonance fluorescence 53
organic liquids–water, dielec. const., temp. and conc. depend. 3528
organic phosphors, excitation energy transfer solvent–soln. 6808-9
paramagnetic salts, aqueous, positron annihilation in 9343
partially miscible, interface mixing zone, non-stationary effects 19085 [5009
polar molecules in non-polar solvents, relaxation times
polymers, diffusion and sedimentation, for 1, 2 and 3 branch points and rings 8657
polymers, dilute, theory, second virial coeff. calc. 16694
polymers, dilute, thermal diffusion 19102-3
polymers, intrinsic viscosity measurement, velocity grad. effects 8599
polymers, molecular wt. distrib., det by fractionation, theory 20702
polymers, neighbour interactions and internal rotations, solvent effect 15790 [77
polymers, sedimentation equilib. second virial coeff. det.

Solutions - contd
polymers, sedimentation of microscopic spheres 78
polymers, sheer degradation 3522
polymers, theory of dilute solutions 14629
pressure soln. in rocks 10280
radioactive, paramag. relaxation 6814
Raman spectra, solute band intensity, solvent effects 15717
solution–solvent mixing 10639
solvent effects on intermolecular forces, absorption band freq. shifts and intensities 10669-70
solvent effects in n.m.r. spectra 7801
sonoluminescence, asymmetrically broadened emission lines 16709
Soret effect, photoelec. recording 8664
spectral analysis, spraying into glow discharge, rotating electrodes 10766
spectral shifts for aromatic hydrocarbons in paraffin solvents 16707
thermodynamic excess functions for electrolytes 10656
thermodynamics, irreversible, inversion of linear laws
viscosity of binary solns., statistical mech. 19092 [14904
n-alkane mixtures, volume contraction on mixing 3518
aniline–cyclohexane mixtures, u.s. propagation 19131
aromatics, condensed-ring, absorption spectra, effect of high pressure and low temp. 15733 [14664
benzene, in CS_2 and CCl_4, proton spin–lattice relaxation
benzene–CCl_4, refractive index and dispersion 10667
benzene–iso-octane, vapour–liquid equilibrium 6781
benzene–methanol, refractive index and dispersion 10668
benzene scintillators, luminescence decay times and energy transfer 19159 [19170
benzene substituents, abnormal n.m.r. saturation behaviour
chlorobenzene, in CS_2 and CCl_4, proton spin–lattice relaxation 14664
chloroform–CCl_4, dipole interactions 935
cyclohexane, in CS_2 and CCl_4, proton spin–lattice relaxation 14464
DPPH, proton hyperfine spectra 10680 [19151
diethyl ether solutions, of organic halides, photoconductivity
2,5 - dimethylpyrazine in hydrocarbon and EPA glasses, solvent effects on $n\rightarrow\pi^*$ transitions 15742
diphenyl cpds., in benzene, CCl_4 and heptane, microwave absorption, relaxation 19149
diphenyloxazole in xylene soln., energy transfer 19161
ethylene chloride, ratio of gauche to trans form 2770
Group Ib and IIb complex cyanides, Raman spectra, CN stretching bands 16706
haemoglobin in aq. NaCl, X-ray small-ang. scatt. 19115
halide, flash photolysis, electron transfer processes in, mechanism 10357
heavy water, relaxation of deuterium nuclei 2179
hydrocarbons, aromatic polynuclear, in paraffin hydrocarbons, spectral shifts 16707
hydrocarbons, liquid, γ-irradiated, energy transfer 18442
hydroxide, u.s. velocity 5012
inks, flow through capillary tubes 4998
iodine, u.v. and visible absorption peaks 16705
methanol in water, ultrasonic wave velocity, rel. to cavitation 19129
perfluoroheptane–i-octane, cluster formation 3519
phenols, hindered, solvent effects on i.r. spectra 8667
polyacenaphthene, viscosity and light scattering 14657
polybutylmethacrylate, in chloroform and isopropanol, diffusion 14636
polyethylene glycols, in benzene 14656
polystyrene, critical opalescence 6805
polystyrene, refractive index, temperature increment 14658
polystyrene–CCl_4, segmental motion 19166
pyrazine in hydrocarbon and EPA glasses, solvent effects on $n\rightarrow\pi^*$ transitions 15742
sugar, light scattering, turbidity meas. 6951
transition metal ions and complexes in D_2O, spectral shifts 3531
uranyl nitrate, fluorescence depend. on temp. and thermal treatment 3539
varnishes, flow through capillary tubes 4998
Wurster's blue perchlorate 14663
$BeSO_4$, compressional relaxation 5010
C^{14}, aqueous, liquid scintillation counting 5687 [10655
CCl_4–methylene chloride, equilibrium and transport props.
$CH_3NH_3^+ + OH_2 + NH_2CH_3$ in aq. acid, proton transfer study by n.m.r. 14118

Solutions — contd
Cl^{35}, n.m.r. contact shifts in $CoCl_2$ solns. 19168
Fe-group salts, paramag. resonance and relaxation 8085
He^3—He^4, change of excess chemical potentials, conc. depend. 14919 [19539
He^3—HeII, diffusion coeff. and thermal cond. 0.7-2.1°K
He^4—He^3, Boltzmann gas model 8863
Hf oxyhalides, aq., complex ion structure 14627
In sulphate, Raman spectra, incomplete dissociation 10671
KI, nuclear quadrupole relax. of I^{127} 12427
La chloride, freezing point 19506
Mn salts, paramag. absorption and relaxation 8870
NH_4^+ in aq. acid, proton transfer study by n.m.r. 14117
NaI, nuclear quadrupole relax. of I^{127} 12427
O_2—O_2, dielec. const. 14655
$(SO_3)_2NO^{3-}$ in aq. soln., Overhauser—Abragam effect 6815
$(SO_3)_2NO^{3-}$, in dilute aqueous solution, double resonance exper. 17777
T, aqueous, liquid scintillation counting 5687
VO^{2+}, paramagnetic relaxation 19167
Zr oxyhalides, aq., complex ion structure 14627

Sorption (See also Adsorption).
chemisorption, on oxidized Ti 6423
desorption of H and D, from Pd 10373
discharge vacuum pumps, theory 8720
with distillation, theory 18450
gases, W impregnated cathodes, poisoning 9072
getter-ion pumps 5058
ion sorption pumping, hot-cathode ionization gauge 16746
intercrystalline, thermodynamics and ion exchange 8333-4
mobile molecules, behaviour 19122
moisture balance, electromagnetic, automatic recording 8588
p—n junctions, effect on surface properties 15915
photodesorption, on oxidized Ti 6423
pre-sorptive effect, in catalytic oxidation of Co on oxide semiconductors 10345
pump oil contamination, on Zns films 14087 [18354
from sorbed water on silica gel, X-ray study of structure
vapours, reactive condensable, meas. up to 350°C 18451
on Ag, of H_2 and CO, work function, chemisorption bond [18452
on Au, of H_2 and CO, work function, chemisorption bond
Cl, gaseous adsorption, by Cu and CuO 10369 [18452
on Co, of H_2 and CO, work function, chemisorption bond [18452
Cu alloys, internal, after annealing, rel. to elec. resistance [14064
on Cu, of H_2 and CO, work function, chemisorption bond [18452
on Fe, of H_2 and CO, work function, chemisorption bond
Ge, effect of absorption of water molecules 7927 [18452
H, electrolytic, on Ni 8311
H_2, on Ni films, temp. depend. 6426
H_2, by Pd black, temp. depend. 4749
H_2, by Ti and Zr, at low pressures 6427
on Ni, of H_2 and CO, work function, chemisorption bond
Ni, loss of sorbed gases, at 800-900°C 12120 [18452
O_2, on Ge 10368
O photodesorption, from ZnO, temp. depend., photocond. study 18074
Pt, desorption of Na, K, Ca impurities 6061
Si rectifiers, in moist gases, inversion behaviour 9982
Si rectifiers, in various ambients, surface breakdown 11702
by Ti films, of activated gases 10374
Ti droplet getter-ion pump, pumping characteristics 16742
ZnO, of gases, effect on electroluminescence 16116

Sound (See Acoustics).

Sound ranging
D.I.M.V.S. array, digital phasing and small signal detection 14777-8
hydrophone arrays, synthesis 5105
underwater, systematic error 14779
underwater camera positioning, by sonar 6900

Sound recording
disk recording, surface and groove noise 142-3
mag. tape, Fe distrib., autoradiographic study 12668
mag. tape, performance from magnetic properties 2222, [3592
sound-modulated light beam, for recording on cine film [20973

Sound reproduction (See also Acoustic radiators; Acoustic transducers; Sound recording).
earphone, loudness-balance data standardization 14752
illusions produced by headphone techniques 18544
loudspeaker cones, vibration frequencies 12444
pseudostereophony, using sphere-loudspeaker 19320
stereophonic, energy theory of directional hearing 12223
stereophonic, localization of apparent source 1025
stereophonic, by reflection 10744
stereophonic and quasi-stereophonic 6506
transmissivity of fabric and wood mesh screens 1008

Space charge
aperture - type electron lenses 19750
cathode thermionic converter, Nottingham's approx. theory evaluation 10943
current in crystals 7055
curved beam formation, exact electrodes 17034
diffusion attenuation 542-3
disturbance propagation in glow discharges 7080
effect on electron-gun trajectories, analogue study 5354
effect on ion beam focusing 7168
electron avalanche retardation 1100
in electron beams, "mag." wave modes 2385
in electron beams, spreading, mag. lens conteraction 10958
in electron field emission, for spherical geometry 3784
in electron gun, thermal spreading, counteraction with mag. field 10951
in filamentary electron beam, transverse waves 1157
flow, between concentric spherical electrodes 9080
flow, in mag. field, paraxial formulation 17045
flow equations, in mag. fields 9079
in gas break-through, below Paschen minimum 9004
in h.f. discharge, conc. meas., by probe method 1111
Hg arc, calc. for current density 262
ion beams, in electrostatic fields, theory 277
layers at semiconductor surfaces, electron and hole transport in, theory 9955
in light ampliers 3795
in liquid dielectrics, Kerr effect study 19148
magnetic "trap" production, potential well behaviour 10955
in magnetron, cylindrical symmetry, statistical equilibrium
meas. in h.f. discharge 5298 [12635
in moving ion streams, growth 19781
oscillations, in CdS semiconductors 6086
oscillations, in ion beams 10976
in particle accelerators, effect on particle motion 2408
in plasma, collision damping of waves 3771
plasma density, direct c.r.t. display 19688
positive ion layer, potential distrib. 17046
potl. distrib., between plane emitting electrodes 19732
in semiconductors 4325
simulation in electrolytic tank 5349
slow-waves, negative energy propagation 19925
spherical, cubical and tetrahedral clouds, e.s. energy 14947
surface, semiconductor calcs. 18006
thermionic power converters, contribution of anode emission 15064
three dimensional flow 15065
in Townsend discharge, transient, development and growth of ionization 5288
transient flow, in parallel plane diode 19733
waves, in cylindrical plasma 1132
waves, in electron clouds 19916
in nitrobenzene, under high electric field 1106
$BaTiO_3$, space charge fields in 10020
in $BaTiO_3$ surfaces, anti-parallel ferroelec. domains 4383
H_2, prod. of negative current—voltage curves at 400 mm Hg [10886

Spallation (See Nuclear spallation).

Spark counters (See Counters, spark).

Sparks, electric (See also Breakdown, electric; Lightning).
crossed-cylinder electrodes, for voltage meas., 20-140 kVp 5286
current and voltage gradient, meas. by c.r.o. 249
effect on structure of Pt—Ag alloys 16352
electrode vapour temp. 3747
electron and excitation temperatures, measured spectroscopically 5287
erosion of Cu in kerosene 14981
erosion of metal monocrystals 16985
friction sparks, temp. and ignition of gas mixtures 7109
high-pressure gaps, production of μsec current pulses 16967
high-pressure gaps, for use to 1000 atm. 2340
high-voltage gaps, μsec triggering 7108
influence of ionizing radiations on breakdown 7106

Sparks electric – contd
in liquids, heavy spark channel expansion 7104
in liquids, spark channels, cylindrical shock wave 15002
long, mechanism, for various electrode shapes 2341
in meteor ionization trail 6577
photoelectric recording of time-resolved spectra 3631
pre-breakdown current in compressed gases, temp. depend.
in shadowgraph photography, 450J discharge 14994 [3743
spark-channel expansion, in first μsec 5285
spectroscopic source, high precision 5169
vacuum spark gap, properties 7107
X-radiation, electron temp. 9010
air, electron avalanches, using cloud chamber 16974
air, in enclosed non-irradiated gaps 10887
air, temp. of discharge channel 14996
A, spectral line broadening and shift 17702
A II and He I, spectral broadening and shift 13417
A, Xe and N_2, high-temperature prod. 7105
He, 2.5-12 atm. 14998
N_2O and H_2 mixtures, behaviour 3746

Specific heat (See also Heat capacity; Thermodynamic properties).
alloys, dilute, theory 11583
antiferromagnetics, temp. depend. 1815 [17898
characteristic temp. meas., from X-ray diffraction spectra
colloids 18443-5
crystals, fallacy of Debye and Born theory 2796
crystals, general theory 2790
cubic crystals, face-centred, at 0°K, calc. by modified Houston method 7850
cubic lattice 11585
Debye temp. calc., modified Houston method 7850
Einstein crystal model, anharmonic forces 1555
fermion system, interacting, at low temp. 14538
ferromagnetics, in mag. field, near Curie point 1782
insulating materials, containing moisture and ice, method of meas. 8822 [20744
inversion of sp. ht. function, vibrational spectrum of solids
ionic solids, at const. vol., temp. depend. 4270
jumps, in relation to melting point formulae 14887
low temp., in hyperfine coupling meas. 2991, 13756
low temp., temp-wave study 19580
measurement, apparatus for -150° to +100°C 2276
measurement, at high temp. prod. by solar furnaces 14896
measurement, metals, up to 500°C in vacuo 5223
measurement, metals, at high temp. 9853
measurement, up to 3650°C 12531
metals, conduction electrons, effect of electron–phonon interaction 11592
metals, electronic, rel. to internal pressure, theory 13464
metals, 100-900°C, direct meas. apparatus 8834
metals, relationship to thermal cond. 17897
nuclear matter 11124 [11578
paramagnetic salts, influence of dipole–dipole coupling
quantum theory, for low temperature variations 219
relaxing gases, from sound vel. meas. 5052
solids, molar or atomic, rel. to other props. 9854
splitting of doublet ground state 8032
surface sp. ht. of isotropic solid at low temp. 20748
22 semiconductors 1557
alkali halides, calc. 2782, 13480
alkali halides, lattice vibrations 9842
α- and β- brass, electronic sp. ht., low temp., composition depend. 12073
fluorspar 20751
GpV sulphides, 65-300°K 13491
lac, calorimeter for 7008
methylene chloride, liquid, vibr. spec. heat relaxation 6791
quartz, crystalline, 2-4°K 9852
rare-earth Fe garnets, at low temp. 9855 [17911
transition metals and alloys, rel. to band structure, theory
A, from crystal parameters 4251
A, liquid, γ at 90°K at high press. 19132
Ag 2791-4
Ag, calc., by modified Houston method 7850
Ag–Mn alloys, 1.3-20°K, and in mag. fields 18408
Al 2791-4
Al, calc., by modified Houston method 7850
Al, at const. volume, calc. 7846
Al, low temp., rel. to band structure 9887-8
As_2O_3, structural prop. correl. 13490
Au, calc., by modified Houston method 7850
Bi_2S_3, structural prop. correl. 13490

Specific heat - contd
Bi_2Te_3 15807
Bi_2Te_3, at 1.37-65°K 8858
CaF_2, 3.5-300°K 6018
Ce, cubic, calc. 11806
CeMg nitrate, 1.5-10°K 20750
ClO_3F, C_p/C_v, from sonic vel. 105
Co, electronic, and energy bands 4267
Co, below 1°K 9860
$CoCl_2.6H_2O$, 1.4-20°K, mag. contribution 4266
Cr, anomaly at 38.5°C 17893
Cr, 20-1410°C 9853
Cr–Fe alloys 7848
Cr–Fe alloys, 1.4-4.2°K 17896
Cr–Mn alloys, 1.4-4.2°K 17896
CsF, calc. 13480
Cu–Mn 20868
Cu–Mn alloys, dilute, theory 11583
Cu–Mn alloys, 1.3-20°K, and in mag. fields 18408
Cu 2791-4
Cu, annealed and cold-worked, 0.4-1.5°K 20746
Cu, calc., by modified Houston method 7850
Cu, at const. volume, calc. 7846
Cu, 20-300°K 2786
D, -175° to +150°C 14909
D_2, solid (ortho), 2-18°K, lattice contrib. 20749
Dy crystalline salts 16054
Dy ethyl sulphate, below 1°K 10094
Dy ethyl sulphate, 1-20°K, mag. dipole interactions 13734
Fe, 20-1450°C 9853
Fe, 25-1050°C, meas. by current pulse method 1558
Fe–Co alloys, 1.4-4.2°K 17896
Ga, in normal and supercond. states 8947
Gd–La, superconducting, latent heat at critical temp. 19553
H, -175° to +150°C 14909
H_2 crystalline, anomalous sp. ht. 11586
H_2, solid (para), 2-18°K, lattice contrib. 20749
He^3, below 1°K 8879
He^3, liquid, near saturated vapour pressure 223
He^3, liquid, theory 11124
He^3, solid, calc. 14921
He^4, liquid, calc. 16934
He, C_v meas. 2.5-20°K, 0-100 atm. 19203
He, liquid, near λ-curve, density depend. 5228
Hg, electronic, at low temp., temp. depend. 8935
Hg, below 1°K 11584
In, below 1°K, lattice contribution in superconducting state
K, 0.15-1°K 9858 [13489
KCl, at const. volume, 300°K to melting pt. 16207
KCl, at low temp., calc. for 3 models 4261
K halides, calc. 13480
KNO_3, meas. with "thermograph" 2275
Li, 20-300°K, martensitic transformation 7852
Li isotopes, 20 to 300°K 15813
Li–Mg, martensitic transformation 2787
MnZn ferrite, 20-350°C 7853
Mo, 10-273°K 1561
N, liquid, γ at 90°K at high press. 19132
Na, 0.15-2°K 9857-8
Na, 20-300°K, martensitic transformation 7851
NaCl, low temp., calc. for 3 models 4261
NaCl, theor. and exper. data, effective Debye temp. 20743
NaCl:Ca, X-irradiated, thermal props. 2833
NaI, 2.4-8°K 17895
Nb, atomic and electronic heats, 10-273°K 20752
Nb, lattice, in supercond. and normal state, difference 19565
Nb, superconducting electronic sp. ht. 8948
Ne isotopes, at low temps., temp. dependence 12416
Ni, electronic, and energy bands 4267
Ni, 180-1160°C 9853
$NiCl_2.6H_2O$, 1.4-20°K, mag. contribution 4266
Ni–Co alloys, electronic s.h. and energy bands 4267
Ni_2Mn, disordered alloy, temp. dependence 17890
NiZn ferrite, 20-350°C 7853
Np, α-phase, temp. depend. 2789
O_2, at 1-30 atm., 1000-30000°K 7129
Pb 2791-4
Pb, calc., by modified Houston method 7850
Rb halides, calc. 13480
Ru, 10-273°K 1560
Sb_2S_3, structural prop. correl. 13490
Sm ethyl sulphate, mag. sp. ht. 10047

Specific heat - contd
Th, 25-1000°C 17894
Ti—V alloys, 1.4-4.2°K 17896
UF_4, 1.3-20°K 15811
V, atomic and electronic heats, 10-273°K 20752
V—Cr alloys, 1.4-4.2°K 17896
V—Fe alloys, 1.4-4.2°K 17896
W, electron structure calc. 7830
W, 14-300°K 21103
W, 10-273°K 1561
YFe garnet, 1.45°K, mag. field depend. 16143
Zn, in normal and supercond. states 8947
ZnS, long-range and short-range force models, lattice vibrations 7847
Zr, 14-300°K 21103

Spectra (See also Absorption, light; Astronomical spectra; Atmospheric spectra; Colour; Mass spectra; Raman spectra; Spectrochemical analysis; Spectroscopy; Stark effect; X-ray spectra; Zeeman effect).
absorption band profiles, in aberrationless monochromators 12486
arc, d.c., line intensity variations with electrode volatilization 19646
complex molecules 20613
complex molecules, absorption theory 9791
crystals, exciton absorption region 9088
crystals, impurity absorption, effect of acoustic waves 2944
disordered diatomic chains, vibrational spectra, calc. 7845
electron in deep trap, absorption and emission 11755
electrons, synchrotron accelerated, visible emission 11142
emission, substances at room temp., method 3622
emission-line profile parameters, nomogram 2231
gases, processes and eqns. 8718
h.f.s. det. of nuclear mag. moments, comparison with n.m.r. values 5657
h.f.s. in i.r. 16855
i.r., gases 1033
i.r., history 154
i.r., human body radiation, fine-structure 206
i.r. absorption, liquids and compressed gases, theory 974
light molecules, spectroscopic terms 5870
line emission, thermodynamics 12524
line profiles, functional description 3626
line profiles, transformation, applic. temp. meas. 12483
liquids, i.r. absorption band parameters 12488
molecules, symmetrical top, difference of upper and lower state rotational consts., from i.r. intensities 13430
noncond. crystals, fund. absorption edge, effect of elec. fields 11757
one-dimensional equilibrium, in isotropic turbulence 3501
pressure shifting, empirical relations 5928
production, low-voltage pulse discharge 3628
quantum mechanics conference 13426
Rydberg const., precise value 4925
semiconductors, i.r. absorption, effective mass of current carriers 18014
u.v. prompt and delayed emission, in G.M. counters 15183
continuous
"auroral afterglow", laboratory-scale model 2346-7
gases, electron beam energy losses 19764
plasma, contrib. from highest atomic states 19680
stars, interpretation 4904
alkali metals, in H flames 1517-18
rare gases 5056, 9758
H plasmas 479
N, recomb. and "minus" continua 1487
O, recomb. and "minus" continua 1486
flames
absorption, low-pressure organic-gas flames 19219
Bunsen, comparison with luminescence of (Zn,Cd)S:Cu 10052
jet engine, liquid fuel, visible emission 8852-3
line intensities 4174
processes and eqns. 8718
acetylene, effect of deuteration on band spectra 5937
alkali metals, in H 1517-18
boron-containing, green bands 7767
oxyacetylene, OH emission, 1.5 μ region 15730
H + O_3, OH radical emission 5931
Na, effect of compound on line intensities 4174
OH, in $H_2/O_2/N_2$ flames 1519
O—Si—Al, u.v., i.r. and visible, energy distrib. 8854

Spectra — contd
flames — contd
Sr, effect of compound on line intensities 4174
resonance (See also Luminescence).
aqueous salt solutions, asymmetrically broadened emission lines 16709
discharge tubes, non-circular cross-section 19629
fluorescence, polarization, calc. using radiation diffusion 5871-2
h.f.s. intensity anomalies 4175
imprisonment of resonance radiation, effect of Doppler and collision broadening and of h.f.s. 2729
incoherent scattering theory for transport of resonance radiation, verification 13394
layers, plane-parallel, secondary absorption and emission processes 11770
Cs, effect of A at press. up to 1500 atm. 5882
He, absorption, in He—D discharge 483
Hg, imprisonment of resonance radiation, theory and expt. compared 2729
Hg, polarization, collision processes with foreign gases 17691
Hg, at 2537 A, decay, rel. to incoherent scattering theory 13394
I_2, u.v. resonance 5951
K, effect of A at press. up to 1500 atm. 5882
Rb, effect of A at press. up to 1500 atm 5882
atoms (See also Atoms, excitation; Atoms, structure).
calculations in, electronic digital computer programming 5165
complex atoms, theoretical intensities 20583
configuration f^3, spin—orbit interaction 7686
configurations of three electrons, matrix elements of tensor operators 7685
excitation, by high-frequency pulses 12479
hyperfine interaction Hamiltonian 17698
isotope shift, due to non-uniform nuclear charge distrib. 4169
isotope shift, rel. to nuclear deformation 11507
isotopic analysis 13419
kinetic theory applic. to study of emission 3559
Lamb shift, effect of e.m. radiation 2730
Lamb shift, and other radiative effects 2731
light atoms, spectroscopic terms 5870
line intensity ratio, meas. 6934
mesic, review 20564
oscillator strengths, calc. from line widths 15658
polarization of line radiation excited by electron impact 17699
quantum electrodynamic study, Coulomb gauge, propag. function 20025
Racah generalized coefficient 17697
Saha equation departure, Lyman continuous opacity 9763
screening theory, for complex theory 5873
shift, due to nuclear isomerism 2733
statistical properties 17696
trapped, at 4°K 9776
trapped, in solid A, Kr, Xe, environmental perturbations 20661
24 elements, impurity detection in ZrO_2 1971
vector coupling, inhomogeneous, with strongly excited electron 20582
wave-number meas., from Fabry—Perot interferograms 10768
actinides 9772
alkali metals, hyperfine transitions of ground state 17701
alkali metals, pressure shifts due to foreign gases, calc. 7723
alkaline earth metals, optical pumping in foreign gas under high press., spin distrib. 17694
hydrogenic ions, radiative recombination 17707
inert gases, compressed, induced i.r. spectra 17700
inert gases, i.r. emission, interferometric wavelength meas. 16854
rare earth elements 9771-3
rare gases, electron-beam excited 15657
transition metals, in H_2O and D_2O solvents, spectral and reactivity differences 13455
A, afterglow emission 13412
A, electron excited, excitation cross-sections 9759
A, isotope shift 5885
A, spark discharge, line broadening and shift 17702
A_2, u.v., corona discharge 1123-4
A^+, excitation in inert gases 10880

Spectra — contd
atoms — contd
Al, 14000-25000 A 478
Al II, energy levels anal. 15638
Al II, in spark discharges 13417
Ag, transition probabilities 7732
Al, absolute f-values 9757
As 16397
Au^{197}, h.f.s. separation, for ground-state $^2S_{1/2}$ 9518
Ba, absorption, in u.v. 7724
Ba^+, absolute f-values 9757
Be, K emission 15327
Bi^{83}, quadrupole and forbidden lines in L-emission 20584
Br 16397
Br IV, energy bands 20585
C, K emission 15327
Ca, absorption in vac. u.v. 9761
Ca, 6573 A line, collision broadening 17704
Ca, vapour, 2100-1080 A absorption 19220
Ca^+, absolute f-values 9757
Ca II, in quiescent solar prominences 6597
Cd, i.r. emission, interferometric wavelength meas. 16854
Cd, near i.r. 10840
Cd, red line contour, atomic beam meas. 11508
Cd I, isotope shift in 3261 A line 5877
Cd I, triplets, intensity at different excitation conditions 17703
Cd II, excited levels, mag. dipole resonance 2715
Cl, 7000-25000 A 477
Cl I, II, absolute transition probabilities 5887
Co, absolute f-values 9757
Co^{59} I, h.f.s. splitting 13121
Co III, vacuum u.v. observations 9762
Cr, absolute f-values 9757
Cr, Q correction for $3d^n4s^k$ configuration of second spectrum 13414
Cr I, 4500-5000 A intensities 484
Cr^{3+} in Al_2O_3, absorption bands and lines, theory and exp. 645-6
Cs, under increasing gas pressure, resonance lines 1533
Cs^{133}, (4,0),(3,0) microwave transitions 17701
Cs^{133}, resonance lines 17705
Cu, in arc discharge in air, intensity ratio 19643
Cu, in glow discharge above aqueous solns. 8716
Cu I, radiative recombination coeffs. in H discharges 13412
Cu II, standard wavelength in vacuum u.v. 4170
D, n = 3 level, fine structure by microwave-optical method 17708-9
D plasma in Scylla 13385-7
Eu II, h.f.s. 17706
Eu^{2+}, in Eu bromate, visible absorption lines 647
Fe, absolute f-values 9757
Fe I, lower chromosphere of sun 6584
Fe, Ni, Cr, Ti; mutual influences taken three by three 10378
Fe, Q correction for $3d^n4s^k$ configuration of second spectrum 13414
Fe group, neutral atoms, oscillator strengths 20590
Fe group, second spectra, $(3d + 4s)^n$ configurations 4171
Fe series (Sc to Cu), comparison with Hartree—Fock calculations 9737
$Gd^{155,157}$, h.f.s. 13420
$Gd^{155,157}$, h.f.s., nuclear moments calc. 13123
Gd isotopes, with special spectrometer 3634
Ge 16397
H, allowed r.f. lines 20591
H, capture—cascade equations 17667
H, in discharge plasma 15024
H, excitation of Lα near threshold in atomic beam collisions with electrons 1475
H, h.f.s., meson corrections 466
H, intensities in Balmer series 1477
H, ionized, continuous radio absorption coeff. 20592
H, metastable 2S state 17689
H, pressure shifting, empirical relations 5928
H, pulsed discharge, high-temp. plasma parameters 10914
H, in quiescent solar prominences 6597
H, self-absorption in electrodeless discharge 4172
H, short-lined states, fine structure by microwave-optical method 17708-9
H, Stark broadening in plasma, calc. 1480
H, variation intensity, with current through discharge 3623
Spectra — contd
atoms — contd
H^2 20646
H^-, absorption coeffs. 9765
$H^{1,2,3}$, hyperfine splittings, precise det. 7725
Hβ line profile, in A behind shock wave 15659
He, in crossed elec. and mag. fields 476
He, excited by electron impact 20562
He, fine structure, precise meas. 2732
He, 5876 A, formation in shock tube 483
He, 5016 A line, precise wavelength 4925
He, isotope shift of deepest ^3P and ^1P levels, calc. 1470
He, level populations in glow discharge 9767
He, near i.r. 16846
He, in quiescent solar prominences 6597
He, r.f. resonances, detection of opt. transition $n = 4 \rightarrow n = 3$ 17656
He, self-absorption in electrodeless discharge 4172
He, Stark effect 5875
He, u.v., corona discharge 1123-4
He^3, h.f.s. and isotope shift 9766
$He^{3,4}$, fine structure 5879
$He^{3,4}$, Lamb shifts 11509
He^4, optical pumping in $^3S_1$ metastable state 13415
He^4 I 7722
He I, in spark discharges 13417
He I, wavelength determinations 2734
He II, excitation in solar chromosphere 6596
Hg, arc, wavelength meas. at diff. voltages 6937
Hg, i.r. emission, interferometric wavelength meas. 16854
Hg, under increasing gas pressure, resonance lines 1533
Hg, Lamb shift, calc. for K-electron 9731
Hg, multiplet and hyperfine structures 20586
Hg, near i.r. 16846
Hg, optico-acoustic effect, u.v. excitation 19214
Hg, pressure shifting, empirical relations 5928
Hg, re-emitted resonance radiation, influence of inter-atomic resonance 17713
Hg, 6123 A line, h.f.s. 5880
Hg, trapped in solid A, Kr, Xe 20661
Hg, 2536.52 line, influence of Kr 7727
Hg, 2537 A line, 6^3P_1 state lifetime, det. for five isotopes 5856
Hg^{197}, h.f.s. 17711
Hg^{197}, isomeric shift, effect of nuclear shape 7721
$Hg^{198,203}$, h.f.s. 5879
Hg I, h.f.s. 5656, 17710
Hg—Tl mixtures, sensitized fluorescence, effect of added A and He 15660
Hg vapour lamps, 1850 and 2537 lines, intensities 9768
Ho isotopes, with special spectrometer 3634
In, λ4101 and 4511 lines, effect of He and A at up to 120 atm 5881
In, in glow discharge above aqueous solns. 8716
In^{115} III, isomeric shift, effect of nuclear shape 7721
K, under increasing gas pressure, resonance lines 1533
$K^{39,41}$, h.f.s., pressure shifts in H and inert gases 17712
Kr, isotope shift 5885
Kr^{83}, h.f.s., term-splittings 1483
Kr I, 14000-25000 A 478
Li, isotopic analysis 9748
Li^+, Lamb shift 1481
Li I, 7000-27000 A 5883
Lu isotopes, with special spectrometer 3634
Mn, absolute f-values 9757
Mn, pressure broadening of violet triplet by A and He 13416
Mo, absolute f-values 9757
Mo, isotope shift for $Mo^{96,97}$ 5884
Mo, isotopic shift 15661
Mo, $M_{4,5}$ emission 15327
N II, bands in air point-discharge 11510
Na, distance between D lines 16871
Na, in flames, effect of compound 4174
Na, re-emitted resonance radiation, influence of inter-atomic resonance 17713
Na^{23}, microwave (2,0),(1,0) transitions 17701
Nb, $M_{4,5}$ emission 15327
Nd, isotopic shift 15662
Ne, absorption, 600-220 A 9770
Ne, elec. discharge, under pulsed h.f. field 10889
Ne, isotope shift 5885

Spectra – contd
atoms – contd
Ne, u.v., corona discharge 1123-4
Ne IV, transition probabilities of forbidden lines 17670
Ni, absolute f-values 9757
O 480, 20587
O, absorption 1533
O, excited by 0.5-1 MeV protons 5942
O I, forbidden doublet, intensity ratio 15663
O I, forbidden line intensities, in expanding stellar atmosphere 18844
O I, 6300 and 6364 A lines, lifetime 7728
O II, bands in air point-discharge 11510
Os I, II 20588
Pb, isotopic anal. 13419
Pb^{207}, h.f.s. 5879
Pd, arc, line intensity variations with electrode volatilization 19646
Pd^{105}, h.f.s. 5879
Pr^{3+}, calc. 5886
Pu^{239}, h.f.s. 20589
Pu I 7700
Rb, under increasing gas pressure, resonance lines 1533
Rb^{87}, 70 c/s line width, optical orientation and microwave detection 17695
Ru I, analysis 7729
Ru I, low even configurations 7731
Sb 16397
Se 16397
Si I, II, absolute transition probabilities 5887
Si IV 15664
Sn 16397
Sr, in flames, effect of compound 4174
Sr, isotopic composition 13418
Sr, stable isotopes and Sr^{90}, isotopic shift 9774
Sr^{+}, absolute f-values 9757
Tb, h.f.s. splittings, Zeeman effect and intensities 17714
Te 16397
Th I, even and odd levels, g-values 7733
Th I-IV, 2000-11550 A 15665
Ti, absolute f-values 9757
Ti I, high-excitation relative f-values 15666
Ti I, revised term values 13410
Ti II, in lower chromosphere of sun 6584
Tl, absolute f-values 9757
Tl, under increasing gas pressure, resonance lines 1533
Tl, vapour, perturbation by A and H under pressure 5888
Tm^{++}, calc. 5886
U, isotopic displacements 5890
U V, in UF_4, 2000 A-8 μ 1731
$U^{235,8}$ mixture, isotopic shift of 46 lines 4176
V, absolute f-values 9757
V, Q correction for $3d^n4s^k$ configuration of second spectrum 13414
W, arc spectrum, isotopic shift 15667
W, bremsstrahl-isochromat, structure of short-wave limit 20593
Xe, isotopic shift 5885
Xe–O_2 mixtures, electron-beam excited 15657
Zn II, excited levels, mag. dipole resonance 2715
inorganic molecules (See also Molecules, internal mechanics).
absorption bands, 2-16 μ, for spectrometer calibration 6938
α-excited, dissociation and γ-de-excitation branching 498
glow discharges, 1-76 cm Hg 1520
paramagnetic ions, line shapes, temp. dependence 20637
review, work in USSR 9809
saturation of microwave rotational resonances 5919
solvent effects in infrared 1529
trapped, at 4°K 9776
trapped, in solid A, Kr, Xe, environmental perturbations 20661
air, behind shock waves 19212-13
selenates, metallic, i.r. absorption spectra 20625
A–SO_2 mixtures, free radicals in shock waves 17760
H–CO_2 mixtures, simultaneous vibrational transitions 7749
inorganic molecules, diatomic
compressed gases, i.r. absorption 972
force constants, depend. on electronegativities 5895
gases, induced i.r. absorption 7748
$\Sigma-\Delta$ and $\Pi-\Delta$ transition intensities 15746

Spectra – contd
inorganic molecules, diatomic – contd
u.v. absorption, O content in gas mixtures 4755
A–Xe, visible bands, in h.v. discharge 4182, 7766
Ag_2, production and study, state constants 5925
Au_2, production and study, state constants 5925
AuAl, production and study, state constants 5925
AuMg, production and study, state constants 5925
AuMg, u.v. band spectra 20657
BO, α and β systems 15750
BeO, $(B^1\Sigma \rightarrow X^1\Sigma)$, overlap integrals 9811
C_2, ground state 4215
C_2, trapped in solid A, Kr, Xe 20661
CN, as thermometric molecule in shock tube 12455
CO, fourth positive band system 7776
CO, i.r. absorption intensity, temp. dependence 3568
CO, isotopic shifts 15713
CO, rotational temp. in hollow cathode 7753
CO, triplet-system intensities 9812
CO, vib.–rot. structure, gaseous and in solution 4199
CO^+, comet-tail system 7777, 15750
CO–H_2 mixtures, pressure-induced transitions, calc. 493
CO_2, gas, i.r. absorption bands 8717
Cl_2, in presence of A, band systems 20615-16
Cl_2, vacuum u.v. absorption 497
Cl_2^+, emission spectrum 5924
Cu_2, production and study, state constants 5925
CuH, in glow discharge above aqueous solns. 8716
DF, u.v., analysis 9818
FeCl, visible 5941
H_2, pressure-induced, rotational absorption 493-4, 1495
H_2, vibration–rotation, Jupiter high dispersion 14397
H_3^+ 20646
HBr, i.r. absorption, Q branch study, perturbed 7752
HCl, i.r. absorption, collision-broadening by foreign gases 15788
HCl, i.r. absorption, temp. dependence 3568
HCl, i.r. absorption in vibration–rotation bands 9793-4
HCl, pressure-induced Q branch 17749
HCl, pressure-induced shifts in 1.8 μ band due to foreign gases 5926-8
HCl, rotational constants 15701
HCl, 2-0 band, perturbation by Kr and Xe 15726-7
HD, rotation–vibration spectrum 11523
HDO vapour, vibration–rotation band 5929
HF, monomer–dimer spectra, overlapping 5940
HF, perturbation of line by compressed rare gases 20632
HF, u.v., analysis 9818
H halides, vibrational–rotational structure, gaseous and solutions 4199
He–Ne, molecular ion bands in discharge 9813
HgBr, 4000-5000 A 20619
HgI, 4000-5000 A 20619
I_2, in presence of A 1527
I_2, u.v. resonance 5951
IBr, magnetic rotation 5932
IBr, red absorption band, rotational anal. 9769
ICl, absorption, visible and near i.r. 7757
ICl, magnetic rotation 5932
IO, 4100-6300 A 5947
InCl, absorption, near 3600 A 5933
InCl, in glow discharge above aqueous solns. 8716
Kr–Xe, visible bands, in h.v. discharge 4182
LaO, proposed electronic transitions 11529
LiH, i.r. 5935
Li halides, i.r. 20620
MnO, band spectrum, 57 band-heads 2768
N, active, pressure dependence 20621
N_2, afterglow, 5 msec after discharge 1522
N_2, afterglows 4189
N_2 9810
N_2, band system 7769
N_2, bands, in N_2–A discharge 1523
N_2, bands, optical excitation functions 1521
N_2, effect of CO in glow discharge 5994
N_2, 8265.5 A system 1530
N_2, excited by 0.5-1 MeV protons 5942
N_2, forbidden band systems 7788
N_2, i.r. Y bands, structure 15724
N_2, intensity distrib. in band systems 20622
N_2, isotopic shifts 15713
N_2, predissociation 13435

Spectra — contd
inorganic molecules, diatomic — contd
N_2, trapped in solid matrix 7770
N_2, vac. u.v., emission bands of forbidden systems 5955
N_2 and N_2^+, in auroral afterglow 5293
N_2^+, bands, in air point-discharge 11510
N_2^+, bands, rotational temp. 1494
N_2^+, excitation functions of neg. system bands 15703
N_2^+, Meinel bands near 1.5 μ, in aurora 6474
NH 495
NH, (1,0) band, rotational anal. 15699
NH, trapped in solid A, Kr, Xe 20861
NO, absorption 1533
NO, β-bands, upper vibration state (v' = 7) 7790
NO, γ-bands, oscillator strength 13432
NO, γ-bands, rotational anal. 15704
NO, γ, ε, β bands 5943
NO, i.r. absorption temp. dependence 3568
NO, magnetic rotation spectra, near i.r. 20623
NO, molecular orbital calc. 15712
NO, trapped in solid matrix 7770
NO, u.v. γ-bands, oscillator strengths 9819
NO, vib.—rot. structure, gaseous and in solution 4199
Na_2, band emission behind shock fronts 5946
NiBr, visible emission spectrum 5944
NiCl, visible emission spectrum 5944
O_2, electrodeless discharge 480
O_2, Schumann—Runge system 5953
O_2, solid, α-phase, 2300-8800 A absorption, electron irrad. effects 5945
O_2, 3350-4500 A, afterglow and airglow 5954
O_2, trapped in solid matrix 7770
O_2^+, first negative band system 5952
OH, 1.5 μ region 15730
OH, $^2\Sigma^+$ levels, abnormal emission in flames 1519
PH, (1,0) band of $^3\Pi_1 - ^3\Sigma^-$ system 11520
SO, absorption 8318
SbO, band spectrum, doublet system 7773
SnO, rot. analysis of $A^1\Pi - X^1\Sigma$ system 9800
TiO, band 11032 A, rotational analysis 5936
Xe_2, u.v. and visible emission due to shock waves 15728-9
inorganic molecules, diatomic, radiofrequency
D halides 2769
H_2^+ 17742, 20617
H_2 negative ions, absorption frequencies, 2.5-44 Mc/s 9806
$K^{39}F$, molecular beam determination 5914
NO, h.f.s., N nucl. quadrupole moment 13443
O ions, absorption from 3 to 44 Mc/s 4795
OH, ground-state Λ-doubling transitions, lab. observation 1534
inorganic molecules, polyatomic
compressed gases, i.r. absorption 972
frozen products of gas discharges, exam. of absorption spectrum 4420
i.r., intensity and polarization calc. 15721
i.r. absorption, intensities and polarizations, calc. 1531
i.r. band intensities 20608
paramagnetic salts, absorption by hydrated ions, theory 5939
actinide cpds., absorption 20656
boron-containing flames, green bands 7767
disiloxane, far i.r. 20635
hexahalide complexes, electron transfer spectra 20650
nitrile band, solvent effect on intensity 490
pyroselenites, i.r. absorption study cation $X_2O_3^{2-}$ 11526
pyrosulphates, i.r. absorption study cation $X_2O_4^{2-}$ 11526
quartz vapour, emission, 2500-4500 A 1525
transition-element complexes 5958
BF_3, i.r. intensity calc. 17747
B_2O_3 and B_2O_3, i.r. emission 4193
B—S system, ionic species, i.r. emission 14970
C_2 7779
CO_2, absorption in extreme u.v. 7781
CO_2, i.r. absorption in vibration—rotational bands 9793-4
COS 7780
CS_2 7780
CS_2, i.r. absorption, temp. dependence 3568
CS_2, $3\nu_3$ band of $C^{12}S^{32}S^{34}$ 1526
DCN, vibration bands, line strengths 9797
D_2O, u.v. absorption, temp. depend. 15736
H_3^+ and H_4^+ 20646
HBO_2, i.r. emission 4192
HCN 7756
Spectra — contd
inorganic molecules, polyatomic — contd
HCN, highly precise, i.r. wavelengths 17745
HCN, ν_2 band, in i.r. 4198
HCO, from acetylene, effect of deuteration 5937
HDO, u.v. absorption, temp. depend. 15736
HN_3, photolysis 3320
H_2O, ortho and para, trapped in solid A and Xe, near i.r. absorption 15722
H_2O, rotational spectrum, i.r. absorption 4200
H_2O, u.v. absorption, temp. depend. 15736
IrF_6, vibrational spectra, search for Jahn—Teller effect 15723
K_2ReCl_6 17761
N_2—N, existence in solid state, discharge product 4419
NCO radical, electronic band system 2765
NF_3, i.r. intensity calc. 17747
NH_2 radicals, absorption spectra with N^{14}, N^{15}, H and D 4214
NH_3 4201
NH_3, absorption, 1440-1840 cm^{-1} and 510-1280 cm^{-1} 5934
NH_3, gaseous emission of i.r. 8794
NH_3, i.r., theory of intensities 4203
NH_3, Jupiter high dispersion spectra 14397
N_2O 7780
N_2O^+, radiative lifetime of $B\ ^2\Sigma^+$ state 15754
N_2O_2, i.r. absorption in solid, unstable isomer 17750
NO_2, absorption of visible light, temp. depend. 1524
NO_2, in air afterglow 790
N_2O_4, i.r., nonplanar isomer 2751
N_2O_4, i.r. absorption in solid, unstable isomers 17750
$N_2^{14,15}O_4$, i.r. spectra, gaseous and liquid 13436
Nb oxide, band system 2766-7
Ni(II) complexes 2749
NpF_6, theory 7768
O_3, pure rotational absorption, 125-500 μ 17748
OsF_6 4202
PH_3, i.r., theory of intensities 4203
PtF_6 4202
ReF_6 20624
SF_6, i.r. intensity calc. 17747
SO_2, i.r., theory of intensities 4203
SiF_4, i.r. intensity calc. 17747
TiI_4, normal vibration frequencies and thermodynamic functions 1496
inorganic molecules, polyatomic, radiofrequency
energy levels of slightly asymmetric top 13431
D_2O, microwave h.f.s. 20667
HDO, microwave h.f.s. 20667
H_2O_2, e.s.r. 10678
N_2F_4 2752
NH_3, inversion frequency, pressure shift 13442
NO_2, fine structure, theory 2761
OCS, saturation of rotational resonances 5918
PH_3, K-type doubling 13440
$S^{32,34}O_2$, h.f.s., semi-rigid rotor interpretation 5917
inorganic liquids and solutions
Chicago research (1958) 9810
alkali nitrates and nitrites, i.r. absorption above and below melting pt. 16069
halide solutions, absorption by dihalide ion after flash photolysis 10357
iodine solns., u.v. and visible absorption peaks 16705
transition metal ions and complexes in D_2O, isotope shifts 3531
water, i.r. 82
water, sorbed onto zeolite, absorption bands 10376
water layers, adsorbed on alkali halides 10375
Cr^{3+}, in solutions, absorption bands 10041
H_2, i.r. fundamental band 4196
HCl, in solution 15702
$LiNO_3$, i.r. absorption 6926
$NaNO_3$, i.r. absorption 6926
inorganic solids
exciton absorption bands, theory of line-shapes 11608
exciton—lattice interaction, line shape of exciton absorption band 13508
frustrated total internal reflection, surface study 10030
ionic crystals, exciton spectra 16048
ionic crystals, i.r. absorption, departures from approx. theory, rel. to dielec. const. 1364
ionic crystals, u.v. absorption, change on melting 10038

Spectra – contd
inorganic solids – contd
lattice vibration spectra, centre law 16050
magnetic crystals, absorption, 10^4-10^5 cm^{-1} 10036
paramagnetic ions, optical pumping 18121
polar crystals, absorption of linear anharmonic chain 18122
semiconductors, i.r. absorption 1734, 18015
semiconductors, i.r. region, free-electron theory 6163
7 ferroelec. cpds. with short H-bonds, i.r. absorption 650
substances transparent in far i.r. 10035
superconductors, far i.r. absorption 10845
trapped species, in solid A, Kr, Xe 20661
alexandrite, absorption, temp. depend. 16061
alkali halides, colour centres, effect of pressure 9906
alkali halides, exciton absorption spectra 6036
alkali halides, extinction bands, correl. with plasma resonance 7876
alkali halides, theory of halogen atom doublet 2810
alkali halides, U-centres, i.r. spectrum 11631
alkali halides, u.v. absorption at room temp. and 80°K 2937
alkali nitrates and nitrites, i.r. absorption above and below melting pt. 16069
beryl, Fe^{3+} absorption 16169
α-brasses, absorption, 0.23-4.0 μ, at 4.2°K 1542
cobaltous salts, hydrated, absorption band structure 16052
diamond, 3000-7000 A absorption 16053
diamond, strong absorption bands in u.v. 4417
diamond, type I, i.r. and u.v. absorption due to N impurities 652
emerald, absorption, temp. depend. 16061
glasses, based on Ti, As and Sb chalcogenides, absorption spectra 13609
graphite, reflection spectra 11760
heavy metal halides, absorption edge, pressure depend. 4406
ice, dense forms 6178
ice, molecular potentials 13694
ice crystals, i.r., H positions 10044
olivine, absorption edge, temp. and press. depend. 8798
quartz, artificial, Brillouin scattering 11763
quartz, extinction bands, correl. with plasma resonance 7876
quartz, i.r. absorption, due to defects 16070
quartz, i.r. absorption, 3μ region 4416, 18128
quartz, with Na and Li impurity ions, X-irrad., absorption bands 18154
quartz, synthetic, i.r. absorption due to OH defects 11764
quartz, visible absorption band 18135
rare earth elements, complex spectra, term analysis technique 16853
rocksalt-type crystals, absorption spectra detail 20976
ruby, absorption, temp. depend. 16061
ruby, stimulated emission 20988 [7876
sapphire, extinction bands, correl. with plasma resonance
sapphire, absorption, induced by neutron and electron irradiation 20989
silica, fused, radiation-induced coloration 16073
silicate crystals and glasses 1499
silicate ion, in garnet structure 2941
steels, effect of apparent dilution by components on each other 8339
sulphide phosphors, absorption in vis. and near u.v. region 10037
tourmaline, absorption, temp. depend. 16061
transition-element ions, rel. to electronic structure 20728
A, vac. u.v. absorption, at 4.2°K 13699
Ag halides, absorption 20871
Ag halides, absorption band positions, impurity ions 16049
Ag halides, extinction bands, correl. with plasma resonance 7876
Al_2O_3, ruby, Cr^{3+} line optical spectrum 20978
Al_2O_3–Cr_2O_3, Cr^{3+} coloured crystals, absorption 4410
Al_2O_3:V, 0.4-1.2 μ 20991
AlSb, n-type, absorption, 0.7-38 μ 6184
AlSb–GaSb alloys 12079
BF_3, i.r., at 83°K 2940
BaO–TiO_2–P_2O_5, u.v. absorption 11773
Bi halides, in pressed alkali halide disks 8001
$CaCO_3$, calcite, crystal field effects 524
CaF_2, i.r. absorption 10040
CaF_2, pure and doped, coloured by electrons at 2.5 MeV 20836-7
CaF_2, synthetic and natural 11759
CaF_2, Yb^{3+} absorption 11938
CaF_2:Eu^{3+}, line luminescence 9909
CaF_2:Sm^{3+}, line luminescence 9909
CdF_2, single crystals, before and after X-irradiation 2823
CdF_2:Ce, $^2F_{7/2} \leftarrow {}^2F_{5/2}$ transition of Ce^{3+} 13698
CdF_2:Nd, i.r. absorption 13698
CdF_2:Pr, i.r. absorption 13698
CdI_2 and CdI_2.PbI_2, absorption in vis. and near u.v. region 10037
CdO, i.r. absorption 11752
CdS, absorption, at low temps., mechanical working depend. 18123
CdS, absorption edge, press. depend. 4408
CdS, absorption edge, temp. depend. 10039
CdS, fine structure of photoconductivity spectra 7955
CdS, polarized reflection, at 4.2 and 77°K, exciton spectrum 2943
CdS, reflection spectrum 6185
CdSe, abs. and reflection, at 77° and 4°K 13692
CdSe films 18113
Co^{2+} salts, i.r. absorption from L.S splittings 1732
Co(II) cpds. 4413-14
$CoBr_2$.$6H_2O$, low temp. optical absorption 16051
$CoCl_2$.$6H_2O$, low temp. optical absorption 16051
CoO, optical absorption, above and below Neel temp. 1725
CoO, 200-1000 mμ 20977
Cr, transmission in vac. u.v. plasma freq. and $M_{2,3}$ band 20981
Cr^{3+}, in crystals and glasses, absorption bands 10041
Cr^{3+}, in ruby 20979
CsBr, F-band structure 7894
Cs_3CoCl_5, no i.r. absorption from L.S splittings 1732
Cs_3Sb, absorption, analogy with photoelectron energy distrib. 1544
Cs–Sb layers 11709
CuBr, reflection, 77°K 16047
CuCl, at 4.2°K 11761
CuCl, reflection, 77°K 16047
CuI, absorption spectra, at low temps. 21000
CuI, reflection, 77°K 16047
Cu_2O, copper-coloured, absorption spectrum 18125
Cu_2O, exciton absorption, quadrupole excitation 11762
Cu_2O, films 20982
Cu_2O, polaron-produced absorption 644
Cu_2O, visible absorption, surface treatment effects 1679
Cu_2O, visible absorption, temp. depend. 643
Cu–Zn alloys, containing Al, Sn, Mn or Pb 1488
Dy chloride and nitrate, absorption, 58 and 4.2°K 16054
Er^{3+} 6179
Eu^{2+} and Gd^{2+}, in CaF_2 18126
Fe^{2+}, in cubic fields, theory and expts. 10228-9
GaAs, absorption edge, press. depend. 4408
GaP, absorption edge, press. depend. 4408
GaP, p-type, absorption measurements 20916
GaP, 1-4 μ absorption band, origin 16055
GaSb, absorption edge, press. depend. 4408
Ge, absorption 1-10 eV 8005
Ge, electron irradiated, i.r. emission, radiative recomb. 20984
Ge, frustrated total internal reflection, surface study 10030
Ge, i.r., due to recombination of excess carriers 591
Ge, i.r. absorption, due to minority carriers 1733
Ge, reverse biased p–n junction, visible light from 2875
Ge:Cu, i.r. absorption, at low temp. 18124
Ge:Zn, i.r. absorption, at low temp. 18124
$GeCl_4$, Raman, using coupled prism-monochromator–recording interferometer 16842
GeO_2, oxygen diffusion 7900
H, i.r. fundamental band 4196
HN_3, irradiated 4727
H_2O, vac. u.v. absorption 13696
Hg halides, absorption edge, press. depend. 4407
Hg halides, in pressed alkali halide disks 8001
(In, Ga)As, energy band gap 2897
InSb, absorption, 5-10 μ, at 78 and 298°K 1727
InSb–GaSb 611
InSb–GaSb, i.r. absorption, composition depend. 1726
Kazide, coloured by u.v. and X-irradiation 8008
KBr, i.r. absorption, anionic impurities, temp. depend. 6177

Spectra — contd
inorganic solids — contd [6051
KBr, V-centre bands in crystals containing Ca, Sr, Ba ions
KBr, X-ray irrad. at 10° K, colour centre absorption 9910
KBr:In, absorption, effect of X-rays 10065
KBr:Tl, X-ray irrad., at low temp. 1596
KCl, colloid centres, absorption 11634
KCl, i.r. absorption, anionic impurities, temp. depend. 6177
KCl, V-centre bands in crystals containing Ca, Sr, Ba ions 6051
KCl, X-irradiated, 420 mμ absorption 558
KCl, X-ray irrad., α and β bands 16064
KCl, X-ray irrad. at 10° K, colour centre absorption 9910
KCl:Ca, X- and γ-irrad. 2938
KCl:Pb, absorption, effect of annealing, at 600° C 20990
KCl:Tl, absorption up to 560° C, rel. to Tl conc. 13709
KCl:Tl, interpretation by configuration coordinate model 6033
KCl—NaCl, mixed crystals, 420 mμ absorption 558
KCl—NaCl, mixed crystals, X-irradiated, F-band position 557
$KCr(SO_4)_2.12H_2O$, Cr^{3+} coloured crystals, absorption 4410
K halides, F-centres, short-wave absorption 17965
K halides, with O complexes, absorption spectrum, photochem. 8009
K halides, Tl-doped, F-band absorption 16065
KI, exciton band, extinction coeff. 2811
KI, F-centres, optical aggregation 1597
KI, i.r. absorption, anionic impurities, temp. depend. 6177
KI:Tl, absorption and emission 20997
KI:Tl, X-ray irrad., at low temp. 1596
KOH 20987
KOH, KOD, near i.r. absorption 1736
K pentaborates, absorption spectra 6360
K_2Sb, absorption, analogy with photoelectron energy distrib. 1544
Kr, vac. u.v. absorption, at 4.2° K 13699
LiD, i.r. absorption, 12.5-25 μ 18127
LiF, in i.r. 6182
LiF, line luminescence 9909
LiH, i.r. absorption, 12.5-25 μ 18127
LiI, u.v. absorption, change on melting 10038
$LiNO_3$, i.r. absorption 6926
LiOH, i.r. absorption, polarized 1735
LiOH, LiOD, near i.r. absorption 1736
$MnBr_2$, absorption 16058-9
$MnBr_2$, optical absorption, ligand field theory 1728
$MnBr_2.4H_2O$, absorption in antiferromag. state 13695
$MnCl_2$, absorption 16058-9
$MnCl_2$, optical absorption, ligand field theory 1728
$MnCl_2.4H_2O$, absorption in antiferromag. state 13695
MnO, optical absorption, above and below Néel temp. 1725
Mg fluorogermanate, Mn^{4+} centre absorption 16087
MgO, Fe^{2+} and Fe^{3+} absorption in 10229
NH_3, vac. u.v. absorption 13696
NH_4^+, in crystals, i.r. intensities 6181
$(NH_4)_2BeF_4$, i.r. spectra 11957
NH_4CNS 4411
$(NH_4)_2SO_4$, i.r. spectra 11957
N_2O_3, unstable isomer 17750
N_2O_4, unstable isomers 17750
Na azide, absorption band at 520 mμ due to colloidal Na 16063
Na azide, coloured by u.v. and X-ray radiation 8008
NaBr, colloid centres, absorption 11634
NaCl, coloured, absorption 18072
NaCl, i.r. reflection 8007
NaCl, X-ray irrad., α and β bands 16064
NaCl:Pb, absorption, effect of annealing, at 600° C 20990
NaF, X-ray irrad., α and β bands 16064
NaI, 22 samples, reflection and transmission, 20° to −190° C 21006
NaI:Tl, absorption and emission 20997
$NaNO_3$, i.r. absorption 6926
$NaNO_2$, crystal field effects 524
$Na_2O—SiO_2$ glasses, i.r. reflection 4679
NaOH, NaOD, near i.r. absorption 1736
Nb_2O_5, anodic oxide films 18411
Nd^{3+} 6179
Ni(II) ion, hydrated, in various crystals 4415
NiO, 0.24 eV absorption band, change due to added MnO and CoO 653

Spectra — contd
inorganic solids — contd
NiO, 200-1000 mμ 20977
$NiSO_4.6H_2O$, $NiSO_4.7H_2O$, 2400-9100A, at −205° and 18° C 20985
O_3, α-phase, 2300-8800 A absorption, electron irrad. effects 5945
O_3, reaction products with atomic H 12098
PbI_2, absorption in vis. and near u.v. region 10037
Pb silicate glasses, γ-irradiated, absorption 16074
$Pr(NO_3)_3.6H_2O$, absorption line shift with film thickness 2942
Rb halides, F-centres, short-wave absorption 17965
S, absorption edge, temp. and press. depend. 8798
Sb halides, in pressed alkali halide disks 8001
Sb_2Se_3, 400-800 mμ absorption 599
Se, absorption in vis. and near u.v. region 10037
Si, effect of O on fine structure 20986
Si, i.r., due to free charge carriers 16071
Si, intrinsic low-temp. emission, theory of intensity maxima 9871
Si, n-type, i.r. absorption, by electron scattering 18129
Si, p-type, neutron irrad., 1-10 μ 651
β-SiC, absorption, 2.3-2.9 eV 16062
$SnBr_4.SnI_4$, absorption edge, press. depend. 4407
Te, i.r. absorption, polarization depend., theory 6127
$TlBr—NH_4Br$ system, reflection spectra 13714
U^{4+}, in crystals 18130
UF_4, 2000A-8 μ, U^{4+} absorption 1731
Xe, vac. u.v. absorption, at 4.2° K 13699
YFe garnet, exchange splitting 6186
ZnO, absorption edge, press. depend. 4408
ZnO, i.r. absorption 8002
ZnO, i.r. reflection spectra 11767
ZnS 13700
ZnS, absorption, 220-600 mμ, 110-500° K 10048
ZnS, absorption edge, press. depend. 4408
ZnS, Cu and Ag activated, u.v. absorption 6161
ZnS, Fe^{2+} absorption in 10229
ZnS—CdS, Cu and Ag activated, u.v. absorption 6161
ZnSe, absorption edge, press. depend. 4408
ZnTe, absorption edge, press. depend. 4408
inorganic solids, radiofrequency

organic molecules and substances (See also Molecules, internal mechanics).
absorption, in low-pressure flames, various molecules 19219
absorption and fluorescence, radicals, by h.f. discharge of aromatic vapours 6199
absorption wavelengths, from metallic model of molecule 15679
Chicago research (1958) 9810
electronic spectra, effect of solvents 15739
forbidden character of allowed electronic transitions 15747-8
review, USSR work 9809
semiconductor dyes, long-wave absorption, singlet excitation state 13619
u.v. absorption, temp. depend., H-bonding 5950
acetanilide, MO calc. 15705
acetylanthracenes, in solvent mixtures, fluorescence spectra 10675
anthracene, absorption of single crystal plates at 20.4° K 10057
aromatics, condensed-ring, effect of high pressure and low temp. on absorption 15733
aryl derivatives of oxadiazole in polystyrene, absorption and luminescence 10073
azulene, solvent shifts 16707
bacteriochlorophyll, 3700-7900 A, calc. 9815
bacteriopheophytin, 3700-7900 A, calc. 9815
benzene, and mono- and divalent ions, electronic spectra, correlations 20648
benzenes, p-disubstituted, forbidden character in allowed electronic transitions 15747
benzene, vibronic calculations 15748
p-benzoquinone 15706-7
Capri blue, in lead nitrate crystals 13954
carboxylic acids, substituted, absorption 18140
coal vitrains, reflection spectra 11760
coronene, and mono- and divalent ions, electronic spectra, correlations 20648

Spectra — contd
organic molecules and substances — contd [16066
9,10-dihydroanthracene containing anthracene impurity
2,6-dimethylnaphthalene, polarized absorption 18132
2,5-dimethylpyrazine, solvent effects on n → π* transitions 15742
diphenylene, in naphthalene 18131
α and β-fluoronaphthalenes, u.v. absorption 5956
formyl fluoride 15740
hydrocarbons, alternant, and mono- and divalent ions, electronic spectra, correlations 20648
hydrocarbons, aromatic, in boric acid glasses, photoionization study 21290
hydrocarbons, aromatic polynuclear, solvent shifts in paraffin hydrocarbons 16707
hydrocarbons, electronic interaction 11530
iodine solns., u.v. and visible absorption peaks 16705
ketones, n—π* u.v. absorpt. and i.r. CO band, correl. 7791
mesonaphthodianthrene photo-oxide 21289
methane, absorption, 2470-3200 cm^{-1} 15735
methane, solid, vac. u.v. absorption 13696
naphthalene, with methylnaphthalene and naphthols, temp. depend. 21003
naphthalene, solvent shifts 16707
naphthalene derivatives, absorption and phosphorescence spectra 5949
naphthalenes, fluorinated, electronic shifts 5957
nitromethane, molecular orbital calc. 15712
n-paraffins, crystalline, vibrational spectra, methylene rocking and wagging modes 13697
phenanthrene, solvent shifts 16707
phenol, under flash photolysis 6413
polyethylene, i.r., b_{1u} methylene wagging and twisting 15792
porphin complexes, Kuhn electron gas model, ring form 9814
porphyrins, theory 20658
pyrazine, solvent effects in n → π* transitions 15742
pyrene, polarization of first two electronic transitions 15755
pyridine, u.v. absorption in different solvents 6804
quinoxaline 2,3 dithiol chelates with Ni, Co and Pd, absorption spectra 20631
triphenylene, and mono- and divalent ions, electronic spectra, correlations 20648
trisoxalatometallates, crystalline 16067
vitrinite, ultra-thin sections, absorption of u.v. and visible light 20992
CBr_4, Cl_2, absorption edge, press. depend. 4407
CD_3H, vibrational—rotational bands 7761
CH^+, extension of $^1\Pi-{}^1\Sigma$ system 6551
CH_3 radicals, recorded through flash-heated grids 17759
C_2H_2—O_2—argon mixtures, free radicals in shock waves
CH_4, Jupiter high dispersion spectra 14397 [17760
C_6H_6, C_6D_6 and (C_6H_6 + C_6D_6) mixed crystals, absorption 7800
$C_{10}H_{12}$, absorption line calc. 11533
CH_3D, vibrational—rotational bands 7761
CHI_3, absorption edge, press. depend. 4407
CN, cometary study 18725, 20611 [18775
CN, low chromosphere emission, excitation temperature
CN, red system (0,0) and (0,1) bands, analysis 20618
Co II coordination cpds 4413-14
Cr trio-acetyl acetone, crystal spectra 20980
Cu mono, di- and tri-ethanolamine complexes, absorption 13693
Dy ethylsulphate, absorption, 58° and 4.2°K 16054
Fe mono, di- and tri-ethanolamine complexes, absorption 13693
Ni mono, di- and tri-ethanolamine complexes, absorption 13693
Sm ethylsulphate, Sm^{3+} anal. term diagrams 10047
organic molecules and substances, infrared
absorption bands, 2-16 μ, for spectrometer calibration 6938
complex molecules, isotopic frequency rule 15715
compressed gases, absorption 972
50-350 μ, use of plane grating in zero order 6927
films, on metals, reflection study 6925
intensity calc. formula 15720
intensity and polarization calc. 15721
isotopic molecules, relationships between band intensities 15719

Spectra — contd
organic molecules and substances, infrared — contd
polar liquids, absorption band intensity, temp. dependence 3534
polyatomic molecules, band intensities 20608
solvent effects 1529
solvent effects on intermolec. forces, freq. shifts and band intensities 10669-70
acetonitrile, width and profile 20614
acetylene, $\nu_1 + \nu_3$ band, perturbation by Kr and Xe 15726-7
acetylene, in organic solvents 9802
1-alkenes, rotational isomerism 15783
alkyldiboranes 7760
alkyldiboranes, isotopic variants 20634
amides, monosubstituted, interaction with benzene in soln. 3532
benzene, crystalline 2939, 8003
benzene, liquid phase 3533
benzene, solid, intensities 13690-1
benzene, width and profile 20614
benzenocarboxylic acids, absorption spectra 9803
bromodichlorofluoromethane ($CBrCl_2F$), 400-3000 cm^{-1} 4207
carbon tetrachloride, absorption, temp. dependence 3568
carbonyl group, effect of non-polar solvents 9804
chloroform, absorption, temp. dependence 3568
cyclohexane, width and profile 20614
cyclopentane, absorption, temp. dependence 3568
DCN in org. solvents, vibrational absorption bands, freq. shifts and intensities 10669-70
dibromochlorofluoromethane (CBr_2ClF), 400-3000 cm^{-1}
1,2-diethyldiborane, isotopic variants 20634 [4207
1,2-dimethyldiborane, isotopic variants 20634
ethane and ethane-d_6 1513
ethylene chloride in soln., ratio of gauche to trans form 2770
fluorinated ethanes 5938
formamide 4195
hydrocarbons, aromatic, polynuclear, out-of-plane CH vibrations 17738
isobutane 20689
ketones, n—π* u.v. absorpt. and i.r. CO band, correl. 7791
metal-chelate compounds 4204
methane, absorption, temp. dependence 3568
methanes, deuterated, vibrational intensities, bond moments 17740
methanes, isotopic, calc. 5898
N-methyl acetamide, solvent effect 9805
methyl-1, 2-benzanthracenes, out-of-plane CH vibrations 17738
methyl iodide, absorption, temp. dependence 3568
monoethyldiboranes 15732
naphthalene, width and profile 20614
penta-deutero-fluoro-benzene 20626
phenols, hindered, solvent effects 8867
1,2 polybutadiene, syndiotactic 4677
polypropylene, irradiation changes in structure 10359
polystyrene, isotactic 4676
polystyrene, transparency in far i.r. 10035
propane 20688
pyridine, width and profile 20614
quinuclidine 17743
Rochelle salt, fundamental frequencies of 4 water molecules 9799
tetrachloroethylene, absorption, temp. dependence 3568
tetracyanoethylene, with NaI or NaCNS solutions 16715
tribromoethylene-d 17753
triethylborane-d_{15} 1532
trifluoromethanethiol (CF_3SH), 3-22 μ 4205
trimethylborane-d_9 1532
trimethylene oxide 17755-6
tris-acetylacetonates of Cr, Mn, Fe and Al, Jahn—Teller effect in Mn cpds. 20636
vinyl chloride and vinyl chloride-d_3 2764
CH_4, $2\nu_3$ band, fine structure 17751
CH_4, vibrational—rotational structure 4199
CH_2Br, adsorbed on porous glass, band shapes, rotational freedom 15731
CH_3CCH 4194
CH_3CN 4194
$(CH_3)_3N$ 4194
HCF_3 4194

Spectra – contd
organic molecules and substances, infrared – contd
HCN in org. solvents, vibrational absorption bands, freq. shifts and intensities 10669-70
H_2O, in various organic substances, absorption 16719
organic molecules and substances, radiofrequency
energy levels of slightly asymmetric top 13431
symmetric-top molecules, hyperfine spectrum of $J = 1 \rightarrow 2$ transition, calc. 15737
acetaldehyde–water mixture, n.m.r. study 6819
acetone and acetone-d_6 4212
acetyl bromide 20630
acetyl cyanide, 8 isotopic species 2763
acetyl fluoride, 8 isotopic species 2762
1-chloro-2-butyne, 20-30 kMc/s 1528
chloroform 15737
cyclohexane radicals, e.s.r. spectra 5969
cyclopentane radicals, e.s.r. spectra 5969
DPPH, proton hyperfine spectra 10680
p-dichlorobenzene, Cl^{35} quadrupole resonance, solvent shifts 4539
diethyl amine, microwave absorption 19210
dimethyl sulphide, 8-37 Gc/s 20627
ethyl chloride, press. dependence of microwave absorption 5920
ethyl cyanide, 17-36 kMc/s 4211
ethyl formate, microwave absorption 19210
fluorobenzene 4210
fluorotrichloromethane 15737
formaldehyde and CHDO 5921-2
formamide 4239
formyl fluoride 20629
formyl fluoride, anomalous Stark effect 20628
formyl fluoride, isotopic variants 15738
methanol 9807
methanol, Stark effect 513
1-methoxyvinyl esters, effect of substitutional R.COO-groups 6276
methyl acetate, microwave absorption 19210
monochloroacetonitrile 7813
nitrobenzene 7771
ortho-chlorophenol soln., microwave absorption 5027
propargyl bromide, second-order quadrupole effect 2744
trans-crotononitrile 13438
trimethyl silane 17744
vinyl chloride 4236
C^{13} nuclei of solvent molecules, in solutions of free radicals 16716
CCl_2F_2, nonresonant absorption 10700
C_6H_6, liquid, reflection spectrum 12426
CH_2CHF_2 9808
CHF_3, nonresonant absorption 10700
CH_3F, nonresonant absorption 10700
CH_3I^{127} 491
HCN, π and σ Stark components 13441
$HCOO^{18}H$ 13439
$HCO^{18}OH$ 13439
H_3SiCN, D_3SiCN 13437
OCS, power saturation of $J = 1 \rightarrow 2$ rotational transition 1500
OCS, using 3-level maser 20642
Spectral line breadth (See also Doppler effect, light; Stark effect; Zeeman effect).
correction for instrumental and other broadening 8796
impurity effects in crystals 13486
measurement, by shearing interferometric method 19414
microwave, meas. method 5428
oscillator strengths calc. 15658
plasma, non-stationary theory 1479
pressure broadening of vibration–rotation bands 9795-6
pressure shifting, empirical relations 5928
quantum electrodynamics study, Coulomb gauge, propag. function 20025
resonance broadening, absorption line-shape calc. 19217
Voigt profiles, computation and tables 5160
A, spark discharges, pressure broadening and Stark effect 5874
C_2H_2, effect of Kr and Xe 15726-7
CO, vibration and vibration-rotation bands, pressure broadening 9795-6
DCl, vibration and vibration–rotation bands, pressure broadening 9795-6

Spectral line breadth – contd
Ge, phonon broadening of impurity lines 11756
HCl, effect of Kr and Xe 15726-7
HCl, i.r. absorption, collision-broadening by foreign gases 15788
HCl, pressure-induced, due to foreign gases 5926-8
He, 5876 A, normal and resonance 483
In, λ 4101 and 4511 lines, effects of He and A at up to 120 atm 5881
Mn, pressure broadening of violet triplet by A and He 13416
Ne, spark discharges, pressure broadening and Stark effect 5874
O_2, Raman spectrum, effect of 7-125 atm. pressure 7764
O_2, under pressure, microwave 5915-16
Si, phonon broadening of impurity lines 11756
Spectrochemical analysis (See also Chemical analysis, mass spectrometry; Spectroscopy).
capacitor papers, i.r. study 16396
centennial, review 18454
emission, use in nuclear field 3336
flames, standard addition technique 8338
i.r. gas analyser, use of selective gas emission 4753
liquid and gas mixtures, instrument errors 19395
optico-acoustic gas analysis 967-71
short-lived transients in radiation chemistry 16383
solutions, spraying into glow discharge 10766
sputtering yield meas. 12653 [16397
u.v. emission, search for Ge, As, Se, Br, Sn, Sb and Te
stainless steels 8339
Cu spark method, increase of sensitivity 12122
Fe, Ni, Cr, Ti, mutual influences 10378
Fe, Si and P determination, with modified quartz spectrograph 14828
H, using deuterium exchange, i.r. spectrophotometric method 18453
O_2, solid, reaction products with atomic H 12098
P, in Cu and in Al alloys, using gliding sparks, far u.v. method 6428
Th, by d.c. arc 21298 [12123
Th, with thoron, in presence of Zr, spectrophotometric ZrO_2, 24 impurity atoms 1971
Spectrometers (See also Mass Spectrometers; Monochromators; Spectrophotometers; Spectroscopy; X-ray spectrometers).
astronomical spectrograph, 9 m, profile and resolving power 18587 [18585
astronomical spectrographs, design, information theory
atomic beam E–H gradient spectrometer 15672
at Bellevue, Fabry-Perot type 16840
calibration, 2-16μ absorption band data 6938
compensation for Rowland ghosts by double diffraction
demonstration β-spectrometer 1161 [14832
design, using grating and Fabry–Perot interferometer for $R \geq 100{,}000$ 16516
for diffuse reflection from powders 12469
Ebert, image investigation 5164
Ebert, plane-grating, image investigation 5164
Ebert, 2-mirror, high resolution, photoelec. detection
echelle-type, for near i.r. 14819 [19415
electron pair, high resolution methods 2632
energy-limited resolution, middle–far i.r. 2241
error in interpolation along intervals on Rowland circle 14831
Fabry–Perot, for hyperfine structures in i.r. 16855
Fabry–Perot, i.r. 16844
Fabry–Perot, integral 16874 [10775
Fabry–Perot, with rect. aperture, instrument function
Fabry–Perot, scanned by pressure, He^4 fine structure at low temp. 7694
far i.r., with plane grating and focusing mirrors, thermopile detector 16857
far i.r., use with superconducting bolometer 8837
grating, high-speed 3633
grating, with rectangular aperture, theory 162
grating, resolution 5163
grating, in zero order, 50-350 μ 6927
high resolution, using double etalon with pressure scanning 16843
i.r., double-beam, signal/noise ratio 10763
i.r., double-beam grating 5166
i.r., geometrical-optical image formation 6928

Spectrometers – contd
i.r. absorption intensity meas., secular distortions 12481-2
i.r. gas analysers, increasing sensitivity 12489
immersion grating, high-resolution 7757
Infracord, adapted for 25 μ 2240 [12487
instrument-function profile, for Russian type IKS-11
interferometric, amplitude modulation selection 16835
interferometric, modulation for visible and i.r., use of analogue computer 16833
interferometric, using any number of gratings 16841
large-aperture grating instrument 159
multi-slit arrays, 2 systems with superposed slit images, high luminosity 19417
near i.r., 5ft vacuum instrument 155
photoelectric, for auroral spectra 8791
photoelectric, with Fabry–Perot interferometer 3634
photoelectric, with oscillating mirror scanning, 0.4-0.9 μ 14820
photoelectric, use of spherical Fabry–Perot interferometer 16873
polarizing interferometer, high luminosity, low resolving power 19417
prism spectrograph, for i.r. atmospheric radiation 8419
quartz, with photoelectric attachment, for spectrochem. anal. 14828
quartz Cornu prism type, for far u.v. 14822
Raman direct-recording 5161
for Raman spectra study 3620
resolving power, improvement, by suppression of intermediate image 14825
with rotating-disk scanning 16860
single-beam, scanning distortions 10776
for solar eruption spectra study, λ3550-9000 A 18768
spectroradiometers, ratio-recording, for fluorescent spectra 16858
stellar, multichannel 16838 [16850
with two Fabry–Perot etalons, for i.r. absorption spectra
accessories
absorption cell, use up to 400°C and 200 000 atm. 8798
absorption cell, variable length 82
analogue integrator, for e.s.r. spectra 2454
autocollimator, use of inclined spherical mirror 16861
coarse grating, for intensity determination 2251
filter pairs, for wavelength standards 3624
high-pressure cell designs 1533
i.r. cell, pressure broadening of gases 8799
i.r. chopper adjustment device 19419
i.r. cryostat. liq. N_2 temp. 14829
optical filter selection, for grating spectrometers 1032
photoelectric detection, of Raman spectra 3618
photomultiplier attachment, with 4 exit slits, for quartz spectrograph 14828
Raman high-pressure gas cell 6932
Raman low temp. apparatus 12484
raster illuminating device, with cylindrical lenses 3615
shutter, high speed 6935 [16862
shutter, mechanical, for extremely short exposure times
slit drive, automatic, for i.r. 156
Spectrometers, microwave
for atomic short-lived states, fine structure det. 17708-9
carcinotron application 9807
for gases, at medium pressures 19951
grating 1224
integrated line intensity meas. 5428
n.m.r., high resolution 3865-6, 5431, 11066
n.m.r., transistorized, with frequency mod. 11064
for nucl. quadrupole Zeeman spectra 17123 [19952
paramag. resonance, bridge analysis and applications
paramag. resonance, broadband mm wave 9225
precision Zeeman modulation 3869 [5429
self-quenched superregenerative, side-band suppression
for spin–lattice relax. times meas., adiabatic passage technique 9223
Stark cavity type 491
Stark cavity type, "antimodulation" intensity meas. 15176
for 2.5-5 mm wavelengths 1227
variable frequency, v.h.f. 10249
Spectrophotometers (See also Colorimeters).
absorption, for petrographic sections of powders 8792
Cary-14, collaborative readings 160
double beam, for i.r. emission of gases 8794
Spectrophotometers – contd
double beam, for reflection coeff. meas. 5152
grating, high resolution 16859
grating, for Schumann u.v. range 3632 [10777
i.r., double-beam, distortions, due to recording system
i.r., ultrarapid-scan 16856 [14824
Jobin–Yvon, with microscope attachment, u.v. to i.r.
microscope-spectrophotometer 3595, 6929
photoelectric, construction and use 18588
photoelectric, high-dispersion 10761
prism type, stray light determination 12485
recording data on filing cards, for Perkin-Elmer model 21
reflection oximeter 8435 [157
Russian, SF-4, attachment for luminescence spectra, 330-550 mμ 10762
u.v., wavelength range extension 14823 [3624
wavelength calibration, from crossover point of 2 filters
White i.r., accessory for pressure broadening study, i.r. active gases 8799
Spectrophotometry (See also Colorimetry).
absorbtivity recorder 19416
aurora, absolute photometry 6475-6 [6933
calculator, electrical analogue, for transmission data
celestial objects, use of constant-brightness phosphors 18589
circuit for light intensity ratio meas. 6934
colour indices for near-white samples 1048 [2258
converting spectrophotometric data to colour coordinates
differential meas., use of photometric sphere 8793
effective line-width meas. 6930
fluorescence spectra correction methods 8795
integrating sphere, distinction between absorption and scattering 5134
optimum optical density, for "shot" noise limited spectrophotometers 1034
phosphors, spectral energy distrib. 2000-8000 A 6188
photoelectric, nightglow transfer problem 14296
photographic, line widths 6923
Raman line intensity meas. 14816
relations between two photometric systems, effect of filter pass-bandwidths 8763 [1734
semiconductors, absorption constants meas., techniques
spectral transmittances of photographic objectives 10790
standard stars 6617
test-tube adaptor, for optical density meas. 14783
vacuum u.v., double-beam method 5167
Spectroscopy (See also Spectra; Spectrometers; Spectrophotometry).
absorption, method of obtaining two identical sources 3627
absorption and scattering coeffs. meas., applications of formulae 1044
atomic beam devices, wavelength shift correction 5168
biological substances 6491
disk technique, for powders 8002
display comparator 5159
emission, scatter diagrams, statistical anal. 12480
emission analysis, measurement and presentation of spectral lines, using photoelectric device 10753
emission spectra meas. for bodies at room temp. 3622
extragalactic, review 18837
fine structure measurements, precise interferometric method 2732
flames, standard addition technique 8338
flash-absorption, using quartz spectrograph 17760
Fourier space concept, application 19411
Fourier transforms, applications 16871
fused salts, i.r. technique 6926
gases behind shock waves 973
i.r., highly precise wavelengths 17745
i.r., thermal-radiation background 158
i.r., use of semiconductor detectors 18015
i.r., using Fourier transform 16469
i.r., wavelength meas. with diffraction gratings 10767
i.r. absorption spectrum, intensity parameters, abs. values 12481-2
i.r. band absorption 14818
i.r. emission of gases 1033, 8794
interference modulation 10771
interference modulation, double-beam, aperiodic and periodic 8924
interferometric analysis 10764
interferometric, factor of merit 16836

Spectroscopy — contd [16854
interferometric, meas. of i.r. emission line wavelengths
interferometric multiplex spectrometry theory 16832
interpolation formulae, diffraction grating work 1035
kinetic absorption spectra, recorded through flash-heated grids 17759
light losses, at spectrometer slits, by diffraction 10772
line distortion, due to step filters 10773
line form, Fourier anal. 16834
line profiles, transformations, applic. temp. meas. 12483
mag. resonance spectra, modulation-distortion correction 8796 [15176
microwave, "antimodulation" method, intensity meas.
microwave, cell for observing π and σ Stark components 13441
microwave, molecular internal rotation, review 5913
microwave, pulsed nuclear resonance technique 9226
microwave, quantum phenomena 293
molecular, in U.S.S.R., review 9809
narrow spectral distrib., mean wave number 16847
optimum meas. conditions, effect of scanning and selection 10770
organic films, on metals, i.r. reflection study 6925
plasmas, high temperature 19686
profile meas., Michelson interferometer, with photo-multiplier fringe counter 19426
r.f., information flux rate, spectra comparison 19420
r.f., using 3-level maser action 20642
Raman line intensities, slot width effect, photoelectric meas. 16864
resonance Raman spectroscopy, dyes 7765
scanning rate, optimum time const., and slit width selection 3625
shock-wave temp. meas. by spectrum-line reversal, double-beam method 14732
solar 16544, 16768-9
time-lapse spectrograms, using rotating slotted disk 2239
time-resolved spectra, photoelectric recording 3631
time-resolved spectra, recording and measuring techniques 6936
transmission funcn. for bands with Doppler—Lorentz line shapes 3621
two-beam interferometry, atmospheric absorption spectra U.S.S.R. (1958) 9757 [16837
u.v., astronomical, using satellites, below 2900 A 4913
vacuum, flap-valve for narrow apertures 19235
vacuum u.v., reflectance-increasing coatings 8797
visible and far i.r., interferometric modulation 16833
wave-number meas., from Fabry—Perot interferograms
wavelength corrections, from air to vacuum 6910 [10768
wavelength meas., in near i.r., interferometric 16852
wavelength standards, Fabry—Perot white light fringes 16853
wavelength standards, I_2 absorption lines 16660
light sources
Balmer series tube 153
d.c. arc, controlled-atmosphere chamber 14834
far i.r., pulse mass oscillator 19421
flash, for chemical kinetics 10778
H and Hg—He lamps 161
H plasma, continuous spectrum 479
h.f. light modulation 8800 [9768
Hg vapour lamps, intensities of 1850 and 2537 A lines
hollow cathode discharge, for impurity detection in ZrO_2 1971
i.r., incandescent lamp with mica window 16867
low-voltage pulse discharge 3628
Lyman—continuum flash source 3629
radiance standard, 0.25-2.6 μ, W strip lamps 19490
rotating electrodes, for solutions, spraying into glow discharge 10766
single flash, determination of CO_2 dissociation 1961
spark source 5169
standard stars for photoelectric spectrometry 6617
u.v., comparison with sunlight distrib. 10769
vacuum u.v., intense sources 14835

Speech (See also Hearing).
American English, acoustic correlates of word stress 6497
analysis, instruments and methods 8439
axis crossings and intelligibility 808
bandwidth compression through spectrum selection 8440

Speech — contd
intelligibility, investigations with sound energy integrator 3591
intelligibility, in reverberation and noise 14327
intelligibility, short time-delayed echoes, subjective masking 14330
noise spectrum, from multi-channel speech anal. 6495
phonemes, American English 14328-9
phonetic recognition and meas. 6494
pitch distribution in German speech 18529
recognition and synthesis 2045
reinforced, intelligibility, applic. to broadcasting systems 18531
singing voice, vibrato, and choir singing 6496
spectrum determination 18530
spoken digit recognition, using time-freq. pattern matching 21405
syllable nuclei, duration 12218
synthesis, minimal rules 810
transmission, ear-microphone 3363
two-frequency complexes, patch discrimination 21406
vowel recognition computer programme 809

Spin (See Fundamental particles; Mesons, spin; Nucleus, spin; Rotating bodies).

Spinors (See Quantum theory, wave equations).

Sprays (See also Aerosols; Drops; Jets).
diffuser, motion of slightly cond. liquid 9176
disintegration of fluid sheets 8639
disk atomizers 6754-5
from impinging jets, distribution 12412

Sputtering
angular distrib. of material, by Hg^+ bombard. 1174
applying In contacts to CdS 16364
cathodes, surface cleaning 16747
dielectrics, anisotropy 21245 [15089
metals, by canal-ray bombard., angle of impact correl.
metals, polycrysalline foils, preferred orientation 18290
metals, by positive ions of up to 25 keV 1172
theory 12088
thin β-ray sources, prep. 17516
yields, spectroscopic meas., thresholds rel. to displacement energies for 20 metals 12653
yields, from var. metals, Hg^+ bombard., angle of incid. depend. 1173
Ag, by light ions 10989
Ag, single and polycrystals 3815
Ag-Pd, with A, He and Xe positive ions 12645
Cr, by A^+ and Hg^+ 12653
Cu, by A^+ and H_2^+, directed emission 10990
Cu, by H ions, up to 50 keV 9109
Cu, single crystals, at ion energy 50-350 eV, orientation depend. 19810
Cu_3Au, with A, He and Xe positive ions 12645
Pt, by inert gas ions 17043
Ta and Mo, by 900-2150 eV Cs^+ ions 9107

Standards (See also Length standards; Mass standards).
atomic, $\Delta m_F = 0$ transitions in alkali atoms 17695
barometers, 0-1200 mb 8677
blackbody, practical realization 19488
C^{14} β-rays, for liquid scintillation counters 15529
C.I.E. artificial daylight 14297
calorimetric, use of quartz 10795
frequency, alkali metal vapours, field independ. hyperfine transitions of ground state 17761
frequency, Cs, use in magnetic field measurement 15102
frequency, Cs transmissions 10546
frequency, meas. of standard transmissions against Cs-beam resonator 4915
frequency, review 855
frequency, use of optical orientation 17695
frequency and time, NH_3 beam 2-level maser 18892
frequency transmissions 12343, 18893
glass colour standards, for sugar products 181
neutron, Canadian 9377
radioactivity, N.B.S. solution C^{14} recalibration by Geiger and proportional gas counters 13159
spectral radiance, 0.25-2.6 μ, W strip lamps 19490
temperature, high-purity Pb freezing pt. 10803
temperature, Pt, 90-27°K 7002
thermal conductivity, high alloy steels 6963
time, high-frequency chronometry 10545
time, using two radioactive clocks, proposal 8532

Standards – contd
time and frequency, at P.T.B. 2092
wavelength, Cu II in vacuum u.v. 4170
wavelength, Fabry–Perot fringes in white light 16853
wavelength, He I 2734
Stark effect
cell, microwave, for observing π and σ components 13441
in h.f. discharges field meas. 2352
plasma, non-stationary theory 1479
acetone and acetone-d_6 4212
acetyl cyanide 2763
acetyl fluoride 2762
formyl fluoride, anomalous 20628
formyl fluoride, microwave 15738
methanol, microwave 513, 9807
rare earth oxides, crystalline 20776
A, spark discharge, line broadening and shift 17702
A, spark discharges rel. to pressure broadening 5874
CH_3CHF_2 9808
DCl,DBr,DI, mm wavelengths 2769
H, in a plasma, calc. 1480
HCN, microwave, π and σ components 13441
He 476
He, para 5875
Ne, spark discharges, rel. to pressure broadening 5874
Stars (See also Nebulae; Novae; Sun).
AGK3 12291-2
AO Cassiopeiae, 3 colour photometry 12310
As Eridani, photoelectric photometry 12311
angular diameters, interferometry obs. 823-4
astrographic work, automatic meas. 12244
astrolabe observations, both hemispheres 12294
astrometric conference 14375
astrometric observations, in southern hemisphere, U.S.S.R. participation 12303
astrometric problems, in southern hemisphere 12299
astrometric work, at La Plata Southern Station 12237
astrometry programme of Cordoba Observatory 12297
atmospheres, isotropic scattering in, H-functions 19002
atmospheres, motion 3423
atmospheres, oscillations of two superposed fluids 18860
ε Aurigae, photometric observations 12329
Be, in galactic clusters 16550
binary, close, evolutionary trends 18847 [18800
binary, gravitational and rotational surface potentials
binary, H-R diagram 14443
binary, relativistic motion of DI Hercules 18802
Cape photographic and meridian programme 12298
on "Carte du Ciel" completion 12305
Centaurus A, radio source 6563
central temperature, quick calculation 6625
cepheids, in Small Magellanic Cloud, photometry 18831
cepheids and supergiants, colour excess photometry 18792
close binary systems, evolutionary mass exchange 14445
close binary systems, motion of gas streams 14446
clouds, statistical study of projected globules 10515
clusters, globular, escape velocity 18815 [18814
clusters, globular, possible existence of dust and gas in
clusters, globular, spectral types and cluster radial velocities 18811-13
clusters, isochron, model 18808-10
clusters, n-body problem, numerical integration 14455
coal carbon stars, spectra 14378
Compton scattering in, monochromatic intensity 8572
Cygnus-α, radio source 18666
diameter meas. using intensity interferometer 14442
double, high velocity, colour-magnitude diagrams 14447
double, measures 12317
double, orbit calculation, programme for IBM650 18799
early-type, corpuscular emission, through gas nebulae 18840
ejection into spiral arms, from gas rings 10473
escape from clusters 12320-1
escape from isolated cluster 14454
evolution, later stages 18848
fluids, incompressible, oscillations of sphere of varying density 14601
formation, from He data 2075
formation, from interstellar gas 18690
formation mechanisms 10514
fundamental, system in southern hemisphere 12293
general catalogue, revised 12295

Stars – contd
heterochromatic magnitudes, effect of interstellar absorption 18790
high-density, dispersion of e.m. waves 12709
Ho 581 binary, parallax and mass-ratio 18801
Hu 575 = ADS 9352 binary, parallax and orbital motion
Lalande 21185, astrometric analysis 18788 [18806
Lick Observatory, proper motion programme 12300
lightning discharges in stellar atmospheres, mechanism, rel. to terrestrial lightning 14310
luminosity function 12306
mass–luminosity relations 16549
massive, evolution, H–He cycle 6609
meridian circle observations, wide-angle cameras 12245
molecules and late-type stellar models 6623
net electric charge 10512, 18789
neutron evaporation, cosmic-ray evidence 1326
occultations (1956-7) 12315
origin, in stellar associations 10513
oscillation of cylindrical fluid in perm. mag. field 3838-40
PFKSZ system, investigation 12302
p–p reaction chain completion, neutrino emission 848
Perseus double cluster, and galactic magnetic field 10517
photometry, characteristic curve in focal method 18795
photometry, photoelectric, effect of absorption lines 14440
photon and neutrino emission in ν–e interactions 12838
position, colour effect on astrometric plates 12301
positions of high accuracy 12304
proper motion components, time derivatives 12290
proton capture by Be^7 7550
pulsating, cooling behind shock wave front 18798
pulsating, masses 12319
pulsating gas sphere, variable star models 16554
pycnonuclear reactions 11396
R Canis Majoris photometry 14441
radio spectra 18661
radio stars, identification 3409
reference, in southern hemisphere 12307
Roche model, non-radial oscillations 18862
rotating, magnetic braking 17091
rotating and supernovae, motion equations of variable mass gyro 8579
rotation of inner parts of galactic system 6613
S-type, mixing processes, time scale 13
Sagittarius A, radio emission, high resolving power study 10483
satellite survey, plans 14439
scintillation, directional, photogr. harmonic anal. 6608
scintillation, review 4903
shock waves in envelopes 18856
Σ 2398, parallax, proper motion and mass ratio 12316
subdwarf, interior models 18784
subdwarf, series of atmospheres 18786
subdwarf, space motions 18783
subdwarf, symposium 18781
subdwarf, trigonometric parallaxes 18782
Sydney, astrometric programme 12296
systems with spherical symmetry, stellar mass distribution, calc. 18817 [18818
systems, stratified, self-gravitating, non-steady solutions
TZ CrA, eclipsing system 12313
temperature and gas velocity 6607
u.v. nebulosities, rocket and satellite observations 14469
V 839 Ophiuchi, photoelectric light curves 12326
variable, electron temperature from spectra 9042
variables, periods of 58 Mira-type stars 18805
velocity perturbations 18787
velocity perturbations, in homog. isotropic stellar population 4902
visibility, in daylight at high altitudes 843
composition (See also Elements, origin).
abundances, line profile determination 18859
B stars, helium abundance 10527
nuclear reactions in, buildup from C 3424
photosphere, balance and abundance 14414-15
plasma 2361
shock waves study, Fermi–Dirac gas model 8693
subdwarf, and mean atmosphere parameters 18785
H, neutral, in Taurus–Orion region, 21 cm spectral study 4906
O, ionization and excitation in hot stars 6610
Li abundance and origin of solar system 16537

Stars – contd
magnetism (See also Sun, magnetism).
gravitating rotating mass, adiabatic magnetodynamic equilibrium 19914
magnetohydrodynamic ellipsoids of revolution 291
proto-star, mag. and dynamical fields outside 17090
radiation (See also Astronomical spectra, stars; Cosmic radiations, r.f.; Sun, radiation).
AH Virginis, light radiation and orbital elements 18803
absolute measurement 18797
absorption, in stellar atmosphere 10915
approximation formulae, radiation and flux intensity calculations 18851
Cass A, at 45 Mc/s, decreases and reception 18671
Cass A, at 45 Mc/s, scintillation vote 18672
cepheids, luminosity variation 12318
cepheids, period-colour relation 18793
corpuscular, stellar flare origin 14444
diffusion theory 18796
emission spectroscopy, scatter diagrams 12480
grey scattering, Rayleigh phase function 16634
i.r. artificial, search 12330 [16839
i.r., meas., using multiplex interferometric spectrometer initial luminosity function 6612
intensity, scattered monochromatic radiation, Compton process 8572
interstellar polarization, meas. and results 6548
isotropic grey scattering 19001
line-blanketing effects, on A–G dwarfs 14461
N III emission spectrum, hot star temp. estimation 16551
neutrino pairs, bremsstrahlung emission 11141
non-stationary, relativistic electron production in atmospheres 12312
optical thickness of extensive stellar atmosphere 2088
polarization meas., instrument polarization effects 1
scintillation, chromatic 18794 [16548
scintillation, r.m.s. brightness fluctuation, directivity
scintillation, turbulent atmosphere model 2085
in space navigation 12690
starlight polarization of near stars 6611
transfer, growth curves, stellar classification 4905
XY Leonis, light curves, photoelectric 18804
structure
atmospheres, theory from photographic observations of solar photosphere 14412
chromosphere, heating by shock waves 18858
convection zones, 3-layer models, depth-dependent temp. grad. 14467
dwarfs, dense, white, condensed state 8517
during evolution, of upper main sequence 18847
evolutional connection between stars and nebulae 18847
giant stars in globular cluster, He burning possibility 18870 [10528
giant stars with shell sources of C–N and p–p reactions
gravitational contraction times of stars, in very young clusters 18807
H II regions, extent 18863
heavy element creation, by neutron capture on fast time-scale, theory 20485
magnetostatic model for compressible star 6622
main sequence, models 18849
main-sequence band and Hertzsprung gap 18869
massive, models in He-burning stage 8516
massive stars, early-stage evolution 14464
neutron star models 10526
nuclear reactions in, element build-up by He, n and p capture 14465
nuclear reactions in, syntheses of α-particle nuclei heavier than Ne^{20} 14466, 18867
nuclear reactions in red giants, buildup of elements from C^{12} 17609
optical thickness of extensive stellar atmosphere 2088
perturbation method 6624
Pleiades, H–R diagram, interpretation 18847
Pleione, structure and instability 18868
population I, gravitational contraction 18864
population II, interior models 18866
red giants, coronal evaporation as mass loss mechanism 18857
rotating, non-rigid, meridional circulation 2086
solar-type star models, mean absorption coeff. 18852
stellar atmospheres, gravity determination 18850
Stars – contd
structure – contd
stellar atmospheres, magnetohydrostatics 18853-5
symposium (Lucknow, 1955) 18847
variable stars, envelope models 18861
white dwarf, pressure ionization 15799
Statistical analysis (See also Errors; Probability; Random processes).
equipment for examining distrib. laws of chance 3399
fractional coverage of plane by inequigranular powders 10325
observation equations, least-squares method of solution 14370
one-dimensional interaction statistics, semiconductor dislocation acceptors 18005
stochastic regenerative processes 18578
sums of distribution functions, analogue computer 4839
applications
accelerating flames, study 3680
angular distribution of fission products 7632
atomic and nuclear spectra 17696
coin tossing, quantum mechanical discrepancy 4959
concrete, flexure failure, stochastic theory 21141 [6546
correlation and regression theory, bibliography (1930-57)
dust counting 8326
dust counting, inter-observer checks 8327
forced choice and phenomenal-report hearing thresholds, predicition 8441
hard-spring oscillator, randomly excited 10711
limit theorems, bibliography (1930-1957) 18579
Markoff cascades with general source terms 15309
metals, equation of state 13461
Monte Carlo calc., slowing of electrons by water 3956
μ-meson mean life 5579
neutron distributions in moderators 12981
neutrons in moderator 20152

random walk problems, with unequal steps, resultant vector probability 4958
rock magnetism 21306 [14791
sampling theorem of information theory, expansion theorem
stellar clouds, study of projected globules 10515
sunspot maxima prediction 2079
time series, bibliography (1930-57) 6547
applications, counters
differential interval analyzer, output distortion 17183
γ-ray absorption in NaI well crystals 11133
nuclei, lifetimes of excited states, errors in delayed coincidence 7258
pulse losses due to dead time in scalers 20001
RIDL type 3300 hundred-channel analyser 7259
scintillation spectrometer, pulse size statistical spread 17144
spurious count evaluation in coincidence measurements 15220
time-of-flight techniques, fluctuations 6691
Statistical mechanics
alloys, n-component, order–disorder transformations 14063
anisotropic system, thermodynamic props., at zero temp., calculation method 18980
antiunitary operators, normal form 16608
approach to equilibrium, general theory 16618
assembly in mass-motion 2138
association problem soln. by matrix-spinor method 8559
Boltzmann eqn. differential-operator approximations 16622
Boltzmann eqn. and inverse collisions 18977
Born expansion, convergence 16631
Bose–Einstein gas with repulsive interaction, ground-state energy 3460
Bose–Einstein lattice gases equivalent to Heisenberg model of ferro-, antiferro- and ferrimagnetism 13748-9
Bose–Einstein statistics, influence in proton–antiproton annihilation 17339
Bose–Einstein system with attractive interactions, energy levels 49
Bose–Einstein system with attractive interactions, eqn. of state, comparison with He^4 14531
Bose fluid, ground-state calc. 18985 [18984
Bose gas, non-ideal, equilib. and quasi-equilib. props.
Bose gas, non-ideal, excitation spectrum 901 [16629
Bose hard-sphere gas, exact momentum-space formulation
Bose hard-sphere gas, low-lying excitations 10609

Statistical mechanics - contd
Bose hard-sphere gas, low-momentum excitations, temp. depend. 18987
Bose hard-sphere system, pair distribution form 16627-8
Bose liquids, elementary excitation spectrum, near disintegration threshold 10816 [14529
Bose particle system, cluster expansion of ground state
Bose system, dilute 3461
Bose system, ground-state energy for Lennard-Jones potential 12382, 14532
Bose system of hard spheres, ground state 899
Bose system with repulsive interactions, ground state, equivalence of cluster integral method and pair approx.
boson gas, ground-state energy 2133-4 [14530
boson gas, phase transformations 3462
boson system, interacting, ground-state energy and excitation spectrum 2132
boson system, method of auxiliary variables, ground-state energy calc. 14534
bosons with impenetrable cores, field operators 2136
Brownian motion of nonlinear system 8564
canonical ensemble, transport coeffs. from dissipation 12376
Carathéodory's local theorem and global application to thermostatics 12539
charged particle gas in neutralizing medium, Debye–Hückel theory 14535
chemical exchange reactions 14097
classical ensemble theory 16615
classical mechanics, new aspects 4964 [18974
classical and quantum mechanical hypervirial theorems
classical vibrating systems, variational methods 16614
coin tossing, quantum mechanical discrepancy 4959
condensing systems, cluster theory 12094
Coulomb interactions, appl. of giant cluster expansion theory 18991
coupled harmonic oscillators, Poincaré cycles, ergodicity and irreversibility 4956
cubic lattices, model for Brownian motion 17876
Debye–Hückel theory, corrections 14535
decaying states, initial state and decay probability 2140
dense chemical systems, Boltzmann eqn. 18426
density matrices, Dirac and canonical, inter-relation 18996
diagram expansions 8567
dielectric formulation for interacting particles 18988
dielectric relaxation of polar liquids 19143
diffusion coeffs. in liquid solutions 10653
distribution function for quasi-particles, thermodynamic quantities 12371
effective cross-sections, definitions 10804 [893
eigenstate system, autocorrel. field, information content
eigenvalue problems, asymptotic soln. 3455
elec. cond., quantum statistical calculation method 7060
elec. and mag. response of thermodynamic systems 16638
electrolytes, strong, basic equations 14121
electrolytes, strong, rigid spheres with central point charges 14122
ensembles of maximum entropy 18976
entropy of non-equilibrium ideal quantum gas 6703
entropy production, minimum 16646
eqn. of state for hard spheres 8562
equilibrium states 889
equipartition of energy deviations with non-quadratic Hamiltonian 18962
ergodic methods 2118
ergodic theory, classical and quantal aspects 10602
Fermi–Dirac gas, shock relations 8693
Fermi gas, canonical transformation 14536
Fermi gas, collective excitations 47
Fermi gas, degenerate 10608
Fermi gas, degenerate, acoustic excitations 1071
Fermi system, Feynman system 8570
fermion gas, degenerate, giant fluctuations 16636
fermion hard-sphere gas with spin ½, ferromagnetism 14537
fermion interactions, two-body correlation 16637 [15303
fermion system, collective motion and particle excitation
fermion system, ground-state energy 10607
fermion system, ground-state energy, critique of Brueckner–Goldstone perturbation series 8568
fermion system, effects of hole–hole interactions 18981
fermion system, interacting, Fermi surface and low temp. props. 14538
fermion system, moment of inertia, effects of particle–particle interaction 2131

Statistical mechanics - contd
fermion system, superfluid, moment of inertia 12375
ferromag. system, random 674
ferromagnetism, theory, high-density behaviour 18172
first collision probability, in regions with circular symmetry 6699
fluctuations, theory 16642
fluid in external potential field, distrib. functions 14624
fluid, rigid-sphere 6698
fluid, rigid-sphere, moderately dense 18967-8
fluid transport, ensemble theory 14548
fluids, scaled particle theory 19095
Fokker–Planck–Kolmogorov eqn., soln. by functional integration 2130
free energy of gas of small density, calc. 14540
γ-ray resonance absorption by system of interacting particles 18902
gas dynamics, one dimensional, unsteady 8678
gas with long and short-range forces 18965
gas in mag. field, with different orbit and spin temp. 2139
gas molecule collisions, with moving body, probability distrib. 3557 [18991
giant cluster expansion theory, appl. to high-temp. plasma
grand canonical ensemble, random-variable theory 894
hard-sphere system, many-body pseudopotential 12380-2,
imperfect gas, press., Mayer density series 16623 [14528
information theory appl., "lack of information" concept
"integral-over-all-paths" 14368 [18998
integration in functional spaces, application 4939
interacting-particles systems, grand partition function, logarithm 10605
interacting particles, thermodynamic quantities and pair distribution function 8566
irreversibility, in angular variables space 4951
irreversibility, ensemble method 18970
irreversibility in interacting spin systems 16639
irreversibility of systems perturbed by random forces 6690
irreversible cooperative phenomena 12369
irreversible processes 16651
irreversible processes in isolated systems, Loschmitt and Zermelo paradox 18986
irreversible processes, thermodynamics 16640
irreversible processes, 2 Gibbsian distrib. and function single distrib. 4949
irreversible thermodynamics of nonlinear processes and noise in driven systems 902
Ising model for ferromagnetism 11814
kinetic phenomena, theory 8561
Kirkwood superposition approx. 14620
lattice gas, multi-component, 1-parameter theory 6009
lattice gas, spherical, eqn. of state and phase transitions 18997
linked-cluster expansion for electron gas "toron" formalism 4276
linked-cluster expansions, appl. to nonspherical situations 14527
Liouville's eqn., application to collisionless Boltzmann eqn. 16621
Liouville's eqn., asymptotic case, application 10615
Liouville's eqn., asymptotic case, study method 10614
Liouville's eqn., perturbation soln., time independent 18963
Liouville's eqn., and resolvent formalism 16619
Liouville's eqn., soln. 16620
Liouville's eqn., for weakly interacting gas 3509 [14625
liquid crystals, nematic phase, molecular-statistical theory
liquids, critical fluctuations and opalescence 14659
macromolecules in chains in velocity field 15793
macroscopic observables, ergodic theory 4954 [13724
magnetic ion systems, isolated and adiabatic susceptibilities
magnetic lattice, disordered 18160
magnetic lattice, disordered, at low temps. 18161
many-body problem, degenerate phase in Bose–Einstein condensation 4948
many-body problem, formulation in terms of av. occupation no. in momentum space 3458
many-body problem, review 3448
many-body problem, zero-temp. limit for dilute hard spheres 3457
many-body systems, analytical invariants 16612
many-boson systems, weak-coupling expansion for ground-state energy 900
many-fermion system, Green's functions 8697

Statistical mechanics - contd
many-particle problems, review 48
many-particle systems, of arbitrary spin, statistical weight 2137
many-particle systems, with linear interaction, time-dependent fluctuations 16625
many-particle systems, theory 896
matrix method appl. to DNA transitions 20707
measurement theory, irreversibility 4950 [14523
mechanics and thermodynamics, foundations, conference
meson cloud, hydrodynamical model 9290
metals, electron–phonon interaction 11592 [18971
molecular chaos and Kirkwood superposition hypothesis
molecular dynamics, small number of elastic spheres 18993
molecule migration, in gas mixture 8560
nodal expansions, exact integral eqns. for particle correlation functions 12372
nonequilibrium processes, generalized theory 6687
nonequilibrium processes, random 12384
nonequilibrium processes, steady-state distribution 16617
nonequilibrium processes, stochastic eqns. 18982
nonideal systems 10605 [10610
nonlinear systems, coordinate probabilities, Gibb's method
nonlinear systems, phase-space diffusion 10613
nonuniform gas 18973
nonuniform multi-component systems, free energy and distrib. function 16630
nuclear reactions, complex particle emission, statistics compared to evaporating water drop 20422
occupation numbers of quantized states 10603
one-dimensional particle chain, velocity auto-correl. function 16628
Onsager symmetry, proof 14544
pair distrib. function of system of Bose hard spheres 2135
pair distrib. function and two-body propagator 898
pair distrib. in non-spherical liquids 6773
particle processes, invariant embedding methods 16616
periodic classical systems, adiabatic invariants 50
perturbation theory, connection with supercond. theory
photon detection 8830 [16942
plasma, Bogobiubov's eqn. 15018
plasma, fully ionized 2362
plasma, irreversible processes 10616
plasma, Lorentzian, electron distrib. 15005
plasma, multi-component 12603
plasma, review 12604
quantal systems, approach to equilibrium, theory 12378
quantized radiation and gas energy 6702
quantized system, in weakly dissipative medium 3459
quantum effects in gases using n.m.r. techniques 8719
quantum gases, approach to equilibrium 8687
quantum, linked-cluster expansion, proof 892
quantum, linked-diagram expansions 890
quantum, many-body problem, virial expansion for hard-sphere gas 897
quantum mechanics, causal interpretation 17212
quantum mechanics, ergodicity conditions 12373
quantum plasma, Boltzmann–Vlasov eqn. 15006
quantum statistics, Green's function method 10606
quantum statistics of interacting particles 7303 [3456
quantum systems of diatomic molecules, hydrodynamic eqns.
quasichemical equilibrium theory 12383
radio-wave propagation over ideally conducting plane 299
random-walk interpretation and generalization of linear Boltzmann eqns., neutron transport 10618
random-walk problems, with unequal steps, resultant vector probability 4958 [13497
random-walk treatment of heat of transport in crystals
rarefield gas, distrib. function of dissipative processes
relativistic streams 17003-4 [12434
relaxation of isolated ensemble of harmonic oscillators 14525
Schwinger's action principle 8555
semiconductors, disordered Ising lattice 6217
semiconductors, elec. cond. 571
solid solutions, configurational partition function 4689
solid solutions, regular, with molecules occupying several sites, partition functions 12082
specific heat, low temp. variations, quantum theory 219
statistical thermodynamics of real fluids 3507
statistical weight calc., simplified formulae 14524
steady-state phenomena, in terms of Gibbs ensembles 891

Statistical mechanics - contd
stochastic processes, open, first order, relaxation of multistate system 16613
strongly interacting particles, perturbation theory, appl. to Lennard-Jones potential 12382
survey article 14521
systems with non-central law of particle interaction 895
systems with singular interaction, ground-state energy and excited states 16624
temperature Green's functions 3463
temperature Green's functions, spectra, with time variables 3464
temporal evolution of isolated dynamical systems 18975
tests of superposition approximation in liquid phase 19090
thermodynamic equilibrium, of 2 macroscopic ensembles
thermodynamics of assembly in mass-motion 8571 [6701
thermodynamics, laws 16641
thermodynamics, nonequilibrium, statistical basis 16645
third virial coeff., quantum theory 903
time scales, nonlinear clocks, stochastic rectification 8533
transport processes 16647-8
transport processes, linear relations in multicomponent systems 18964
turbulence, in boundary layers 927
turbulence, theory 4999
turbulent flow of incompressible liquid 926
turbulent fluid, averaged Navier–Stokes 68
unitary and anti-unitary symmetry operators 16609
viscosity of binary liquid solns. 19092
Wick's theorem, simple proof 6686 [14533
Wigner distribution function, for boson and fermion systems
Wilson–Kistiakowsky eqn. for gases 19198
A liquid, shock Hugoniots 8653 [16934
He^4, liquid, partition function evaluation for cubic lattice
He^4–He^3 solutions, Boltzmann gas model 8863

Steam
enthalpy 10695
steam–gas system, transverse flow in condensation 8959
superheated, equations for properties 14911
and water mixtures, density meas. 10806
wet, nuclear reactor 'burnout' studies 2698

Steel
annealed and deformed, u.s. attenuation, mag. contribution
balls, in layer, heat–mass exchange 12514 [10165
cast C steels, magnetization and hysteresis data, effect of heat treatment 4485
construction elements, cyclic overloading 14563
deformation of surface texture 8132
dislocation interactions 2821
dislocation networks, within ferrite grains 17939
embrittlement due to radiation damage in reactors 7674
expansion coeff., plastically deformed 19501
friction on wood 8137
frictional forces–deformation relationship 4571
grain structure, effect on u.s. attenuation 726
hardening and embrittlement by cyclic stressing at fatigue limit 16242
high alloy, as thermal cond. standard 6963
impacting projectile, indentation depth 10629
internal friction, effect of heat treatment and plastic deformation 1849
mech. props. under hydrostatic pressure 18271
microstresses due to plastic deformation 10263
mild, effect of plastic flow on magnetic props. 21048
mild, thermo-e.m.f. prod. by plastic deformation 15999
mirror fabrication, for high-speed rotation 2235
neutron, Fermi age, in stainless steel 7369
neutron irradiated, effect on mech. props. 7905
nonmagnetic pressure vessels, 20000 kg/cm^2 3386
pearlite nucleation, role of austenitizing temp. 18393
phase transformations, effect of tensile stress 16337
plasticity, high pressure effects 1856
plates, cratering and shock wave phenomena 8741
precipitates, lamellar, lattice structure, electron diffraction study 4625
precipitation changes, electron microscope study 14095
pressure of hydrogen in cavities 18391
projectiles, impact on Al and Cu, pit formation 8142
projectiles, spherical, impact on rock 11990
rolling, temperature effects 13910
sound velocity 5081
stainless, deformed, surface examination 21117

Steel - contd
stainless films, anodic oxidation, production of $NiO.Cr_2O_3$ 3279
stainless, hydrogen bubble chamber use, choice 17160
stainless, spectrography, influence of components 8339
strain ageing, dislocation locking and precipitation hardening 16345
strength anisotropy, due to various treatments 21140
stress change of ultrasonic attenuation 2800
surface texture and rolling resistance 8131
thermal cond., electron–phonon ratio 7861
thermal cond. at low temp. 6022
transformer, effect of precipitates on coercive force 18186
wires, stressed, magnetization, in a.c. fields 679
yield and flow stress, temp. effect 21109
Cr–Mo steel, precipitation of Mo_2C 18389
Mn–Fe, spectral line intensity ratio 6934
Armco, granular structure, after annealing 14055
austenite, with Mn, arrangement of C atoms 12049
austenitic, surface stress meas. 10254
austenitic, thermal treatment, second kind ordering 16397
carbon, mag. viscosity as function of fatigue 10132
carbon, plastic flow mechanism 6304
carbon precipitation in α-iron 18405
carbon solubility in α-iron, C^{14} technique 4684
carbonyl iron, suspension, magnetization process 11843
low-carbon, grain boundary migration and dimensional change 1860 16220
low-carbon, stress induced ordering and strain-ageing
martensite, crystal growth, surface temp. conditions 13940
martensite, kinetics of tempering 15850
martensite, labyrinth structure 8267

Stellar clusters (See Stars).

Stellar composition (See Stars, composition).

Stellar motion (See Stars).

Stellar structure (See Stars, structure).

Stereoscopy
in bubble chambers 1232
cloud and bubble chamber photography 15198
colour 14354 18546
image elongation, oblique observation, "subjective" space
magnitude as function of target thickness 6516
perception function, accommodation and conveyance distances 18545
perception function, applic. to observation of stereoscopic aerial photographs 18547
perspective distance calc. 12230 18563
spatial localization at photopic retinal illuminance levels

Stopping power (See Range of particles).

Storms (See Atmospheric disturbances; Magnetic storms; Thunderstorms).

Strain gauges
cyclic strain meas., multi-way instrument 8101, 16197
h.f., and accelerometer calib. 2146
resistance, with gauge bodies of synthetic materials and metals, accuracy 6287
resistance, low temperature sensitivity 4551
resistance, use with transformer bridges 16959
vibrating-wire extensometer 62
vibrating-wire gauges, oscillator measuring equipment 8583
vibrating-wire pressure cells, for earth press. meas. 12399
$BaTiO_3$, for membrane manometer system 5042 21253
Bi layer, on deformable substrate, resistance variation
Bi, strain coeffs. 16198
Ge, strain coeffs. 16198
Te, strain coeffs. 16198

Strange particles
associated production in p–p collisions, two models 20131
β-decay, effective coupling constant 13069
classification 5619
construction from one baryon and one meson 9278
decay, effect of final-state interactions and isotopic spin selection rules 13053
decay interactions 11231
decay interactions, theory 11232
decay, leptonic, rel. to $|\Delta I| = \frac{1}{2}$ rule 12839
decay, parity nonconservation 9317
decay, spin changes, concept of i'-space 11233
effects in π-nucleon s-wave scatt. 20200
formation, in K- and π-meson inelastic scatt. 20243
interactions, rel. to weak hyperon decays, theory 13061
in Lee's renormalizable field model 7286, 9277 13070
in meson–nucleon collisions, Fermi's statistical theory

Strange particles – contd
multiple production, in π–N collisions 15312
new hypothetical D-particle 15457
parity, from hyperon polarization in $K^- + p \rightarrow Y + \pi$ 2599
parity nonconservation in strong interactions 11234
parities and coupling consts., methods for det. 2598
"particle mixture" effects and decay interactions 15299
production in $p^- + d$ reactions 12936 11172
production, in $\bar{p}$ –p and $\bar{p}$ –C interactions at 75-200MeV
production, by π^- in C, Fe, Pb at 1.5 BeV, lifetimes 17426
production, from π^-–proton collision 7408 17427
production, by proton interaction in C, Fe, Pb, at 2.8 BeV
production, in proton–nucleus interactions at 9 GeV 4088
production, by 9 BeV protons interacting with emulsion nuclei 13068
reactions, appl. of Chew and Low's method 13066
review 7420
spin > 1 particles, wave-functions 17247
spin, rel. to parity nonconservation 11235
strangeness, isobaric spin, and spinor inversion props. 7283
in He II, near λ-point, particle hydrodynamics 10826-7

Strength (See Electric strength; Mechanical strength).

Stress analysis (See also Bending; Photoelasticity; Strain gauges; Torsion).
aeolotropic circular disk 19008
aeolotropic paraboloid, effect of surface friction 19014
Airy stress-function surfaces, geometrical properties 8603
annular plates under tension and bending 19019 4544
application method, strain calc. for polycrystalline wires
around inclusion in cylinder, under torsion 4968
autographically recording machine 4550
axially-symmetrical hole in flat plate, soln. by analytic functions 10624
bending plate to spherical shell 3474
buckling of fluid-filled metal column 6727
in buttress dams 4972
circular cylinder under torsion 19018 19025
circular plates, cylindrically orthotropic, large deflections
composite beams, increased carrying ability 1868
contact problem in stressed elastic layer 19011
curved anisotropic rods, oval sections, under torsion 19009
cylindrical shell with strengthening rings 19013
deformation of tubular solid of curved axis 8578 19026
dilation centre, in semi-infinite solid, with fixed plane face
elastic body, with cylindrical hole at const. temp. 6706
elastic plane corner, under edge stresses 14560
elastic sphere, under tangential torsional force, with transverse rigidity variation 10620
elastic thin plates, rotating about an axis lying in their middle planes 19032
elastodynamics, 3-dimensional problem, potential representation 10623
fracture growth, kinetics of Griffith criterion 19027-8
frames, static and kinematic, plastic collapse, dual linear programming 6575
free circular hole, in isotropic plates, under normal loading 6708 4967
infinite elastic parabolic plate, stresses, under conc. force
infinite elastic sheet under tension 6710
infinite elastic solid, with spherical inclusion, and centre of rotation 19007
infinite flat plates 3473
infinite strip, bending, position of edge dislocations 8102
liquids with laminar flow, cross stresses 10637
membrane theory of thin shells 12389
numerical mathematics conference 12232
paraboloids, composite elastic, twisted 6709
plastic compression, between smooth plates, under plane strain 6713 6714
plastic compression, plane strain, between rough plates
in plastic range 16225
plate with flow, electrical analogue for stresses 19030
plate problems, elementary solutions, general formula 14558
ring plates, circular 6712
sectorial plates 6712
slab, with varying rigidity mod., under shearing stress 4966
solid under hydrostatic pressure and tensile load 16228
spheres, elastic isotropic, twisted 6707
stroboscopic dynamic photoelasticity 2143
T - junctions of hollow pipes, Poisson's ratio depend. 12385
thermal, Grueneisen's relation 8574
thermal stress in semi-infinite elastic solid 10626

Stress analysis - contd
travelling cracks in elastic materials under longitudinal shear 19029
truncated cone, due to surface friction 19015
twisting of elastic cylindrical shell 4969
viscoelastic thin rods, finite or semi-infinite 14714
Stress measurement (See Dynamometers; Strain gauges).
Stress/strain relations (See also Elastic constants).
aeolotropic circular disk 19008
anisotropic bodies, formulation 4560
bending of thin, semi-infinite plate 54
cantilever cylindrical shell, stability under external pressure 12387
condensed thermodynamic theory of linear elasticity 4542
convex shells, elastic deformation, buckling load 19012
deformation tensor for simple loadings 6711
elastic, anelastic and plastic components of uniaxial tensile strain 18238
force nuclei, in elastic solid, internally bounded by spherical hollow 19022
rel. to hardening, isotropic, by plastic flow 1854
metal crystals, f.c.c., var. with temp. 3144
metals, at liquid helium temperatures 6293
metals, at low-temps. 19577
microscopic specimens 4548
plastic deformation, stress relaxation times 698
semi-rigid materials, extensometer meas. 8584
shell with double curvature, Green's tensor for equib. problem 12388
shells of medium thickness 3472
stability in linear visco-elastic region 8576-7
string, large amplitude motion 116
thermal stress analysis 8574
thermoelastic bodies, uneven temp. distrib. terms 4970
time-dependent tensile strength of solids 11983
wedge with given boundary stresses, elasticity theory 12386
in work hardening of isotropic media 6321
alkali metals, deformation at low temps. 16215
brass, elastic, anelastic and plastic components of uniaxial tensile strain 18239
polyisobutylene, dynamic shear behaviour, effect of pressure 18249
polymethylmethacrylate 8117
polyvinylacetate 8117
rubber 3160
rubbers, filled and unfilled 8108
SBR rubber, stress relaxation, at large strains 18244
SRB rubber, ultimate props., time and temp. depend. 21123
steel beams, cyclic overloading 14563
steel, low C, strain ageing 16345 [16220
steel, low C, stress induced ordering and strain ageing
Ag—Al alloy, single crystals, temp. depend. 21133
Al and Al alloy V-95, 1.6-300°K 1867
Al alloys, with Cu, Ag, Zn, solute clustering effects 16347
Al, effect of torsion 16201
Al, macrocrystalline 1867
Al, polycrystalline, work-softening effect 4562
Al, from propagation of compression waves 5076
Al, quench hardened 4570
Al, at room and low temp. 13915
Al, single crystal and polycrystalline 4556
Au, evap. thin films 10331
Cu, elastic, anelastic and plastic components of uniaxial tensile strain 18238
K, 4.2-195°K 1850
LiF, effect of surface condition 21096
MgO, single crystals 8119
Na, 4.2-195°K 1850
Ni, macroscopic strength inhomogeneity 6307
Stresses, internal
crystals, fluctuation of parameters 4957
cylinder, circular, under torsion, stresses around spherical inclusion on axis 19020
cylindrical clad fuel elements, thermal stresses 12989
elastic body, with cylindrical hole at const. temp. 6706
elastic body, with uneven temp. distrib. 4970 [10625
ellipsoidal inclusion in elastic solid, elastic field outside
elliptical rigid inclusion in elastic solid, theory 8125
laminated inf. elastic media, applic. to magneto-striction 8046
mechanical resonance dispersion, plastic flow in crystalline solids 18252
Stresses, internal — contd
metals, b.c.c., yield and flow stress, temp. effect 21109
metals, due to plastic deformation 10263
plate, thick, with rigidity varying exponentially with depth, torsional stresses 19021
polymer solutions, in steady flow 3497
with precipitates growth, dislocation formation 20825
thermal stresses in crystals 17889
thermal stresses, hollow cylinders of finite length 14561
total rupture of elastic medium 699
corundum crystals, acting perp. to optic axes 13543
glass to metal tube seals 19006
polyvinyl chloride, appearance of surface cracks 10273
NaCl, growth stresses, generation and removal 16366
Sn—Te—Al ternary alloys, effect of additives 18261
Sn—Te—Zn ternary alloys, effect of additives 18261
Stroboscopes
stroboscopic radiography with linear accelerator 6958
variable phase, with light modulation by u.s. diffraction 5181
Strontium
compressed, interatomic separation 20721
isotopic composition, spectral determination 13418
Strontium compounds
binary phosphate glasses, properties 21216
effect of cpds. on Sr line intensities of flame spectra 4174, extraction from reactor fission products 4719 [630
Sr metaniobate in Na niobate, dielec. and piezoelec. props.
$(Sr,Ba)Nb_2O_6$, ferroelec. props. rel. to structure 8217
Sr—Bi titanates, complex permittivity, temp. depend. 16025
$Sr(CO)_3$, Raman spectrum 2946
$SrCl_2$, e.s.r. of Mn^{2+}, Gd^{3+}, and Eu^{2+} 3132
$SrCl_2$, optical pumping of Eu^{2+} 1829
SrF_2, luminescence spectra 10066
$Sr(NO_3)_2$, aqueous soln., compressibility 14640
$Sr(NO_3)_2$, magneto-optic studies 2934
SrO, electrical conductivity as function of applied field and temp. 20873
SrO, reaction kinetics on W 3308
$Sr_3(PO_4)_2$, Cu activated 4441
$(Sr,Pb)(Ti,Zr)O_3$, phase diagram, dielec. and piezoelec. props. 21236
SrS:Eu,Sm, e.s.r. of Eu^{2+}, detection of optical excitation 682
SrS:Eu,Sm phosphor, $Eu^{++} \rightarrow Eu^{+++}$ ionization 13713
SrS:Eu:Sm phosphor, light and γ-excited, light-sums 10074-5
$SrSO_4$, spherulitic cryst. aggregates, growth 3180
$SrSnO_3$, puckering phase transitions 13654
$SrTa_2O_6$, X-ray structure study 14035
$SrTiO_3$, e.s.r. of Fe^{3+}, test of spin Hamiltonian 3133
$SrTiO_3$, puckering phase transitions 13654
$SrWO_4$, growth of single crystals for e.s.r. studies 6265
Sr_2WO_6, work function 19707
Sr_2ZrO_4, puckering phase transitions 13654
Sublimation (See also Heat of sublimation; Vaporization).
"lattice" (Ising) model for gases 6992-3
and third law of thermodynamics 7015
ice, props. of artificial nuclei 10281
MoO_3, mass spectra 10697
NaCl, crystal growth 711
NaCl spheres into A, rate, 726-770°C 16921
Sulphur
absorption edges, temp. and press. depend. 8798 [3517
atomic distributions in liquid, plastic and crystalline state
atoms, gaseous, transport coeffs., calc., at low temp. and press. 3565
dissociation energy of S_2 2735-6
elec. cond. due to α-bomb. and photocond. 7918
electron affinity, calc. 9745
films, on glass, photocond., effect of Hg vapour 18073
formation of electrets, effect of alternating fields 635
green and purple, e.s.r., trapped radicals 16175
ionization potential—refractivity relation 2321
metallic state, due to fusion by shock waves 15806
molecular force consts. 13429
positron annihilation in, γ-ray ang. correl. 15336
reversible poisoning of oxide-coated cathode 5333
rhombic polycrystalline, mech. props. 1862
"sulphur point", reproducibility 16923
S_8, bond energy and next-nearest neighbour interactions 1512
Sulphur compounds
positron annihilation in, γ-ray ang. correl., similarity of S^{2-} and Cl^- ions 15336
use in sensitization of photog. emulsions 12745

Sulphur compounds – contd
sulphamic acid (NH_2SO_3H), crystal structure 8228
sulphides, α-scintillations, effect of elec. field 16105
sulphuryl fluoride, thermodynamic props. 5016
H_2SO_4, electrolysis, induced e.m.f. 12107
H_2SO_4, γ-ray irrad. at 77°K, atomic H and H_2 yields 14137
H_2SO_4, molar sound velocity 19133
S_2Cl_2, flash photolysis 16382
SF_6, for calibration of electron energy scale 10952
SH transition probabilities 11518
SO, absorption spectrum 8318
SO, dissociation energy 2736
SO, evolution from Ni at 800-900°C 12120
SO_2, evolution from Ni at 800-900°C 12120
SO_2, i.r. spectral intensities, theory 4203
SO_2, refractivity, press. depend. 6839
SO_2, thermal cond., press. and temp. depend. 19202
SO_2–argon, free radicals in shock waves, flash-absorption spectroscopy 17760
SO_2–H_2, thermal diffusion, 300-480°K 959
SO_3, SO_2 photolysis 8318
SO_3, force constants 17723
SO_3, refractivities 8777
$SP(C_2H_5)_3$, structure 3254

Sun (See also Corona, solar; Flares, solar; Prominences, solar; Sunspots).
activity, correl. with cosmic-ray variations, cosmic-ray equator 20276
activity, correl. with F_2 region asymmetry in N and S hemispheres 14253
activity, correl. with high-altitude cosmic-ray meas. 9485
activity, correl. with primary cosmic-rays, balloon flight study 9480
activity, correl. with radio star scintillation 12210
activity, correl. with satellite ionization phenomenon 12338
activity, cosmic-ray diurnal variation (1954-8) 20290
activity, cosmic-ray meson intensity correl., Chacaltaya meas. 15485
activity, during 1958 12278
activity, as function of rise time 18734
activity, and geomag. K-index at sunspot minimum 14419
activity, high, F_2-layer critical frequency variation, correl. activity, in IGY Kelvin lecture 754 [14254
activity, and ionosphere E-region 8380
activity, life of M-regions correl. 14420
activity, monthly ionospheric index 18500
activity, previous to 1750 12279
activity, rel. to cosmic-ray variations 9481
activity, structure and properties of sources 4852 [18732
activity, study of, combined optical and radio techniques
activity, transient decreases in cosmic-ray intensity 9478
activity, two daily indices, short-term differences 18646
atmosphere, models, comparison by Stark effect in H_γ 18746
atmosphere, structure, effect of blanketing 18745
atmosphere, temps. in elec. discharges 18748
atmospheric abundances, determination 18744
atmospheric phenomenon 18743
brightness, distribution at 88 cm 18632
brightness, during eclipse 842
brightness, non-uniformity 838
bursts, type III, correl. with flares 2084 [18473
charged-sun theory for magnetic and cosmic-ray phenomena
chromosphere, dynamical features 3418
chromosphere height, 1958 observations 18756
chromosphere, ionized helium excitation 6596
chromosphere, mean height, eleven-year variation 8505
chromosphere, model for temp. distribution 18629
chromosphere, "mushroom" structures 16543
chromosphere, obs. in K-line radiation of Ca 2081
chromosphere, temp. and density model 18630 [6591
corona, expansion, generalized interplanetary gas model
diffusion of heavier ions 18766
disk, darkening, curvature effects 4890
effect on satellite orbits 2090
effect on Vanguard motion 20
Ellerman's "H bomb" observations 8496 [18474-5
eruptions, rel. to geomag. and ionospheric disturbances
granulation 837, 6585
granulation, brightness fluctuation 18741
granulation changes, brightness, size and shape 6586
granulation, H_2 convection zone 2078

Sun - contd
granulation, interpretation 18740
hydromagnetic phenomena, observability 3416
influence on earth satellite orbit 16
limb darkening, at 5400A 10510
limb intensity decrease 12284
line profile determination of abundances 18859
non-stable processes, leading to neutron eruption 18767
opaque atmospheres, energy balance 12248
optical activity, correl. with radio burst data 4857
outer atmosphere, thermodynamic structure 14417
outer layer, convection, recurrence and Ice Ages 4889
outer layer, diffusion and chemical stratification 4888
outer layer, rotation, meridional currents, activity 4887
periodicities 18731
phenomena, catalogue of disturbances 21343
photosphere, balance and abundances 14414-15
photosphere, fine structure, photographic observation from manned balloon 16540
photosphere, photographic observations 14412-13
photosphere, upper, large-scale motion 14431 3420
photospheric activity, thread-shaped loops, vortex structure
polarization of light at edge of disk 4894
proton sputtering, etching of Sikhote-Alin meteorite 10497
radar echoes 4871
radar studies, symposium 14382
3.2 cm radio picture 18637
rotation and photospheric circulation 18733
self-reversed emission cores of Ca^+, H and K 12249
solar physics, review 14407
as source of intermediate energy cosmic-rays 1325
spicules, Hα line 14421
spicules, heating of solar outer atmosphere 18762
sunrise, effects on ionosphere, at Brisbane, 3.64 Mc/s transmission study 14202
suntracker for balloon applications 10399
surges, filaments and chromospheric structure, white light study 2083
surges, Swedish observations in 1958 6599
temp. distrib. in outer solar atmosphere 6590
various disturbances, origin of type II radio bursts, optical study 4900
water heating using plastic materials 19500
Fe X u.v. resonance line study 14436
H^- ion in solar atmos., collisional dissociation 18747
Hα activity, short wave fadeout correl. 12285

magnetism
direction and irregularities, from scatt. of cosmic r.f. radiations 14430
fields responsible for cosmic-ray variations 14182
flare, assoc. mag. fields 14429
flare (16 July 1959), assoc. mag. field 9
flares, from Zeeman splitting and spot field study 18759
flocculi, mag. field, corpuscular stream ejection 3422
motion of solar cosmic rays 14408
polar zones, rel. to sunspots and prominences 6601
in prominence and corona formation 6592 [18758
prominences, field strength, rel. to prominence lifetime
in sunspot cycle 16541
sunspots field, correl. Mt. Wilson, Potsdam and Crimea data 6588

radiation (See also Astronomical spectra, sun; Sunlight).
absorption by atmospheric water vapour 14409
absorption at snow surface 14301
activity indices based on meas. of atmospherics 6452
centre-to-limb wavelength increase 18774
chromospheric spicules, Hβ, H_γ and K profiles 18761
contours of solar lines near extreme limb 18773
contra-streaming hydrogen plasmas 3777
cooling of coronal matter 11
corpuscular clouds, observation by direct continuous-wave reflection 4896
corpuscular emissions, enhanced ionization in polar ionosphere 14223
corpuscular, geophysical effects 21313 [14187
corpuscular influence on large-scale circulation at 300 mb
corpuscular, plasma and magnetic fields in solar system
corpuscular radiation, rocket study 14381 [10487
corpuscular streams, ejection, effect of flocculi mag. field
corpuscular streams, 1950-3, origin 8359 [3422
cosmic-rays, backscatter by H II sphere 20279
cosmic-rays, balloon observations (26th March, 1958) 9482

Sun — contd
radiation — contd
cosmic-rays, intensity and solar activity 11249
daily index based on E-layer ionization 14230
effect on lower ionosphere 2008
effect on Sputnik III signals 18
e.m. radiation, from rotating electrons, in mag. field 5316
emission intensity at 11 μ 18770
energy conversion, photocell efficiencies 9987 [7967
energy conversion, photovoltaic cells, temp. considerations
γ, energetic, γ-ray telescope detection 16460
geophysical effects 21314
Hα and X-ray surges, as cause of atmospherics 16542
integrator 14952
limb darkening near Hα 10509
neutrino radiation 5631
origin of terrestrial particles from solar flares 6583
plasma, interaction with earth's field 18468
pressure, artificial satellite perturbations 10530
pressure, effect of perigree ht. of Vanguard I 8531
pressure, effect on satellite orbits 8530
pressure, influence on artificial satellite motion 14472
pressure, propulsion of space vehicles 12334
protons, as cause of geomagnetic variations 1989
rocket astronomy data 16538
solar bundles, observations in Norway 8415
solar wind, coupling with exosphere 16456
solar wind, unifying hypothesis with aurora and Van Allen radiation belt 4813
Swan bands of comets, excitation mechanism 14406
use for space navigation 12690 [16539
X-rays, accompanying three S.I.D. flares, rocket meas.
X-rays, centre—limb variation of slowly varying radiation
X-rays, emission, free neutron decay 18767 [18742
radiation, radiofrequency
activity centres, 3.23 cm study, with 2-aerial interferometer 4852
after flare (22 Aug. 1958) 8474
atmospheric scintillations, observed with centimetric waves 16474
brightness distrib., at 60 cm, localized regions 4851
bursts, association with flares 4898-9
bursts, cm-wave, correlation with flares 14214 [20280
bursts, correlated with magnetic and cosmic-ray storms
bursts, frequency drift with time 4859
bursts, magnetic storm forecasting 14181
bursts, at metre and cm wavelengths 4856
bursts, polarized, and noise storms 6560-1
bursts, power spectra, rel. to geomag. and ionospheric disturbances 18474-5
bursts, rel. to cosmic-ray emission 4858
bursts, short-duration 18641
bursts, and S.I.D. effect on u.h.f. scatter propagation 21346
bursts, slow drift, velocity 6562
bursts, type III, 15-38 Mc/s, noise storms 6556 [4857
bursts, 19 Mc/s, source location, correl. optical activity
bursts (4 Nov., 1957) 18643
chromosphere temp. and density model 18630
corona intensity, comparison with optical studies 2082
corona, radioheliograms 18634
from corona, slow variation, mechanism 14427
corona study 3407-8
and cosmic-ray storms 11253
detection of coherent harmonics 833
during eclipse, 19 April 1958, microwave brightness distrib. and polarization 18647 [10395
earth's mag. field micropulsations 27 day solar depend.
e.m. wave propag., by plasma oscillations 3766
emission region dimensions 12262
inner corona model 18631
multiphase interferometer for source location 6567
noise emission periodicities 6557
noise fluctuations 3407
noise storm, correl. with solar flares 14422
obscuration 8483
outer corona, radio emission 4
polar cap cosmic noise absorption correl. 12257
polarimeter 16524
quiet sun at 88 cm 18632
radio storms, relation between position and sense of polarization 6559
review 14407

Sun -contd
radiation, radiofrequency - contd

N—S asymmetry 8
non-recurring, velocity field structure 8498 [14252
number, F_2-layer maximum usuable frequency predictions
numbers, correl. with geomag. fluctuations 14168
observations, Jan.—June 1957, Istanbul 8501
peak number estimate for 1968 10501
photographic observations of solar photosphere 14412

Sunspots — contd
polarization of light 4893
polarization observations at 2.0, 3.3, 5.1 cm 18636
prediction (1959-1966) 839
radio-emission at 10 cm, rel. to visibility 18642
radio-star scintillation correl. 16475
as radio-storm sources 18645
review 14407
rotation and isorotation 10500
secondary zone, butterfly diagram (1879-1950) 10 [14419
solar activity and geomag. K- index at sunspot minimum
as sources of 3.2 cm emission 18637
surrounding photospheric brightness 8500
umbral granulation, high resolution photogr. 4891
Wilson effect 8499
1939-59 data, rel. to coronal emission 14437
1958 records 3421, 12278

Superconductivity (See also Quantum theory, many-particle systems).
acoustic absorption and thermal cond., electron—phonon interaction 13500
alloy with transition metal, influence of exchange 8959
alloys, dilute, thermodynamic treatment 12556
alloys, in strong mag. field near T_c 8927
Bardeen's theory, comment 10832
BCS model Hamiltonian, asymptotically exact soln. 19550
BCS theory, appl. to nuclear matter and liquid He^3 11124
BCS theory, case of overlapping bands 3703
BCS theory, connection with perturbation theory 16942
BCS theory, criticism 10831 [16637
BCS theory, electron-pair model in configuration space
BCS theory, exact treatment of strong coupling approximation 19548
BCS theory, experimental criteria, penetration depth and scatt. 10834
BCS theory, gauge invariant formulation 12555
BCS theory, ground-state energy and Green's function for reduced Hamiltonian 10838
BCS theory, interaction in 8943
BCS theory, mathematical aspects 14536
BCS theory, plasma frequency dispersion 14929
BCS theory, quasi-particles and gauge invariance in 5234
BCS theory, in strong-coupling limit 7025, 14925
Bethe—Goldstone approximation method 14924 [19554
Bogolyubov method for collective excitations, plasma freq.
Bogolyubov model, Meissner—Ochsenfeld effect, calc. 1076
Bogolyubov theory, appl. to moment of inertia of superfluid fermion systems 12375
Bogolyubov theory, energy gap 16946
bolometer and spectrometer for far i.r. 8837
bolometers, criteria of choice 12528
Bose gas, non-ideal, excitation spectrum 901
boson gas, phase transitions 3462
circuits 19573 [19554
collective excitations, Bogolyubov method, plasma freq.
collective excitations, theory of dielec. const. 230 [10842
collective excitations, transverse, i.r. absorption, theory
compensation equation, with Coulomb interaction 10837
computer elements 8932
conference, Cambridge (1959) 19547
contacts with interposed barriers 5235
contacts, theory 10851
critical mag. fields due to supercurrents 14930
critical supercooling field 8941 [10829
current-carrying ring, in liq. He, phase-transition meas.
cyclic refrigerator 8952
dangerous electron diagrams, Coulomb effects, using S-matrix 8929
electromagnetic response, relation between diamagnetism and longit. and transverse conductivity 19557
electron gases 10839
electron interaction 16943
electron—lattice interactions, perturbation 12558
electron—phonon interaction, theory 1073
electron—phonon resonance, theories 527
elements with extremely low transition temp. 5236
energy gap in Bogolyubov theory 16946
experimental data, existence of ferromagnetism 8946
Fermi gas, degenerate, acoustic excitations 1071
fermion system, with BCS interaction, modified Bethe—Goldstone eqn. 17271
fermions, infinite system, energy gap, reaction matrix singularities 17270

Superconductivity - contd
ferromag. metals 14932
ferromag. superconductors, intermediate state 7031
ferromagnetics, effect of (s—d) exchange 19560
films, critical fields, calc. 16954
films, magnetic field attenuation, meas. 10853
films, thermal propag. of normal region 12564
gauge invariance 16947
general account 1072
Ginzburg—Landau macroscopic theory, comparison with expt. 14931
Ginzburg—Landau theory, review 8942
Gor'kov's method, generalization for electron—phonon interaction 14922
ground state, alternative models 19551 [229
ground state, BCS Hamiltonian with improved eigenfunctions
ground-state energy and Green's function for reduced Hamiltonian 10838
hard sphere Bose system, pair distribution form 16627-8
hard superconductors, intermediate state, study of large domains 2293
hard superconductors, volume changes 8956
high current densities, extension of BCS theory 3702
impure superconductors, BCS-type theory 3704
impurity effect, theory 14927
interacting fermions, as fermion-pair bosons 10835
intermediate state, study 10848
interphase surface energy meas. 7028
i.r. absorption, energy gap mechanism 10845
isotope effect in BCS and Bogolyubov theories 1077
Knight shift 19552
Knight shift, non-disappearance 231
λ-transition, 2-fluid model, thermodynamic props. 8928
lattice gas, multi-component, 1-parameter theory 6009
law of corresponding states, expt. and theory compared 1074
London equations, derivation from Maxwell equations 16944
mag. field meas., in superconductors, γ—γ ang. correl. 5232
magnetic superconductors, T_s rel. to Curie point 16956
many-body problem, review 3448
Meissner effect, BCS and Bogolyubov's theory 5233
Meissner effect, Bogolyubov theory 16945 [19458
Meissner effect, effect of strong coupling between electrons
Meissner effect, gauge invariance of many-electron system 14926
Meissner effect, Tomonaga's gauge-invariant theory 14928
metals, polyvalent, transition temp. calc., pressure depend.
metals, with quasi-boson excitations 10830 [3705
nuclear spin relaxation, theory, and calc. of R_s/R_n 1078
paramagnetic effect in superconductors 8961
phenomenological electrodynamics 9148
phenomenological theory, Ginzburg—Landau eqns., microscopic derivation 10836
plasma frequency dispersion, screened exchange energy, on BCS theory 14929
plates, intermediate states 10840
quasichemical equilibrium approach, pair correlations 19555
quasichemical equilibrium theory 12383
quasi-particles and gauge invariance in theory of 5234
relation to ferromagnetic interaction phenomena 10111
relation to ferromagnetism for AB_2, (A=Nd,Y; B=Re,Os,Ir, or Pt) 13753
Righi—Leduc effect 19558
single layer coils and hollow cylinders 5238
slots in surface of superconductor 8953
solid state physics conference 6002
spin alignment, theory 2286
spin—electron interactions, experiments 12557
spin exchange in superconductors 8964
spin—spin interaction of impurities 19556
static London eqns., analogue soln. 19549
superconducting electromagnets 7029
superconducting electrons, range of order in normal conducting barriers 8962
superconductors, n.m.r., Knight shift, theory 1075
supercurrent maximum for particular value of energy gap
surface energies 8942 [16948
surface impedance, calc. 10841
surface impedance, frequency depend., exper. data 8930
surface impedance in mag. field, theory 8926
susceptibility of supercond. spheres 5375
theory, review 10833
thermal conductivity, electronic component, anisotropy effects 10844

Superconductivity - contd
thermodynamics 14923
transition region hysteresis loop props., tin 2287
transition temp., effect of exchange interaction 12560
two-component atomic volume model 8945
two-component theory 8925 [8944
virtual interaction among electrons, parallel permutation
rare earth alloys, ferromagnetic, theory 7030 [6217
rare earths, in superconductor, solid soln., ferromag. props.
Al, critical temp., effect of impurities 8957
Al, interphase surface energy 7028 [1074
Al, law of corresponding states, expt. and theory compared
Al, mm wave absorption, temp. depend. of energy gap and skin depth calc. 2288-9
Al, spin—lattice relaxation time 8950
Al, superconducting state, structure at critical temp. 18337
Al, surface impedance, calc. 10841
Al, u.s. measurements 233
Au wires, Sn-plated, contact supercond. 5235
AuBe 5237
Be films, polymorphism 10846
Bi, work-hardened 18379
BiPt 10847
Cu wires, Sn-plated, contact supercond. 5235
Cu—Bi alloys 10849
CuS, X-ray spectra 14934
Fe films, on glass 2290
Ga, nucl. quadrupole resonance, 0.8 - 4.2°K 19562
Ga, plastically deformed 16955
Ga, sp. ht. in normal and supercond. states 8947
Ga, thermal cond. in supercond. and normal states 7026
Gd—La, magnetic alloying, latent heat at critical temp. 19553
$GdOs_2$—$LaOs_2$, solid solns., T_S rel. to Curie point 16956
$GdRu_2$ in $CeRu_2$, solid soln., mag. props. 11844
$GdRu_2$—$CeRu_2$ solid soln., T_S rel. to Curie point 16956
Hg, apparent structure on far i.r. energy gap 1083
Hg, critical field curve 8935
Hg, energy gap, from far-i.r. absorption 14933
Hg, i.r. absorption due to transverse collective excitations, theory 10842
Hg, i.r. transmission, 0.1-1.1 mm, of films 10852 [1074
Hg, law of corresponding states, expt. and theory compared
Hg, superconducting state, structure at critical temp. 18337
Hg, u.s. absorption 8954
Hg, u.s. attenuation 232
In below 1°K, thermal conductivity 8937
In, critical field curves 16951
In, critical field, pressure depend. 19563
In, critical temp., change due to electrostatic charging 19559
In, critical temp., effect of impurities 8957
In, energy gap, from far-i.r. absorption 14933
In, interphase surface energy 7028
In, i.r. transmission, 0.1-1.1 mm, of films 10852
In, specific heat below 1°K, lattice contribution in supercond. state 13489
In, superconducting state, structure at critical temp. 18337
In, surface tension meas., at boundary with normal phase
In, thermal cond., 1.3-4.2°K 20755 [8934
In, variation with frequency 8936
In—Hg alloys 7032
In—Pb alloys 8960
In—Pb, transition, time delays in 500-1000A films 1082
La and La—rare earth alloys, transition temp. 12560
La with rare earth additives 12557
La, spin—spin interaction of impurities, transition temp. lowering 19556
Mo—U, alloys 4320
Nb, electronic sp. ht. 8948
Nb, energy gap, from far-i.r. absorption 14933 [19565
Nb, lattice spec. heat, difference from normal-state value
Nb magnet, from nuclear orientation studies 11299
Nb, thermal cond. in supercond. state, effect of plastic deformation 8938
Nb—Sn, critical field 19564
Nb—U alloys 4320
Pb, apparent structure on far i.r. energy gap 1083
Pb, critical field curve, comparison with Hg 8935
Pb, density of states, max. near Fermi level 20772
Pb, energy gap, from far-i.r. absorption 14933
Pb, energy gap, by penetration depth meas. 7034
Pb, energy, meas. by electron tunnelling in $Al/Al_2O_3/Pb$ sandwich 16949

Superconductivity - contd
Pb, hollow cylinder, normal transitions 8951
Pb, i.r. absorption due to transverse collective excitations, theory 10842
Pb, i.r. transmission, 0.1-1.1 mm, of films 10852
Pb, irreversibility in supercond. transition 12559 [1074
Pb, law of corresponding states, expt. and theory compared
Pb, pressure depend. of critical temp., up to 10^4 atm. 8939
Pb spheres, gyromagnetic effect 8949
Pb, superconducting state, structure at critical temp. 18337
Pb, superconductive storage elements, relaxation times 7035
Pb, thermal cond. in supercond. state, effect of plastic deformation 8938
Pb, transition, time delays in 500-1000A films 1082
Pb—Bi, thermal cond. in supercond. state, effect of plastic deformation 8938
Pb—Gd, Ga depend. 8933
Re, domains, effect of cold-working 2293
Re, neutron irrad. 3706
Rh, critical mag. field, down to 0.3°K 12561
Sn, below 1°K, thermal conductivity 8937
Sn, critical field curves 16951
Sn, critical temp., change due to electrostatic charging 19559
Sn, current transitions in films 1081
Sn, destruction, critical resistance 12563
Sn, energy gap, from far-i.r. absorption 14933
Sn, energy gap anisotropy, u.s. absorption study, temp. depend. 19567
Sn films, critical currents 12562
Sn films, critical fields, calc. 16954
Sn films, cylindrical, critical mag. fields and currents 8940
Sn films, as i.r. bolometers, 50-1000μ 19495
Sn films, low residual resistivity 10854 [10855
Sn films, mag. phase transition, influence of aggregation
Sn films, penetration depth 8931
Sn films, supercond.—normal cond. transition 16950
Sn, h.f. surface impedance 10850
Sn, interphase surface energy 7028
Sn, i.r. transmission, 0.1-1.1 mm, of films 10852 [1074
Sn, law of corresponding states, expt. and theory compared
Sn, pressure depend. of critical temp., up to 10^4 atm. 8939
Sn, surface impedance, calc. 10841
Sn, surface resistance, 17-77 kMc/s and 1.5-3.0°K 1080
Sn, surface tension at supercond.—normal phase boundary
Sn, transition, no time delay detected 1082 [19566
Sn, transition temp., impurity effect, theory 14927
Sn, u.s. absorption, anisotropy 13501
Sn, variation with frequency 8936
Sn, wires, metal plated, contact supercond. 5235
Sn—In alloys, thermal resistance in intermediate state 7033
Ta, critical field curves 16951
Ta, energy gap, from far-i.r. absorption 14933
Ta films 2291
Ta, resistance transition induced by mag. field 2292
Ta, single crystals, prep. for critical field meas. 8955
Ta, transition temp. for purified specimens 16952
Ta—Nb single mixed crystals, trapped magnetic flux in 7027
Ti, transition temp., effect of Cr, Mn, Fe, or Co in solid solution 1079
Ti films, effect of H_2, N_2, A and O_2 adsorption, thickness depend. 16953
Tl, films, influence of adsorbed gases 5239
Tl, pressure depend. of critical temp., up to 10^4 atm. 8939
Tl, superconducting state, structure at critical temp. 18337
V alloys 8958
V, energy gap, from far i.r. absorption 14933
V_3X (X=As, Au, Co, Ga, Ge, Ic, Pt, Sb, Si), β-W structure, n.m.r. properties 19561
β-W structures 6358
Zn, sp.ht. in normal and supercond. states 8947
Zn, superconducting state, structure at critical temp. 18337

Supercooling
constitutional, function in crystal growth 1681
nucleation, at reduced temp. 16267 [3687
organic materials, differential thermal analysis, apparatus
He^4 supersaturated vapour, condensation in cloud chamber 7018

Superfluidity (See also Quantum theory, many-particle systems).
Bose systems, dilute 3461
electron gases 10839
Fermi fluid, bound pair states, hard-core effects 22
fermion systems, moment of inertia 12375

Superfluidity - contd
flow mechanism 8866-7 [1070
hydrodynamic stability of He II between rotating cylinders
ion drift velocity study 14913
nuclear matter 1348
nuclear matter, theory 11124
in nuclei 9505, 20330
nuclei, at non-zero temp., phase transition 15499
of nuclei, rel. to moments of inertia 4011
pair distribution near a wall, asymptotic value 3510
quantization of circulation 7023
use in studies of nuclei 13110
superleaks and He films, props. 6868
theory 8892
theory, use in models of nuclei 2616
vorticity in superflow 8922
H, D, T, in mag. field, critical temp. and pressures 19531
He, as Bose–Einstein gas 10817
He, excitations, Feynman theory 8875
He, rotation, review 14916
He_3 vortex lines 8874
He^3 7020, 8924
He^3, theory 11124
He^4, critical vel. through 260 micron glass capillary 8912
Supersonic flow (See also Shock waves).
application to pneumatic pivot design 16729
around thin bodies, at high attack angles 12430 [10904
collision-free shock thickness, Alfvén Mach number depend.
combustion in 2270
density measurements using flash X-ray tube 19188
density and temp. meas. in highly rarified medium 951
entropy and velocity 2203
hydraulic analogue 16725
hypersonic, at leading edge of flat plate 5045
hypersonic, past wedges 19187
hypersonic wakes in atmos., density and temp. profiles, calc. 14679
over delta-shaped body, computation 6539
plasma, under piston action 9170
shock waves in plastic medium 993
sphere, shock layer about stagnation region 14671
transonic, inviscid flow, normal shock waves from convex body 19185
turbulent boundary layer meas. at Mach numbers 8-10 952
air stream, transition boundary–layer processes, optical study 16727
water, supersonic, wall friction meas. from temp. rise 12404
Supersonics (See Ultrasonics).
Surface energy
crystals, orientation dependence 17865
liquid sessile drops, minimum energy 6772
Madelung calc. for ionic solid 7836
salts, molten, near freezing pt. 13466 [13467
semiconductors, with diamond and zinc blende structures
Fe crystals 4258
LiF films 21182
NH_4Cl 12096
Surface ionization (See Ionization, surface).
Surface measurement (See also Area measurement).
in gas–solid interactions 14147
granular materials, by small-angle X-ray scattering 21222
non-destructive technique for examining surfaces 2064
specific area by heat of adsorption determ. 8264
Surface phenomena (See also Adsorption; Capillarity; Catalysis; Electron emission; Films; Ionization, surface; Liquid waves, surface).
absorption capacity meas. for solids 8264
adhesion, effect of electrical layers at interface 4574
apparatus, for ultra-high vacuum work 14699
atom recombination 510
atomic roughening on surface melting 21213
contact, theory 6716
deformation and frictional forces, relationship 4571
ferromagnets, magnetostatic modes and spin waves 11817
fibre replication, by rolling 8263
h.f. electromagnetic examination without contact 6530
magnetic gradient at surface of ferromagnetic substance
metal surfaces, atomic cleaning 8726 [13751
metal surfaces, scattering of ions, theory 19801 [8136
metals, contamination, effect on junction growth in friction
metals, effect of inert-gas ion bomb. 19803
metals, electron emission during oxidation 260
Surface phenomena - contd [8983
metals, metastable ion contamination, electron emission
microscopic cracks in drawn glass 3261
molecular beam deposition on to cold target surfaces, theory 14888
molecular crystals, surface effects, penetration depth 11555
molecular dissociation and reconstitution on solids 1968
monomolecular films, compression props., automatic recording technique 16394
p–n junctions 15915
semiconductors, etching effects 590
small particles in vacuo, surface temperature versus particle size 1962
solids in vacuo and various vapours 4573
study by frustrated total internal reflection spectra 10030
surface ageing at liquid–liquid interfaces 2158-9
surface analysis by charged particle spectroscopy 18457
surface re-orientation on metals due to abrasion 704
surface sp. ht. of isotropic solid at low temp. 20748
temperature, meas. by molecular beam technique 19521
cetyl alcohol film, reduction of water evaporation 14890
diamond on glass, surface flow and wear 8140
diamond, surface states, MO–LCAO treatment 20719
glass, elec. conductivity 11651 [10274-5
glass, surface crack distribution, Na vapour etching study
graphite, surface states, MO–LCAO treatment 20719
polymethylmethacrylate, surface degradation 3309
polyvinyl chloride, crack appearance 10273
quartz, amorphous layer on particles prod. by milling 12058
quartz, highly dispersed, surface props. 12114
quartz and vitreous silica, refractive index changes on ion beam irrad. 13569
serum albumin 15970
snow, plane crystals, coalescence 14324
steel, austenitic, macro-surface stresses 10254
water jet striking surface, molecular kinematics 6737
Ag crystals heated in air, striation formation 18328
AgBr, surface potential, temp. depend. 20961
Al, electron energy loss spectrum, effect of oxidation 9880
Al, fatigue, surface deformation 11976 [14151
Bi_2Te_3, cleavage surfaces, adsorption and bonding props.
Bi_2Te_3, structures produced by cleaving and by ion bombard. and annealing 14047
C, alkyl iodide vapours interaction, desorption and activation energy 3304
CdS, trapping and diffusion 13631
CeO_2, heat treated, composition 606
Fe, ionic bombardment 7902
Fe–Cr alloys, dislocation study, by ion bombard. 1927
Ge, conductivity, effect of various treatments 15929
Ge diodes, ambient atmosphere and reverse current 9981
Ge, effect of etching on recombination velocity 13601
Ge, field effect and cond., cleaned surfaces 4344
Ge, investigation by magnetoconcentration effect 2861
Ge, study by frustrated total internal reflection spectra 10030
Ge, surface cond., p-type, and field-induced surface cond., of cleaned surface 2678
LiF, effect of surface cond. and mech. props. 21096
Mg, electron energy loss spectrum, effect of oxidation 9880
N migration on W 7838
O atom recombination 511-12
O atom recombination on metal 6405
P, red, interaction with alkyl iodide vapours, desorption 3305
Si–electrolyte barrier layer 13649
Si, n-type, surface energy levels 15938
Si rectifiers, in various ambients, surface breakdown 11702
Si:Au, chemical poti., temp. depend. 11699
W, surface migration in high electric field, activation energy 11646
W carbide, Co-bonded, wear of hard and soft phases 18285
Zn silicate phosphors, in fluorescent lamps 11779
Surface tension (See also Capillarity).
calc. from liquid density and vapour pressure 5004
difference between dynamic and static 70
gas-phase nucleation, Becker–Doering theory 6425
liquid lamellae, formation in liquids 8661
liquid–liquid interfaces, surface ageing 2158-9
Marangoni effects 19081
mechanical working of a liquid, influence 72
relaxation, surface viscosity relation 3504
rotating liquids, freq. and temp. depend. 73

Surface tension - contd
rotational kinetic effect 8640 [5213
small spheres in metal vapour, formation of surface film
solutions, partially miscible, interface mixing zone, non-stationary effects 19085
virtual work, method, problems 5006
benzene, bubble meas., rotation effect 19087
benzene, solid—liquid interface tension 3505
caprylic acid in HCl 71
cetyl alcohol, on water, damping out ripples 12411
ethyl alcohol 14613
glycol, benzene, bubble meas., rotation effect 19087
higher alcohols in H_2O 71
hydrocarbon acid and alcohols, straight-chain, study adsorption in water surface 14615
water film, vertical jet directed onto horizontal plate 5005
Bi, 300 -500°C 19088
Bi—U, 300-500°C 19088
Ge, temp. depend. 19089
He^3 liquid 8861 [8934
In, at boundary between superconducting and normal phases
Sn, anisotropy at supercond.—normal phase boundary 19566
Sn, 300-500°C 19088
Sn—Tl, 300-500°C 19088
Te—Tl alloys, molten, rel. to electrochem. props. 10355
W, solid phase 7839

Surface tension measurement
automatic recording film balance system 2162
coacervates, interfacial tension by stirrup method 14614
and density meas., in one apparatus 2161
dilute electrolyte solutions, Jones—Ray effect 2160
drop-out method, effect of viscosity 19082
du Noüy method, using load cell, automatic recording 14607
du Noüy ring, profiles and areas of interfaces 2163
epitasimeter, process control of chemical concentration
falling meniscus method, factors affecting 3503 [5002
liquid—liquid interfaces, calibration of contracting jet method 2158
liquid mixtures, avoidance of errors due to evaporation 71
monolayer compression props., automatic recording 16394
photoelectric method, tensiograph 10644

Surface texture
cracks, geometry 14045
cracks on transparent plastics 6315 [16828
crystals, interference microscope for surface examination
damage in intermetallic compounds 13941
electron microscopy, height det. method 16368
friction, dependence on roughness 10277
metal cold cathodes, effect on emission 7150
metals, effect on ferromagnetic resonance 13857
mirrors, polishing, for Newtonian telescope 165
radiation focusing, by random surface 8769
roughness equilibrium on surface melting crystal 21214
theory using orientation density 8146
glass, effect of intense ultrasound 21215
glass, electron microscope study 16339
mumetal, heated in air 18394
rocksalt, effect of polishing (100) faces 8213
steel, finishing techniques for high-speed mirrors 2235
steel, rolling resistance 8131-2
Fe-3% Si, complex recrystallization texture 18291
Ge, electrolytic polishing, optimum conds. 21177
LiF, effect of scratching 10278
Mg evap. films, structure determination, ultra-high vacuum technique 14046
MoO_3 crystals, electron micrograph interpretation 3286
Ni films, electroplated, brightness 4393
W carbide, bonded, pick-up of Cu and duralumin 6322

Suspensions (See also Aerosols; Sedimentation; Sols).
attenuation of sound in suspensions, effect of heat losses 19294
electrospheric mobilities and surface-charge densities of particles 19605
elutriator for ferrimag. mineral sands 10326
ferromag. particles, characteristics in mag. field 21047
gas bubbles in liquid in acoustic field, coagulation 4738
in opaque liquids, vel. of falling particles 3491
particle size from turbidity 16390
photoelectric counter for small particles 18447
polydisperse macromolecules, sedimentation 16393
spherical particles, viscosity meas. 4987
sound attenuation and visco-inertial dispersion 6869

Suspensions - contd
submicroscopic particles, precision counting 8331
thermal-precipitator for air sampling 10362
Van der Waals attraction betw. uncharged particles 12113
viscosity formula 14578
viscosity of suspensions of spheres 6730
algae in water, u.s. absorption 8750
barytes, rheological props. 8596
clay, yield stress 16391
glass beads, in electrolytes 3330
mastic, light dispersion 16900 [10665
polymers, in liquid dielectric, nonuniform elec. field effects
sand in water, motion 6752
silica, vitreous, water, sedimentation, mobilities 4744
Al flakes, orientation in electric field 10360
UO_2—NaK, cold trap stabilization 14143

Symbols (See Nomenclature and symbols).

Synchrotrons (See Particle accelerators, orbital).

Tables, mathematical
Bessel functions, modified, second kind 6541
Coulomb wave-functions, irregular 6685
Hermitian polynomials 14369
integrals, for fundamental particle interactions 325
nuclear resonance theory, $\psi(x,t)$, $\phi(x,t)$, $\Psi_n(t)$ 13216
solid angles subtended by circular disks 3396

Tables, physical (See Collections of physical data).

Tachometers (See Angular velocity measurement).

Tantalum
deuteron irradiation, D build-up, neutron yield 17979
emissivity, spectral and total, and thermal cond. above 2300°K 14876
equations of state, at high pressures 11549
etching effects, dislocations 13969
films, superconductivity 2291 [1599
in Ge, diffusion and solubility, temp. and elec. cond. depend.
internal friction, high-temp. damping 3145
isotopes 173-175, discovery 9605
photo-emission, elec. field depend. 1148
secondary emission, He, H and A ion bombard. 12632
secondary emission, during incandescence, under K ion bombard. 15059
secondary emission, under ion bombardment 19806
secondary emission, positive ion bombard. 9078
single crystals, prep. for critical field meas. 8955
sputtering ratios, for A^+ bombard. 9110
sputtering and scattering on bomb. with Cs^+ 9107
superconducting, far-i.r. absorption 14933
superconducting Ta—Nb mixed crystals, trapped magnetic flux in 7027
superconducting transition, induced by mag. field 2292
superconducting transition, purified specimens 16952
superconductivity, critical field curves 16951
superconductivity, intermediate state 10848
Ta/Rh—W thermocouple, up to 2800°C 7006
thermal cond., normal and supercond. states 10843
twinning, after impact deformation 18294

Tantalum compounds (See also Alloys).
anodic oxide films, p—i—n junction 15962 [7979
tantalates, of Mn, Co or Ni, solid solns. based on $BaTiO_3$
TaC, thermal decomposition 10349
$TaCl_3$, potential field and force constants 1501
Ta_2O_5, anodic films, photo-induced growth 10337
Ta—O system, high-temp. study 12095

Teaching
Advanced Placement Programme, in U.S.A. 4918 [4965
air suspension apparatus for measuring resolution of forces
alternating current experiments 2294
architecture students, physics course 4920 [860
atomic constants, laboratory experiment for measuring
β- spectrometer demonstration 1161
calculus—physics course 26
centripetal force apparatus 6725
circuitry and nonlinear elements 1094
cosmic-ray physics, coincidence telescope 11263
creative thinking and experimenting 6639
cryophysics, textbook 14912
demonstration lectures, conference 14483 [16868
dielectric and metal films, optical properties, demonstration
dynamic hard-sphere model 8690

Teaching – contd
dynamics of impact ball apparatus 19031
e.m. field of ferromagnetic transformer 17069
educ. of 19th century scientist 856
electrification of conductors 234
electromagnetic waves 17093
electrostatics, problems 19589
engineering curricula, revision 857
exponential decay, by water column half-life 18897
in France, Argentina and England 3430
graduate examinations 22
high school physics courses, evaluation 24
high-vacuum kits for students 19241
hydrodynamic flow demonstration 917
importance of correct questions 28
interference, from 2 slits, film and protractor model 174
interrelationship of physical quantities 4924, 18899
ionization chamber for demonstration 1229
kinetic theory demonstration apparatus 16730
LCR circuits 7049
laboratory examinations, nonsecret 4922
lecture demonstrations 4921
mass spectrometer, simple type 5362
modern physics, laboratory course 17129
momentum experiments, air-suspended pucks 16656
motional electric fields, demonstration 17067
National Science Foundation, institutes 4919
nuclear physics, ratemeter and valve voltmeter 17174
nuclear reactor, at Iowa State College 13346
nuclear reactors, subcritical, as college facility 5814
optical pumping apparatus 17693
particle track visualization, dust-track model, with Pb and alnico slugs 5458
Ph.D. physicists, baccalaureate origins 25
Ph.D. physicists, undergraduate training 23
philosophy of physics 6638
Pohl, 1959 Oersted medalist 14482
potential fields, demonstration expt. 1090
precession 4974-5
punched cards for personal ref. files 18896
rubber membrane model, for demonstrations 16561
secondary school physics courses 6636
sphere collision demonstration 3475
special relativity, problem 16573
through television 6637
television courses 4916
testing for physics achievement 4917
thermodynamics formulae derivation 16927
virtual work, in soln. of problems 5006
visiting foreign staff project, at Temple University 3429

Technetium
decay of Tc^{99m}, in Tc metal, effect of compression, calc. 5718
melting point, determination 20725

Telescopes
binocular, parallelism tolerances 6921
Galilean, telephoto lens treatment 8778
image interpretation, enlarged retinal image, psychological approach 19383
Newtonian, cutting and polishing mirrors 165
wide-angle tracking device 19388
astronomical (See also Radioastronomy).
Bergedorf Schmidt, as astrometric instrument 12241
polar axis adjustment 10470
reflecting, diffraction patterns due to obstructions 10471
reflecting, Lick observatory, 120 in. mirror 14373
reflectors, instrumental polarization, meas. and corrections 18612
satellite telescopes 14372
Wollaston polarization photometer, for 82 in. McDonal telescope 16515

Tellurium
carrier recombination and trapping 6143
diffusion in GaSb 4359
dislocations, etching, suitable etchants 17928
elec. cond., l.f. fluctuations, temp. depend. 15963
electrical and optical props., theory 6127 [6126
electronic structure, composite valence and cond. bands
field electron emission, rel. to V–I characteristics 1145
films, optical constants 4396
films, optical transmission and electron absorption 21247
films, strain coeff. 16198
ionization potential–refractivity relation 2321

Tellurium – contd
lattice vibrations, group theory study 20737
photoconductive cells, for i.r. 8840 [10942
secondary electron emission, primary energy depend.
thermoelectric power, effect of phonon drag 6149
tracer, electrolytic purification 5680
u.v. absorption and reflectivity 8004
u.v. emission spectrum, use for analysis 16397
zone refining, elec. resistance purity test 13963

Tellurium compounds (See also Alloys).
No entries this year

Temperature
"apparent", rel. to "true" in pyrometry 2273
atmosphere and interplanetary space 8484
changes, estimating conditional probabilities 14186
chip–tool interface in machining 10461
electron, in Sceptre IIIA plasma (~ 10^5 deg K) 8857
electron, in medium subject to synchrotron radiation 9042
flames, in liquid-fuel jet engine, colour temp. 8852-3
high-temp. prod., in spark discharges in A, Xe, N_2 7105
negative, possible prod. in gas discharges 1109
negative absolute, thermodynamic potentials for equilibrium systems 16931 [7036
1958 He^4 scale, using international vapour pressure data
proposed internat. temp. scale down to 20°K, Pt thermometer 214
behind shock waves 102
spark discharge channel temp., in air 14996
standards, freezing pt. of tin 2271
thermometric fixed points, establishing 3685

Temperature distribution
brake drum, bimetallic 16915
buried cable, temp. rise at surface 5197
composite media, of homog. isotropic parts 6974
in compressible 2-dimens. flow, with steady disturbs. 8612
concentric cylinders, dielectric filled 8819
cylinders, finite unsheathed 1460
in Dewar flasks, for liquid He 7039
elastic bodies, with cylindrical hole at const. temp., thermal stresses 6706
in elastic bodies, dynamic stress production 4970
in electrically heated plate 5195-6
electron gas, classical, in positive ion distrib., thermal equilibrium 15019
electron-tube anodes, radiation in vacuum 10944
gas mixtures, temp. discontinuity, at boundary 10691
in glow discharges, thermally inhomog. 1120
infinite plate, variable transfer coeff. and environment temp. 16905 18499
ionsphere, F2-region over Kodaikanal, June and December
lumina, in chemically reacting gas flow 14674
in liquid drawing of wire 12534
lubricant films, hydrodynamic theory 8611
multilayered tube wall 19473
nuclear reactor coolant channels, vector diagram 5830
nuclear reactor shells, γ-irrad. 7671
positive column of static arc 7098
sea, effect on acoustic intensity fluctuations 2213 [1052
in semi-infinite medium, with time-dependent conduction
solar atmosphere 6590
solid block, with one or more tubular heaters 12511
solids, during change of property 6961
soot flames, colour dependence 1059
Stephan's problem, moving interface 208 [14864
in stratified media, calc. [illegible]
thermal stresses in [illegible]
tubes and coils [illegible]
turbul[illegible]

Temper[illegible]
[illegible]
erro[illegible]
flames,
interpolat[illegible]
low temps., with [illegible]
planetary bodies, effective grey[illegible] ... bolometric albedo 8489
plasma, direct c.r.t. display of electron temp. 19688
reaction temp., behind shock wave 16377
recorder, multipoint digital, with punched tape output 14897

Temperature measurement - contd
recording, unattended long period operation 3436
rocket-grenade expt., correction 14197
running thread-line 3683
scales, He^4 vapour pressure proposal, 0.5-5.20°K 8878
scales, liq. He^3 region 8876-7
seawater, thermistor bridge apparatus 16765
within solid body, special thermocouple 7068
standardization, 10-90°K scale 19513
standards, freezing pts., high purity Pb 10803
standards, Pt resist.–temp. relationship at low temp. 7002
standards, sulphur point reproducibility 16923
in studies using solar furnaces 14896
at supersonic speeds, theory 951
surfaces, by molecular beam technique 19521
techniques, survey 2272
thermistor cryometer 3676
very low temp., in adiabatic demagnetization 10857
ZnS:Cu, u.v. excited, from luminescence meas. 16095
spectral methods
arc discharges 19520
arc discharges, excitational, vibrational and rotational temps. 3749
black radiator, 4000°K, and spectrophotometric apparatus
blackbody, practical realization 19488 [204
CO in hollow cathode, rotational temp. 7753
cathodes, opt. pyrometer evaluation and comparison 3684
detonation front, from luminescence 10814
electron temp., in high-temp. plasma 8857
flames 217
flames, etalon filter apparatus 1039
flames, laws of temperature emission 10810
jet-engine flames 8852-3
from line profiles 12483
metals, in near i.r. 8855
Mars, radiometric observations 6572
in nuclear physics 3336
plasma 19686
plasmas, H and He 19689
plasma, high-temp. 19687
reflectivity and temp. of radiating surface 6903
"rotational" temp., interaction effects 15695
in shock tubes 12455
shock wave gas temp., meas. by Na D-lines 10727
shock waves 102
behind shock waves, rel. intensities of spectral lines 973
shock waves, by spectrum-line reversal 8744, 14732
spark discharges 5287
spark discharges, electrode vapour temp. 3747
Venus 6573
Tensors
anisotropic, used in crystallography 16247
Cartesian, book 18568
irreducable tensorial sets, theory of coupling of angular momenta 16610 [6536
non-analytical manifold, conformal Minkowski space–time
pseudo-Hermitian space, self-adjoint operators 10464
super-energy, in relativity 6646
super-energy and Riemann, in general relativity 2110
Terbium
atomic spectrum 17714
elec. resistivity, 1.3-300°K 18002
electron config., and B cpds. 1502
heat capacity, 1.4-4.0°K 6016
hyperfine coupling, expt. det. 2991
magnetic props., 1.25-295°K 2986
Terbium compounds
luminescence, Tb^{3+} in complex cpds. 6196
luminescence, Tb^{3+} in soln., quantum yield 943
TbB_4, formation, structure 14020
TbB_6, formation, structure 14020
Tb ethyl sulphate, Tb^{3+} hyperfine coupling 2991
Tb hexa-antipyrine tri-iodide, luminescence 4452
TbN, mag. ordering, neutron diffraction study 11849
Terrestrial electricity (See also Atmospheric electricity).
current-system of geomagnetic variations 21341
effect of solar eclipse (19 Apr. 1958) 18471-2
Terrestrial heat (See Earth, heat).
Terrestrial magnetism (See also Geophysical prospecting).
Argus experiment, trapping electrons in geomag. field [10427-30
astatic magnetometer, for geomag. investigations 9133
Terrestrial magnetism – contd
auroral isochasms 793
bays, morphology 2001
bays, relation between auroras 8403
calculation from Vanguard I rotational damping 4910
chronic drag over geologic time 14163
comparison with cosmic-ray neutron distrib. 11262
cosmic ray effects, critical B-values 20304
current systems in vertigial geomag. field 10394
disk dynamo model, equilibrium stability 11023
distant geomag. field, radial rocket survey 12133
dynamo theory, review 19890
earth's field, and galactic cosmic-ray decreases, no association 20295
earth's field, geometry at ionospheric heights 8358
earth's field, horizontal component variations and solar radio emission 18469
earth's field, interaction with satellites 10538 [18490
earth's field, local distribution, effect of v.h.f. echoes
earth's motions in magnetosphere 10405
eccentric dipoles and spherical harmonic analysis 21308
effect on ionospheric turbulence 12172
effects on cosmic radiation, for observation pts above earth 11278 [21318
extraterrestrial current system, satellite information
field lines, conjugate points for auroral and whistler stations 10435
field lines, motion 12137
field measurement, to give earth radii 3340
field in space, ring currents and auroral isochasms 16410
geocentric axial multipole hypothesis 6433
geomagnetic dynamos 18458
green coronal line intensity 8503
Halley Bay Expedition, results 18476
IGY Kelvin Lecture 754
induced mag. field growth, through core 5390
induction of electric currents in spherical shells 19885
interaction of polar plasma with earth's field 18468
ionospheric forward scatter mode, 200 Mc/s, assoc. with mag. field 10413
magnetite, magnetic viscosity 18184
magnetohydrodynamic theories, review 19890
main field, 152 km above Fort Churchill 14170
measurement, vector field proton magnetometer 14161
observations, Prince Harald Coast, Antarctica 14179
origin, charged-sun theory 18473
outer atmos. field, distortion due to earth's rotation 14180
palaeomagnetism of British carboniferous system 21307
Palaeozoic slate, deformation effect on susceptibility anisotropy 14162
remanent magnetism, late secondary and early tertiary British rocks 21305
residual magnetization of rocks 1972
reverse thermo-remanent magnetism, exchange interaction as cause 4773
rocket-borne magnetometer 5372
rocks, anisotropic 6431
rocks, domain theory of magnetic grains 21042
rocks, exchange anisotropy 8041, 10388
rocks and geological bodies 8355
rocks, normal and thermo-magnetization 1973
rocks, remanence formation, opp. polarity 6432
rocks, stability, coercive force depend. 4774
rocks, statistical methods 21306
rotational retardation of Vanguard II 4911
space research possibilities 3433
stability of the plasma surrounding the earth 19676
two-dimensional mag. fields, analyt. continuation 1180
Western Canada, and elec. field study 12132
variations (See also Magnetic storms).
Antarctica, observations 4814
due to Argus detonations, world-wide effects 16411
C_1, international mag. character figure, daily normals
catalogue of disturbances 21343
due to changing ring current 14263
circulation at 100 mb correlation 10393 [14192
correlation with atmospheric ozone layer depth changes
correlation with solar corona intensities 8359
correlation with solar activity, review 6442-3
correlation with solar erruptions and radio bursts 18474-5
correlation with spread-F 14246
correlation with whistler occurence 12209

Terrestrial magnetism - contd
variations - contd
cosmic-ray distribution, latitude surveys, 1956-7 and 1958-9, Japan–Antarctic 20302
dawn chorus correl., diurnal max. 10447
dip, rel. to ionospheric electron density 16425
distant geomag. field, directional instability, Pioneer I investigations 10390
disturbances, and 5 kc/s electromag. radiation 14174
on earth's surface, due to external phenomena 1990
"eddy model" of non-dipole field and secular variation 18459
effects of high-altitude nuclear explosions 12142
effects of meteors 16407 [18760
effects of solar flares associated with type IV radio bursts
effects of spread-F in Baguio 21365
electrojet model fitting observations 6445 [14173
electromagnetic induction in hemi-spherical ocean by Sq
external influences 1990
F and E_1 ionization correl. 16433
F2 region distortion, on magnetic equator 14256
Fermi collisions with magnetohydrodynamic waves 21313
5 kc/s, from outer atmosphere, directional observations
geomagnetic noise at 230 kc/s 21396 [14315
global hydromagnetic wave ducts in exosphere 8369
H, S_q diurnal variation, Indian peninsular 16405 [14164
H and Z variations, near equatorial electrojet, relationship
horiz. field, effect of solar-caused ionization at equator
horiz. field, fluctuations near mag. equator 14167 [6444
horiz. intensity, lunar daily variation, at Alibag 12136
hydromagnetic oscillations and earth's outer atmosphere [18502
K-index, correlation with ionsphere drift velocity 14221
K-index and solar activity, at sunspot minimum 14419
Ibadan, lunar and luni–solar variations in H and Z 14176
Ibadan, solar variations 14175
and ionspheric disturbances, polar auroral freq. and intensity 12166
ionospheric and geomagnetic phenomena correlations in auroral zone 18497
magnetic and earth current disturbances, correl. with auroral activity 10438
micropulsations 4772
micropulsations, accompanying meteor activity 16409
micropulsations, aural zone, correl. with l.f. e.m. radiation 10437
micropulsations, e.l.f. atmospherics 12213
micropulsations, at equator 14178
micropulsations, 5 to 30 periods 10395
micropulsations, hydromag. wave correl., ionospheric heating 16439
micropulsations, occurrence frequency 12135
micropulsations, rare hiss and earth currents 10448
micropulsations, short period 16408
micropulsations, simultaneous with pulsating aurora 6435
micropulsations, short and long period, mechanism 21311
micropulsations, world-wide characteristics 21310
non-correlation with solar flares 755 [16412
due to nuclear explosions, at high altitudes 4770-1, 12141,
oscillations, at middle latitudes 10391-2
oscillations, 10-1 sec decrement, relation to ionsphere phenomena 6436
period range 0.3–120 sec 14168
pulsations 1993-2000
pulsations, giant 18461-2
pulsations, review, and earth currents 10389
rapid fluctuations, during magnetic disturbance 14177
relation between first impulses, horiz. and vert. magnetograms 8356
S_q current system, focus position 14172
S_q, tidal theory 14171
secular, theory, core and mantle rotation model 4775
due to solar eclipse (19 Apr. 1958) 18471-2
solar eclipse effect, fine structure 1991
due to solar flares 6434
due to solar protons 1989
variance (power) spectra of Cl, Kp and Ap 16413
vertical intensity, at mag. equator 2002

Thallium
as alkali halide luminescent activator 4431
atoms, sensitized fluorescence of Hg–Tl mixtures, effect of added A and He 15660
films, superconductivity, influence of adsorbed gases 5239

Thallium – contd
films, supercond. and normal cond., effect of H_2, N_2, A, O_2 adsorption, thickness depend. 16953
in K halides, effect on colour centres 16065
magnetoresistance, anisotropy, Fermi surface 9939
in Se, effect on elec. conductivity 7966
spectrum of vapour under pressure 5888
superconducting state, structure at critical temp. 18337
superconducting transition temp., pressure depend., up to 10^4 atm. 8939
Tl II–Tl III phase transition 14041

Thallium compounds (See also Alloys).
chalcogenide systems, optical props. 13609
$TlAsS_2$ (lorandite), crystal structure 3236
TlBr–TlI, mixed crystals, i.r. optical use 5155
TlBr–TlI, single crystals, kinking limit, orientation 13542
TlBr-NH_4Br, crystal growth, reflection and luminescent spectra 13714
TlCl, heat capacity and entropy, 15-310°K 1066
TlCl, absorption spectra 1729
TlCl, heat of sublimation and energy of dissociation 19511
TlF, magnetic double resonance 13883
TlI, effect of light on contact potential 1626
TlI, molec. vibrational freq. 9801
TlI, solid solubility in NaI 16356
TlI–TlBr (KRS-5), dielec. props., 500c/s–c Mc/s 16008
Tl halide films, rapid prep. 14081
Tl halides, absorption edge, pressure depend. 4406
Tl halides, u.v. absorption 11766 [13466
$TlNO_3$, molten, elec. cond. and viscosity melting study
Tl, S, polycrystalline photocells for i.r. 7962
$TlSbS_2$ and similar types, crystal structure of films 16330
$TlSbSe_2$ and similar types, crystal structure of films 16330
$Tl_2Se.As_2(Se, Te)_3$, Hall effect 15964 [615
$Tl_2Se–As_2Te_3$, conductivity fluctuation, excess noise meas.
Tl selenides, vapour state, temperature-pressure relations [19201
$Tl_2Te–As_2Te_3$, conductivity fluctuation, excess noise meas. 615

Thermal conductivity (See Conductivity, thermal).
Thermal diffusion (See Diffusion, gases, thermal; Diffusion, liquids, thermal).

Thermal expansion
combined dilatometry and thermal analysis apparatus 3675
crystals, ionic, lattice vibration theory, eqn. of state 4270
crystals, lattice vibrations relationship 13482
crystals, low-symmetry, expansion tensor axes, from X-ray data 13492
dilatometers, for viscous systems, recording and non-recording 207 [12989
fuel elements, externally clad cylindrical, thermal stresses
meas., at high temp. prod. by solar furnaces 14896
meas., at low temp., capacitance technique 17901
meas., up to 3650°C 12531
optical lever apparatus, for single crystals 11587
radiation detector principle 2266
nuclear reactor shell, due to neutron irradiation 7672
solids, pressure effect calc. 13495 [9854
solids, relationship with mech. and other thermal props.
stress analysis 8574
two-dimensional lattices 4271
alkali halides, room temp. - 700°C 17900
Armco iron, 0-1000°C 13498
diamond, 25°-750°K 15816
Fluoroplast IV, -190° to 325°C 6376
fluorspar 20751
gases, calc. from pvT data, experimental review 5210
gases, isothermal, during radiation absorption 12433
graphite, X-ray study, expansion coeff. variation 8291
ice 8206
ice, H_2O and D_2O, temp. depend. 9869
metals, electron gas contrib. 17902
metals, incorrect derivation 18899
polytetrafluoroethylene, rolled in one direction 10324
pyrrhotite, 0-350°C 13818
silica, vitreous, 4.2-140°K 12532
stearic acid, B- and C- forms, X-ray study 18368
steel, plastically deformed, 22-50°C 19501
1:3:5-trichlorobenzene, -183 to 20°C 8246
triglycine sulphate 7856
di-p-xylylene 8248
A, solid, at low temp. 8844

Thermal expansion - contd
Ag, lattice expansions and Debye temps. 1909
Ag, lattice vacancy equilib. conc. 13548
Ag, liq. and solid, in terms of defect formation 9893
Al, detection of vacancy concentration 27092
Al, liq. and solid, in terms of defect formation 9893
Al, at low temp. 8844
Al, pressure depend. 13495 [17902
Al, 20-30°K, departure from Gruneisen's theory explained
Al, 229-656°C, and lattice parameter temp. depend. 4294
AlAs, 291-577°K 1563
Au, liq. and solid, in terms of defect formation 9893
Bi, linear coeff., 80-540°K 13493
CsI, meas. by X-ray diffraction 6026
Cu, liq. and solid, in terms of defect formation 9893
Cu, low temp. electronic contribution 17901
Cu, pressure depend. 13495
Fe, low temp. electronic contribution 17901
Fe, pressure depend. 13495
Fe—Cr alloys, rel. to magnetic props. 4480
GaAs, 78-680°K 1563
GaP, rel. to anharmonic forces 10043
Gd, 80-750°K, anomaly at Curie pt. 7855
Ge, at low temps. 7854
He^4, liquid 3701
He^3, liq., coeff. from 0.55 to 1°K 8881
He^3, liquid, 0.14-1.1°K 225
He^3, liquid, 1-3°K 10821
He^4, liquid, phonon contribution 2281
He^4, liquid, under pressure below 1°K 224
He^4, solid, calc. 14921
He^3, solid, coeff. 19546
He^4, solid, negative value below 1.5°K 16941
InAs, 78-673°K 1563
KBr, -180 to 400°C 15815
KCl, -180° to + 400°C 15815
KCl-KBr, solid solutions, -180° to + 400°C 15815
$KLiSO_4$, X-ray measurement 18361
$K_3Na(SO_4)_2$, X-ray measurement 18361
Kr, 0-116°K 9839
Kr, solid, at low temp. 8844
MnF_2, anomaly at Néel temp. 1564
NH_4Br, at 137.2°C 16335
NH_4Cl, at 183.1°C 16335
NH_4NO_3, anomalous 17899
NaCl, theory 4270
$NaNO_3$, X-ray meas. 15814
Pb, pressure depend. 13495
$PbTa_2O_6$ 2920
Si, 50-850°C, in argon 2799
Si, at low temp. 13494
Si, single crystals, -195° to +100°C 11587
SmB_6 13468
Ti, lattice expansions and Debye temps. 1909
U—fission product alloys 14072
Zr hydrides, δ and ε phases, by X-ray diffr. 15817

Thermal measurement (See also Calorimeters; Calorimetry; Conductivity, thermal, measurement; Temperature measurement; Vapour pressure measurement. Entries describing measurement methods for specific thermal quantities and effects may also be found listed under the various headings for the subjects concerned).
cellulosic materials, diffusivity, radiant heating method
differential thermal analysis apparatus 3675 [10796
solar furnaces 14896
"thermograph", for comparison meas. 2275
Ukrainian clays 8823

Thermal transformations (See also Boiling; Heat of transformation; Melting; Phase transformations; Vaporization).
cryometry by method of complete melting 3676
liquid drawing of wire, temp. distribution 12534
cristobalite, inversion of micro-crystals 4582
martensitic, at low temps., volume change meas. 21243
Fe, α → γ transition, rel. to energy losses on electron bomb. 20763
He^3, liquid, P—V—T rels., 1-3°K 10821
KNO_3, rel. to ferroelectric props. 639

Thermionic emission (See also Ion emission; Ionization, surface).
conversion of heat into elec. energy, figure of merit 7137
with secondary emission 7187
solar batteries 14950 [5357
alloys, binary and ternary, semi-phenomenological theory
semiconductors 15901 [5338
Ag—Cs photocathodes, thermo- and photoemission maxima
Ni, in CCl_4 and Freon 10936
Pt, in CCl_4 and Freon 10936
Th, monolayer density for max. emission 17026
U, wire and films 3786
UC, anomalously large constants 17027
$(ZrC)_{0.5}(UC)_{0.5}$, anomalously large constants 17027
electrons (See also Cathodes).
cathodes, effect of Cs 10934
cathodes, oxide-coated, in N_2 atmosphere 15703
cathodes, oxide-coated, surface charge localization 9071
convertors for fission heat into electricity 264-5
meas., in discharge tubes 5334
planar diode flow, Langmuir limit 269
semiconducting cathode, non-stationary emission 17024-5
in thermal-electrical energy conversion 14935, 15051
borides and carbides of rare earth and transition elements, anomalous, theory 2377
halides containing F-centres 5335
Ge 17030
Ge, Cs-vapour treated 7139
NaCl, coloured 18072
UC, on W, 1200-2100°K 12626
W, incandescent, H^+ formation 8985
ions
cathodes, oxide-coated, surface charge localization 9071
vacuum distillation pinhole camera, using radioactive source 5358
Cs, from various emitters, mass-spectrometer study 276
Ni, in vacuo 10972
O^-, during activation of oxide-coated cathodes 17042
Pt, thermionic and activated emission of Na, K, Ca impurities, diffusion study 6061
W, clean and oxygenated, alkali pulse-emission 9093-4
W, incandescent, H^+ formation 8985
W, positive pulses, correl. with flicker effect in space-charge limited diodes 9094
W, in vacuo 10972

Thermionic tubes (See Electron tubes).

Thermochemistry (See Heat of reaction, etc.).

Thermocouples
bonding into samples, use of hard Ga alloys 14360
butt welding, 0.001-0.01 in. dia. 12576
in cooling systems regenerative 19602
high-temp., stability in vacuum 19516 [5218
measurement errors, due to heat flow from thermal regions
operation of general thermocouple 12575
plasma, efficiency 9040
radiation thermoelement, direct visual adjustment 6990
thermodynamic props. 3693
transient temp. meas. in solid body 7068
noble metal, for calorimetry 16925 [7858
Au—Co, thermal cond., elec. res., Lorenz number, 4-100°K
Bi—Sb—Te alloys, as refrigerating elements 2915
Bi_2Te_3—Sb_2Te_3, thermoelec. power, elec. cond. depend. 2917
Cs plasma, for 1600°-2600°K hot-junction 1139
Cu—constantan, in low temp. thermostat, 4.2°-77°K 19522
Re—W, in H_2 atmospheres, stability, thermal cycling 14955
Ta/Rh—W, up to 2800°C 7006
W/Rh—W, up to 2800°C 7006

Thermodynamic properties (See also Critical constants, thermal; Entropy; Heat capacity; Heat of reaction; Latent heat; Phase transformations).
coexistence of phases, strain terms, bulk free energies 220
diatomic gas molecules, dissociating, at high temp. 962
elastic solids, inequalities 13906
enthalpy, of freezing, meas. 6994 [221
enthalpy, in laminar flow, heat cond. and viscosity depend.
five-membered heterocycles, calc. of thermodyn. functions from spectroscopic data 13433
fluid in external potential field 14626
graphical representation, 3-dimens, multiphase states 19529
ions, unipositive gaseous elemental, 100-50000°C, calc.
ionized gases, calc. 19606 [14972
lattice with defects, appl. to linear chain 11569-70
macromolecular crystals, chain oscillations, free energy density 14054
molecules with square-well potential interaction, free volume theory 4242
perturbed crystal lattice, freq. spectrum moments 2785

Thermodynamic properties - contd
simple systems, at low temp. 8654
solid solutions 731
solids, with imperfections 4295
2-component 2-phase systems, use of Jacobians 10815
vapour—liquid equilib. in multicomponent systems 1064
alloys, liquid metallic 1956
alloys, triple, partition function, ordering processes 6378
benzene vapour, isothermals 22-70°C 8698-9
binary crystalline cpds., min. molar Gibbs free energy 4259
bromodichlorofluoromethane ($CBrCl_2F$), calc. 4207
dibromochlorofluoromethane (CBr_2ClF), calc. 4207
ethylenediaminetetra-acid complex ions 21277 [13761
ferromagnetic crystals, imperfect, Ising approximation
ferromagnetic crystals, partition functions 8038
ice, anomalous props. 11579
inert gas crystals 17889
ketene 11524
liquids, classical 10649
metals, grain growth and creep, activation energies 6041
methanes, isotopic, from force constants calc. 5898
spinels, binding energy, statistical theory 2772
steam, enthalpy 10695
steam, superheated, equations 14911
sulphuryl fluoride 5016
trifluoromethanethiol 5017
urania-thoria solid solns. 6382
water, sorbed on zeolite 10376
Al halides, gaseous, diatomic, calc., 0-6000°K 963
Al_2O_3, vaporization 10698
AlSb—GaSb 12079
AsH_3, AsD_3 4187
AsT_3 17741
B halides, gaseous, diatomic, calc., 0-6000°K 963
B_2O 4193
Bi—Mg, liquid state 14644
C_3 6836
C vapour, orbital theory calc. 509
Cd, enthalpy of freezing 6994
Ce ethyl sulphate, 0.02-1°K 10102
Cl and Cl_2, gaseous, 273-5000°K 964
ClF, gaseous, 273-5000°K 964
$CsNO_3$ transition energy at 153.8°C 18372
CuII acetonylacetone 1-20°K 10093
D_2 -175° to +150°C 14909
FeO—SiO_2—CaO melts, state diagram 18163
Ga—Cd alloys, enthalpy of mixing 6994
Ge-Si 4685
H_2 -175° to + 150°C 14909
HBO_2 4192
HCl, gaseous, 273-5000°K 964
HF, liquid 3524
HT and D_2, rotational effects, perturbation calc. 20606
He, fluid, 3-20°K, up to 100 atm. 19532
He, liquid, from dielec. const. meas. 8899
He^3, liquid, rel. to neutron inelastic scatt., theory 8872
He^3—He^4 solutions 14919
He^3—He^4, superfluid solutions 8888
He^4, near λ-point 16933
InSb 10354
InSb, gaseous molecules in equilib. with solutions of In and Sb 965
InSb—GaSb 4685
KCl—KBr, configurational free energy 12071
Li halide dimers 17854
Li halides, gaseous, diatomic, calc., 0-6000°K 963
Mn—Ni 4688
Mo, W, and U oxides, gaseous 10699
MoO_2, sublimed vapour 10697
N_2, function F=H-TS, for $p < 900$ atm., $300° \leq T \leq 800°$C 14910
NH_3, ND_3 4187
NT_3 17741
Na, neutral, partition function calc. 20551
Ne isotopes, at low temps. 12416
O_2, enthalpy at 1-30 atm., 1000-30000°K 7129
OsF_6 4202
P_4, gaseous, 1 atm, 10-1000°K 19200
PH_3, PD_3 4187
PT_3 17741
PtF_6 4202
PuF_3, free energy of formation 12101
Sm 2788

Thermodynamic properties — contd
UF_6, 1.3-300°K 15811
W oxides 1955
Thermodynamics (See also Atmosphere, thermodynamics; Entropy; Equations of state).
anisotropic system, at zero temp., calculation of properties
approach to equilibrium, general theory 16618 [18980
assembly in mass-motion 8571
Boltzmann eqn. for dense systems 18426
Carathéodory's local theorem, proof 12539
classical concepts 3690
closed systems, and infinite reservoir systems, equilib. and extreme value conditions 16928
condensed phases, excess free energy at max. and min. melting pts. 19502 [14523
conference, foundations of mechanics and thermodynamics
determination of certain quantities 10466
distribution function for quasi-particles 12371
dynamic susceptibility 7013
elasto-plastic media deformation 1852
electro-thermodynamics, in low temp. range 9148
equilibrium, of 2 macroscopic ensembles 6701
equipartition of energy deviations with non-quadratic Hamiltonian 18962
formulae derivation 16927
fuel cell and Carnot cycle 3695
gas mixtures, adiabatic or isothermal equilibrium, in constant vol. vessel 16929
heat engine, well-informed 5227
heat-light conversion in phosphors, limitation 10049
heterogeneous dissipative systems, by variational methods
irreversibility, theory 6688 [19525-6
irreversible, and continuum mechanics 6689
irreversible, inversion of linear laws 14904
irreversible, nonlinear processes and noise in driven systems 902
irreversible, Onsager's relations 4953
irreversible cooperative phenomena 12369
irreversible processes 16640 [3465
irreversible processes, mech. and thermodyn. analogy [10662
isomeric reaction calculations from ultrasonic relaxation
isothermal discontinuity, disappearance in dense radiation laws 16641 [906
mechanical theory 7012
non-equilibrium 16643
non-equilibrium, statistical basis 16645
non-equilibrium processes, steady-state distribution 16617
Onsager's reciprocal relations, forces and fluxes in irreversible thermodynamics 14906
Onsager symmetry, proof 14544
photovoltaic effect derived from Carnot cycle 16968
polynomial representation of thermodynamic tables 2278
potentials for irreversible processes 19528
potentials for systems at negative absolute temp. 16931
quantized system, in weakly dissipative medium 3459
quasi-static processes and reversibility 14903
relations for three-dimensional systems 19527
second law, $\oint dQ/T \leq 0$ 16926
second law and causality principle 18966
sublimation and third law 7015
superconducting dilute alloys, Gibbs free energy 12556
surface phases 5213
statistical 2279
statistical, of real fluids 3507
temp. fluctuations in equilib. 7014
temperature Green's functions 3463
3 axioms, for generalized thermal systems 863
timewise progress of processes 7011
vectorial phenomena, Onsager's relations 16644
vitrification and crystallization, energy balance 12059
applications
biological systems 805 [3518
Brønsted's principle of congruence, n-alkane mixtures
Casimir coeffs. and minimum entropy prod. 14643
chemical reaction rates, theory of transpiration and diffusion 7016
cross-relaxation in spin systems 13884
defect structure equilibrium 14902
diffuse double layer, theory 19603
diffusion of weak electrolytes 19104
discriminant for Lennard-Jones potential 20696
elasticity, linear, theory 4542

Thermodynamics – contd
applications – contd
elec. and mag. response of thermodynamic systems 16638
electron emitter, in gas discharges 3781
excess functions for electrolytes 10656
ferromagnetics, in mag. field, near Curie point 1782
gas flow, in cylindrical tubes, thermal choking 5044
He liquid mixtures 10823
high pressure thermodynamic scale 16930
ice, electrical properties 16652
intercrystalline sorption 8333-4
irreversible plastic deformation 6301
Ising problem for rectangular lattice, new solution 20739
low-temp. prod. by adiabatic magnetization 1087
microphones, sensitivity thresholds 6888
migrational equilibrium, in isothermal and monothermal fields 3691
migrational equilibrium, in thermal fields 3692
nuclear reactor behaviour, mathematical theory 20529
osmotic meas., with solute-permeable membranes 6659
paramagnetic resonance, in systems with 2 kinds of mag. moments 10219
paramagnetic relaxation, in l.f. mag. fields 10217
RC circuit, nonlinear 12565
radiative emission processes 12524
real gas model, n-molecule aggregates 19196
solid solutions 731
solids, with imperfections 4295
sonic velocity jump, at boiling point, liquid–vapour phase ratio 5079
statistical, gas with long and short-range forces 18965
steady monothermal rate processes 3694
steady states and steady-rate processes 3691-4, 14907-8
superconductivity theory 14923
thermoelasticity, non-stationary thermal gradients 5193
transport processes, in liquid systems 14634
Volta effect, as non-stationary irreversible effect 5249
welding arcs, inert-gas-shielded, self-regulation 2343

Thermoelectricity (See also Thermocouples).
bibliography 19599 [4723
calomel cell, nonisothermal, initial thermoelec. powers
convertors, performance under constant heat flux operation [14956
cooling systems, for photomultipliers, to reduce noise 3731
cooling systems, regenerative 19602
crystals, ionic, thermoelec. power 7878
crystals, with strongly degenerate electron gas 15829
evaporator of high thermal efficiency 5266
ferromagnets, effects of s–d interaction 20753
generators and cooling devices, efficiency calc. 3734
low-temp. production 19569
magnetic field effects, det. of effective scattering mechanism parameters of electron transport 11730
meas., effect of random inhomogeneities 17982
meas., of semiconductors 1688 [19586
measurement, of semiconductors, 20 c/s - 20 kc/s app.
measurement, thermoelec. power, improved apparatus 8982
microphone for modulated u.s. waves 19321
oxide-coated cathodes 13641

semiconductors, figure of merit, impurity scatt. effect
semiconductors, in mag. field, phonon relaxation 1692
semiconductors, Seebeck effect 20943 [1690
semiconductors, thermoelectric power, integral evaluation
semiconductors, 2-band model, inner elec. field 20942
solar-energy convertors, max. efficiency 19601
solid–liquid interface, Peltier coeff. 19600 [18075
thermoelectric power meas., rapid method for semicond.
thermoelements, effective masses and mobilities 3732

Thermoelectricity - contd
alkali metals, calc., phonon-drag term 17888
alkali metals, at low temp. 1687
alkali metals, thermoelectric power, phonon drag component 20760
alkali metals, 2-20°K 2916, 10003
alkali and noble metals, below 1°K 10003
alloys, at low temp., theory of resonant scatt. of electrons from foreign atoms 6146
alloys, e.m.f. to 300°K 1686 [13498
Armco iron and and Pt, comparison of thermoelec. power
chalcopyrite, e.m.f. to 400°C 15953
chalcopyrite, thermoelec. power, -140° to + 300°C 7938
galena, e.m.f., to 400°C 15953
graphite, anisotropy 7970
magnetite, e.m.f., at low-temp. transition 6148
metals, and alloys, in impurity scattering region 9861
metals and dilute alloys, relative effects at low temp., theory 13640
metals, effect of lattice vibration spectrum 1554
metals, Fermi liquid model 559
metals, monovalent, effect of phonon distribution 18077
metals, and semiconductors, below and above melting pt. 7909
metals, and semiconductors, electron–phonon interaction 6013 [10004
metals, in strong mag. fields, for various Fermi surfaces
metals, thermoelec. tensor, in strong mag. fields, phonon drag 10005
metals, transport processes, review 9862
mild steel, e.m.f. prod. by plastic deformation 15999
mixed oxides, props. 2914
molybdenite, e.m.f. to 400°C 15953
pyrites, thermo e.m.f. to 400°C 15953
Ag, annealed and cold-worked, thermoelec. power at low temp. 18081
AgCl, thermoelectric power 20949
$AgFeTe_2$, thermoelec. power 15961
$(Ag_{x/2}Pb_{(1-x)}Bi_{x/2})Te$ 4646
$AgSbTe_2$ 11680
$AgSbTe_2$–PbTe 2902
Ag–Se layers, thermoelec. power 7968
Al, e.m.f. prod. by plastic deformation 15999
Al, thermoelec. power, phonon drag contrib. 18078
Al and Al alloys, 4-120°K, thermoelec. power and thermo e.m.f. 7857
AlSb, n-type, thermoelec. powers, 80-1200°K 598
Au, annealed and cold worked, thermoelec. power at low temp. 18081
Au–Cu and Au–Cu–Ni, thermoelec. power 4373-4
Be, reactor-grade, 4-120°K 11588
Bi single crystals, Seebeck coeff. 11734
Bi_2S_3, power, rel. to semiconducting props. 6089
Bi–Sb–Te alloys, thermoelec. power, applic. to refrigeration 2915
Bi_2Se_3, power rel. to semicond. props. 6089
Bi_2Te_3 2915
Bi_2Te_3, power, rel. to semicond. props. 6089 [7972
Bi_2Te_3, variation of thermoelec. power with sintering temp.
Bi telluride, p-type polycrystals, Bridgman effect 20944
Bi–Te solid soins., thermoelec. power 4352
Bi_2Te_3–Bi_2S_3, thermoelec. power 6387
Bi_2Te_3–Bi_2Se_3, e.m.f., ageing effects 2889
Bi_2Te_3–Sb_2Te_3 16002
Bi_2Te_3–Sb_2Te_3, elec. cond. depend. 2917
CdO 11752
CdSb, e.m.f., temp. depend. 1660
CdSb, monocrystals, thermoelectric power 15946
CdSb: In, e.m.f., temp. depend. 1660
CdSb-ZnSb 18401
CeO_2, heat treated, thermoelec. power 606
Co, thermoelectricity below 1°K 18076
$CoSb_3$, with Sn, Te and Ni impurities 10006
$CoSn_3$, thermoelec. power 13577
Cs, thermoelectricity below 1°K 18076
Cu, cold-rolled, thermoelec. power, 8-320°K, rel. to annealed Cu 1691
Cu, cold-worked, relative effects at low temp, theory
Cu, dilute alloys, 4-120°K 9863 [13640
Cu, dilute binary alloys, thermoelec. power, 8-320°K
Cu, e.m.f. prod. by plastic deformation 15998-9 [10007
Cu, thermoelec. power, highly pure specimens, 0.1-350°K 20945

Thermoelectricity - contd
Cu—Ni, thermoelec. power 4373-4
Cu_2O, 1000-1250°C 6147
Fe, thermoelectricity below 1°K 18076
Fe—Si, transverse thermo e.m.f. 11666
$FeSn_2$, thermoelec. power 13577
Ga, liquid, Seebeck coeff. 12419
Ga, arsenoselenides, thermoelec. power 15955
GaAs—Ga_2Se_3 system 11712
GaSb, e.m.f., 200-400°K 6119
GaSb, at m.p., and liquid state 624
GaSb, -190° to +600°C 623
GaSb, p—type, e.m.f., 150-950°K 15954
Ge, bulk Peltier voltage, resistivity depend. 11733
Ge, effects of strain 1643
Ge, n-type, Seebeck effect, strain depend. 11735
Ge, phonon contrib. to thermoelec. power 2873
Ge, volume gradient Thomson effect 11732
HgSe, mag. field effects, parameters of electron transport theory 11730
(In,Ga) As, thermoelec. power, carrier conc. depend. 2897
InSb, review 13614
InSb, at m.p., and liquid state 624
InSb.GaSb, equimolecular, temp. depend. 15959
In_2Te_3, effect of pressure 13615
$MnAl_2$, thermoelec. power 20948
MnP and MnP_2, temp. dependence 10008
$MnSn_2$, thermoelec. power 13577
Mo, reactor-grade, 4-120°K 11588
Ni, thermoelectricity below 1°K 18076
Ni Co, ordering detected at 773°C 16355
Np, thermoelectric power meas., 300-900°K 11657
PbS, n- and p-type, 4-100°K 18080
PbSe, 4-100°K 18080
PbSe, thermoelec. power, effective mass of carriers 20947
PbSe, thermoelectric power, temp. variation 20946
PbTe, 4-100°K 18080
PbTe, power, rel. to semicond. props. 6089
Pd, thermoelectricity below 1°K 18076
Pt, thermoelectricity below 1°K 18076
Pu, thermoelectric power determination 18082
Rb, thermoelectricity below 1°K 18076
Sb—Cd, welded contact, thermoelec. inversion 16000
Sb—Mg, welded contact, thermoelec. inversion 16000
Sb_2Se_3, thermoelec. power 620 [16001
Sb_2Te_3—Bi_2Te_3, thermoelec. power, composition depend.
Sb_2Te_3—Bi_2Te_3, thermoelec. power, temp. depend. 18079
SbZn—SbCd 16002
Se, with Br, Cl, I impurities, temp. depend. 1675
Se, thermoelec. power 11717
Se: Au, thermoelec. power 11717
Si—Co 13604
Si—Mn, temp. depend. 2884
SmB_6 13468
Te, effect of phonon drag on current carriers 6149
Te—Mg, welded contact, thermoelec. inversion 16000
ThSe, p-type single crystals 18054
$TiSb_2$, thermoelec. power 13577
U, thermoelectric power determination 18082
VSb_2, thermoelec. power 13577
VO_x(x=0.75-1.74), composition depend. 18353
W, reactor-grade, 4-120°K 11588
Y hexaboride, e.m.f., against Cu 1879
Zn, at liquid He temp. 13581
$Zn_xCd_{1-x}Sb$, effects of Te, Cu, Sn doping 2903-4
ZnSb, thermoelec. power 15967

Thermometers (See also Pyrometers; Thermocouples).
capacitor, for hydrological investigations 1061
fixed points, establishment 3685
gas, variable sensitivity for use at 300-4.2°K 1060
Hg, for calorimetry 5220
plate type 19514 [18232
using quadruple resonance temp. depend., $KClO_3$ study
resistance
bridge, direct reading 7003-4
carbon, interpolation technique for several thermometers, 1.5-30°K 215
carbon, at low temp., effect of stray h.f. fields 19517-18
film gauges, in shock tubes 2274
In resistance thermometry 3686
interpolation, 20-273.15°K 12538
low noise, high accuracy, for use below 140°K 1086

Thermometers — contd
resistance — contd
low temp., improved bridge 19519
Meyers, Pt, long-term stability at high temp. 16923
Pt, 4-90°K 213
Pt, measurements at 4-90°K 213
Pt, proposed international temp. scale, 90-20°K 214
Pt, 630.5°C-1,063°C, stability meas. 8856
spear for field meas., -30° to +70°F 5219
standardization, 10-90°K 19513
surface temp. meas. 7005

Thermonuclear reactions (See also Elements, origin; Nuclear fission; Nuclear fusion).
basic physics 5836
conferences 1458, 5835
control problems 13384
controlled, Russian research 7677
controlled fusion, hot dense plasma containment 5322
controlled fusion, hypothetical devices based on shock heating 9724
cosmic electric discharges 2072, 6620
cross-sections and rates of various reactions 17638
cyclotron-radiation loss 3773
debris, 15 day old, airborne meas. of atmospheric conductivity 10402
endoergic reaction rates, formula 7651
heavy particle detection 17639
magnetic confinement 13383
magnetic fields for, production 17063
magnetohydrodynamic aspects 3757 [17512
"Mike" thermonuclear device (Nov.1952), U isotope prod.
nuclear explosions in outer space, e.m. wave prod. 15136
nuclear power from fusion processes 1461
plasma, ion injection into magnetic mirror 3762
plasma heating, in axial mag. field 10899
plasma heating, collision free 3758
plasma heating, of positive ions, by electron beam 15027
research in U.S.A. 4154
review 4153
rotating plasma expts., review 4156
stabilized pinch, direct energy conversion 7678
in stars, evolution, H—He cycle 6609
stellar charge source 10512
in stellar plasma 2361
survey of early Russian work 7676
time variation, energy balance 17637
D, in Scylla, emission of neutrons, protons, tritons, light and X-rays 13385-7
D(d,p)T, determination of ion temp. in Scylla 462
D plasma, fusion experiments 17645
D and T plasmas, transient temp. variations during self-heating 3759
$Ne^{22}(\gamma,\alpha)O^{18}$, in hot stars 11430
$O^{16}(O^{16},n)S^{31}(\beta^+,\nu)P^{31}$, in hot stars 11430
$O^{16}(O^{16};p,2p$ or $\alpha)P^{31}$, Si^{30} or Si^{28}, in hot stars 11430

Thermostats
air temperature control, for biological research 5221
controllers, based on rate-of-change temp. meas. 5222
controllers, electronic, for analytical oven 14898
controllers, for 4.2-77°K 19522
ignition source, temperature-regulated 3682

Thickness measurement (See also Particle size).
absorbing specimens, using 3-beam interferometer 19431
crystal film thickness monitor 3481
evaporated films, interferometric thickness control 3280
evaporated films, using 3-beam interferometer 5174-5
fibre diameter variation meas. 4978
films 1040
films, using Fraunhofer double-slit fringes 6941
He II moving film 8913
metal films, optical and electrical methods 4979
metal films, optical method 5170 [10630
metal films, by radioisotope-induced X-fluorescence meas.
microwave 6721
optical gauge for Ge and Si wafers 6722
thick layers, interferometric method, "vernier" effect 8805
three-beam interference method, layers under 1 μ 12491
tinplate, using X-ray fluorescence 8290
wedge-shaped layers 3483

Thixotropy
thixotropic liquids, time depend. of viscosity 6736
thixotropic materials, viscous props. 6735

Thorium
arc zone melting, purification 8169
atoms, Th I spectrum, even and odd levels, g-values 7733
atoms, Th II, fd^2 configuration 20555
deposits on control grids, thermionic props. 7136
evaporation, from thoriated W cathodes 7135
Hall effect, room temp. - 400C 7948
lattice spacing, with ref. to contamination 10311
mag. susceptibility, 130-300°K 669
monolayer density for max. thermionic emission 17026
radiometric determination in complex ores 18455
resonance line hyperfine-structure intensity anomalies 4175
sintered, effect of O_2, C and N_2 on properties 10462
specific heat and elec. cond., 25-1000°C 17894
spectral data, 2000-11550A 15665
spectrochemical analysis, by d.c. arc 21296
spectrophotometry, with thoron, in prescence of Zr 12123
Th—U separation, by ion exchange 21302

Thorium compounds (See also Alloys).
absorption spectra 20656
thoria-urania solid solns., thermodynamic props. 6382
Th(IV) and Pt(IV) acetylacetonates, probable isomerism [8239
ThO_2, diffusion of Xe^{133}, Rn^{222} and I^{131} 15874
ThO_2 films, u.v. reflection filters 3640
ThO_2, slurries, sedimentation at high temp. 12112
ThO_2—UO_2—ZrO_2, structures 8229
ThSe, p-type single crystals, properties 18054

Thulium
elec. resistivity, 1.3-300°K 18002
magnetic props., 1.3-300°K 11811
magnetization, at low temps., in strong fields 11842
paramagnetic susceptibility 8030
spectra of Tm^{3+}, calc. 5886
Tm^{3+}, self-consistent fields, without exchange 5848

Thulium compounds
Tm^{3+} chelates, fluorescence spectrum 16084 [11600
Tm ethyl sulphate, crystal field splitting of energy levels [16481

Thunderstorms (See also Lightning).
atmospherics and thunderstorm electricity, symposium
as chemical phenomenon 18526
effect of atmospheric blue haze 18520
electric field above, measurements 778
quasi-static electric field 16481
structure of electro-convective eddies 3354

Tides
atmospheric, lunar and solar 12136
ionospheric, oscillation 14219
moon's tidal couple 18692
oceanic, relaxation methods 8632
tidal action between galaxies 18824
wave recorder, long period 12410

Time interval measurement
analysers, using crystal-controlled trochotron tube 14481
chronometry, high-frequency 10545
by counting radioactive disintegrations 18891
definition of time interval, using Newton's 1st law 4985
digitrons, μsec intervals 3487
international coordination of time signals and standard freq. transmissions 18894
lifetimes of nuclear rotational levels ~ 10^{-10} sec, by microwave method 20397
photomultiplier and coincidence system 19725
using pulse-height analyser 2145
standard frequency transmissions 18893
between 10^{-9} and 10^{-7} sec 19991
time and frequency standards, at P.T.B. 2092

Time measurement
absolute scale, using nonlinear clock, stochastic rectification 8533
absolute scale, using 2 radioactive clocks 8532
atomic clock 12344
Cs atomic clocks 14480
Cs frequency standard 4915
Cs frequency standard, improved precision 6635
Cs standard frequency transmissions 10546
freq. variations of quartz oscillators and earth's rotation, in terms of caesium standard 21
frequency standards 855
NH_3 beam 2-level maser 18892
nuclear cosmochronology 14394
quartz oscillator freq. and earth's rotation period, rel. to Cs time standard 10547

Tin
condensation, in vacuum 1943
crystal growth, β-phase 3174 [16304
crystal growth, effect of initial purity on preferred direction
crystallization, lamellar character and sub-structure 18305
cyclotron resonance, mag. field and temp. depend. 17918
cyclotron resonance, at 2.4°K and 9.4 kMc/s 11616
deformation twinning of single crystals under impact loading 21115
e.s.r., 10^{10}c/s, 2.3°K, orientation depend. 21079
elastic limit at low temp. 16214
elastic moduli, effect of temp. 6295
elastic moduli, single crystals, temp. depend. 10255.
elec. resistance, liq. He temp. 9932 [9847
electronic structure, u.s. attenuation study in mag. field
equations of state, at high pressure 11549
etch figures 18331
exo-electron emission, photostimulation 10937
films, optical properties, effect of lattice defects 4391
films, photoemission 9074
films, supercond.—normal cond. transition 16950
freezing pt 2271
friction with various materials, effect of adhesion 16245
fusion curves to 10^3 atm 9840
Ga-coated single crystals, mech. props. 6313
γ-ray backscattering, 0.2-2.0 MeV 7318
grain growth, in zone-refined specimens 16273
grey, elec. resist., 0.1-283°K 9931
grey, single crystals, transformation studies 18307
grey ⇌ white transition in Hg—Sn alloys 727
lifetime, under load 16223
liquid, solubility of Kr in 19120
magnetic susceptibility, room temp. to 20.4°K 21026
magnetoresistance, anisotropy, Fermi surface 9939
melting points of thin deposited films 19505
n.m.r., electronic structure 4530
plate thickness using X-ray fluorescence 8290
pure, preparation by multi zone refining and vacuum heat treatment 13962
in Se, after zone refining, distrib. calc. 13942
shock wave propag. 12453 [12090
single crystals, preparation for electron microscopy
soldering of mercury telluride 8462
specific heat, 0.1-5°K 19580
superconducting, current transitions in films 1081
superconducting, energy gap anistropy, u.s. absorption study, temp. depend. 19567
superconducting, far i.r. absorption 14933
superconducting, h.f. surface impedance 10850
superconducting, interphase surface energy 7028
superconducting, law of corresponding states, expt. and theory compared 1074
superconducting, and normal, u.s. absorption 13501
superconducting, resistance, freq. depend. 8936
superconducting, surface impedance, calc. 10841
superconducting, surface resistance, 17-77 kMc/s and 1.5-3.0°K 1080
superconducting films, critical current 12562 [8940
superconducting films, critical mag. fields and currents
superconducting films, low residual resistivity 10854
superconducting films, mag. transitions, influence of aggregation 10855
superconducting films, penetration depth 8931 [19495
superconducting films, use as i.r. bolometers, 50-1000μ
superconducting and normal films, far i.r. transmission, 0.1-1.1 mm 10852
superconducting transition, no time delay detected 1082
superconducting transition temp., pressure depend., up to 10^4 atm 8939
superconductivity 2287
superconductivity, contacts of plated wires 5235
superconductivity, critical field curves 16951
superconductivity, critical temp. change due to electrostatic charging 19559
superconductivity, destruction, critical resistance 12563
superconductivity, films, critical fields, calc. 16954
superconductivity, hollow cylinder with circular current
superconductivity, intermediate state 10848 [5238
surface impedance, 1.9 Mc/s, 4.2°K, mag. field depend. [20875
surface resistance, oscillatory dependence on weakening field 20874

Tin - contd
surface tension, 300-500°C 19088 [19566
surface tension at supercond.-normal phase boundary
thermal cond., below 1°K 8937
u.s. absorption, in mag. field 20758 [11576-7
u.s. absorption, 17-70Mc/s, in mag. field, liq. He temp.
u.s. attenuation, at low temp., rel. to elec. cond. 1568
ultrasonic dispersion, in mag. field 1567
u.v. emission spectrum, use for analysis 16397
valence electrons, approx. wave-functions 469
white, de Haas—van Alphen effect and Fermi surface 20765
white, deformation twins 4585
white, space groups, irreducible representations 21178
wires, Ni- and Au- plated, disappearance of superconductivity, barrier thickness 8962
in Zn, effect on creep and viscosity 6311

Tin compounds (See also Alloys).
stannates, dielectric props. 13645
ternary carbides with Ni, Co, Fe, Mn 16324
$SnBr_4$, SnI_4, absorption edge, press. depend. 4407
Sn halide films, rapid prep. 14081
Sn hexahalide complexes, electron transfer spectra 20650
SnO, $A^1\Pi$-$X^1\Sigma$ system, rotational anal. 9800
SnO_2, crystal melting 10321
SnO_2, deposition and useq 21251
SnO_2, effect on dielec. props. of barium titanate 7982
SnO_2, i.r. absorption, effect of illumination with u.v. 18118
SnO_2, semiconducting, opt. and elec. props. 15965
SnO_2, Sb-doped thin layers, opt. and elec. props. 16036
Sn oxide films, plasma oscillations 1623
$(SnSe)_{1-x-y}(SnTe)_x(PbTe)_y$, crystal structure 18364

Titanium
atoms, oscillator strengths 20590
atoms, Ti I, high-excitation relative f-values 15666
crystal structure, α and β-phases, rel. to oxide structures and ω-alloy phases 16310
dispersions with enriched B for reactor use, charac. 14057
as electron microscope replica of alloys, resolving power
emissivity meas., 100-900°C 8834 [3290
films, activated gas sorption 10374
films, optical transmission and electron absorption 21247
films, for tritium targets 8280
getter 3573, 5059
getter, in miniature vacuum pump 14700
granular structure, after annealing 14055
grid emitting properties 7134
H_2 sorption, at low pressures 6427
lattice expansions, and Debye temps. 1909
lattice stability, b.c.c. and h.c.p. modifications, free energy differences 15800
scattering amplitudes for slow neutrons, for Ti^{46-50} 9684
spectra, in solar photosphere 14415
spectra, balance and abundance in stellar and solar photosphere 14414
stacking faults 552
superconducting transition temp., effect of Cr, Mn, Fe, or Co in solid solution 1079
Ti^{3+}, electron spin resonance and relax. in corundum 13873
X-ray absorption, fine structure of fund. edge in $BaTiO_3$ [15609
X-ray emission spectra, in several compounds 5889
X-ray emission spectrum 20736
X-ray K absorption edges, in Ba titanates, rel. to ferroelec. props. 1739
X-ray spectra, emission and K-absorption 20595

Titanium compounds (See also Alloys).
ceramics, elec. breakdown 1713
mixed titanate system, piezoelectric props. 1714
titanates, degradation, exo-emission study 10932
titanates, dielectric props. 13645
titanates, elec. breakdown strength 1709
Ti^{3+} alum, susceptibility, theory, nature of crystalline fields 8034
TiB_2, anisotropic thermal vibrations 13488
Ti beryllide, X-ray emission spectrum 20736
Ti boride, X-ray emission spectrum 20736
TiC powder, emissivity 16919
Ti^{3+} caesium alums, mag. susceptibility 18167
Ti caesium sulphate alum, mag. behaviour 16127
Ti carbides, X-ray emission spectra 5889
TiCo, magnetization 1788
TiCo, ordering in intermediate phase 18352

Titanium compounds - contd
TiFe, magnetization and elec. cond., temp. depend. 1788
TiFe, ordering in intermediate phase 18352
Ti—H systems, X-ray structural phase anal. 14024
Ti hydride, gas generator, gas evolution anal. 12440
Ti hydride, nonstoichiometric, proton magnetic resonance
Ti hydrides, X-ray emission spectra 5889 [18230
TiI_4, normal vibration frequencies and thermodynamic functions 1496
Ti monoxide, structural and geometric relations with α and β-Ti and ω-alloy phases 16310
Ti_2Ni, crystal structure 4648
TiNi, magnetization 1788
TiNi, ordering in intermediate phase 18352
Ti nitrides, X-ray emission spectra 5889
TiO, i.r. band 11032A, rotational analysis 5936 [1919
TiO, lattice parameters, X-ray study, absorption correction
TiO_2 519
TiO_2, absorption edge 4405
TiO_2, action of 2-10 kV electron irrad. 1162
TiO_2, anatase—rutile phase transformations, impurity effects 7895
TiO_2, Cr^{3+} doped, maser material 9196, 16180
TiO_2, crystal melting 10321
$TiO_{1.18-2}$, elasticity 13901
TiO_2, elec. props. 1697 [9879
TiO_2, electron states, near defects, relaxation processes
TiO_2, Fe^{3+} doped 9194
TiO_2, fracture, symmetrical fourfold, helical 16282
TiO_2, in interference light-filters 3639
TiO_2, particles, forces between 1874
TiO_2, piezoresistivity 7949
TiO_2, pigment, in linseed stand oils viscous props. 6735
TiO_2, pigment, rutile and anatase content 4610 [13552
TiO_2, rutile, absorption centres, elec. and optical study
TiO_2, rutile, e.s.r. resonance of Fe^{3+} in, at low temp. 11951
TiO_2, rutile, elastic moduli, ultrasonic meas. 13902
TiO_2, rutile, elec. cond. anistropy, nonstoichiometric crystals 15966 [13579
TiO_2, rutile, electron transfer in, onset of field emission
TiO_2, rutile, powder, electrification 13643
TiO_2, rutile, relaxational polarization 18098
TiO_2, rutile and anatase, mag. susceptibility 18165
TiO_2, V^{4+} e.s.r. in 13879
TiO_2, work function 19707
Ti_2O_3, antiferromagnetism 16148
Ti_2O_3, magnetic transitions 11799
Ti oxides, elec. cond., composition depend. 6128
Ti oxides, films, photovoltage 9998
Ti oxides, physical props. 20967 [6423
Ti oxides, surface films, chemisorption and photodesorption
$TiSb_2$, elec. cond. theory 13577
Ti silicide, X-ray emission spectrum 20736

Torquemeters
transmission dynamometers 3489

Torsion (See also Elastic constants; Stress analysis).
beams, of sections bounded by quartic curves 12390
bending and shortening effect of pure torque 14554
curved anisotropic rods, oval sections, stresses and displacements 19009
curved rods, circular cross-section 16655
cylinders, circular, stress concentrations 19018
cylinders, circular, transversely isotropic, stresses around axial spherical inclusion 19020
cylindrical shells, anisotropic, stability 700
cylindrical shells, elastic twisting 4969
elastic-plastic, circumferentially notched bar 12392
electrical analogue apparatus 16654
notched rectangular bars, twisting theory 14556
plates, thick, with rigidity varying exponentially with depth, stress distrib. 19021
stresses in truncated cone, due to surface friction 19015
strips, in acoustic field 5097 [19250
visco-elastic circular cylinder, forced torsional vibrations
wires, polycrystalline, strain calc. 4544
Al, alternating, fatigue damage 21120
Al, effect on tensile stress—strain curve 16201

Tracers (See also Radioactive tracers; Radiochemistry).
No entries this year

Transducers (See Acoustic transducers).

Transformations (See Thermal transformations; Phase transformations).

Transformations, mathematical
canonical, in theory of Fermi gas 14536 [4947
Coulomb field, transition matrix elements between states
Coulomb wave-functions, in terms of confluent Appel functions 4946
Foldy-Wouthuysen, analogy with Lorentz 12840
Fourier, use in analysis of multicomponent exponential decay curves 821
general Lorentz, reduction by matrix method 14367
Hankel, perfect fluid 6741
theorem for estimating eigenvalues 2066
two-fold spectral representation of $f(z_1,z_2)$ 6540
Transistors (See Semiconducting devices, transistors).
Transmission
acoustic waves (See also Acoustic wave propagation).
floors, ceilings, and walls of buildings 1018
through flow velocity discontinuity 16781
across solid–liquid boundary 2198
acoustic waves, ultrasonic
metals, attenuation at low-temp. 19581
aniline–cyclohexane mixtures 19131
KCl crystals at low temp. 21098
electromagnetic waves (See Electromagnetic wave propagation).
light (See also Absorption, light; Filters, optical).
atmosphere, meas. instrument 4783
clouds, i.r. 14302
films, dielectric multilayer, automatic computation 10779
films, solid 21247
fogs, i.r. 10452
glass coloured filters, for solar radiation research 16825
interference microscope measurements 6920
by light-scattering layers with varying parameters 14846
metal films, apparatus for vacuum study 19422
pile of plates, modified Lunelund and Stokes formulae 19378
powders, effect of adsorbed water, theory 3650
twin crystal boundary, Fresnel formulae 3654
alkali metal halides, 17-55μ 6167
ammonium dihydrogen arsenate and phosphate, u.v. 13686
anthracene, exciton absorption region 13678
polyethylene, with C-black, 17-55μ 6167
polytrifluorochloroethylene, i.r. 12473-4
Ag_2Se films, i.r. 16363
As_2S_3 glass, 15-25 μ 6904
As–S–Se films 4404
$BaTiO_3$, transition study in elec. field 20958
Bi thin films, coeff. 10027
Cr, vac. u.v., plasma freq. and $M_{2,3}$ band 20981 [6120
GaSb–InSb alloys, i.r. transmission and optical energy gap
Hg films, superconducting and normal, far i.r., 0.1-1.1 mm [10852
In films, superconducting and normal, far i.r., 0.1-1.1 mm
K, in far u.v. 18117 [10852
K dihydrogen arsenate and phosphate, u.v. 13686
$MgO.Al_2O_3$ (spinel) monocrystals 16033
Na, in far u.v. 18117 [10852
Pb films, superconducting and normal, far i.r., 0.1-1.1 mm
Sb films 21247
Si, thin layer 20975 [10852
Sn films, superconducting and normal, far i.r., 0.1-1.1 mm
SnO_2, Sb-doped thin layers, 0.35-2.5 μ, wavelength depend.
SnO_2, semiconducting 15965 [16036
Te films 21247
Ti films 21247
Transparency (See also Optical constants; Transmission, light).
alkali metals, u.v. 1721, 4401
Transport processes (See also Diffusion; Kinetic theory; Liquids, theory; Solids, theory; Statistical mechanics).
aerosols, effect on attenuation and dispersion 14740
binary mixtures, of rigid sphere fluids 3469 [18979
Boltzmann elastic collision operator, special properties
Boltzmann eqn., Cartesian tensor scalar product and spherical harmonic expansions 18989
Boltzmann eqn., collision term 51 [16622
Boltzmann eqn., differential - operator approximations
Boltzmann eqn., integral form 98
Boltzmann eqn., omission of exclusion factors, rel. to Pauli principle 3470
Boltzmann eqn., quantum-mechanical 6700
Boltzmann eqn., relativistic, steady-state solution 18990
Boltzmann eqn., and shock wave structure, transport function 16770
Transport processes - contd
collision integrals, for exponential repulsive potential 956
concentration - dependent diffusion, exact solutions 6695
canonical ensemble, transport coeffs. from dissipation in dense media, approx. theory 904 [12376
dissipation functions, and invariant imbedding 19004
electrons, in magnetic field, theory 2813
electrons, with Maxwell–Boltzmann distrib., constant relax. time, Boltzmann eqn. soln. 13573
entropy balance eqn., and Onsager's relations 16643
entropy production, minimum 16646
equations, simple solutions, applications 3471
exchange processes, in fixed columns 3466-8
finite atmosphere, diffuse reflection and transmission 14551
fluctuations from non-equilibrium steady state 6692
fluids, non-equilibrium distribution functions 10650
fluids, phonon concept 12379
Fokker–Plank eqn., derivations 16514
Fokker–Planck eqn., soln. 19657 [8658
fused salts, phenomena involved in transport properties
gases, assuming inverse power intermolecular potentials
gases, effect of chemical forces 14547 [16735
gases, slightly ionized, transport props. in low elec. fields
grey scattering, Rayleigh phase function 16634 [2326
heat–mass exchange, in layer of steel balls 12514
invariant imbedding, conservation relations and nonlinear eqns. 19005
in ionized plasma 2362
irreversible, statistical interpretation of phenomenological theory 16632
irreversible behaviour, statistical mechanics 16651
irreversible processes, quantum theory 16650
irreversible processes, thermodynamics 16640 [3501
isotropic turbulence, one-dimensional equilibrium spectra
laminar boundary layer equation, at high Prandtl numbers
laminar flow, total enthalpy change 221 [16677
linearized collision operators, properties 18978
Liouville equation, perturbation soln., time independ. 18963
in liquid alloys, elec. force on ion 19112 [10652
liquids, friction constant, semi-empirical determination
luminescent solutions, energy transport 6806
many-particle systems, with linear interaction 16625
mass flow, steady bithermal 14907
mass transfer, in turbulent flow 3669
mass transfer, turbulent, near walls 16678 [20753
metals, and alloys, ferromagnetic, effects of s–d interaction
metals, effect of phonon spectrum and umklapp processes
metals, review 9862 [17888
metals, thermal transport phonomena, quantum-mechanical approach 1537 [1554
metals, transport props., effect of lattice vibration spectrum
molecular friction in dilute gases 19195
molecular transport in liquids and glasses 2141
Monte Carlo method for criticality problems 13325
multicomponent gas mixtures, at high temp. 957
multicomponent systems, linear relations 18964
multiple scattering of e.m. fields 12674 [16626
one-dimensional particle chain, velocity auto-correl. func.
organic phosphors, energy transport 1572
Osanger's relations for vectorial phenomena 16644
particles in scattering medium, quantum theory, incoherent processes 9298
plasma, relativistic eqns. 9030
principle of corresponding states 14543
quantum corrections, for transport coefficients 18969
quantum gases 10617
quantum theory 14542, 16635
radiative, through atmosphere, eqn. soln. 5566
radiative, in novae 14449-50
radiative transfer 16616
radiative transfer, error function absorption coeff. 14549
radiative transfer, in non-uniform media 4961 [19001
radiative transfer, soln. of eqn. and Milne-Eddington model
radiative transfer, Wick–Chandrasekhar approx., convergence 10619
relativistic streams, statistical mechanics 17003-4 [14525
relaxation of isolated ensemble of harmonic oscillators
resonance radiation, incoherent scattering theory, verification 13394
scattering and transmission functions 14552
in slightly ionized gases, in high elec. field 8989
solid solutions, binary disordered 18404

Transport processes - contd
solids, irreversible processes 16649
spherical harmonic solutions of equations 4955
spherical harmonics, convergence rate 20146
statistical mechanics 16647-8
structure of transport equations 18972-3
thermal cond. of fluids, auto-correlation expression 14545
thermodynamics, nonequilibrium, statistical basis 16645
transfer function of distributed parameter reactor systems
transfer problem, integral equation transform 14550 [13320
variational method 52

Tritium
aqueous solutions, scintillation counting 5687
in atmospheric H_2 2040, 5682
atomic spectrum, ground state, precise h.f.s. det. 7725
atoms, h.f.s., precise det. by e.s.r. 20543
β-spectrum, low energy region 4053
decay, initiation of T_2—ethylene reaction 3321
diffusion of HT in liquid argon 14635
estimation, in proportional counter 4756-7
extraction from He^3 20575
ion generator, producing air ions 7164
isotope effect, in oxidation of benzyl-α-t alcohol by chromic acid 4712
labelling, for very low vapour press. meas. 19512
in meteorites, content 6581 [20709
molecular beams, production, for nuclear fusion studies
monitor for 5456
polycrystalline, structure 21187
production in fission, by neutrons of U and transuranic nuclides 461
production in nuclear reactions, compound nucleus and direct-interaction effects 20425
production in Th, by 135 MeV protons 17595
reactions initiated by β-decay of tritium 14132
solid, defects due to radioactive decay, e.s.r. study 20855
superfluidity, in mag. field, critical temp. and press. 19531
T—He, age of Ramsdorf meteorites 4885
targets, Zr and Ti films 8280

Tritium compounds (See Hydrogen compounds).

Tritons (See also Nuclear reactions, tritons).
accelerator for, 340 kV 9113
ang. distrib., $Be^9(He^3,t)B^9$ 5755
angular distribution, $Li^7(\alpha,t)Be^9$ 13246
binding energy, effect of hard core 17433
binding energy, tensor and L.S forces 17432
emission from nuclei, shell-model calc. 15567
energy, variation calc., D-state wave functions 17434
interactions with deuterons at 6-14 MeV 15461
kinetic and potential energy, matrix elements 11238
magnetic moment, calc. 13122
magnetic moment, precision meas. 387
momentum transform, from $d + d \rightarrow p + t$ 11420
neutron scatt., elastic, 1-6 MeV, diff. cross-sections 17435
photodisintegration, low-energy, theory, rel. to n—d scatt. [11239
prod. and angular distrib., in (γ,t) reactions, on Li^6 to Au
reactions with H_2 and D_2 10347 [13264
scattering on protons, elastic, at 50-200keV, phase-shift analysis 13073
spectra, from (d,t) reactions 9639
spectra and ang. distributions, in (d,t) reactions, on C^{12}, F^{19} and Al^{27} 9638
Be^9 (d,t) 9640
$Be^9(d,t)Be^8$, ang. distrib. 17600
$C^{13}(d,t)C^{12}$, at 148 MeV, t ang. distrib. 5751
from D plasma in Scylla, velocity spectrum 13387
$Li^{6,7}(d,t)$ 9640
$T^3(p,n)He^3$, threshold energy, n—H mass diff. 20246

Tungsten
abrasion, theory 3164
adsorption of CO_2 751
adsorption of CO_2 and O_2, field effects in electron emission microscopy 5356
adsorption, diffusion and evaporation of CO 3325
adsorption of H_2 4748
adsorption of, and interaction with, H 6424
adsorption of N, heat of 3328
adsorption, of O_2 21297
alkali ion pulse emission 9093-4
arc spectrum, isotope shifts 15667
atomic and electronic heat, 10-273°K 1561

Tungsten — contd
atomic structure, relativistic self-consistent solution 9741
atomically clean surfaces, production 8726
atomization of H_2, at W filament 9779 [20593
bremsstrahl-isochromat, structure of short-wave limit
cathodes, heated, field emission, elec. stability and life 9068
chemisorption on Cu, Ag, Au, Fe, Co, Ni, work function, bond 18452
counter-tube cathodes, spectral yield curve 9229
diffusion of $Li^{6,7}$, in polycrystalline ribbon 17976
elastic constants and spec. heat, 14-300°K 21103
electron field emission, time depend. 3783
electron emission by ion bombardment 19806
electron work function, for various crystal faces 15047
electrostatic electron emission, in pulse regime 15048
emissivity, spectral and total, and thermal cond., above 2300°K 14876
field emission through adsorbed inert-gas layers 19713
films, heat treatment, structural changes 12086
H^+ formation on, during incandescence 8985
incandescent, alkali earth metals and Na ionization 10878
incandescent, optical pyrometer meas. 12537
internal friction, high temp. damping 3145
irradiation damage and recovery 7906
lattice parameters, X-ray study, absorption correction 1919
mass spectra anal. 9098
neutron irradiated, damage and recovery 20853
O and Ba coated, work function 9064
reaction kinetics of SrO on W 3308
recrystallization, torsion induced 6328
secondary emission 5341
secondary emission, bomb. with positive ions 9078
secondary emission, during incandescence, under K ion bombard. 15059
secondary emission, Zn and Cd ion bombard. 12632
sintered, U.T.S., temp. depend. 1866
statistical model, electron structure 7830
subcrystals, in vapour-grown crystals 18301
surface ionization of K and CsCl 10873 [11646
surface migration in high electric fields, activation energy
surface migration of N 7838
surface tension and surface migration consts. 7839
thermal and elec. conductivity and thermoelec. power
thermionic emission, in vacuo 10972 [11588
thermocouples, Re—W, stability in H_2 atmospheres 14955
thermocouples, W/Rh—W, up to 2800°C 7006
vacuum annealed, causes of brittleness 16241

Tungsten compounds (See also Alloys).
W carbide, Co-bonded, wear of hard and soft phases 18285
W carbide, "hot" electron emission 9066
W carbide, pickup of copper and duralumin 6322
W carbides, anisotropic thermal vibrations 13488
W hexahalide complexes, electron transfer spectra 20650
W nitride, cubic form, electron diffraction study 14023
W nitrides, electron diffraction phase anal. 14022
WO_3, Ag-doped, solid-state studies 17922
WO_3, i.r. absorption, effect of illumination with u.v. 18118
W oxides, mass spectra 10699
W oxides, thermodynamic props. 1955

Tuning forks (See Vibrating bodies).

Turbulence (See also Cavitation; Vortices).
acoustic radiation from turbulent fluid containing foreign bodies 8684
acoustic scattering 6878
in air and air—H_2 jets 8682
air, vortex flow, heat transfer and friction 6977
airflow, acoustical signal detection 12463
alkali metal liquids, heat transfer 3526
in atmosphere, Richardson's criterion 2022
in atmosphere and stratosphere, in stable layers, electrically neutral 14196
averaged Navier—Stokes equations, velocity products 68
axisymmetric, Chandrasekhar's theory 6759
axisymmetric, spectrum 2154
bibliographical review 10631
boundary layer flow problem 3553 [14595
boundary layers, incompressible, velocity defect laws
boundary layers, meas. at Mach 8-10 952
boundary layers, nonstationary, on wing profile and figure of rotation 10685
boundary-layers, research, conference 14672
boundary layers, statistical theory 927

Turbulence - contd
boundary layers, velocity defect laws 14677 [19068
boundary layers, with zero press. grad., flat-plate anal.
compressible flow, over flat plate 8683
convection, nonisothermal, between parallel planes 8620
decaying homogeneous, theory 8626
definition, with ref. to atmosphere 12167
dispersion by continuous movements 19000
in e.m. pumps, mag. field independ. 17079
energy transfer 14594
flow round rotating cylinder, noise generation 19330
gas analogy for simultaneous exchange of momentum, heat and mass 19177
gas streams, aspirated sampling nozzle 8325
gases, flow pattern, rapid deformation of 19180
gases, pre-mixed streams, optical flame studies 12536
heat loss from flowing non-boiling water 6979
heat transfer, in tubes, Reynold's analogy 19070
heat transfer, in turbulent flow 3669
incompressible liquid, statistical dyn. approach 926
and incompressibility 6726
inverted atmosphere, Taylor instability 10683
inviscid compressible fluids, density fluctuations 6761
ionized gases, effect of mag. field 12169
ionosphere, forward v.h.f. scatter theory 12711
ionospheric, influence of earth's mag. field 12172
ionospheric scatter propagation relationship 12174
isotropic, one-dimensional equilibrium spectra 3501
isotropic, pressure—velocity intercorrelations, at single points 19065
isotropic, pressure—velocity intercorrelations, at 2 different points 19066
isotropic, spectrum, decay 6760 [19063
in laminar flow, in rectangular pipes, isolated disturbances
large-ion chamber, air flow 949
liquid HeII between rotating cylinders 1070
in liquid metals, heat transfer in channels 14869
locally isotropic, in incompressible fluids 19067
mass transfer, turbulent, near walls 16678
mean-velocity and turbulence meas., corrections at high turbulent levels 12408 [10404
at meteor heights, theory of propagating atmospheric waves
microstructure, acoustic microanemometer investigation [10396
microstructure in atmos., scattering of waves 12176
mixing, of coaxial streams, in closed conduit 6753
mixing-length, generalized theory 6822 [16727
model, cylindrical, boundary-layer transition, optical study
n.m.r. study 16674
Navier—Stokes, theory and functional integration 14592-3
pattern in turbulent flow, in wall-adjacent region 928
pressure and temperature correlation in turbulent stream
salt water under fresh water layer 8609 [19069
seawater, spectrum at high Reynolds number 5000
in shear flow with stability 10640
solutions, convective solute diffusion 78
spectra in stably stratified atmosphere 12173
stagnation point fluctuations, on body of revolution 16728
statistical theory 4999
stratified fluids, in boundary layer 6827 [5001
theory, and similarity of vorticity fluctuation, applications
transition process, under disturbed entrance flow conditions
turbulent diffusion, theory 8625 [8621-3
two-phase burning streams, flame propagation 18437
in upper atmosphere 4788
in upper atmosphere, ionospheric irregularities 21332
vertical, frequency spectrum 12170
water, vortex flow, heat transfer and friction 6977
in water tunnels, noise production 2216

Twilight (See also Atmospheric spectra; Zodiacal light).
I.r. emission band, airglow 2028
night-sky emission theory 18510
optical state of earth's atmosphere 3360
polarization of light from sky 4804
solar-ray trajectories, calc. 3360
vertical distribution, Na resonance scattering 14287
6300 A line researches 18516
Ca emission 6462 [4802-3
Na airglow, 1955-7 data analysis, Na distrib. and height
Na D-lines, intensity, seasonal var. 2032
Na emission, southern-hemisphere observations 12200
Na flash, Rayleigh scattering 786

Twilight — contd
Na glow, excitation 21382
Na glow, observation corrections 2033
Na resonance scattering 2029, 2031
O I, 5577A enhancement, seasonal variations 18517
O I, 5577 and 6300A glow, photometric obs. 14288

Twinning (See Crystals, twinning).

Ultracentrifuges (See Centrifuges).

Ultrasonics (See also separate headings, e.g. Absorption).
aerosol coagulation 139
apparatus, for elastic const. meas. 11965
applications, developments, review 14758
cleaning, 15-2500 kc/s 14358
with coarse gratings 8753
concentrators, theory and computation 998
conduits, various combinations 5078
crystals, high density, elasticity meas. 13901
diffraction of light, by a.m. u.s. beam 16898
diffraction of light, by progressive wave 2253 [16899
diffraction of light, 3-dimens. system, higher-order spectra
diffraction of light, by two non-orthogonal u.s. waves 16897
diffraction of light, by 2 parl. u.s. waves, with 1:12 frequency ratio 19437
diffraction of light, by u.s. waves 14645
e.s.r. saturation, by u.s. sound field 3125
effect on colour of electroluminescence 18152 [8816
effect on diffusion of developer into photographic emulsion
effect on motion of Bloch walls in Ni 16136
effect on recoil in Mössbauer effect 20335
effect on surface structure of glass 21215
elastic const. meas., Be 1840
elastic const. meas., c.w. resonance technique, for single crystals 11963, 13897 [13896
elastic const. meas., pulse method, monoclinic crystals
elastic const. meas., rutile 13902
electrokinetic effect, in glass, 20-250 kc/s 5267
electroluminescent panels, u.s. irrad., yellow discolouration 8025
electrolytes, effect of conduction on compressibility 19128
emulsification, dispersion and coagulation, effect of sound intensity 4737
flaw detection, in metals 8760
generators, focused, high intensity 999
haemoglobin irradiation 18528
hypersonic waves, generation and detection 7867
image convertors 10735-6
image convertors, applic. to medico-diagnostics 19322
internal molecular rotation studies 19325
irradiation effect on creep of Cu springs 4563 [14596
liquid surfaces, withdrawal of transducer, column formation
luminescence of liquids in ultrasonic fields, survey 19164
machining, effect of cavitation 3390
machining, semiconductor slices 14362
magnetic field measurement 11010
matterscope 3590
mineral layer studies 16798
molten metals, electrodynamic methods of exciting u.s. waves 5110
organic cpd. synthesis, in u.s. field 1964
piezoelectric crystals, sources of sound 14733
pulse echo method, for size of defects 5109
pulse echo techniques 6855
radiators, for diffractional light modulator systems 12494
solvent agitation, for cleaning glass 6529
stroboscopes, variable phase, with light modulation by u.s. waves 5181 [1005
thermal visualisation of u.s. oscillation of shells in liquid
three dimensional system, diffraction of light 8808
ultrasonograms, fine-grained emulsion production 14746
very high energy, survey of uses 6890
visualisation of u.s. pulses, with a h.f. carrier 1004
water delay line, variable 14727
wave generator, using electron-beam impingement 12447
whistle, for applic. to liquids and gases 996

Uncertainty (See Indeterminacy; Probability).

Units (See also Constants; Dimensions; Nomenclature and symbols).
atomic 7237
changes in, rel. to math. form of physical laws 14484

Units - contd
"dex" suggested for "order of magnitude" 18898
humidity, Celsium-gramme-metre system 947
length, standards, methods of meas. 861
in physical laws, mathematical relations 858
pressure, vacuum range, proposed standard 19222
time, standards, methods of meas. 861
from unified field equation 4926
"universal", of temp., magnetism, mass, length and time 2093
Units, electrical [19582
faraday, determination with Ag perchloric acid coulometer
Uranium
α particle range, 4.5 MeV 9446
α-phase, cold-worked monocrystals, influence of deformation mechanism on recrystallization 10260
α-phase, irradiation growth, absence above 430°C 13938
α-phase, single crystals, adiabatic elastic moduli, temp. depend. 16204
α-phase, thermal cycling 13570
α-phase, volume increases, due to neutron irrad., effect of thermal fluctuations 9721
arc zone melting, purification 8169
atomic structure, relativistic self-consistent solution 9741
atoms, U V energy levels, from UF_4 absorption spectrum [1731
content in radioactive minerals 3335
crystalline texture, neutron diffraction study 18416
diffusion into Al, maximum penetration 13563
diffusion of Kr, fission-produced, in U metal 11645
dimensional instability, mechanism 11650
drawn rods, neutron study of texture 6394
effect of $\alpha-\beta$ thermal cycling on U and alloys 4580
evaporation, by fission fragments 5812
fission neutron inelastic scattering in 5801
γ-ray study of K, L and M + N + ... shells 7688 [10874
ionization potential, by surface ionization method with Li ions, U^+ bombard. of Cu, sputtering ratios 9110
isotope separation by UF_6 gaseous diffusion, use of fine-pored Ag membranes 18385
isotope separator, magneto-ionic expander 12652
irradiated, effect of heat and pressure on swelling 8265
irradiated, growth of gas bubbles, effect of dislocations 9903
irradiated, growth, wrinkling, creep, fuel element life 7674
irradiated, tensile props. 10271 [15623
irradiation effects on composition, under long use in reactor
mechanical props., effect of radiation 4545
metallurgy, production 3392
meteor content, neutron activation via Xe 4883 [14044
natural, fuel rod heat treatment, effect on burn-up distortion
ore deposit, size determination by Kr^{85} method 4777
ores, prospecting, using atmospheric Rn activity 16498
polycrystals, effect of thermal cycling on microstructure
radiometric determination in complex ores 18455 [16254
reactivity, temp. coeff., meas. 13330
self-diffusion, β-phase 11644
spectrum, isotopic displacements 5890
thermionic props. of wires and films 3786
thermoelectric power determination 18082
transformation temperatures 18377
U—Th separation, by ion exchange 21302
vacuum deposition, on organic backing 17288
vapour pressure 10699
wave number meas. from Fabry—Perot interferograms 10768
$U^{233,235,238}$, delayed fission neutrons 5811
$U^{235,238}$, epithermal neutrons η meas. 4133
U^{235}, enrichment, checked by γ-intensity 11388
$U^{235/238}$, η for 30-900keV neutrons 4134
U^{235}, estimation by means of ionization-chamber fission counter 15188
$U^{235,238}$, mixture, isotopic shift of 46 spectral lines 4176
$U^{235}-Pu^{239}$, rel. to conversion factors in U and water lattices
U^{238}, fission cross-section for fission neutrons 2695 [2702
Uranium compounds (See also Alloys).
absorption spectra 20656
analysis in soln., by γ-absorptiometry 4767
glass, phosphorescence decay 18145
isotope separation, by nozzles 13397
urania-thoria solid solns., thermodynamic props. 6382
uranyl nitrate solns., fluorescence depend. on temp. and thermal treatment 3539
UC, anomalous thermionic emission 17027
UC, diffusion of radioactive noble gases 4308
UC, props., preparation, irradiation behaviour 20524
Uranium compounds - contd
UC, thermionic properties at 1200-2100°K 12626
UC_2, dispersions in Al for plate-type fuel elements 9722
U carbide, effective resonance integral 20499
U dioxide rods, temperatures, thermal stresses and displacements 6962
UF_4, absorption spectrum, 2000A-8μ 1731
UF_6, heat capacity, 1.3-20°K, and thermodynamic props. to 300°K 15811
UF_6, mass spectrometry 12124
U fluoride, U tetrafluoride, molten, absorption spectra 19155
UGe_3, ferromagnetic props. 11834
UH_3, reaction with aqueous acid 14103
UO_2, incandescent, thermal conductivity 8821
UO_2, review of sintering techniques 14056
UO_2, sintering in H_2 at 1350°C 8464
UO_2, suspensions in NaK, stabilization 14143 [15620
U_3O_8, irradiated, diffusion phenomena of fission products
U_3O_8, stacking fault formation on partial reduction to UO_2
U_3O_8, precipitation in UO_2, habit planes 8150 [20793
UO_3 (Mallinckrodt), crystal structure 3224
U oxide, diffusion of radioactive noble gases 4308
U oxides, diffusion of Xe^{133}, 500-1150°C 1607
U oxides, hydrated, synthesis and crystal props. 4578
U oxides, mass spectra 10699
$U^{238}O_2F_2$, aqueous solutions, critical parameters of slab volumes 13323
$UO_2(NO_3)_2$, hexahydrate and - deuterate, luminescence, pyroelectricity 18136
UO_2—Si, Zr or Th cermets, study 6533
UO_2SiO_4, electron or light excited, luminescence 1753
UO_2—ThO_2—ZrO_2, structures 8229

Vacuum apparatus (See also Glass-metal seals).
all-metal bakeable taps 981
all-metal systems 12437, 16739
automatic control, 760-$1x10^{-4}$ 12442
bakeable seals, using Al wire gaskets 5064
cold trap, with water-cooled thermopile 16744
conductance of systems for molecular flow 19173
demountable seal, -188°C to + 800°C 5063
dessicator for photographic materials 19238
diffusion-pump thermostat 218
enamelled iron walls, for ultra-high vacuum containers 8725
epoxy-resin joints, for sealed-off high-vacuum tubes 10705
evaporation source, with controlled characteristics 16361
evaporation source, for deposition of Al 19240
flap-valve, for narrow apertures 19235
fluid traps 19233
freeze-drying, large scale 5066
furnance 8724
furnace, up to 1400°C 8461
furnace, r.f. induction, for clean target preparation 111
furnace, for X-ray diffractometry 8185
glass fibre mats, evacuated, as thermal insulation 1051
glow-discharge coating, directional 113
for high-purity gases 5295
high-temperature pressure—vacuum apparatus 2062
high-voltage continuously-pumped system, pre-breakdown conduction 16748
insulated terminals, demountable 16743
leak detector, using O_2 and thoriated W diode 14701
leak detectors, mass-spectrometer type 283, 2191, 8723, 12439, 14703, 15087, 19237
leak valve, all metal 19234
leak valve, for ion source, adjustable 12643
leak valves 19236
limiting pressures, meas. using omegratron mass-spectrometer 12436
liq. He trap 3579 [12431
molecular flow through various pipes, Monte Carlo calc.
nonrefrigerated traps 108, 16745
O-ring seal, In, tight to HeII 3574
optical props. det. of metal films 19422
pressure controller, automatic, for liquid-He cryostats 112
residual gas composition with condensation pumps 12441
students' kits 19241
sublimation apparatus, prep. of α-active thin sources 7489
ultra-high vacuum production, Alpert's method, for surface phenom. studies 14699
ultra-high vacuum unit 6841
valve, fast acting, for gas injection 3577

Vacuum apparatus - contd
valves, for ultra-high vacuum 3575-6
X-ray camera, high temp., for reactive metal exam. 13972
Young's modulus meas., using transverse vibrations, -200° to +700°C 8099
Zeta, 1958 modifications 5838
Vacuum gauges
calibration systems 19232
capacity-type micromanometer 6843
cold cathode, for below 10^{-3} mm 12438 [5060
combined thermoelec. and ionization gauge, 1-10^{-5} mm Hg
ionization, Bayard–Alpert, bistable behaviour 5061 [19226
ionization, Bayard–Alpert, cause of large-magnitude errors
ionization, Bayard–Alpert, nonproportionality 2188, 19225
ionization, cold cathode, three-electrode form 19230
ionization, control circuit 2190
ionization, hot-cathode, sorption and desorption of gas 16746
ionization, ion energies in cold cathode discharge 5275
ionization, Philips type, discharge mechanism 19614
ionization, sensitivities 8722
ionization, up to 10^{-1} torr 19228
magnetron type 980
McLeod, for gases with high critical temp. 19227
molecular streaming, discrepancies due to 2186
Pirani gauge, using Pd barrier, for high press. leak detection 5062
Pirani, thermistor-type 19231
pressure standard, proposed unit 19222
semiconductor manometer, 1-10^{-6} mm Hg 2189
thermal conductivity type 19229
thermistor, influence of wall temp. 6842
thermistor hypsometer, with high accuracy 914
Vacuum pumps
adsorption, using cold charcoal 8721
adsorption, large capacity 16741
condensation, residual gas comp. in evac. system 12441
diffusion, speed meas., dome fitting 978 [2188
diffusion, Hg and oil, max. attainable vacuum, comparison
evapor-ion, with liquid He trap 3571
gas discharge, high speed pumping 3570
gas discharge, pumping effect 8720
getter–ion, operation and applic. 107
getter–ion, Ti droplet, pumping characteristics 16742
getter–ion, theory and design 5058
glass oil-vapour pump design 976
ion, high-speed, discharge axial field 3570
isotope separation, in molecular pumps 4161
miniature pump, with Ti getter 14700
molecular 2187
outgassing rates, rapid determination 2192
phenoxy benzene pumping fluids 16740
poisoning prevention with alumina traps 16745
polyphenyl ether pumping fluids 16740
pumping speed, measurement 10702
rotary, design 3569
Ti getter pump 5059
Ti getter pump, with high pumping speed 977
Vacuum technique
alloy formation by deposition 21234
annealing in high vac., optical heating system 14900
coating by glow-discharge, directional 113
deposition of CdSe films 4693
deposition of radioactive materials 17514
electrical clean-up of gases, calculations 109
electroluminescent panels, preparation 18153
electrostatic time-of-flight spectrometer 2402
encapsulation of semiconductor devices 9984
evaporation, electron bombardment apparatus 5065
evaporation rate meas., from crystals 106
exoelectron emission from surfaces, examin. 3780
fatigue measurement, apparatus 4566
gas cleanup, penetration depth investigation 9003
gaseous heat conduction 19483
glass, aluminized, outgassing by electron bombard. 979
glass cleaning techniques 3578, 6529
inert-gas cleanup, discharge mechanism 10703
leak detection, with omegatron 283
leak detection, with thermal cond. gauge, sensitivity to var. gases and liquids 8723
leak detection, using mass spectrometer without bake-out or high vac. technique 14702
manipulation of Cl, NaCl-fusion cut-out 14703

Vacuum technique - contd
measurements, using forced periodic changes of molecular k.e. 6844
metal film resistors, prep. 8287
metal surface cleaning, by ion bombardment 8726
Na vapour etching, of sheet glass 21217
patterned film production, scattering effects 3282
pumping, of linear accelerators 2407
replication for surface structure determinations 14046
residual gas, analysis in evaporators 10704
residual gas, conference 19224
Si films, electron beam bombard. 19423
slide cleaning for deposition 110
sorption, of activated gases, by Ti films 10374
surface contamination, in demountable systems, C film exam. by electron microscope 19239 [14699
surface phenomena studies, ultra-high vacuum apparatus
symposium 5057
Ti, as getter 3573
Ti hydride gas generator, anal. of gas evolution 12440
ultra-high vacuum technology 19223
U deposition on organic backing 17288
Vacuum tubes (See Electron tubes).
Valency
bond resonance structures, for triplet state 17790
spinels containing Mn and Fe, ($Fe^{2+}Mn^{3+}$) assignment 3240
B and higher borides, valence orbital structure, systematization 13515
MgO impurities, e.s.r. valency determ. 11795
Pb, metallic 4256
Van Allen radiation (See Atmosphere, radiation belt).
Vanadium
atomic and electron heats, 10-273°K 20752
effect on mag. susceptibility of Al 16124
elastic moduli, 4.2-300°K 16200
ions, absorption spectrum, 0.4-1.2 μ, in Al_2O_3 20991
ions, e.s.r. in sapphire 10238
ions, V^{2+}, e.s.r. in ZnF_2 10233
ions, V^{3+}, e.s.r. in corundum 8086
ions, V^{3+}, e.s.r. in sapphire 1834
lattice parameters, X-ray study, absorption correction 1919
magnetic susceptibility, 20-293°K 21029
oscillator strengths of neutral atom 20590
paramag. resonance, V^{4+} in TiO_2 13879
spectra, in solar photosphere 14415
spectrum, Q correction 13414
spin resonance, in Si 4514
superconducting, far-i.r. absorption 14933
thermal cond., normal and supercond. 10843
vibration spectrum, calc., compared with neutron diffraction spectrum 1552
X-ray abs. spectrum, in various cpds. 1737 [8204
X-ray diffraction pattern, diffuse streaks due to N impurity
Vanadium compounds (See also Alloys).
spinels, valency semicond., temp. depend. 4366
V_2Al_{13}, structure 3226
V^{3+} alums, mag. susceptibility 18167
V ammonium alum, mag. props. 6214
V boride, X-ray abs. spectrum of V 1737
V carbide, X-rays abs. spectrum of V 1737
V nitride, X-ray abs. spectrum of V 1737
VO^{2+}, mag. props. in dilute systems 8084
V_2O_3, low-temp. X-ray diffraction studies 12046
V_2O_3, magnetic transitions 11799 [6363
V_2O_3, neutron diffr. study, 168-533°K, structural transition
VO_2, powdered, diffuse reflectance meas. 18112
V_2O_5, atomic distances 4650
V_2O_5, effect on dielec. props. of barium titanate 7982
V_2O_5, ice growth on 6335
V_2O_5 sols, streaming birefringence 3333
V_2O_5, X-ray abs. spectrum of V 1737
VO_x (x = 0.75-1.74), structure and thermo. e.m.f. 18353
$VOCl_3$, potential constants 5900
V oxides, elec. cond., composition depend. 6128
V oxides, various, temp. variation of susceptibility 10101
V^{3+} paramagnetics, susceptibility and anisotropy 8033
V_2S, crystal structures of α and β forms 4629
VSb_2, elec. cond., theory 13577
V_3X (X = As, Au, Co, Ga, Ge, Ir, Pt, Sb, Si), n.m.r. properties 19561

Vaporization (See also Boiling point; Condensation; Distillation; Evaporation; Heat of vaporization; Phase transformations; Vapour pressure).
boiling boundary layer, vapour content distrib. by β-translucence 10805
droplets, and combustion, theory 14894
equilibrium, change with temp. 5215
forced convection, local pressure gradients 14873
thermodynamics 3694
vapour degreasing for cleaning glass 6529
wire explosions 5214, 12530
benzene, forced vap. at 25°C 14908
n-butyl alcohol, forced vap. at 25°C 14908
carbon tetrachloride, forced vap. at 25°C 14908
carbon tetrachloride, thermodynamics 3694
methanol, forced vap. at 25°C 14908
transition metal (II) halides, dimer formation 3566
water, forced vap. at 25°C 14908
water, thermodynamics 3694
Al_2O_3, mass spectra 10698
Vapour density (See Density, gases).
Vapour pressure (See also Humidity; Vaporization).
isotopic liquids 8654
liquids, rel. to compressibility coeff. 6780
partial, over monocrystal surfaces 11994
transition metal (II) halides 3566
trifluoromethanethiol 5017
A, isotopic liquids 2168
A, isotopic liquid above b.p. 14683
BeO, in equilib. with solid, at high temps. 6997
C, orbital theory calc. 509
Cd, solid, 200-290°C 13472
CdS, crystal growth 8163
Cr, in solid state, radioactive tracer method 13473
H_2, 3.4-4.5°K 16738
HT and D_2, rotational effects 20606
He^3—He^4 mixtures, 0.6-2.4°K 10822
He^3—He^4 solutions, 1.4-2.6°K 5231
He^4, 1958 international tables 7036
Hg, 10^{-9}—1.08×10^3 mm Hg 5215
LiF, over solid and liquid, eqns. 10689
N_2, isotopic liquids 2168
N_2, 21.2 - 26.4°K 16738
Ne, isotopes 8700
Ne, isotopic liquid above b.p. 14683
O_2, isotopic liquids 2168
ScH_2 21270
Tl selenides, temperature—pressure relations 19201
U 10699
ZnSe, crystal growth 8163
Vapour pressure measurement
alloys, torsion—effusion apparatus 3678
apparatus for 10^{-3} - 760 mm Hg, -100°C to +20°C 14669
carrier gas method, flow velocity depend. 14893
low pressures and temp. 16738
null-point torsion effusion apparatus 14892
very low press., nuclear method 19512
Variable stars (See Stars).
Variational calculus (See Calculus).
Vectors
angular momentum 908
antiunitary operators, normal form 16608
bicubic spherical harmonics 3394
dimensional analysis, vector space theorems 16562
electromagnetic energy—momentum vector 7194
unitary and antiunitary symmetry operators 16609
Velocity
e.m. wave-front velocity 2439
plane surface microwaves, group velocity 11047
in motor car accidents 6705 [2194
particle, in solid cone in longitudinal half-wave resonance
visual discrimination, Weber ratio 14348
acoustic waves (See also Dispersion, acoustic; Liquid helium, sound propagation; Shock waves).
antiferromagnetics 10163
Bose system, dispersion formula 12381
binary fluid mixtures, conc. depend. 16695
binary liquid mixtures, conc. depend. 6786
dense gases, temp. dependence 19205
electrolytic solutions, calculated 5013
electrolytic solutions, from compressibility data 19046
expanding reacting fluid 10722
hypersonic, in viscous liquids 10724
Velocity — contd
acoustic waves — contd
liquids, at boiling point, liquid—vapour phase ratio, Pictet—Trouton rule 5079
metal bars, temp. variation 5081
metals, at melting point, liquid—solid phase ratio 5080
open pipes, demonstration experiments 2199
organic liquids, 5- and 6-membered rings, molar sound velocity 19134
rocket-grenade expt. 14197
two-component systems 8737
van der Waals solids, 0°K 17868 [16763
viscous media, potential function in solving wave-equation
sea water 19276
sea water, formula 989
sea water, temp., press., and salinity depend. 10721
shallow water, under-ice, in Barrow Strait 14726
shallow water, variations 5083
TNT explosion products 14728
water, distilled 19275
water, effect of pressure 10657
A, liquid and gaseous, at high press. 8695
Al, 0.4-3.5 × 10^4 atm. 11974
Cu, 0.4-3.5 × 10^4 atm. 11974
D, -175° to +150°C 14909
Fe, 0.4-3.5 × 10^4 atm. 11974
H, -175° to +150°C 14909
HF, liquid 3524
He II, second sound, down to 0.38°K 12553
N_2, H_2 and O_2, at boiling points, as temp. meas. 216
O_2, at different temp. 16764
O_2 and N_2, and mixtures, liquid, high press. 124
Pb, 0.4-3.5 × 10^4 atm. 11974
acoustic waves, ultrasonic (See also Dispersion, ultrasonic).
diffraction effects 19298
electrolytes, dispersion 941
electrolytes, effect of temp. and conc. 16769
gases, vibrational relaxation study 9789
hard materials, surface waves 8738
latent heat of vaporization correl. 16768
marine sediments 8739
molten salts 16696
organic liquids, rel. to molar refraction and internal pressure 19130
plates, longitudinal spectra 16800
solid—liquid boundary, by angles of total reflection 16766
alcohol—glycerol mixtures, conc. depend. 10658
aniline—cyclohexane mixtures 19131
chloroform 127
o-chloronitrobenzene, melt and soln. 10659
m-chloronitrobenzene, normal and supercooled, temp. depend. 6789
diphenylether, normal and supercooled, temp. depend. 6789
ethanes, substituted, 10-110 Mc/s, -70° to +100°C, rotational isomerism 19125
ethyl acetate, vel. and absorption coeff. 8652
glycerine, -50° to +50°C, at hypersonic freq. 5011
glycerol—water mixtures, conc. depend. 10658
glycine sulphate, light diffraction obs. 9845 [19206
halomethane gas mixtures, multiple velocity dispersion
Indian granite 2201
isobutyl bromide, vibrational, rotational isomeric, structural and shear relaxation 17736
menthol, normal and supercooled, temp. depend. 6789
methanol—water solution, rel. to cavitation 19129
methylene bromide 127
naphthalene, melt and soln. 10659
o- and m-nitrophenol, melt and soln. 10659
palmatic acid, melt and soln. 10659
phenyl salicylate, melt and soln. 10659
salol, normal and supercooled, temp. depend. 6789
salol, supercooled 10723
stearic acid, melt and soln. 10659
water containing algae suspension 8750
water and electrolytic solns., temp. depend. 6793
$Ba(NO_3)_2$, aqueous soln. 14640
Bi, 98° and 4.2°K 16199
CO_2, solid 11965
$Ca(NO_3)_2 \cdot 4H_2O$, aqueous soln. 14640
Cd, elastic const. meas. 13898
CdI, aqueous solns. 6790
CdS 21094
Ge, temp. depend. 1843

Velocity — contd
acoustic waves, ultrasonic — contd [5049
H_2 mixtures with He, N_2, O_2, thermal and ordinary diffusion
He^3, liquid and low-temp. gas, at 14 Mc/s and up to 9 atm.
$HgCl_2$, aqueous solns. 6790 [2281
KNO_3, aqueous soln. 14640
$MnSO_4$, aq. soln., freq. and temp. depend. 6792
Na, elastic const. meas. 13904
NaI 17895
$NaNO_3$, aqueous soln. 14640
Ne—He, A—He and K—He gas mixtures 14721
$Pb(NO_3)_2$, aqueous soln. 14640
Si, neutron irrad., size of damaged region 2835
$Sr(NO_3)_2$, aqueous soln. 14640
light
air and vacuum, review of results 10746
constancy principle 4932
in liquids, flowing 19356
in mag. field 12466
and meas. of interplanetary distances 6574
from moving source, exper. study of special relativity theory 18922
photon, in vacuo, energy depend. investigation 12467
Velocity analysis, particles (See also Alpha-ray spectrometers; Beta-ray spectrometers; Ion velocity; Mass spectrometers; Range of particles).
Brookhaven fast chopper, modification 17348
with conical pole pieces, stray field derivation 7191
direct method, using resonant microwave cavity cloud chamber 7252
electrostatic analyser, aberration correction 5364
emulsion tracks, maximum likelihood method 5465
energy and ang-distrib. fluctuations meas. 312
fast neutrons, time-of-flight technique 2552, 17349 [17629
fission-fragments, automatic time-of-flight measurements
heavy cosmic-ray primaries, energy det. in emulsion by knock-on electron method 17442
ion transmission, with inhomogeneous mag. fields 7170
magnetic analyser, for particle accelerators 15222
magnetic proton spectrometer, Uppsala 11075
magnetic spectrometer, line-focus intensity distrib. 7173
momenta meas., 10^{10}–10^{12}eV 12805
mesons and hyperons, using travelling wave devices 319
neutrons, pulse-time recording for time-of-flight methods
neutrons, time-of-flight tape recording 17352 [2474
photons, in vacuo, energy dependence investigation 12467
π-mesons, bubble density in H bubble chamber, velocity depend. 12728
propane bubble chamber determination 20090
protons, bubble density in H bubble chamber, velocity depend. 12728
protons, 6.3 BeV, check of energy det. methods by multiple meson prod. in emulsion 1283 [19799
spectrometers, image location, effect of stray mag. fields
time-of-flight experiments, with 15 MeV linear accelerator 17350
time-of-flight fluctuations, statistical problems 6691
time-of-flight meas., $\sim 10^{-9}$ sec, single-channel time-interval analyser 19995
time moments and asymptotic formula for slowing down neutrons 363
van de Graaff beams, for time-of-flight meas. 2476
Velocity measurement (See also Angular velocity measurement; Stroboscopes).
microwave reflection from piston end, in hypersonic gun tunnel 4976
particles in opaque fluid 3491
photoelectric apparatus 3488
radioactive pneumatically transported grains 19041
shocks in solid explosives 3584
vehicles, using interrupted light beams 4986
acoustic waves
in explosion products 14728
liquids, interferometric determination 6859
liquids, by resonator tube, effect of walls 5062
models 19333
plastics, thin films 6859
behind shock front, flying plate projectile 8742
solids, limited size 990
air, atoms. press., 100–1500 c/s, sp. ht. calc. 5052
sea, variations recorder 14756
water, as function of temp. and pressure 19273-4

Velocity measurement — contd
acoustic waves — contd
A, solid 9848
CO_2, atmos. press., 100–1500 c/s, sp. ht. calc. 5052
ClO_3F, for Cp/Cv 105
O_2, atmos. press., 100–1500 c/s, sp. ht. calc. 5052
acoustic waves, ultrasonic
with coarse gratings 8753
inorganic acids, molar sound velocity 19133
liquids, by optical diffraction 6858
liquids, variable frequency interferometer 16767
in stress analysis 694
alkali halide crystals, c.w. resonance technique 11963
hydroxide solns., aqueous 5012
A, liquid, at high press. 19132
Ge, under pressure, transverse vel. 1844
N, liquid at high press. 19132
α-U, phase comparison meas. 16204
light
air and vacuum, review 10746
in distance meas. 14569-70
review 19355
in vacuum, using microwave frequencies, M.I.T. survey 8762
Vibrating bodies (See also Bells; Crystals, lattice mechanics; Elastic waves; Pendulums; Piezoelectric oscillations).
anti-vibration mountings 6870
$BaTiO_3$ plates, vibration patterns 19253
bars, flexural and longitudinal reson. freq., Young's modulus relations 13905
bars, longit. vibrations 19248
bars, plates, wedges and cones, stress and strain limits on attainable velocity 16749
bars, resonance method for mechanical impedances, under various conditions 19248 [16756
bars, tapered, of revolution, in longit. half-wave resonance
beams, discontinuously loaded 16754
beams, effect of shear on higher frequencies 6850
beams, elastically mounted, damping 16755
beams, 2-layer viscoelastic, bending and extension 16758
bending wave radiation, from vibrating plates 19283
bending waves, measurements and investigations 19249
bubbles, viscous damping 10643
circular plate, water-loaded, resonant frequency 6849
clustered rods, cooled by parallel flow 5072
cone, solid, in longitudinal half-wave resonance 2194
conical bar, varying rigidity and density, torsional vibrations 14709
conical shells 10710
conical shells, axisymmetric modes 12444
cylinders, hollow and thick-walled 19251-2
cylinders, isotropic, natural elastic vibrations, meas. 1–120 kc/s 14708
cylindrical elastic shell, interaction of acoustic wave 10716
cylindrical shells, axially symmetric vibrations, in acoustic medium 14711
cylindrical shells, exper. study 14710
cylindrical shells, thick-walled 2193, 8729, 10708-9
cylindrical structures, input impedances 6851
damping layer, influence of rate of flow values 1017
damping and vibration detector position, effect in reson. meas. 5075
dielectric substances, free oscillations 16030
disks, radial extensional vibrations, theory 14705
dynamic absorber, transient behaviour 136 [6716
ellipitical vessels containing liquids, rotational vibration
gut strings, frequency shift due to humidity 5111
hard-spring oscillator, equivalent linearization 16757
hard-spring oscillator, randomly excited 10711
l.f. motion, in elastic wave field 19033
liquid-containing body, elastic vibrations 925
membranes, velocity distrib. det. 19313
Myklestad matrix method, extension 5067
nonlinear, orbitally stable soln. 6537
nonlinear string, response to random excitation 14704
nonlinear system, passage through resonance, approx. soln.
plate, clamped in fluid, forced vibrations 19247 [114
plates, acoustical radiation behaviour 16809
plates, amplitude meas., using interference microscope 5069
plates, damping, temp. depend. 16800
plates, inf. and elastic, stress wave 118
plates, infinite and thin, mechanical impedances 19346
plates, moment impedance 19245

Vibrating bodies — contd
plates, piezoelectric, quartz and tourmaline, bending, longitudinal and thickness vibrations 19255
plates, theory 983
plates, triangular, thin equilateral 16752
plates, velocity distribution determination 19313
primatic bars, flexural natural freq., depend. on width/length 14706
quartz lenses, double convex, Chladni's figures 14713
quartz plates, analysis 19254
quartz plates, square, contour vibrations 16751
rails, during passage of train, 10-100kc/s 5073
rectangular piston, sound field 2205
resilient supports, vibration isolation 14707
ribbed plates, transverse vibrations 5068
rods, frequencies below radial resonance 10707
solid propellant rockets, acoustic rockets 8735
solids, as aggregate of atoms, extension of Huygens' principle 13463
sound deadeners, testing 16804
sphere, in rotating liquid 6746
spherical shells, elastic 5071
spring—mass system, forced oscillation, Coulomb and viscous damping 19243
strings, amplitude depend. on reson. freq., applic. to vibroscope 6848
strings, large-amplitude motion 116
strings, minimum bowing press. 16750, 19244
strings, parameters determining musical response 1010
surfaces, vibrometer meas., damping effects 117
system stability, under forced frictional oscillations 6846
tape moving between pair of pulleys, transverse vibrations 12443
tuning forks, analysis 19855
viscoelastic, between parl. planes 3502 19250
viscoelastic circular cylinder, forced torsional vibrations
wires, applic. in pressure cells 12399
wooden beams, free flexural vibrations 3580

Vibrations (See also Acoustics; Damping; Oscillations; Vibrating bodies; Waves).
absorbing materials, expt. investigation 1013
bubbles, in water, damping 119 6865
bubbles, in water, frequency, radius, and press. changes in buildings, propagation 19332
classical system, variational method for study 16614
effects and analysis, conference 8727
ferromagnetics, in a.c. fields, effect of mag. props. 12445
forced, Coulomb damping, two deg. freedom 984
linear mechanical oscillator 14564
Melde's expt., subharmonic oscillation 6847
nonlinear, orbitally stable solutions 6537
nonlinear, in weak external fields 16602
oscillatory parametric control 6545
random 982, 10706
review of Soviet work 6845
stability, Routh—Hurwitz and Markov criteria 8728
structural vibration processes 19334
variation in amplitude and phase in propagation 120

excitation
beams, elastically mounted 16755
impact sound, production and reduction 19335
"octave vibration" of stringed instruments 5112
plate clamped in fluid, forced vibrations 19247
plates, radiation behaviour 16809
random, response of nonlinear string 14704
spring-mounted mass, resonance investigations 985
superposed on crystal, electrical effects 7917
alum, optico-acoustic effect 20972
human skin, dynamics of vibration sense at l.f. 16499
Rochelle salt, optico-acoustic effect 20972
NaCl, effect of internal friction 21100

measurement (See also Seismographs).
a.f. pick-up, for structural vibration measurement 19318
amplitude meter, using moiré-fringe technique 3581
concrete beams, torsional 6853
cylinders, isotropic, 1-120 kc/s 14708
in detonation waves, H—O mixtures 6862
damping and vibration detector, effect of position in resonance meas. 5075
instrument transfer functions, determination 19324
instruments and methods 19316
longitudinal, in Mc/s range, electrostatic drive and f.m. equip. 5074
metals, torsional vibrations, strain-dependent damping 6852

Vibrations — contd
measurement — contd
physical equivalents of spectral motions 5102
quartz accelerometer, development and calibration 16663
rails, during passage of train 5073
review of Soviet work 6845
tuned capacitor detector, for megacycle range 16800
vibrating wire gauges, frequency 8583
vibration pick-up calibration 19323
vibroscope, amplitude correction 6848
wooden beams, free flexural vibration 3580

Viscoelasticity (See also Plasticity).
associated liquids, viscoelastic props. 8651
beams, 2-layer, bending and extensional vibrations 16753
circular cylinder, forced torsional vibrations 19250
continuum mechanics and irreversible thermodynamics 6689
deformation, relaxation eqns. 698
flow, relaxation of stress and creep 6309
linear isotropic, theory 8113
liquids, diffusion of vorticity 16680
oil-seal operation 6750
oscillation of fluid in circular tube 2151
plane lamina rotation, in viscoelastic liquid 6747 10622
porous cylinder, fluid filled, deformation, under steady press.
rod, stress waves, finite and infinite cases 14714
sinusoidal oscillation of medium between parl. planes 3502
solid propellant rocket, acoustic resonance 8735
sphere, change to torus by random impacts 55
stability in linear viscoelastic region 8576-7
variational theorems 4560
Voigtian material, 3-dimens. rheological eqn., for large deformation 21129
elastomers, stress relaxation 3160
eucalypt pulp, Young's modulus, rel. to no. of H-bonds 6308
oils, lubricating, under cyclic shearing stress 8597
polymers, ultrasonic measurement of moduli 14049-51
renneted milk gel, relaxation times 8122-3
rubber, strain dependence 697
silicone liquids, under cyclic shearing stress 8597

Viscometers
capillary, data reduction 12402
capillary, mean effective pressure head, calc. 63
capillary, with negligible k.e. correction 6729
capillary, for non-Newtonian liquids 8595
capillary, theoretical evaluation 6730
for non-Newtonian measurements, design factors, Ferranti model 19044
oscillating cup, theory 16667
oscillating cylinder, amplitude of oscill. formula 19043
oscillating cylinder, graphical method 6732
oscillating cylinder, for Newtonian liquids, theory 12401
oscillating cylindrical crucible, absolute meas. 10632
oscillating disk, between fixed plates, theory 16671
oscillating disk, relative meas. 16722
oscillating disk, theory 16669-70
oscillating disk, theory and exper. on 11 gases 16723
parallel plate, theory 6733
plunger, wall effect in flow of lubricating greases 14577
rolling-sphere for structured liquids 14575
rotating disk, non-Newtonian liquid flow 10633
torsional vane, for foam 14576

Viscosity
ang. osc. of cylinder in viscous fluid 8598
boundary layer theory 8617
canonical ensemble 12376
chemical, effect on velocity of sound in expanding reacting fluid 10722
circular disk in fluid, impulsive rotatory motion 19053
dense media, approx. theory 904 19176
drag of many cylindric lattice at low Reynolds number
effect on multiple prod. of particles 11129
effect of spin relaxation time 18224
flow, laminar, non-Newtonian, in circular pipe 19064
force const. on cylindrical particle 14583-4
hydrodynamical minimum theorem 2147
measurement, kinetic energy correction 6729 3493
Muskat-Aronofsky model, displacement in porous media
non-Newtonian 4988
non-Newtonian, flexible-chain molecules 15793
plates, extension and flexure, analogy 8603
polymer solutions, effective viscosity to microscopic spheres 76
ratio of vol. to shear viscosity, calc. for dense fluids 65

Viscosity – contd
relationship to thermal conductivity 6734
renneted milk gel, relaxation times 8122-3
settling suspensions of spherical particles 4987
statistical mechanics 16647
Stokes friction, steady motion 16675
at surface, surface tension relaxation 3504
suspensions, relation to sedimentation velocity 4740, 10366
suspensions, of spheres 6730
thixotropic materials 6735
unmixing demonstration 6751
wave equation for viscous media 16763
A, fluid, at const. density 8674
As_2Se_3–As_2Te_3 system, vitreous 12062
TiO_2 pigments, in linseed stand oils 6735
Zn monocrystals, in air and under Sn layer 6311
gases
compressed, continuum model 12415
meas., oscillating-disk method, relative meas. 16722
mixtures, for force-constant determination of unlike molecular interactions 15736
plasma, in mag. field 15022
pressure dependence 3561, 19197
air, in turbulent vortex flow 6977
air, 20° and 25°C, press. depend. 16723
water vapour, 20°C, press. depend. 16723
A, 20° and 25°C, press. depend. 16723
CCl_4–methylene chloride solutions 10655
CO_2, 20°C, press. depend. 16723
D, 20°, press. depend. 16723
D_2, 20-80°K, law of corres. states 8705
H, 20°C, press. depend. 16723
H isotopes and noble gases, mixtures, 20-300°K 8675
H_2, law of corres. states, 20-80°K 8705
H_2, at low temp., para–para and para–ortho collisions, calc. 7815
H_2–D_2, temp. depend. 6820
H_2–HD, temp. depend. 6820
H_2–H_2O, vapour mixtures, 295°K 16721
HD, below 80°K 8703
HD–D_2, temp. depend. 6820
He, 20°C, press. depend. 16723
He, 25-237°C, 1-137 atm. 8673
$He^{3,4}$, 20-80°K, law of corres. states 8705
He, H_2, D_2 and Ne, 20-60°K 92
He–Ne, temp. depend. 6820
Kr, 20°C, press. depend. 16723
N, 20° and 25°C, press. depend. 16723
N_2–CO_2, press. depend. 8676
Ne, 20°C, press. depend. 16723
Ne, 20-80°K, law of corres. states 8705
O, 20° and 25°C, press. depend. 16723
Xe, 25°C, press. depend. 16723
liquids (See also Lubrication; Superfluidity).
acoustic streaming, first and second viscosity coeff. ratio
binary liquid solns., statistical mechanics 19092 [6880
broadside motion of flat plate 19057
continuum model 12415
and density, from oscillating cup viscometer data 16667
drops, partial coalescence 8645
effect on dielectric relaxation 19145
effect of solvent viscosity on diffusion, Einstein's law 14633
effect on surface tension meas. by drop-wt. method 19082
friction constant, semi-empirical determination 10652
macromolecular polymer solution 12405
meas., using Helmholtz resonator 8593
metals, "electronic" viscosity 4997
mixtures, Andrade eqn. exponent, mole fraction depend. 8600
molten salts, from u.s. absorption and vel. meas. 16696
monatomic liquids, 12 specimens 6775 [16666
Newtonian, oscillating cylinder data, graphical determin.
non-Newtonian, axial and circular flow 916
non-Newtonian, capillary measurements 12402
non-Newtonian, flow eqns. 2149
organic, rel. to dielec. props. 19142
organic, temp. dependence 5215
polymer solns., irrad. effects 20701
polymers, intrinsic viscosity, velocity grad. effects 8599
salts, molten, rel. to melting study 13466
spheres, moving through liquid 6731, 8592 [8644
splash of water drop, falling into glycerol–water mixture
suspensions, improved Einstein's formula 14578

Viscosity – contd
liquids – contd
thixotropic, time dependence of viscosity 6736
viscoplastic, motion of spheres 19051
viscoplastic oil, lubrication 14586
AIIIBV alloys, thermal stability 13465
alkali metals, measurement 3526
barytes suspensions 8596
DNA, comp. of molec. weights 7822
ethylene glycol 19045
glass, high silica content, temp. depend. 18383
glass, rel. to elec. cond. 3260
glycerine–water mixtures 14575
milks, fat-free 14575
polyacenaphthene solutions 14657 [3492
polyisobutylene, melt viscosity, press. and temp. depend.
poly-para-tertiary butylphenylmethacrylate solutions 12501
salt water, from flow and stress near interface 8609
silica, temp. depend. 18383
water, in turbulent vortex flow 6977
A, calc. for 89°K, vol. viscosity 65
B trifluoride 6980
CCl_4–methylene chloride solutions 10655
CaO–GeO_2 8255
Ga, structure changes, and elec. cond. data 12419
GeO_2, 1000-1550°C 8255
H_2S, liquid, -11.5° to +50°C 14579
He, from damping of torsionally oscillating cylinder 16937
He, between 1.1 and 0.79°K 8903
He II 19537
He II, "eddy" viscosity 5229
He II, near λ-point 8904
He II, Landau correction coeff. 10818
He II, normal component, in fine channels, temp. depend.
He II, 1.15-2.15°K 8864 [16938
He II, ratio of dilational to shear coeffs. 8906
He^4–He^3 solutions, Boltzmann gas model 8863
Na_2O–GeO_2, 1000-1550°C 8255
Ni and Ni–Cu alloys, molten 14580
$ZnCl_2$ 14626
Visibility
No entries this year
Vision (See also Colour vision; Eye; Stereoscopy).
absolute threshold and age 2058
accomodation correlation 12229
acuity, depend. on type of light source 18561
acuity, effects of involuntary eye movements 14343
acuity and eye movements, variations 8447
binocular, space geometry 18550
cats, physiological nystagmus 3384
complex flicker, fusion 14345
contrast, enhanced by movement or intermittence 8449
contrast sensitivity, with different illuminants 14350
critical flicker freq., equivalence of pulse-to-cycle fractions 3383
cross-wires, confused image, due to illusions 19382
dark adaptation 8451-2, 14351-2, 18560 [3381
differential binocular adaptation, effect on scopotic acuity
electroretinogram, potential change 8450
eye movements, during fixation 8448
factors, determining maximum angular velocity of pursuit ocular movements 3378
fine-line visibility, in intermittent illumination 18548
flicker fusion, flicker between different brightness levels
flicker fusion, light–dark ratio 6518 [6517
foveal dark adaptation, effect of pre-exposure colour 18562
foveal spectral sensitivity, meas. 18564
fusion of complex stimuli, Fourier model 6519
haploscope, tilting type 816
image quality, evaluation 19371
luminosity losses in deuteranopes 6528
min. dark intervals, between flashes 8453
object visibility dependence factors 6520
perceptual anomalies, with single contour 18549
peripheral, movement thresholds 14344
perspective distortion, over compensation 14349
Pulfrich stereophenomenon, magnitude as function of target thickness 6516
pursuit ocular movements, max. ang. vel. 3378
recovery, after green and blue-green adaptation 8445
refractive error, green/red ratio 6526
retinal images, stabilization by means of telescopic normal incidence system 18565

Vision – contd
retinal images, stabilized and unstabilized, monocular rivalry 10458
scanning, of PPI radar screens 18567
scanning-mechanism hypothesis 18551
scotopic acuity, temporal course, effects 18559
scotopic sensitivity, seasonal changes 3382
spectral energy thresholds, acuity target resolution 18553
star visibility, in daylight, at high altitudes 843
target size and shape, effect on visual detection, neural formulation 2061
with telescope, enlarged retinal image, psychological approach 19383
temporal adaptation, to spatial detail 4629
unstructured field, search 8455
velocity discrimination, Weber ratio 14348

Vitreous state
formation of glasses, under high press. and temp. 12060-1
molecular transport 2141
paramagnetic resonance line shapes 21219
polymers, optical activity 8258
semiconductors 3263
semiconductors, complex chalcogenides 13610
semiconductors, optical properties 13609
vitrification, energy balance 12059
vitrification, of plastics 4680
alkali borate glasses, n.m.r. data 8256
borates, glass-forming, structure and physical props. 8252
halides, glass-forming 6777, 14626
oxide glass, fluoride ion in vitreous matrix 21218
polymethylmethacrylate, photoelastic properties 4398
quartz, amorphisation by milling, effect of medium 12058
quartz, amorphous form prod. under shock conditions 6324
silica, Debye temperature 11580
silica, heat capacity anomalies 11581
silica, properties of suspensions, electrokinetic mobilities 4744
silicate fibres, structure 6372
As glassy chalcogenides, X-ray study 21199
As_2SeTe_2, elec. cond., effect of impurities 15944
Ba borate, radial distrib. study 14027
C, amorphous, tetrahedral structures in, predicted X-ray diffraction pattern, rel. to graphite and diamond 6371
$CaO-GeO_2$, viscosity 8255
Cs borates, cation distrib. 4645
Na_2O-GeO_2, viscosity, 1000-1550°C 8255
Rb pentaborate, radial distrib. curve 6360
S, plastic, structure 3517
$ZnCl_2$, glass-forming, liquid structure 14626

Volume measurement
conference, 44th Nat. Weights and Meas. (1959) 6720
drops of aqueous sol., "micro-rod" meas. 6770
hard superconductors 8956

Vortices (See also Cavitation; Turbulence).
axisymmetric boundary layers, transition patterns 921
boundary layer, over flat plate, in presence of shear flow [3498
fluid motion, density stratification, Navier–Stokes equations
formation, near resonator, in air stream 6828 [12154
liq. He, vortex lines 8874
in liquid drops, formation 8643
magnetohydrodynamic flow, flat plate drag 15125
resistance to circular cylinder, due to vortices 16679,
shear flow, due to oscillations 14600 [19073
similarity structure of vorticity fluctuation 5001
superflow 8922
superposable axially symmetric flows, decay 4992
Taylor, between horiz. concentric cylinders, formation conditions 8627
troposphere, nonlinear eqn. soln. 21324
viscoelastic liquids, diffusion 16680, 19072
waves, on quantized vortex lines, in rotating HeII 8907

Water (See also Ice; Seawater; Steam).
acoustic field of plate waves in water layer 19284
acoustic sawtooth waves, form analysis 19309
acoustic square-wave propag. 123
acoustic streaming, velocity 19306
acoustic streaming, viscosity ratio 6880
acoustic transmitters and receivers 12458

Water – contd
acoustic wave propag. 2196
adsorbed on alkali halides, i.r. study 10375
adsorbed on Vycor glass, freezing 12118
adsorption, by Ge surfaces 12115
air bubbles, nonlinear oscillations 6865
air content, dissolved, meas. 21264
with algae suspension, u.s. absorption 8750
α- and β- activity meas. 5691
α- particle range 1322
boiling boundary layer, vapour content distrib. by β-translucence 10805
bond study 8666
bubble formation 16682-3
compressibility, 5-60°C 12400
compressibility, temp. depend. 6793
condensation on, from atmosphere 5211
condensed film, optical props. 746
D_2O, spectral shifts of transition metal ions and complexes in soln. 3531
diamagnetism of vapour, calc. 17795
diffusion of solutes, across oil/water interface 8656
diffusive motions in, cold-neutron scatt., calc. and expt.
diffusive motions in, from neutron scatt. 79 [14648-9
distilled, sound velocity 19275
drops, in air, damped oscillations 14611
drops, falling into water–glycerol mixture, splashes 8644
drops, impact on metals, pit formation 8142
drops, in mist, photoelec. meas. 12110
elec. cond., in strong shock waves 6073
elec. conductivity, changes caused by X-irradiation 19113
electronic structure of molecule, calc. for various wave-functions 7786
equivalence factors for D_2O, neutron age calc. 12955
evaporation, reduction by cetyl alcohol film 14890
evaporation, from surfaces coated with stearyl alcohol film 16922
excited by acoustic waves, reflection of e.m. waves 7220
film, dynamic surface tension meas., vertical jet directed onto horiz. plate 5005
flow, in pipes, cavity formation 6762
flow, turbulent vortex, heat transfer and friction 6977
flow stability, in heated passages 6749
formation of self-trapped electrons ("polarons") by irradiation 14136
gamma dose distribution, in cylindrical volumes 15558
gamma-ray absorption 7328, 9327
γ-ray backscattering, 0.2-2.0 MeV 7318
gaseous diffusion in O_2, at high temp. 3563
and glycerine mixtures, viscosity meas. 14575
H bond covalency 8662
heat loss from non-boiling water, at high heat fluxes 6979
heating by sun 19500 [12471
heavy–light water mixtures, phase contrast refractometry
heavy water prep. by gaseous diffusion, use of fine-pored Ag membranes 18385
i.r. absorption 82
isotope contents of various samples 17680
isotope enrichment by slow evaporation, rate variation with sample origin 17681
jets, high-speed break-up 8619
light and heavy, heat of mixing, formation of HDO 3306
light scattering, Brillouin components 14847 [19158
luminescence and Cherenkov radiation, X- and γ-ray excited
microwave spectrum, HDO and D_2O, h.f.s. 20667
as moderator, neutron spectra meas. 7657
molecular structure 5983
molecules, ortho and para, trapped in solid A and Xe, near-i.r. absorption 15722
neutron age in 12982
neutron age in D_2O-H_2O mixtures 12984
neutron age to In resonance, from D(d,n)He^3 reaction 12986
neutron age in, from Pu–Be 15362
neutron reflection, angular and spectral distrib. 7366
neutron scatt., at 0.005 eV, inelastic cross-section 6795
neutron scattering 12940, 15360
neutron scattering, dose albedo 12944
neutron slowing-down time, meas. 12977
noise production, in turbulent boundary layer 2216
nucleate boiling, under reduced pressure 14891
optical and r.f. props. 8665-6
percolation through ion-exchange resins 12067
phase transition, ice–water, equation of curve 6991

Water – contd
positron annihilation in 9343 [4993
pressure pulse meas., damping due to viscous dissipation
proton conductance, anomalous, dipole rotation mechanism
proton conductance, theory 4721-2 [4720
radiation chemistry 4730
radiolysis, light and heavy water 18438
ripples, damping out by cetyl alcohol films 12411
rotational kinetic effect 8648
salt water–fresh water interface, flow and stress 8609
self-diffusion coeff. 3513
self-dissociation and protonic charge transport 7738
shallow, sound velocity variations 5083
slow-neutron scatt., cross-section calc. 12941
solutions in organic substances, i.r. absorption spectra, n.m.r. comparative study 16719
sorbed on zeolite, i.r. study 10376
sound propagation, at l.f., in shallow reservoir 19268
sound velocity, as function of temp. and press. 19273
sound velocity measurement, up to 300°C and 150 kg/cm² pressure 19274
specific gravity, direct reading hydrostatic balance 8594
and steam mixtures, density meas. 10806
structure and sound velocity, effect of press. 10657
supercooled, nucleation 8153
supersonic flow in tubes, wall friction meas. from temp. rise 12404
surface tension, effects of rotation, temp. depend. 73
surface tension, meas. by drop-weight method, viscosity effect 19082
surface tension, rotational kinetic effect 8640
thermal conductivity, anomaly 19121
thermomagnetic effects 6785
triple point, temp.–time dependence 1056
u.s. propagation, 15-80°C 14757 [16768
u.s. velocity and latent heat of vaporization relationship
ultrasonic variable delay line 14727
underwater sound reflection 8751
vaporization, forced, at 25°C 14908
vaporization, forced, thermodynamics 3694
vapour, adiab. expansion and ice-crystal form. 5212
vapour, afterglow discharge, microwave study 5294
vapour, effect on adsorption of O_2 on Ge 16395
vapour, effect of CdS photocond. 9992
vapour, electron attachment coeff. 5277
vapour, i.r. absorption, 50-350 μ 6927
vapour, i.r. attenuation 1967
vapour, ionization and elec. breakdown 14961
vapour, mixture with H_2, viscosity at 295°K 16721
vapour, near i.r. absorption bands 14302
vapour, r.f. absorption 12717
vapour, rotational spectrum 4200
vapour, viscosity 16723
water-methanol solution, ultrasonic-wave velocity, rel. to cavitation 19129
water–oil interfaces, oil drop coalescence 14610
wave profiles 8634
waves, diffraction by cylinders 8633
X-ray scattering 7330

Wave mechanics (See Quantum theory).

Waveguides (See Electromagnetic wave propagation, guided waves).

Waves (See also Acoustic waves; Elastic waves; Electromagnetic waves; Liquid waves; Magnetohydrodynamics; Seismic waves; Shock waves).
atmospheric, on spherical earth, finite-amp. 3-dimens. 6830
bending waves, radiation from vibrating plates 19283
Cauchy's problem, solution for plane waves 10595
Cauchy's problem, wave eqn. soln. 822
compressional, rel. to petrol and benzene flame propag. in air 14895
compressional, velocity in marine sand 2200
deflagration, plane, stability 8850
gravitational, null and type III, propagation laws 2100
Huygens' principle, interpretation, appl. to acoustic, elastic and e.m. waves 11048
magnetohydrodynamic, in primeval nebula, ang. momentum transfer 292
magnetohydrodynamic, in waveguides 1200
mechanical impedances, measurement 19249
N-wave, propagating into stratified atmosphere 6829
in nonlinear fields, propagation 10590
nonlinear theory 11037

Waves –contd
pressure and entropy production 8639 [12176
scattering, and microstructure of turbulence in atmos.
simple flow in ducts 948
space-charge waves, in cylindrical plasma 1132
thermal, in He II, diffraction by spherical mirror 2282
wakes behind cylinders 19071 [14364
wave-type solution, of nonlinear parabolic differential eqn.
wavelength, non-dissipative and dissipative media 5077

Waxes
carnauba electrets 6159
carnauba, ouricuri, American montan, dielec. props., -60° to +90°C, var. freq. 18089
electrets, decay 5261
electrets, heterocharge, ionic space-charge layers 18106
paraffin wax–water wetting hysteresis 14615

Weather (See also Meteorology).
No entries this year

Weighing (See also Balances; Mass standards).
conference, 44th Nat. Weights and Meas. (1959) 6720
platform weighbridges, accurate determination of burning rates 6723
recording meter 6724

Wetting (See also Contact angle; Heat of wetting).
fluid saturation of porous media, r.f. measurement method
Ge, with In and In alloys 14066 [19083
spreading coeff. meas. 5003
paraffin wax and water, hysteresis 14615

Wind
diabatic profile, mixing length 6822
ionosphere, E-region 18492
ionosphere, F-region 14240
ionosphere, meas. utilizing radio-star data 21347
ionosphere, wind systems and drift motions 8378
irregularities, at 80-100km, radio echoes study 8368
matter convection in atmosphere 12177
point-discharge current dependence 1116-7
shear, in upper-atmos. turbulence 4788
turbulent transfer, in boundary layer 6827 [18483
upper atmosphere, effect of winds on rotation of satellite
upper atmosphere, meteor trail observation 14390
upper atmosphere, radio study 8367
upper atmosphere, rocket-grenade meas. 14197
upper atmosphere, sodium rocket experiment 21331
vertical distribution, rel. to atmos. density 6440

Wolfram (See Tungsten).

Wood
beams, free flexural vibration 3580
cork–rubber composition, thermal cond. 5204
friction, on steel and PTFE 8137
under rolling cylinder, resistance, directional depend. 13920
temp. meas. probes, for thermal regions 5218

Work function (See also Electron emission).
cathode surface, effect on breakdown of hydrogen 10871
change due to adsorbed molecular layer 5327
effect on sparking potential in H 5329 [5438
Geiger–Müller cathodes, effect on counter-tube perform.
metal, correl. with electron Fermi energy 20766
oxide-coated cathodes, in H 5328 [7152
potential distrib. between two plane emitting electrodes
secondary electron emission in solids 2374
semiconductor thermionic cathodes 19707
Ag, effect of H_2 and CO chemisorption 18452
Au, effect of H_2 and CO chemisorption 18452
Al, during vacuum–air transition 19706
Au, during vacuum–air transition 19706
Au–Ba system, on W 17023
Ba_2WO_4 cathodes 10935
Bi_2Te_3, measurement 13636
Co, effect of H_2 and CO chemisorption 18452
Cu, effect of H_2 and CO chemisorption 18452
CuO, effect of oxide additions 11710
EuB_6 14012
Fe, effect of H_2 and CO chemisorption 18452
Fe, surfaces cleaved in vacuum 2373
GaAs, measurement 13636
Ge, with adsorbed O 9059
Ge, measurement 13636
In films, photoelectric determination 9060
InSb, measurement 13636
Mo, effect of Na and Cs films 9062
Mo, 700-1100°K, effect of surface poisoning 19710
Mo, temp. dependence and meas. technique 9061

Work function – contd
Ni, effect of H and CO chemisorption 18452
Ni, 720-1025°K 19709
Ni, temp. dependence 9063, 19708
Ni films, effect of oxygen 19720
NiO, effect of oxide additions 11710
Ni oxide films, effect of hydrogen 19720
SmB_6 13468
TbB_6, measurement 14020
U, wire and films 3786
UC, on W, 1200-2100°K 12626
W, coated with O and Ba 9064
W, for various crystal faces 15047
ZnO, effect of oxide additions 11710
ZnO, modified, rel. to elec. cond. 11718
Work hardening (See also Cold working; Surface texture).
isotropic media, stress–strain relationships 6321
mild steel, by cyclic stressing at fatigue limit 16241
Al, softening 4562
Al, strain hardening 21114
Al–Cu aged alloys, mechanism of hardening 18265
Al–Cu alloy single crystals 18264
Ag, strain hardening 21114
CdS, effect on absorption spectra at low temp. 18123
Cu, single crystals, by alternating stresses 8124
Cu, strain hardening 21114
Cu–Zn crystals, heat conductivity after strain 20801
LiF crystals, dislocation behaviour 7885

X-ray absorption (See also X-ray spectra).
attenuation coeffs., 10 keV-100MeV 20105 [7329
coeff. of heterogeneous slabs, variation with particle size
mesic X-rays, appl. to muon mass meas. 20172-3
nomogram, for monoenergetic X-rays 5535
relation to mass per unit area 2522
solids, detection with bubble chamber 20104
calcite, temperature distorted 3208
water, bond study 8666
X-ray analysis (See Chemical analysis, X-ray; Crystal structure, atomic; X-ray crystallography).
X-ray crystallography (For results of structure analysis see Crystal structure, atomic)
alloys, ageing, oscillating photogr. 14003 [13981
anisotropic temp. factor, rel. to electron density distrib.
atomic scattering amplitudes, rel. to structure amplitudes
composite diffraction profile analysis 8191 [12025
Compton incoherent scatt. functions for Li, Li^+, Be, Na, Na^+, Al^+, Al^{3+}, K^+, Cl^-, Ca, Ca^+, Ca^{2+} 8196
conferences 8175, 16287
crystal surface, absorption correction 3193
defects, study, effect of emission-line asymmetry 3202
diffraction angle meas., use of centroids of diffraction profiles 8187
diffraction patterns of polycrystals, graphical indexing methods 18339-40
distorted crystals, scattering theory, with and without use of atomic scatt. factors 12022-3
elastically bent crystals, self-adjustment of internal radiation field 1904
energy flow of X-rays in a perfect crystal, theory 8193
extra reflections in spectrochemical analysis, aspects 16296
form factors, crystalline field and spin polarization effects at Fritz Haber Inst. (Germany), review 6351 [20770
incoherent scatt. functions, for N, O, F, Si, Ge atoms and ions 4620
intensities, influence of binding electrons 10300
interfaces and specific surfaces, small-angle scattering, theory 6350
lattice parameters, measurement, effect of Co $K\alpha_1$ asymmetry 3201
line-width variations, det. by achromatic diagrams 8188
organic cpds. similar to Cs_2ZnCl_4 3243
organic molecules, effect of rigid-body and internal vibrations on diffracted intensities 4622
parameter variations, det. by achromatic diagrams 8188
pattern intensity, meas. with GaAs barrier layer cell 3198
phase-transition points, second-order, scattering theory 16299
powder patterns, diffraction maxima intensity, effect of surface relief 8192
powder samples, small-angle intensities from double reflections 4618

X-ray crystallography – contd
projection topographs, for dislocations study 1587
reflections, effect of mag. fields 10301
review, British achievements 13970 [6349
Schultz technique for pole figures, instrumental aberrations
semi-focusing method, with flat polycrystalline sample 3191
stored-energy calculation, from line broadening 20799
thermal expansion, tensor axes determination 13492
thermal motion in crystals and molecules, conference 21153
unit cell parameters, precision meas., with diffractometer
wires, fibrous texture, quantitative method 3284 [13979
diamond 12020
Cs_3Bi, comparison with $CsBi_2$ 14011
Cu, scattering by stacking faults 20794
Cu solid solutions, effect of deformation on pattern 1910
GaAs, single crystal polarity 721
Ge, intensity variations, rel. to elec. cond. 586
Kr, 20-90°K, Debye-Scherrer powder study 9839
NaCl, effect of temp. on Na and Cl displacements 14018
Ni^{2+}, form factor 20789-70
O^{2-}, scattering factor 8197
Zn twinning, accommodation zone 12000
apparatus (See also X-ray monochromators; X-ray spectrometers). [17297
bent crystal spectrometer, aberrations, precision mounting
Buerger precession camera, unidirectional integrating mechanism 8182
camera, axial retigraph 8178
camera, high-vacuum and high-temperature 13972
camera, low-temp., for counter goniometer 4611
camera, microbeam back-reflection 4606
camera, for -190° to +600°C 716
camera, for -175° to +300°C 16291
camera, for up to 270°C 16289
counter diffractometer 8187
cryostat, -190°C, for monocrystals 12015
cryostat and camera, low-temp. 3220
crystal growing device, for use in cameras 8165
diffraction pattern electronic image-intensification 13974
diffractometer, automatic, for single crystals, kinematics of the moving elements 8177
diffractometer, automatically recording, for NaCl structure amplitudes 18350 [21180
diffractometer, controlled atmosphere sample chamber
diffractometer, Geiger 4609
diffractometer, Geiger, for monochromatic radiation 8181
diffractometer, high-speed, use of soft X-ray scintillation counter 13975
diffractometer, high-temp. 4608 [8179
diffractometer, rapid-scanning, design and performance
diffractometer, with system of slits before detector 3193
furnace, for Seifert diffractometer 3192
goniometer, twin head, for diffusely reflected X-rays 8180
graticule, for viewing powder photographs 8186
photographs, influence of protective paper 12014
powder camera, translating device 18336
powder-diffraction apparatus, for high temperatures 4607
precession camera, with two-circle goniometer 3197
recorder, for URS-251 unit and GUR-2 goniometer 16290
recrystallization rates 13945
scintillation counter apparatus, for recording diffraction patterns 12017
scintillation counters, for single-crystal studies 4612
specimen holder, for powder cameras 21181
vacuum furnace 8185
calculation apparatus
magnetic recorder double Fourier series synthesizer 18341
mechanical structure-factor computer 4842
protractor for Laue photographs 4605
calculation methods
amplitude and sign assignments, arbitrary, limitations 12030
camera radius, precise determination from diffraction photographs 13973
composite diffraction profiles, analysis 8191
computer programmes 8202, 18342 [10299
correlation of intersecting layers of X-ray intensity data
crystal orientation, from Laue diagrams 13977
crystallite size, from line width 8189
deformation stacking faults, distance statistics 10304
electron density, generalized Fourier projections 13993
electron density distrib., from Fourier series formula 13994
fitting plane to set of points by least squares 8203
Fourier and least square refinements 10302

X-ray crystallography – contd
calculation methods – contd
Fourier synthesis, sign sequences and structure factors 3213
graphical methods 714, 3218
Guinier–Preston zones, structure analysis by Fourier method 4630
Harker sections, location of true maxima 13997 [16301
harmonic analysis of diffraction line shapes of polycrystals
information theory methods 18337
isotropic temp. factor, equiv. to given anisotropic one 3216
lattice constants of polycrystals 13978
lattice distortion and particle size in polycrystals 6354
lattice sums, tabulated functions 21152
M function tables for hindered rotator, extension 10303
non-centrosymmetric crystals, deconvolution of Patterson function 3215
non-centrosymmetric crystals, modified method of weighted Fourier synthesis 3212
optical diffraction in structure determ. 12036
orientation determination, plane projection and lattice row construction 13998
Patterson function, synthesis for deconvolution 3214-15
Patterson and electron density functions, computer programme 8200 [13925
phase of amplitudes, determination by structure delineation
phase det., method based on variances of individual terms, discussion 6352
phase det., rational dependence and renormalization of structure factors 4621
phase det., superposition method 16300
polarization correction for upper level geometry 10298
programme for powder intensity calc. of synthetic garnets 8226
proteins, structure analysis, accurate det. of position and shape of heavy-atom replacement groups 8249
radial distribution curve formulae, calc. of integrals using strips 13996
refining structure coordinates, electronic computer programme 4623
smearing effects, removal 8190
space group PĪ, regression formulae for E_H 3211
space groups, hexagonal system 13985
on "Strela" (USSR) universal computer, programming 12034
structural analysis, trial-and-error methods 12031
structure amplitudes, cumulative distrib. function to distinguish centrosymmetric structures 6353
structure analysis, electron density projections, generalized bounded 13995 [3211
structure factors, joint distribution, regression formulae
structure factors, computer programme 8201
structure parameters, least-squares analysis, Taylor series approximation for ΔF 8198
unit cell parameters 13979 [8199
vector space, appl. in structure investigation (book)
Weissenberg intensities, correction for angle-factors 6348
structures (See Crystal structure, atomic).
technique
Bi single crystal orientation 6347 [1918
cotton cellulose study, with Geiger counter spectrometer
crystal setting on axial retigraph 8178
fibres, diffraction pattern enhancement by heavy-metal salts 10295
grain size determination, from spotty diffraction rings 6345
line intensity fluctuations, limitation by tube output stabilizer
metals, cold-worked, lattice parameter meas. 4619 [20109
optical transform methods, for klockmannite structure determination 10313
perfection determination, from optical analogy 6346
polarized X-rays, use to study crystal perfection 4615
powder diffraction patterns, high pressure device 3195
powder technique for absorption corrections 4616
precession photographs, film-to-film scaling consts., determination 3200
reciprocal lattice record, extension, by composite precession photograph 10297
single crystal cooling, cryostat for use with liq. H 8184
survey 3614
total external reflection 8344
X-ray diffraction (See also X-ray crystallography; X-ray scattering).
in crystals, energy flow, Fritz Haber Inst. studies, review
double, in Cu–Ge solid soln. 21192 [6351
effect of crystal dislocations 717
X-ray diffraction – contd
macroscopic analogue 8176
metal zone-plate, for focusing 19444
by perfect crystals, energy flow, theory 8193
polarized X-rays, theory confirmed 4615 [18339-40
polycrystal patterns, unified graphical indexing method
by single crystals, at low temp. 8184
spherical waves, dynamic theory, Pendellösung fringes 12021
21 powder patterns 18355
polyethylene 8251
Al–Fe alloys, study of interatomic bonding forces 18399
CdS monocrystals, effect of X-ray intensity and optical illum. 12040-1
CsI, thermal expansion meas. 6026
La silicates, Pb and Pb–Mn activated 13710
$NaNO_3$, thermal expansion meas. 15814
Tb cpds., electronic configuration 1502 [17915
Zn, study of electron transition probability from K-level
X-ray examination of materials (See also Chemical analysis, X-ray; Radiography).
conference 8175
counter-tube goniometer, fine structure determ. 4610
crystallographic aspects of extra reflections 16296
crystals, characteristic temp. det. from spectra intensity 17898
film thickness, using radioisotope-induced X-rays 10630
films, reflection studies of anneal and oxidation 14089
fluorescence analysis, use of Tm^{170} source 8343
fluoroscopy, review 14154
lighter elements, by total external reflection 8344
microscopy and microanalysis, conference 1944
polymers, one-dim. diffraction patterns 16298
projection X-ray microscope 11138 [13972
reactive metals, X-ray camera, high-vacuum, high-temp.
semiconductors, excess carrier decay time meas. 13589
single crystals, plastic deformation study, microbeam methods 18258
anatase–rutile, phase transitions 7895
calcite, distorted 3208
calcite, plastic deformation 21130
diamond, dislocation study of projection topography 17929
ferrospinels, valence and distribution of Mn ions 12051
glass, oxide, containing fluoride ions 21218
graphite, thermal expansion 8291
monazite single crystal, thorium-bearing 3242
Nylon texture 8250
polythene, γ-irradiated, study of action of heat 4681
polyethylene terephthalate fibres, crystallinity meas. 14052
steel, austenitic, macro surface stresses 10254
tinplate, using fluorescent X-rays 8290
Al, observation of dislocations 20804
Al–Cu, Guinier–Preston zones 8266
Al–Fe alloys, study of interatomic bonding forces 18399
Al hydroxide gels 3332
Ag–Cu alloys 14077
$(Ba_{6-2X}R_{2X})(Nb_{8-X}Fe_{1+X})O_{30}$ 11900
C, amorphous, predicted diffraction patterns 6371
CoZn ferrites, ferromag. domains 1804
Fe electrodes, overvoltage and H diffusion through, lattice parameters 8309
Fe thin layers, lattice const. reduction 1798
Ge, dislocations 1902 [20858
Ge, thin layers, deuteron-irradiated, small-angle scattering
Nb_3Al, structure and density 3221
Ni, annealing investigation 21124
Ni–Au, decomposition study 14075-6
NiZn ferrites, constitution determination 16326
Pd electrodes, overvoltage and H diffusion through, lattice parameters 8308
S, plastic, structure 3517 [13538
Si carbide, dislocations undetected by etching techniques
Si oxidation products 1970
$SrSO_4$, spherulitic cryst. aggregates, growth 3180
Te–Se alloys 12077
V single crystals, diffuse streaks on diffr. pattern due to N impurity 8204
W oxides, H reduction 1955
ZnSe–GaAs, existence of cont. series of solid solns. 729
Zr hydrides, δ and ε phases, thermal expansion 15817
liquids
ionic solutions, structure det. 19117
law of corresponding states, cross-section relations 14650
metals, structure 19123

X-ray examination of materials – contd
liquids – contd
molten salts 6778
haemoglobin, in aq. NaCl, small-angle scatt. 19115
perfluoroheptane–i-octane solns., cluster formation 3519
Bi–Pb molten alloys 3521
Hf oxyhalide aq. solns., complex ion structure 14627
K, structure 16692
Na, structure 16692
Na–K alloys, structure 16692
S, structure 3517
Zr oxyhalide aq. solns., complex ion structure 14627
microstructure
crystal distortions, micrographic estimation 10305
fibres, small-angle diffr. patterns 12089
quartz 4628
Al, deformation bands, microbeam study 6393
Be, cracks and heavier element distribution 18417
Cr, extruded, brittle fractures 8130
Ge 4628
Si 4628 [6313
Sn single crystals, Ga-coated, break-up due to adsorption
molecular structure
collagen, low-angle diffraction patterns 14038
keratin, 6 forms 10296
Bi polymer present in Bi perchlorate aq. soln. 4247
X-ray measurement (See also Dosimetry).
beam strength, from 1 MeV electron accelerator 19822
betatron energy scale, control and calibration 7175
$FeSO_4$ solns., Fe^{2+} yields 3324
film method, for checking output of X-ray machines 20110
free-air ionization chamber 5441-2
image intensifier, for diffraction patterns 13974
ionization chamber for X-ray tube output stabilization 20109
iso-dose, automatic plotter 9242 [4982
multiplet densitometry, recording projection micrometer
photocell 5340
pinhole television camera, 1 to 2 r/hr sensitivity 2512
precision quantameter, for high energies 17298
proportional counters, quantum efficiency 2518, 5439
proportional counters, nonlinearity 11139
solar X-radiation, accompanying three 2+ flares 16539
wavelength discrimination, using proportional counter 17299
X-ray monochromators
crystal, higher-order reflection 16296
double crystal, collimated beam 3194
X-ray reflection
in crystals, effect of mag. fields 10301
films, thin solid, annealing and oxidation studies 14089
powder samples, double reflections, small-angle intensities
diamond, (111) face 12020 [4618
LiF crystals, increasing reflection power 8183
X-ray scattering (See also Compton effect; X-ray diffraction).
by alloys, of substitution multicomponent type 8272
amorphous and homogeneous slab, coherent, in direction of primary beam 17294
by cell-model liquid 19116
cubic powders, temp. diffuse scatt. 1920-1
Debye–Waller scatt. factor, det. using Mössbauer effect in Al, Pt, graphite and paraffin 11560
diffuse, crystals containing stiff groups of atoms 4617
diffuse, elastic consts. det. 13983-4
by distorted crystals, theory, with and without use of atomic scatt. factors 12022-3
elastic, near photoelec. threshold 11117 [12028
on electrons, in crystalline fields, outer electron config.
fluctuations, theory 16642
gases, review of results, electron size 1270
gels, with hole structure 718
grid reduction, limitations 2523 [4620
incoherent scatt. functions for N, O, F, Si, Ge atoms and ions
intensity distrib., Compton line width 7717
low-angle, recording technique for time variant scatter specimens 12018
by molecules, semi-stiff chain type, at low angles 11546
mosaic crystals, coherent scattering regions, theory 13982
non-crystalline solids 718
small-angle, from Al hydroxide gels 3332
small-angle, particle-size determination of silica gel 8330
small-angle, pile-irradiated graphite 20857
small-angle, surface meas. of granular materials 21222
Smekal–Raman type 347
spectral distributions 12904

X-ray scattering – contd [12053
silica sol mixtures, at small angles, rel. to particle size
transition metals, electron distribution 515
1-3-5-triphenylbenzene, diffuse scattering 21206
in water, energy and ang. distrib. 7330
Al, atomic scatt. factor, meas. 12026-7
Al, two-phonon scattering 7864
Al alloys, ageing, temp. diffuse scattering 14004
CaF_2 crystal, Compton effect 8195
Cu–Zn alloy, thermal scattering anomalies 16317
Fe, on d- and f- electrons, in crystalline fields, outer electron config. 12028
Fe, scatt. factor for outer electrons in Fe_3Al 1915
KCl–KBr solid solution, diffuse 16323
Na borosilicate glasses, low-angle 10320
Na borosilicate glasses, rel. to light scatt. 16040
Ni, on d- and f- electrons, in crystalline fields, outer electron config. 12028
Ni–Cr alloy, thermal scattering anomalies 16317
Ni–V alloys, thermal scattering anomalies 16317
Pt, ang. distribution 7327
X-ray spectra (See also Chemical analysis, X-ray).
multipole radiation, various forms 19887
Picker Vanguard machine, 140 kVp primary and scattered spectral distrib. 12905
review of techniques, past and present 3952, 9331
scattered X-rays, off beam-axis, spectral distrib. 12904
Zn, Ga, Ge 13469
absorption
absorption edge positions, effect of chemical and physical states 20596 [20105
from Be-window tubes, absorption analysis, data for 4 tubes
K-spectra calc. 7720
"total external reflection" filter 17293
tinplate thickness meas. 8290
A, atomic absorption factor 7720
Au, K absorption edge, effect of spectrometer window 9760
CH_4, K-LL fine structure 17715
Cr–Mo alloys, rel. to composition 1937
Cu, comparison with supercond. CuS 14934
Cu, isolated fringes 13470
Cu alloys 13469
Fe, in antiferromagnetics and ferrites, K-edge 672
Fe, K-edge, temp. dependence 1738
Ga, K absorption spectrum, 17° and -185°C 20733
Hg, K-edge, calc., effect of including Lamb shift 1471
N_2, K-LL fine structure 17715
Ni and Ni–Cu alloy, K-absorption spectra 13471
Ni–Fe alloys, fine structure 518
O_2, K-LL fine structure 17715 [20672
Os complexes, study of charge and type of chem. bonds
Pb, K-edge, rel. to μ-meson mass det. 11559
Pb–Sn alloys, rel. to composition 1937
S, comparison with supercond. CuS 14934
Se, K-edge 20734
Se, theory 6127
Te, theory 6127
Ti, in $BaTiO_3$, fine structure of fund. edge 15809
Ti, in $BaO.TiO_2$, rel. to ferroelec. props. 1739
Ti, K-absorption 20595
V, K-spectrum, in various cpds. 1737
Zn^{2+}, atomic absorption factor 7720
emission
asymmetry, effects in defect crystallography 3202
auroral, balloon observations during IGY 14266-7
auroral, during storm (10-11 Feb. 1958) 8402
β-excited, as energy reference source 3953
continuous, from electron-opaque targets, ang. and energy distrib. 3951
gas discharge 5540
h/e evaluation, from quantum limit 2094
heavy elements, K relative intensities, calc., rel. to retardation 11511
intensity calc. for electron probe microanalyser 14155
K-shell fluorescence yield of several atoms 5851
metals, screening effect 13512
μ-mesic atoms, K yields for light elements, theory, appl. to Li, Be, B 13422
pulsed discharges 5317, 19650
solar corona, Gaunt factor 18779
solar limb, rel. to atmospherics 16542
sparks, electron temp. 9010
sun, centre–limb variation 18742

X-ray spectra - contd
emission - contd
graphite, and Brillouin zone 6007
graphite, and electron states 1545
rare earth elements, Kα lines 481
transition metals, effect of impurities 9764
Ag, L-shell fluorescent yield 15652
Al, K-line, absolute intensity meas. 5876
Al, K-shell fluorescent yield 15651
Al VII, electron temp. 9010
Bi^{83}, L-emission, quadrupole and forbidden lines 20584
Bi, μ-mesic, 2P—1S transition 20567
C, K-lines, absolute intensity meas. 5876
Cl, K-shell fluorescent yield 15652
Co, $Kα_{1,2}$ asymmetry, effect in X-ray crystallography 3201
Cr_2O_3, Kβ' lines 20735
$Cr_2(SO_4)_3.nH_2O$, Kβ' lines 20735
Cu, comparison with superconducting CuS 14934
Cu, $Kα_{1,2}$ asymmetry, effect in X-ray crystallography 3201
Cu, Kα production, 9-15 kV 5878
D, pinched discharge 1140
D, plasma in Scylla 13385-7
Fe, critical potentials 17716
Fe, $Kα_{1,2}$ lines 20735
$Fe(NH_4)_2(SO_4)_2.6H_2O$, Kβ' lines 20735
Fe_2O_3, Kβ' lines 20735
from Gd(n,γ) reaction 11448
K, 40-1000A 20594
Li, K-emission 20732
Li and Li—Mg alloys 20731
Mg, soft $L_{2,3}$ emission 7726
MnO_2, Kβ' lines 20735
$MnSO_4.4H_2O$, Kβ' lines 20735
Ni, K-shell fluorescent yield 15652
P, 3D—2P mesonic lines, rel. to μ-meson mass det. 11559
Pa^{234}, int. conversion coeff., 82 keV transition 15552
Pb, fluorescence in γ-ray scatt., ang. distrib. 13259
Pb, K relative intensities, rel. to retardation 11511
Pb, μ-mesic, 2P—1S transition 20567
Pm^{147}, low-energy photon and electron spectra 20386
Pt, bremsstrahlung, ang. dependence from thick targets 7327
S, comparison with supercond. CuS 14934
Si, Kβ-bands 20639
SiC, Kβ-bands 20639
SiO_2, Kβ-bands 20639
from Sm(n,γ) reaction 11448
Tb^{159}, K-radiation from de-excitation of first exc. state 4035
Th, μ-mesic, 2P—1S transition 20567
Ti 20595
Ti, pure and compounds 20736
Ti cpds. 5889
Tm^{170} source, for fluorescence analysis 8343
$U^{234,238}$, accomp. α-decay 11348
$U^{235,238}$, μ-mesic, 2P—1S transition 20567 [20593
W, bremsstrahl-isochromat, structure of short-wave limit
Zn, and in Zn—Cu alloys, L-spectra 13421
X-ray spectrometers (See also Gamma-ray spectrometers; X-ray crystallography, apparatus).
curved crystal, precision mounting, aberrations 17297
curved crystal, resolving power 9330
curved crystal, for 30-300 keV meas. 9671
curved crystal, transmission type 20584
flow proportional counter, for 30-200A 15327
multichannel Laue spectrometer 3338
proportional counters in coincidence 17131
scanning microanalyser 4761
scintillation counters, for emission study 17296
scintillation NaI spectrometer 17296
with two concave gratings, resolving power calc. 14827
window effects, on K absorption edge of Au 9760
X-ray spectroscopy (See also X-ray crystallography; X-ray diffraction).
dosimetry by film-badges, range extension 19977
emission, conference 18333
fluorescence, conference 8342
fluorescence, review 14154
at high temp. prod. by solar furnaces 14896
review of techniques, past and present 3952, 9331
soft, review of applications to solid state 4272
X-ray tubes
with Be-windows, X-ray spectra analysis, data for 4 tubes
fine-focus, electrode system 348 [20105
X-ray tubes — contd
fine-focus, orientation of mosaic blocks 16288
fine-focus, 40 × 400 μ source 20108
flash tube, 200 joules 20107
flash tube, use for hypersonic air-flow density meas. 19188
flash tube, using low inductance and high vacuum 17295
output stabilization, by ionization chamber 20109
point-focus, for microprojection 7331
in projection microscope 11138
spectral contamination 2524
tele-focus electron gun, applications 2393
X-rays
auroral zone I, balloon observations 14272
beam strength, from 1 MeV electron accelerator 19822
energy reference source, β-excited emission 3953
filtering in ultra-soft region 17293
image intensification 5541, 13974, 19407-8
from interplanetary space 6550
microprojection 7331
microscopy, Ag-activated nitrocellulose as recording material 21254
polarization, by crystal reflection 3190
production during l.p. gas discharge 7084
projection microscope 11138
solar corona, distribution 836
effects (See also Nuclear reactions, photons).
colour film and dosimetry 349
exo-electron emission, from etched metals 15053
photographic sensitivity of plates and films, absolute determination 8815
alkali halides, α and β absorption bands 16064
alkali halides, defect formation, Varley mechanism 9894
alkali halides, F-centre prod. at room and liq. He temp. 6052
alkali-halide phosphors, de-exciting action 1750
alkaline earth halides, colour centres 20837
benzene scintillator solns., luminescence decay times and energy transfer 19159
glass, induced elec. polarization 2926
quartz 16089
α-quartz, colour centre prod. at 77°K 2834
Rochelle salt, anomalous props. 11741
rubber, vulcanization 6419
silica, fused, colour centre prod. at 77°K 2834
water, conductivity changes 19113
AgCl, internal friction 13908
Al aerosols, crystallization 14144
Bi, L_{III} Auger spectrum 9574
CaF, precipitated, thermoluminescence 6210
CdF_2, single crystals 2823
CsBr, F-centre prod. 7894
$FeSO_4$ solns., Fe^{++} yields 3324
K azide crystals, irrad. at liq. N temp., formation of colour centres 8008
KBr, colour centre formation at 10°K 9910
KBr:In, absorption and luminescence spectra 10065
KBr:Tl, colour centres, at low temp. 1596
KCl, colour centre formation at 10°K 9910
KCl, colour centre prod. at 5 and 78°K, effect of plastic deformation 6050
KCl, elec. conductivity 11658
KCl, F-centre formation 15859, 15861-2
KCl, F-centres, growth kinetics 4301
$KClO_3$, V-centres 2825
KI:Tl, colour centres, at low temp. 1596
LiF, "antimorph" of F-centre, electronic structure 6053
LiF, defects, low-temp. annealing 2836
LiF, luminescence spectra, at 77°K 1748-9
Na azide crystals, irradiation at liq. N temp., formation of colour centres 8008
NaCl, coloration and resultant props. 18072
NaCl, expansion and coloration of undoped and doped crystals 2824
NaCl, ionic conductivity fall 1622
NaCl, photocond., heat treated 6142
NaCl, pulverized crystals, electrification 3714
protection (See Radiation protection).
Xenon
afterglows, recombination 2345
atmospheric Xe^{133}, possible fission source 14323
atoms, scatt. of 615 keV electrons 7714
diffusion, in Ag, 500-800°C 15868
diffusion, in H_2 and D_2, 300-700°K 961

Xenon - contd
diffusion phenomena and isotope effects 15620
effect on radiolysis of CO 12108
elec. arcs, a.c., cathode mechanism 16990
elec. arcs, h.p., long discharge 2342
elec. arcs, h.p., modulated, dynamic props. 12599
elec. arcs, h.p., probe studies 16992
elec. arcs, h.p., wall stabilized 1107
elec. arcs, temp., spectral meas. 19520
elec. breakdown, 2800 Mc/s 253
elec. discharge, h.p., transparency 9011
elec. discharge, s.h.f., mean frequency of ionization by electrons 15029 [13388
electron orbit angular momentum, distrib., pressure depend.
electron stopping power 352
flash source, intensity meas. 8789
force parameters, calc. using exp 6-8 model 1515
ionization, double, by electrons 2317
ionization, multiple, by electrons 2318, 7070
ionization, relativistic increase 1099
ions, ionization of inert gases 12578
isotope enrichment, by thermal diffusion 4126
isotopic composition in Richardton meteorite 4041, 14405
mixtures with A, bands in cathode glow of discharge 7766
mixtures with A and H, binary and ternary, thermal cond.
mixtures with A and He, mutual diffusion 8702 [5054
mixtures with A and Kr, h.v. discharge, visible band spectrum 4182
mixtures with inert gases, thermal cond. 104
mixtures with O_2, excitation of spectra by electrons 15657
power reactor buildup, absorbed radioactivity calc. using sliderule 9723
scattering of electrons and positrons, 7-17 MeV 5764
scintillator, used at 75 atm. 15190
solid, absorption spectrum, vac. u.v., at 4.2°K 13699
solid, environmental perturbations on foreign atoms and molecules 20661
solutions in Kr, solid and liquid 8846
spark discharges, high-temp. prod. 7105
stroboscopic flash source 10778
thermal diffusion, at tracer concentrations, in other gases
viscosity, meas. 16723 [8696
Xe^{129}, diffusion in ThO_2 15874
Xe^{133}, diffusion in U oxides 1607
Xe_2, excitation by shock waves, u.v. and visible emission 15728-9
Xe^{2+}, resonance charge exchange 8999

Ytterbium
elec. resistivity, 1.3-300°K 6080 [11938
paramag. resonance and optical spectra of Yb^{3+} in CaF_2
Ytterbium compounds. (See also Alloys).
Yb garnet gallates, Yb g-factor anisotropy 10189
Yb garnets, paramag. resonance 10239
YbFe garnet, absorption and reflectivity 10045
YbFe garnet, ferromag. resonance, theory 1820
$Yb_3Fe_5O_{12}$, containing rare earths, mag. props. 4517
$Yb_3Fe_5O_{12}$, e.s.r. observation 4516
$Yb_3Ga_5O_{12}$, containing rare earths, mag. props. 4517
$Yb_3Ga_5O_{12}$, e.s.r. observation 4516
Yttrium
single crystals, elastic constants, 4.2-400°K 8104
single crystals, elec. resistivity, 1.3-300°K 2843
Y^{89} hyperfine structure by atomic beam resonance 1484-5
Yttrium compounds (See also Alloys).
ferrite, ferromagnetic resonance 6251
garnet, ferromagnetic resonance 10208 [13827
garnets, mag. props. of Al, Ga and Cr substituted ferrites
garnet, magnetoacoustic resonance 3090
garnet, substituted, effect of porosity on absorption width 8076
halides, molecular structure 15774
hexaboride, preparation, structure and props. 1879
$(5-x)Fe_2O_3.xAl_2O_3.3Y_2O_3$, variation of absorption line-width and g-factor 13859
YB, powder, emissivity 16919
YFe garnet, adiabatic demagnetization and spec. heat mag. field depend. at 1.45°K 16143
YFe garnets, with Al^{3+} and Cr^{3+}, magnetic props. 13835
YFe garnets, dipolar ferrite modes 9188
YFe garnet disk in microwave cavity 2448
YFe garnet, disks, ferrimag. reson. 9187

Yttrium compounds - contd
YFe garnet, divalent iron substitution 13836
YFe garnet, domain structure 16141
YFe garnet, electron spin relaxation 6258
YFe garnet, ferromag. relaxation mechanism for M_s 10200
YFe garnet, ferrimag. res. saturation effects 10205
YFe garnets, ferromagnetic resonance 10197
YFe garnet, ferromag. resonance, effect of surface of crystal 10195
YFe garnets, ferromag. reson., temp. depend. 11929
YFe garnet, ferromag. resonance, theory of giant anisotropy anomalies 6252
YFe garnets, high-permeability 21056
YFe garnets, i.r. absorption of silicate ion 2941
YFe garnet, impurity-doped, ferrimag. resonance 10211
YFe garnet, interaction of photons and spin waves 18210
YFe garnet, magnetic annealing 3091
YFe garnet, magnetic lag effects 3092
YFe garnet, mag. res. instability in crystal spheres 10210
YFe garnets, method for growth 10286
YFe garnet, microwave magnetic and dielectric props. 11896
YFe garnets, with Nd, prep. and saturation magnetization 21057
YFe garnets in pulsed mag. fields, resonance expts. 10177
YFe garnet, rare-earth doped, ferrimag. resonance 18211
YFe garnet, size effects on ferrimag. resonance absorption absorption 21066
YFe garnet spheres, ferrimag. res. line width 3122
YFe garnet spheres, magnetoacoustic resonance 3862
YFe garnet spin-wave relaxation in ferromag. resonance 3113
YFe garnet, Sn-substituted, canted spin arrangements 1779
YFe garnet, specific heat at low temps. 9855
YFe and YGa garnets, method for growth 10286
YFe—GdFe garnets, mag. moments and lattice consts. 3089
$Y_3Fe_2Fe_3O_{12}$—$Ca_3Fe_2Sn_3O_{12}$, crystal chemistry and mag. props. 6359
$Y_3Fe_5O_{12}$ containing rare earths, e.s.r. study 4516
$Y_3Fe_5O_{12}$ containing rare earths, mag. props. 4517
$Y_3Fe_5O_{12}$, crystal growing 13953
$Y_3Fe_5O_{12}$, Faraday effect at 1-9μ 13677
$Y_3Fe_5O_{12}$, ferromagnetic resonance 6251
$Y_3Fe_5O_{12}$, garnet structure, u.h.f. props. 6243
YGa garnet, Fe^{3+} ground-state cubic crystal field splitting parameter, sign 1824
YGa garnets, method for growth 10286
$Y_3Ga_5O_{12}$ containing 1% Yb^{3+}, e.s.r. obs. 4516
YGd garnet, ferromagnetic resonance 10208
YHo garnet, ferromagnetic resonance 10208
Y_2O_3, work function 19707
$(3-x)Y_2O_3.xGd_2O_3.5Fe_2O_3$, initial permeabilities 10137
$(3-x)Y_2O_3.xSm_2O_3.5Fe_2O_3$, lattice constants, mag. props. 10136

Zeeman effect
ground-state sublevels, r.f. perturbing field 464
paramag. atoms in crystalline fields, splittings, calc. 4418
p-dibromobenzene, quadrupole resonance 8094
Ca II, in solar flare spectra, mag. field study 18759
CdS fluorescence spectra, 4.2°K 1745
Cl_2, mult. quadrupole, recording r.f. spectrometer 17123
Cl^{35}, n.m.r., det. of upper limit for anisotropy of inertial mass 10561
Cr^{3+} in Al_2O_3, theory and exper. 645-6
Dy crystalline salts, 58° and 4.2°K 16054
Eu bromate, visible spectrum 648
$EuCl_3.6H_2O$, visible spectrum 649
Ge:Cu, i.r., at low temp. 18124
Ge:Zn, i.r., at low temp. 18124
H_2, r.f., metastable electronic state established 20645
He 476
Na, transition frequency and probability 464
Na I, in solar flare spectra, mag. field study 18759
Nd salts, energy level assignments 7686
O, rotational fine structure 3869
Os I, II 20568
Ru I, 207 lines, 0.24-0.54μ 7730
Si, impurity levels 11765
Tb 17714
Y^{89}, h.f.s. splittings 1484-5

Zeta-potential
oil droplets, in surface-active agent solutions 19605

Zinc
absorption spectrum, i.r., and Zeeman effect, as impurity in Ge 18124 [16239-40
amalgamated monocrystals, crack growth and fracture
brittle fracture, effect of surface impurities 6316
brittle rupture 689
crack formation, during plastic deformation 688
creep and viscosity of monocrystals, in air and under Sn layer 6311
crystal growth, large single crystals 8164
crystal growth, simple method 3174
crystals, etching with 8 keV A ions 8173
diffusion, in Cu, grain-boundary and lattice mechanism 1602
diffusion, in Cu_2O, microstructure effects 11640
diffusion, in GaAs 9918
diffusion, in InSb 9920
dislocation etch pits 20819
dislocation relaxation, in single crystals 17944
dislocations, etch study 713
dislocations, motion in whiskers and platelets 20808
electron transition probabilities, to Brillouin zones 17915
electronic structure, calc. 9888
equations of state, at high pressure 11549
etch figures 18331
etch pits 556 [13581-2
Ettingshausen–Nernst effect, 4.2°K, effect of pressure
exo-electron emission 2383, 10937
films, electron probe meas. 10336
galvanomagnetic effects, isothermal, at low temp. 9944
galvanomagnetic and thermomagnetic potentials at liquid He temp. 13561
as Geiger–Müller cathode, work function 5438
gettering effect on Si p–n junctions 18032
liquid, self-diffusion, temp. depend. 5008 [1773
magnetic props., effect of elastic deformations, low temp.
mech. and phys. props., effect of cyclic heat treatment 4569
mechanical strength, of monocrystals, effect of Ga coating 1871
mechanical strength, variation with time and temp. 21149
optical props. of surface, effect of oxide 9075 [13909
plastic deformation, crystal fragmentation and twinning
polycrystals, grain boundary and lattice diffusion 7901
properties and structure, changes at 120 and 180°C 13496
shock wave propag. 12453 [13547
slip, multiple, active basal and pyramidal slip systems
sp. ht., in normal and supercond. states 8947
stacking faults 7887
structure distortions 7879
superconducting state, structure at critical temp. 18337
twinned, accommodation zone, X-ray diffract. study 12000
twinned, pits prod. by vacuum thermal etching 16286
twinned layers, load depend. 13936 [11576
u.s. absorption, 17-70 Mc/s, in mag. field, liq. He temp.
vapour, mag. resonance of excited atomic levels 13880
vapour mixture with Hg, elec. discharges with negative optical absorption 19360
X-ray spectra, L-spectra, in Cu–Zn alloys 13421
X-ray spectrographic study 13469
Zn II free ions, mag. dipole resonance 2715
Zn^{2+}, X-ray K-spectrum 7720
Zn:Cd, elongated cells, dislocation densities 11620 [18303
Zn:Cd, Zn:Cu, fibrous substructure, effect of impurities

Zinc compounds (See also Alloys).
binary phosphate glasses, properties 21216
"Electrofax", properties, review 4387-8
ferrites, Cu substitution, heat capacity, Néel temp. 4498
ternary carbides, with Ni, Co, Fe, Mn 16324
NiZn ferrites, Fe-rich, "perminvar" effect 10175
NiZn ferrites, Hall effect and semicond. props. 7935
NiZn ferrites, solubility of ferric oxide 21232
NiZn ferrites, Young's mod. and internal friction 11971
$ZnAl_2O_4$, Mn^{2+} e.s.r. 3131
$ZnBr_2$, electrolytic enrichment with Br^{79} 11495
(Zn,Cd,Hg)S, electroluminescence 16114
(Zn,Cd)S, Ag and Cu activated, optical props. 6161
(Zn,Cd)S, complex dielectric permeability meas. 10010
(Zn,Cd)S, photodielec. props., powder layers 6158
(Zn,Cd)S, temp. depend. of luminescence 1062
(Zn,Cd)S:Ag, luminescence, rel. to CdS concn. 2959
(Zn,Cd)S:Ag, luminescence efficiency 16091

Zinc compounds - contd
(Zn,Cd)S:Au, fluorescence 16096
(Zn,Cd)S:Cu, candoluminescence and luminescence 10052
(Zn,Cd)S:Cu,Cl, preparation and electroluminescence 16110
(Zn,Cd)S:Mn, α-ray luminescence, in a.c. and d.c. fields
(Zn,Cd)Se, photocond., spectral response 15996 [18148
$ZnCl_2$, α-and β-phases, structure 1908
$ZnCl_2$, glass-forming, liquid structure 14626
$Zn_{0.95}Cu_{0.05}K_2(SO_4)_2.6H_2O$, e.s.r. spectrum 4510
ZnF_2, e.s.r. of Mn^{2+} impurity, F^{19} super-h.f.s. 6272
ZnF_2, e.s.r. of Ni^{2+}, V^{2+} and Cr^{2+} 10233
ZnF_2:Mn, crystal growth 21163
Zn halide films, rapid prep. 14081
(Zn,Hg)S, electroluminescence 16114
$ZnMn_2O_3$, refined structure calc., computer programme
ZnO, absorption edge, press. depend. 4408 [4623
ZnO, action of 2-10 kV electrons 1162
ZnO, adsorption rates of CO 752
ZnO, α-scintillations, low temp. depend. 10078
ZnO, chemisorption of O_2, effect of u.v. irrad., rel. to model as n-type semiconductor 8303
ZnO, dielec. const. 7973
ZnO, effect of light on contact potential 1626
ZnO, electrical cond. 2849
ZnO, elec. cond., pressure depend. 6085
ZnO, electrodes, charge and potential distributions 13618
ZnO, electroluminescence, effect of u.v. and gas adsorption 16116
ZnO, H_2 chemisorption, temp. dependence 750
ZnO, i.r. absorption, 1-13 μ 2945
ZnO, i.r. absorption and electrical conductivity 654
ZnO, i.r. reflection spectrum 11767
ZnO, i.r. spectrum and adsorption of CO_2 8002
ZnO, luminescence due to 9 kV electrons 6202
ZnO, luminescence, edge emission, tight binding model 2956
ZnO, modified by Na_2O, Li_2O, $ZnSO_4$, ThO_2, elec. cond. and work function 11718 [11606
ZnO, optical experiments demonstrating exciton existence
ZnO, photocond., O photodesorption study, temp. depend. 18074
ZnO, photo-e.m.f., sensitized with chlorophyll and analogues
ZnO, piezoelectricity and conductivity 16027 [1676
ZnO, single crystals, fluorescence, polarization 11782-3
ZnO, work function, effect of oxide additions 11710
ZnO, X-irradiated, electron emission 2375
ZnO, xerographic, reciprocity failure 6956
ZnO, Zn diffusion, elec. cond. 569
ZnO:Se, photo- and cathodoluminescence, effect of Cu, Fe, Ni impurities 21008
ZnO:Zn, luminescence, H_2^+ excited, decay times 1755
Zn oxide and rubber mixtures, permittivity 6151
Zn oxide, Mn-activated, red luminescence 10068
Zn oxide, red luminescence 10068
Zn oxide spheres, sintering, in air, O_2, H_2, He 1958
ZnS, absorption edge, press. depend. 4408
ZnS, absorption spectra of crystals 13700
ZnS, absorption spectrum 10048
ZnS, activated, electroluminescence at low voltages 1765
ZnS, Ag and Cu activated, optical props. 6161
ZnS, band structure, symmetry props. 11783
ZnS, crystal formation from powder 21165
ZnS, Cu and Mn activated, d.c.–a.c. excitation, electroluminescence brightness waves 16112
ZnS, Cu and Mn activated, electroluminescence, total luminance 16111
ZnS, diffusion of activators in luminescence 655
ZnS, e.s.r. and optical absorption of Fe^{2+} in 10229
ZnS, electrets, effect of elec. fields and temp. 16092
ZnS, electroluminescence and crystal structure 4454
ZnS, electroluminescence, effect of ultrasound 18152
ZnS, electroluminescence, efficiency, theory 2968
ZnS, electroluminescence theory, electron tunnelling and recomb. 4463
ZnS, energy bands in zincblende, wurtzite and mixed crystal structures, by LCAO method 1541
ZnS, evap. films, ageing effects 3638
ZnS, films, adhesion to glass and silica, effect of oil vapour contamination 14087
ZnS, films, dielec. props., Al/ZnS/Al sandwiches 16007
ZnS, films, electron bombard., enhanced elec. cond. 15968
ZnS, fluorescence, self- and Cu- activated 13716
ZnS, growth from the melt 8163

Zinc compounds - contd
ZnS, hexagonal crystals, phys. props. 1880
ZnS, lattice vibrations, sp. ht., short-range and long-range force models 7847
ZnS, luminescence, edge emission, tight binding model 2956
ZnS, luminescence, spectral composition, temp. depend. 11780
ZnS, luminescent efficiency, thin layers 2963
ZnS, Ni and Co activated, electroluminescence 2965
ZnS, outer field emission 261
ZnS, phosphors activated with rare earth metals 1767
ZnS, phosphors with Ag, Cu, Au activators, Al, Sc, Ga coactivators 13717
ZnS, phosphors, conversion of heat into light 10049
ZnS, phosphors, deep trapping 6197
ZnS, phosphors, disorder phenomenon 18151
ZnS, phosphors, electroluminescence mechanism and efficiency 11794
ZnS, phosphors, electroluminescence, voltage depend., particle distrib. 2967
ZnS, phosphors, i.r. stimulation 11786 [18139
ZnS, phosphors, i.r. and u.v. excited, trapped electrons
ZnS, phosphors, infrared quenching 16097
ZnS, phosphors, opt. and elec. props. 10084
ZnS, phosphors, self-activated, luminescent centre 2951
ZnS, photodielec. props., powder layers 6158
ZnS, photocurrents and photovoltages, effect of polarized light 2907
ZnS, photoelectret state 13661
ZnS, photoelectret state and luminescent afterglow 10023
ZnS, powders, a.c. properties 13722
ZnS, pyroelectric effect in cubic structure 13663
ZnS, single crystals, fluorescence, polarization 11782-3
ZnS, single crystals, growth and heat treatment 10287
ZnS, single crystals, high-voltage photoelectric effect 15995
ZnS, single crystals, polarization of luminescence 16093
ZnS, synthetic, bombardment conductivity 18055
ZnS and (Zn,Fe)S, lattice spacing 10316
ZnS:Ag, α-scintillations, low temp. depend. 10078
ZnS:Ag, c.r.t. screens 18149
ZnS:Ag, luminescence efficiency 16091
ZnS:Ag, luminescence decay props. for α and γ-ray excitation 21009
ZnS:Ag, ZnS:Ag,Ni, luminescence rise and decay 659
ZnS:Ag,In, luminescence, effect of CdS addition 11784
ZnS:Ag:$MgCl_2$, thermoluminescence and temp. quenching 4461
ZnS:Ag:Mn, luminescence rel. to electron or optical excitation intensity 21010
ZnS:Cu, containing Nd or Eu, electroluminescence and photoluminescence 6206
ZnS:Cu, electroluminescence 1764, 10080
ZnS:Cu, electroluminescence, effect of u.v. irradiation 2964
ZnS:Cu, electroluminescence, temp. and freq. depend. 4462
ZnS:Cu, electroluminescent panels 10085
ZnS:Cu, i.r. emission 11781 [626
ZnS:Cu, photodielectric effect, addition of Co as "killer"
ZnS:Cu, theory versus exper. 1757
ZnS:Cu, thermoluminescence 6209
ZnS:Cu, u.v. excited luminescence, sample temp. 16095
ZnS:Cu and ZnS:Cu:Mn, electroluminescence 10082
ZnS:(Cu,Ag or Al), crystalline transformations 11998
ZnS:Cu,Al, action of elec. fields 4428
ZnS:Cu,Al, electroluminescence, polarization 16109
ZnS:Cu,Cl, preparation and electroluminescence 16110
ZnS:Cu:Cl, pulse excitation 10086
ZnS:Cu:Cl, thermoluminescence 4464
ZnS:Cu,In, luminescence, effect of CdS addition 11784
ZnS:Cu,Mn, electroluminescence 10082-3 [10081
ZnS:Cu,Mn, electroluminescence, d.c. and a.c. excitation
ZnS:Cu,Mn,Al, electroluminescence 6207
ZnS:Cu,Pb, electroluminescence, rectangular pulse excitation, mechanism 21015 [21017
ZnS:Cu,Pb, electroluminescence, time-dependent spectra
ZnS:Cu,Pb, optical flash, energy of thermal activation 10089
ZnS:Cu(Pb,Cl), pulse excitation 10086
ZnS:Cu,S,Zn, luminescence, H_2^+ excited, decay times 1755
ZnS:Gd, photoconductivity, paramag. resonance detection of trapping 11729
ZnS—MgF_2, in optical filters, band transmission 6912
ZnS:Mn, effect of i.r. illumination 10069
ZnS:Mn, energy level structure, transitions 8027
ZnS:Mn, luminescence, effect of i.r. radiation 16090
ZnS:Mn, luminescence, rel. to electron or optical excitation intensity 21010
ZnS:Mn, phosphorescence decay 18145
ZnS:Mn, photo-, thermo- and electroluminescence, temp. depend. 16115 [16094
ZnS:Mn, sublimated, effect of temp. on photoluminescence
ZnS:Mn, sublimated, electroluminescence 11792
ZnS:Mn, thermoluminescence and localization levels 16118
ZnS:Mn, trapping levels 4455
ZnS:Mn,Cu, pulsed square-wave excitation 11793
ZnS:Mn,Ni,Cl, luminescence, electron excited 16108
ZnS:V, 2μ fluorescence, excitation spectra 13715
Zn(S,O):Cu,Cl, pulsed square-wave excitation 11793
ZnSb, diffusion of Fe and Cd 6056
ZnSb, semicond. props. 15967
β-Zn_3Sb_2, unit cell 6379
ZnSe, absorption edge, press. depend. 4408
ZnSe, growth from the melt, prep. and props. 8163
ZnSe, opt. and photoelec. props. 13671
ZnSe—GaAs, solid solns. 729
ZnSe:V, 2μ fluorescence, excitation spectra 13715
$ZnSiF_6.6H_2O$, paramag. resonance of Mn^{2+} in 18220
$ZnSiO_3$:Mn^{2+}, luminescence 4453
Zn_2SiO_4:Mn, c.r.t. screens 18149
Zn_2SiO_4:Mn, coated with Al, cathodoluminescence 11789
Zn silicate phosphors, in fluorescent lamps, surface chemical props. 11779
$ZnSnAs_2$, crystal structure 8224
Zn sulphides, electron trap centre distrib. 13721
ZnTe, absorption edge, press. depend. 4408
ZnTe, opt. and photoelec. props. 13671
$ZnWO_4$, growth of single crystals for e.s.r. studies 6265
$ZnWO_4$, luminescence decay time, ion excitation 1756

Zirconium
α-particle range in, 4.5 MeV 9446
arc zone melting, purification 8169
β-α transformation, habit planes and orientation 16312
corrosion in HBr, effect of α-rays 12100
elastic constants and spec. heat, 14-300°K 21103
equations of state, at high pressure 11549
H_2 sorption, at low pressures 6427
lattice stability, b.c.c. and h.c.p. modifications, free energy difference 15800
magnetoelectric props., 4.2-78°K, up to 27 kOe 11661
in molten U, diffusion 3515
reaction kinetics, in dry air, at high temps. 12102 [8280
shock wave propag. 12453
thin films, evaporation and deposition for tritium targets
zone melted, elec. cond. at liq. H and liq. N temp. 562

Zirconium compounds (See also Alloys).
zirconates, dielectric props. 13645
zirconia, neutron and fission fragment damage 2622
Zr_4Al_3, crystal structure 4631
Zr_5Al_3, crystal structure 3223
Zr anodic oxide films, u.v. absorption 4412
ZrB_2, anisotropic thermal vibrations 13488
ZrB_2, powder, emissivity 16919
$ZrBe_9$, preparation and structure 724
Zr_2Be_{17}, preparation and structure 724
ZrC, lattice constant 10315
$(ZrC)_{0.2}(UC)_{0.2}$, anomalous thermionic emission 17027
Zr—H systems, X-ray structural phase anal. 14024
Zr hydride, scattering of neutrons 12940
Zr hydrides, elec. resistivity, 1.2-400°K, optical mode scattering contribution 15884
Zr hydrides, thermal expansion of δ and ε phases, by X-ray diffr. 15817
ZrO_2, crystal structure 3225
ZrO_2, with MgO and other oxides, elec. cond. 4321
ZrO_2, solid solns., irradiation induced phase transformations 21211
ZrO_2, work function 19707
ZrO_2—UO—ThO_2 system, structures 8229
Zr oxyhalide aq. solns., complex ion structure 14627

Zodiacal light
connection with asteroids and periodic comets 18721
1957 observation in Egypt 18722
spectrum 3414

Zone melting and refining
analogue apparatus 18316
automatic refining apparatus 16272

Zone melting and refining — contd
by electron bombardment, apparatus 4592
organic materials, 3 refiners 6329
pyrolytic coating, for quartz and ceramic vessel, toluene in N_2 21167 [12534
temp. distribution, analogies from liquid drawing of wire
terminal zone cropping 8168
zone levelled ingots, impurity distrib. 10288
Al, soundness of lattice of recrystallized metal 6355
As_2SeTe_2, electrical cond. of vitreous material and crystals 15944
B 707
$BaTiO_3$-type ferroelectrics 709
Cu, apparatus 8170
Fe, damping effects due to directional ordering 10167
GaAs, floating-zone refining apparatus 18317
GaAs, horizontal melting 8166
GaSb—InSb 730
Ge, single crystals, uniform impurity distrib. 13944
$HgIn_2Te_4$, purification 565
InSb 1669
KBr and KCl 8167
Sb_2Se_3, single crystal prep. 620

Zone melting and refining — contd
Se, Sn distrib. 13942
Si, by electron bombardment 706
Si, high-purity crystal growth 16268
Si, p-type, zone levelling 6330
Si, single crystals, uniform impurity distrib. 13944
Sn, with vacuum heat treatment 13962
Te, elec. resistance purity test 13963
ThSe, p-type single crystals, preparation 18054
U, Zr, and Th, purification by arc zone melting 8169
Zr, elec. cond. at liq. H and liq. N temp. 562

Zoology
cats, hearing thresholds 6505
cats, physiological nystagmus 3384
frogs, electroretinogram, effect of prep. and electrode placement 14357
frogs, standing potential in eye 8456
guinea pigs, bone conduction in ears 2046
hummingbird feathers, irridescent colours 16870
mice, blood flow velocity 12217
rodents, effect of noise stress 806-7
steer, entoptic scatter as function of wavelength 8454

LIST OF SUBJECT INDEX HEADINGS

The headings used in the Alphabetical Subject Index are listed below. The headings are grouped into sections on the same basis as the arrangements of the abstracts in the monthly issues of Physics Abstracts. Each section lists the headings which concern its subject and it follows that many of the headings are listed in several places.

An introduction to the Subject Index will be found on page 2487.

MATHEMATICS

MATERIALS

The chemical elements are listed by names, followed by their compounds. Organic compounds are grouped under the heading "Organic compounds". In addition, there are also the following special substance headings:

Alkali metals
Alkali metal compounds
Alkaline earth metals
Alkaline earth compounds
Alloys
Inert gases
Rare earth metals
Rare earth compounds

Deuterium
Tritium
Air
Ozone
Liquid helium
Ice
Steam
Water

SCIENCE ABSTRACTS: SECTION A AUTHOR INDEX NUMBER

PHYSICS ABSTRACTS

Published by The Institution of Electrical Engineers

AUTHOR INDEX 1960

AUTHOR INDEX

For the sake of simplicity and uniformity, all names beginning with articles or prepositions are listed as if written as single words, regardless of nationality (e.g. Van Vleck is listed as if written Vanvleck). Cross-references are included in appropriate places. Compound names are generally listed under the last component, unless hyphenated; exceptions to this rule are appropriately cross-referenced.

All names are reproduced in the abstracts and the index with the same spelling as in the original articles; in the case of articles printed in Cyrillic characters, a letter-by-letter transliteration is given, in accordance with the scheme given at the beginning of this volume of "Science Abstracts". Russian authors' names may appear in Latin-alphabet publications in various forms, due to the use of different transliteration schemes; these names are reproduced as printed in the articles abstracted.

In anticipation of reprinting the entries in future cumulative indexes, the Abstract Number given with each entry below incorporates the final digit of the year of publication in "Science Abstracts". The headline at the top of each page supplies the remaining digits to complete the year (1960), and indicates the section (Physics Abstracts). Thus "0=1234" in this index means "Abstract 1234 in the 1960 volume of Physics Abstracts".
